For your information

Main Owner’s Manual

Please note that this manual applies to all models and explains all equipment, including options. Therefore, you may find some explanations for equipment not installed on your vehicle.

All specifications provided in this manual are current at the time of printing. However, because of the Lexus policy of continual product improvement, we reserve the right to make changes at any time without notice.

Depending on specifications, the vehicle shown in the illustration may differ from your vehicle in terms of color and equipment.

Accessories, spare parts and modification of your Lexus

A wide variety of non-genuine spare parts and accessories for Lexus vehicles are currently available in the market. You should know that Toyota does not warrant these products and is not responsible for their performance, repair, or replacement, or for any damage they may cause to, or adverse effect they may have on, your Lexus vehicle.

This vehicle should not be modified with non-genuine Lexus products. Modification with non-genuine Lexus products could affect its performance, safety or durability, and may even violate governmental regulations. In addition, damage or performance problems resulting from the modification may not be covered under warranty.

Installation of a mobile two-way radio system

As the installation of a mobile two-way radio system in your vehicle could affect electronic systems such as the multiport fuel injection system/sequential multiport fuel injection system, cruise control system, vehicle dynamics integrated management, SRS airbag system and seat belt pretensioner system, be sure to check with your Lexus dealer for precautionary measures or special instructions regarding installation.
Scraping of your Lexus

The SRS airbag and seat belt pretensioner devices in your Lexus contain explosive chemicals. If the vehicle is scrapped with the airbags and seat belt pretensioners left as they are, this may cause an accident such as fire. Be sure to have the systems of the SRS airbag and seat belt pretensioner removed and disposed of by a qualified service shop or by your Lexus dealer before you scrap your vehicle.

Perchlorate Material

Special handling may apply, See www.dtsc.ca.gov/hazardouswaste/perchlorate.

Your vehicle has components that may contain perchlorate. These components may include airbag, seat belt pretensioners, and wireless remote control batteries.

CAUTION

■ General precautions while driving

Driving under the influence: Never drive your vehicle when under the influence of alcohol or drugs that have impaired your ability to operate your vehicle. Alcohol and certain drugs delay reaction time, impair judgment and reduce coordination, which could lead to an accident that will hurt or kill you, your occupants or others.

Defensive driving: Always drive defensively. Anticipate mistakes that other drivers or pedestrians might make and be ready to avoid accidents.

Driver distraction: Always give your full attention to driving. Anything that distracts the driver, such as adjusting controls, talking on a cellular phone or reading can result in a collision with resulting death or serious injury to you, your occupants or others.

■ General precautions regarding children’s safety

Never leave children unattended in the vehicle, and never allow children to have or use the key.

Children may be able to start the vehicle or shift the vehicle into neutral. There is also a danger that children may injure themselves by playing with the cigarette lighter, the windows, the moon roof, or other features of the vehicle. In addition, heat build-up or extremely cold temperatures inside the vehicle can be fatal to children.

1-1. Key information

Keys

The following keys are provided with the vehicle.

1 Electronic keys
   • Operating the smart access system with push-button start (→P. 22)
   • Operating the wireless remote control function (→P. 34)
2 Mechanical keys
3 Key number plate

Using the mechanical key

Take out the mechanical key.

After using the mechanical key, store it in the electronic key. Carry the mechanical key together with the electronic key. If the electronic key battery is depleted or the smart access system with push-button start does not operate properly, you will need the mechanical key.

When required to leave a key to the vehicle with a parking attendant

Turn the trunk opener main switch OFF and lock the glove box as circumstances demand. (→P. 42, 341)

Remove the mechanical key for your own use and provide the attendant with the electronic key only.
■ Key number plate

Keep the plate in a safe place such as your wallet, not in the vehicle. In the event that a mechanical key is lost, a new key can be made at your Lexus dealer using the key number plate. (→P.525)

⚠️ NOTICE

■ To prevent key damage

● Do not disassemble the electronic key.
● Do not subject the keys to strong shocks, expose them to high temperatures by placing them in direct sunlight, or get them wet.
● Do not expose the keys to electromagnetic materials or attach any material that blocks electromagnetic waves to the key surface.
1-2. Opening, closing and locking the doors and trunk

Smart access system with push-button start

The following operations can be performed simply by carrying the electronic key on your person, for example in your pocket.
(The driver should always carry the electronic key.)

1. Locks and unlocks the doors (→ P. 23)
2. Unlocks the trunk (→ P. 23)
3. Starts and stops the engine (→ P. 121)
1-2. Opening, closing and locking the doors and trunk

### Locking and unlocking the doors

Press the lock button to lock the door.

Grip the handle to unlock the door.

Make sure to touch the sensor on the back of the handle. The door cannot be unlocked for 3 seconds after the door is locked.

### Unlocking the trunk

Press the button to unlock the trunk.
Antenna location and effective range

Antenna location

1. Antennas outside cabin
2. Antennas inside cabin
3. Antenna inside trunk
4. Antenna outside trunk
Effective range (areas within which the electronic key is detected)

- **When locking or unlocking the doors**
  The system can be operated when the electronic key is within about 2.3 ft. (70 cm) of an outside door handle. (Only the doors detecting the key can be operated.)

- **When unlocking the trunk**
  The system can be operated when the electronic key is within about 2.3 ft. (70 cm) of the trunk release button.

- **When starting the engine or changing modes**
  The system can be operated when the electronic key is inside the vehicle.
1-2. Opening, closing and locking the doors and trunk

■ Operation signals
  ● Doors: A buzzer sounds and the emergency flashers flash to indicate that the doors have been locked/unlocked. (Locked: Once; Unlocked: Twice)
  ● Windows and moon roof: A buzzer sounds when the windows and moon roof begin to close.

■ Door lock buzzer
  If a door is not fully closed, a buzzer sounds continuously if an attempt to lock the door is made. Fully close the door to stop the buzzer, and lock the vehicle once more.

■ Conditions affecting operation
  The smart access system with push-button start uses weak radio waves. In the following situations, the communication between key and vehicle may be affected, preventing the smart access system with push-button start and wireless remote control from operating properly. (Way of coping: → P. 526)
  ● When the electronic key battery is depleted
  ● Near a TV tower, electric power plant, gas station, radio station, large display, airport or other facility that generates strong radio waves or electrical noise
  ● When carrying a portable radio, cellular phone, cordless phone or other wireless communication devices
  ● When the electronic key has come into contact with, or is covered by a metallic object
  ● When multiple electronic keys are in the vicinity
  ● When carrying or using the electronic key together with the following devices that emit radio waves
    • Another vehicle’s electronic key
    • A wireless key that emits radio waves
    • Personal computer
  ● If window tint with a metallic content or metallic objects are attached to the rear window
### Switching the door unlock function

It is possible to set which doors the entry function unlocks using the wireless remote control.

**STEP 1** Turn the “ENGINE START STOP” switch OFF.

**STEP 2** When the indicator light on the key surface is not on, press and hold ☐, ☐, or ☐ for approximately 5 seconds while pressing and holding ☐.

The setting changes each time an operation is performed, as shown below. (When changing the setting continuously, release the buttons, wait for at least 5 seconds, and repeat step 2.)

<table>
<thead>
<tr>
<th>Multi-information display</th>

<td>Hold a door handle to unlock all doors</td>
<td>Exterior: Beeps twice Interior: Rings once</td>
</tr>
</tbody>
</table>
Unlock the doors using the wireless remote control and open one of the doors.
If a door is not opened within 60 seconds after the button is pressed, the doors will be locked again and the alarm will automatically be set.
In case that the alarm is triggered, immediately stop the alarm. (→ P. 75)

Battery-saving function
In the following circumstances, the entry function is disabled in order to prevent the vehicle and electronic key batteries from discharging.

● When the entry function has not been used for 2 months or more
● When the electronic key has been left within approximately 3 ft. (1 m) of the vehicle for 10 minutes or more

The system will resume operation when...

● The vehicle is locked using the door handle lock switch
● The vehicle is locked/unlocked using the wireless remote control function (→ P. 34) or the mechanical key (→ P. 526)

Electronic key battery depletion

● The standard battery life is 1 to 2 years. (The battery becomes depleted even if the electronic key is not used.) If the smart access system with push-button start or the wireless remote control function does not operate, or the detection area becomes smaller, the battery may be depleted. Replace the battery when necessary. (→ P. 440)

● To avoid serious deterioration, do not leave the electronic key within 3 ft. (1 m) of the following electrical appliances that produce a magnetic field:
  • TVs
  • Personal computers
  • Recharging cellular phones or cordless phones
  • Table lamps
To operate the system properly

Make sure to carry the electronic key when operating the system. Do not get the electronic key too close to the vehicle when operating the system from the outside of the vehicle.

Depending on the position and holding condition of the electronic key, the key may not be detected correctly and the system may not operate properly. (The alarm may go off accidentally, or the door lock prevention may not function.)

Note for the smart access system with push-button start

● Even when the electronic key is within the effective range (detection areas), the system may not operate properly in the following cases.
  • The electronic key is too close to the window or outside door handle, near the ground, or in a high place when the doors are locked or unlocked.
  • The electronic key is near the ground or in a high place, or too close to the rear bumper center when the trunk is unlocked.
  • The electronic key is on the instrument panel, rear package tray or floor, or in the glove box when the engine is started or “ENGINE START STOP” switch modes are changed.

● As long as the electronic key is within the effective range, the doors may be locked or unlocked by anyone.

● Even if the electronic key is not inside the vehicle, it may be possible to start the engine if the electronic key is near the window.

● The doors may unlock if a large amount of water splashes on the door handle, such as in the rain or in a car wash when the electronic key is within the effective range. (The doors will automatically be locked after approximately 60 seconds if the doors are not opened and closed.)
1-2. Opening, closing and locking the doors and trunk

- Gripping the door handle when wearing a glove may not unlock the door.
- If the wireless remote control is used to lock the doors when the electronic key is near the vehicle, there is a possibility that the door may not be unlocked by the smart access system with push-button start. (Use the wireless remote control to unlock the doors.)
- A sudden approach to the effective range or door handle operation may prevent the doors from being unlocked. In this case, return the door handle to the original position and check that the doors unlock before pulling the door handle again.

■ When the vehicle is not driven for extended periods
To prevent theft of the vehicle, do not leave the electronic key within 6 ft. (2 m) of the vehicle.

■ Security feature
If a door is not opened within approximately 60 seconds after the vehicle is unlocked, the theft deterrent system automatically locks the vehicle again.

■ Alarms and warning indicators
A combination of exterior and interior alarms as well as warnings displayed on the multi-information display are used to prevent theft of the vehicle and unforeseeable accidents resulting from erroneous operation. Take appropriate measures in response to any warning indications on the multi-information display. (→ P. 508)

The following table describes circumstances and correction procedures when only alarms are sounded.
### 1-2. Opening, closing and locking the doors and trunk

<table>
<thead>
<tr>
<th>Alarm</th>
<th>Situation</th>
<th>Correction procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exterior alarm sounds once for 2</td>
<td>Tried to lock the doors using the entry function while the electronic key is still inside the passenger compartment</td>
<td>Retrieve the electronic key from the passenger compartment and lock the doors again.</td>
</tr>
<tr>
<td>seconds</td>
<td>Closed the trunk while the electronic key is still inside and all doors are locked</td>
<td>Retrieve the electronic key from the trunk and close the trunk lid.</td>
</tr>
<tr>
<td>Exterior alarm sounds once for 60</td>
<td>Tried to exit the vehicle with the electronic key and lock the doors without first turning the &quot;ENGINE START STOP&quot; switch OFF</td>
<td>Turn the “ENGINE START STOP” switch OFF and lock the doors again.</td>
</tr>
<tr>
<td>seconds</td>
<td>Tried to lock the vehicle using the entry function while a door is open</td>
<td>Close all of the doors and lock the doors again.</td>
</tr>
<tr>
<td>Exterior alarm sounds once for 10</td>
<td>Tried to open the door and exit the vehicle without shifting the shift lever to “P”</td>
<td>Shift the shift lever to “P”.</td>

**Before driving**
1-2. Opening, closing and locking the doors and trunk

- If the smart access system with push-button start does not operate properly
  - Locking and unlocking the doors and trunk: Use the mechanical key. (→P. 526)
  - Starting the engine: →P. 527

- When the electronic key battery is fully depleted
  →P. 440

- Customization that can be configured at Lexus dealer
  Settings (e.g. smart access system with push-button start) can be changed.
  (Customizable features →P. 569)

- Certification for the smart access system with push-button start
  - For vehicles sold in the U.S.A.

  FCC ID: NI4TMLF-1

  NOTE:
  This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

  FCC WARNING:
  Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

  - For vehicles sold in Canada

  NOTE:
  This device complies with RSS-210 of Industry Canada.
  Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
CAUTION

Caution regarding interference with electronic devices

- People with implanted pacemakers or cardiac defibrillators should keep away from the smart access system with push-button start antennas. (→P. 24) The radio waves may affect the operation of such devices. If necessary, the smart access system with push-button start can be disabled. Ask your Lexus dealer for details, such as the frequency of radio waves and timing of emitting the radio waves. Then, consult your doctor to see if you should disable the smart access system with push-button start.

- Users of any electrical medical device other than implanted pacemakers and implanted cardiac defibrillators should consult the manufacturer of the device for information about its operation under the influence of radio waves. Radio waves could have unexpected effects on the operation of such medical devices.

Ask your Lexus dealer for details for disabling the smart access system with push-button start.
1-2. Opening, closing and locking the doors and trunk

Wireless remote control

The wireless remote control can be used to lock and unlock the vehicle and the trunk from outside the vehicle.

![Remote Control Diagram]

- **1** Locks all doors
- **2** Unlocks all doors
- **3** Opens the windows and moon roof (push and hold)
- **4** Unlocks the trunk (push and hold)
- **5** Sounds alarm (push and hold) (→P. 76)

---

### 2-step unlocking function

When you push the button, the driver’s door is unlocked. Pushing the button again within 3 seconds unlocks the other doors.

### Operation signals

- **Doors**: A buzzer sounds and the emergency flashers flash to indicate that the doors have been locked/unlocked. (Locked: Once; Unlocked: Twice)
- **Trunk**: A buzzer sounds to indicate that the trunk has been unlocked.
- **Windows and moon roof**: A buzzer sounds to indicate that the windows and moon roof are opening.
1-2. Opening, closing and locking the doors and trunk

- **Door lock buzzer**
  → P. 26

- **Security feature**
  → P. 30

- **If the wireless remote control does not operate properly**
  - Locking and unlocking the doors and trunk: Use the mechanical key. (→ P. 526)
  - Starting the engine. (→ P. 527)

- **Electronic key battery depletion**
  → P. 28

  → P. 26

- **Customization that can be configured at Lexus dealer**
  Settings (e.g. 2-step unlocking function, trunk unlocking function) can be changed.
  (Customizable features → P. 569)
1-2. Opening, closing and locking the doors and trunk

- **Certification for wireless remote control**
  - For vehicles sold in the U.S.A
  
  **NOTE:**
  This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

  **NOTICE:**
  This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.

  **FCC WARNING:**
  Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

  - For vehicles sold in Canada

  **NOTE:**
  Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
1-2. Opening, closing and locking the doors and trunk

Doors

The vehicle can be locked and unlocked using the smart access system with push-button start, wireless remote control or door lock switch.

- Smart access system with push-button start
  → P. 23

- Wireless remote control
  → P. 34

- Door lock switch

1. Locks all doors
2. Unlocks all doors

- Inside lock button

1. Locks the door
2. Unlocks the door

The front doors can be opened by pulling the inside handles even if the lock buttons are in the lock position.
Locking the driver’s door from the outside without a key

**STEP 1** Move the lock button to the lock position.

**STEP 2** Close the door.

The door cannot be locked if the “ENGINE START STOP” switch is in the ACCESSORY or IGNITION ON mode, or the electronic key is left inside the vehicle.

The key may not be detected correctly and the door may be locked.

Rear door child-protector lock

The door cannot be opened from inside the vehicle when the locks are set.

These locks can be set to prevent children from opening the rear doors. Push down rear door switches to lock the rear doors.
Automatic door locking and unlocking systems

The following functions can be set or canceled:

<table>
<thead>
<tr>
<th>Function</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shift position linked door locking function</td>
<td>Shifting the shift lever out of “P” locks all doors.</td>
</tr>
<tr>
<td>Shift position linked door unlocking function</td>
<td>Shifting the shift lever to “P” unlocks all doors.</td>
</tr>
<tr>
<td>Speed linked door locking function</td>
<td>All doors are locked when the vehicle speed is approximately 12 mph (20 km/h) or higher.</td>
</tr>
<tr>
<td>Driver’s door linked door unlocking function</td>
<td>All doors are unlocked when the driver’s door is opened within 10 seconds after turning the “ENGINE START STOP” switch OFF.</td>
</tr>
</tbody>
</table>

Setting and canceling the functions

To switch between setting and canceling, follow the procedure below:

**STEP 1** Close all the doors and switch the “ENGINE START STOP” switch to IGNITION ON mode. (Perform step 2 within 10 seconds.)

**STEP 2** Shift the shift lever to “P” or “N”, press and hold the driver’s door lock switch (1 or 2) for approximately 5 seconds then release.

The shift lever and switch positions corresponding to the desired function to be set or canceled are shown as follows.
1-2. Opening, closing and locking the doors and trunk

<table>
<thead>
<tr>
<th>Function</th>
<th>Shift lever position</th>
<th>Switch position</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shift position linked door locking function</td>
<td>“P”</td>
<td>1</td>
</tr>
<tr>
<td>Shift position linked door unlocking function</td>
<td></td>
<td>2</td>
</tr>
<tr>
<td>Speed linked door locking function</td>
<td>“N”</td>
<td>1</td>
</tr>
<tr>
<td>Driver’s door linked door unlocking function</td>
<td></td>
<td>2</td>
</tr>
</tbody>
</table>

When the setting or canceling operation is complete, all doors are locked and then unlocked.

- **Closing the front doors from outside with the inside lock button set in the locked position**
  The door cannot be locked if the “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode, or the electronic key is left in the vehicle. (However, depending on the key’s location, the system may not be able to detect it. In these instances the door lock protection function will not operate properly.)

- **Using the mechanical key**
  The doors can also be locked and unlocked with the mechanical key. (→P. 526)

- **Customization that can be configured at Lexus dealer**
  Settings (e.g. unlocking function using a key) can be changed.
  (Customizable features →P. 571)
### 1-2. Opening, closing and locking the doors and trunk

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>To prevent an accident</strong></td>
</tr>
</tbody>
</table>
| Observe the following precautions while driving the vehicle.  
Failing to do so may result in a door opening and an occupant falling out, resulting in death or serious injury. |
| - Always use a seat belt. |
| - Always lock all doors. |
| - Ensure that all doors are properly closed. |
| - Do not pull the inside handle of the front door while driving.  
The doors will open even if it is locked. |
| - Set the rear door child protector locks when children are seated in the rear seat. |
1-2. Opening, closing and locking the doors and trunk

Trunk

The trunk can be opened using the trunk opener, smart access system with push-button start or wireless remote control.

- **Trunk opener**

  Press the opener switch.

- **Smart access system with push-button start**
  → P. 23

- **Wireless remote control**
  → P. 34

**Canceling the trunk opener feature**

Turn the main switch in the glove box OFF to disable the trunk opener.

1 ON
2 OFF

The trunk lid cannot be opened even with the wireless remote control or the smart access system with push-button start.
1-2. Opening, closing and locking the doors and trunk

■ Trunk easy closer
In the event that the trunk lid is left slightly open (not latched properly), the trunk easy closer will automatically close it to the fully closed position.

■ Trunk light
When the trunk light switch is set to ON, the trunk light turns on when the trunk is opened.

<table>
<thead>
<tr>
<th>1</th>
<th>ON</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>OFF</td>
</tr>
</tbody>
</table>

■ Trunk handle
Use the trunk handle when closing the trunk.

■ Internal trunk release lever
The trunk lid can be opened by pulling down on the glow-in-the-dark lever located on the inside of trunk lid.
The lever will continue to glow for some time after the trunk lid is closed.

■ Using the mechanical key
The trunk can be also opened using the mechanical key. (→P. 526)
1-2. Opening, closing and locking the doors and trunk

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| ■ While driving  
Keep the trunk lid closed.  
This not only keeps personal belongings from being thrown out, but also prevents exhaust gases from entering the vehicle. |
| ■ When children are in the vehicle  
- Never leave children unattended in the vehicle as they may lock themselves in the vehicle or trunk, which could cause the child to overheat or suffocate, resulting in death or serious injury.  
- Do not allow a child to open or close the trunk lid. Doing so may cause the trunk lid to operate unexpectedly and part of the child's body may become caught. |
| ■ Trunk easy closer  
When the trunk lid is not completely closed, the trunk easy closer will automatically close it. Be careful not to catch fingers or anything else in the trunk lid. Failure to do so may result in serious injury. |

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| ■ To avoid damage to the trunk easy closer  
Do not apply force when the closer is operating. |
1-3. Adjustable components (seats, mirrors, steering wheel)
Front seats

1) Seat position fore/aft control switch
   For driver’s seat only: Height of the head restraint also moves upward or downward with the seat movement.

2) Seatback angle control switch

3) Seat cushion (front) angle control switch

4) Vertical height control switch

5) Lumbar support control switch
### CAUTION

**Reclining adjustment**

Do not recline the seat more than necessary when the vehicle is in motion, to reduce the risk of sliding under the lap belt.

If the seat is too reclined, during an accident the lap belt may slide past the hips and apply restraint forces directly to the abdomen or your neck may contact the shoulder belt, increasing the risk of death or serious injury.
1-3. Adjustable components (seats, mirrors, steering wheel)

Driving position memory system (if equipped)

Your preferred driving position (the position of the driver’s seat, steering wheel and outside rear view mirrors) can be entered into the computer’s memory and recalled with the touch of a button. It is also possible to set this function to activate automatically when the doors are unlocked. Three different driving positions can be entered into memory.

The same buttons are found on the front passenger’s side, allowing the position of the front passenger’s seat to be memorized.

- **Entering a position to memory**
  - Check that the shift lever is set in “P”.
  - **STEP 1** Turn the “ENGINE START STOP” switch to IGNITION ON mode.
  - **STEP 2** Adjust the driver’s seat, steering wheel, and outside rear view mirrors to the desired positions.
  - **STEP 3** While pushing the “SET” button, push button “1”, “2” or “3” until the signal beeps.

If the selected button has already been preset, the previously recorded position will be overwritten.
Recalling the memorized position
Check that the shift lever is set in “P”.

**STEP 1** Turn the “ENGINE START STOP” switch to IGNITION ON mode.

**STEP 2** Push button “1”, “2” or “3” to recall the memorized position.

Linking driving position memory with door unlock operation (driver side only)

Memorized driving positions can be recalled when you unlock the driver’s door using the entry function or wireless remote control and open the driver’s door. Steering wheel position is recalled when the “ENGINE START STOP” switch is set to the IGNITION ON mode.

**Setting the linked door unlock operation**

**STEP 1** Set the driving positions into the memory system using the “1”, “2” or “3” buttons on the driver’s side. (→P. 47)

**STEP 2** Turn the “ENGINE START STOP” switch to the OFF, then close the driver’s door.
Push the “1”, “2” or “3” button on the driver’s side and the button on the wireless remote control at the same time for about 1 second until you hear a beep.

Open one of the doors.
If a door is not opened within 60 seconds after is pressed, the doors will be locked again and the alarm will automatically be set. In case that the alarm is triggered, immediately stop the alarm. (→P. 75)

■ Canceling the linked door unlock operation

1. Close the driver’s door with the “ENGINE START STOP” switch set to the OFF.
2. Push the “SET” button and the button on the wireless remote control at the same time for about 1 second until you hear 2 beeps.

■ Retained accessory power
Each memorized position (except for the tilt and telescopic steering column) can be activated within 30 seconds after the corresponding side door is opened, even if the “ENGINE START STOP” switch is in the OFF.

■ If any position memory button is pushed while the adjustments are being made
The operation will stop. To reactivate the system, push the desired button (“1” or “2”) again.

■ If the 12 volt battery is disconnected
The memorized positions must be reset because the computer’s memory is erased when the 12 volt battery is disconnected.
### 1-3. Adjustable components (seats, mirrors, steering wheel)

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>

- **Seat adjustment caution**

  Take care during seat adjustment that the seat does not strike the rear passenger or squeeze your body against the steering wheel.

  If this happens, you can stop the movement by pressing another driving position memory button.
1-3. Adjustable components (seats, mirrors, steering wheel)

Head restraints

**Vertical adjustment**

- **Driver’s seat**

  Head restraint height can be adjusted automatically along with the seat position adjustment. (→P. 45)

- **Front passenger’s and rear seats**

  1. Grip head restraint and move it up or down.
     Push and hold the lock release button when lowering the head restraint.
  2. Grip head restraint and remove while holding the lock release button.

**Horizontal adjustment**

- **Front and outboard rear seats**

  Grip head restraint and twist to tilt forward or backward.
1-3. Adjustable components (seats, mirrors, steering wheel)

- **Adjusting the height of the driver’s head restraint manually**
  Push and hold the lock release button when lowering or raising the head restraint.

- **Removing the driver’s seat head restraint**
  For removal and installation, ask your Lexus dealer.

- **Adjusting the height of the head restraints**
  Make sure that the head restraints are adjusted so that the center of the head restraint is closest to the top of your ears.

- **Adjusting the center rear seat head restraint**
  Always raise the head restraint one level from the stowed position when using.

---

**CAUTION**

- **Head restraint precautions**
  Observe the following precautions regarding the head restraints. Failure to do so may result in death or serious injury.
  - Use the head restraint designed for each respective seat.
  - Adjust the head restraints to the correct position at all times.
  - Do not drive with the head restraints removed.
1-3. Adjustable components (seats, mirrors, steering wheel)

Seat belts

Make sure that all occupants are wearing their seat belts before driving the vehicle.

■ Correct use of the seat belts

1. Extend the shoulder belt so that it comes fully over the shoulder, but does not come into contact with the neck or slide off the shoulder.
2. Position the lap belt as low as possible over the hips.
3. Adjust the position of the seatback. Sit up straight and well back in the seat.
4. Do not twist the seat belt.

■ Fastening and releasing the seat belt

1. Fastening the belt
   Push the tab into the buckle until a clicking sound is heard.
2. Releasing the belt
   Press the release button.
1-3. Adjustable components (seats, mirrors, steering wheel)

Adjusting the height of the belt (front seats)

1. Up
2. Down

Move the height adjuster up and down as needed until you hear a click.

Seat belt comfort guide (outboard rear seats)

If the shoulder belt fits close to a person’s neck, slide the seat belt comfort guide forward.

Seat belt pretensioners (front and outboard rear seats)

The pretensioner helps the seat belt to quickly restrain the occupant by retracting the seat belt when the vehicle is subjected to certain types of severe frontal collision.

The pretensioner may not activate in the event of a minor frontal impact, a side impact or a rear impact.
Pre-collision seat belts (front seats of vehicles with pre-collision system)

When the pre-collision sensor detects an obstacle and determines that a collision is unavoidable, the seat belts lessen collision injury by retracting the slack in the front seat belts before the collision, thus restraining the driver and passenger at an earlier stage.

The seat belts will also operate in the event of sudden braking. (→P.190)

■ Emergency locking retractor (ELR)

The retractor will lock the belt during a sudden stop or on impact. It may also lock if you lean forward too quickly. A slow, easy motion will allow the belt to extend, and you can move around fully.

■ Automatic locking retractor (ALR)

When a passenger’s shoulder belt is completely extended and then retracted even slightly, the belt is locked in that position and cannot be extended. This feature is used to hold the child restraint system (CRS) firmly. To free the belt again, fully retract the belt and then pull the belt out once more. (→P.102)

■ Pregnant women

Obtain medical advice and wear the seat belt in the proper way. (→P.53)

Women who are pregnant should position the lap belt as low as possible over the hips in the same manner as other occupants. Extend the shoulder belt completely over the shoulder and position the belt across the chest. Avoid belt contact over the rounding of the abdominal area.

If the seat belt is not worn properly, not only a pregnant woman, but also the fetus could suffer death or serious injury as a result of sudden braking or a collision.
1-3. Adjustable components (seats, mirrors, steering wheel)

- **People suffering illness**
  Obtain medical advice and wear the seat belt in the proper way. (→P. 53)

- **Child seat belt usage**
  The seat belts of your vehicle were principally designed for persons of adult size.
  - Use a child restraint system appropriately for the child, until the child becomes large enough to properly wear the vehicle’s seat belt. (→P. 98)
  - When the child becomes large enough to properly wear the vehicle’s seat belt, follow the instructions on P. 53 regarding seat belt usage.

- **Replacing the belt after the pretensioner has been activated**
  If the vehicle is involved in multiple collisions, the pretensioner will activate for the first collision, but will not activate for the second or subsequent collisions.

- **Seat belt extender**
  If your seat belts cannot be fastened securely because they are not long enough, a personalized seat belt extender is available from your Lexus dealer free of charge.
1-3. Adjustable components (seats, mirrors, steering wheel)

CAUTION

Observe the following precautions to reduce the risk of injury in the event of sudden braking or an accident. Failing to do so may cause death or serious injury.

- **Wearing a seat belt**
  - Ensure that all passengers wear a seat belt.
  - Always wear a seat belt properly.
  - Each seat belt should be used by one person only. Do not use a seat belt for more than one person at the same time, including children.
  - Lexus recommends that children should be seated in the rear seat and always use a seat belt and/or an appropriate child restraint system.
  - Do not recline the seat any more than necessary to achieve a proper seating position. The seat belt is most effective when the occupants are sitting up straight and well back in the seats.
  - Do not wear the shoulder belt under your arm.
  - Always wear your seat belt low and snug across your hips.

- **Adjustable shoulder anchor**
  - Always make sure the shoulder belt is positioned across the center of your shoulder. The belt should be kept away from your neck, but not falling off your shoulder. Failure to do so could reduce the amount of protection in an accident and cause death or serious injuries in a collision. (→ P. 54)

- **Seat belt pretensioners**
  - Do not place anything, such as a cushion, on the front passenger’s seat. Doing so will disperse the passenger’s weight, which prevents the sensor from detecting the passenger’s weight properly. As a result, the seat belt pretensioner for the front passenger’s seat may not activate in the event of a collision.
  - If the pretensioner has activated, the seat belt becomes locked: it cannot be further extended, nor will it return to the stowed position. The seat belt cannot be used again and must be replaced at your Lexus dealer.
### CAUTION

#### Seat belt damage and wear
- Do not damage the seat belts by allowing the belt, plate or buckle to be jammed in the door.
- Inspect the seat belt system periodically. Check for cuts, fraying, and loose parts. Do not use a damaged seat belt until it is replaced. Damaged seat belts cannot protect an occupant from injury.
- Ensure that the belt and tab are locked and the belt is not twisted. If the seat belt does not function correctly, immediately contact your Lexus dealer.
- Replace the seat assembly, including the belts, if your vehicle has been involved in a serious accident, even if there is no obvious damage.
- Do not attempt to install, remove, modify, disassemble or dispose of a seat belt. Have any necessary repairs carried out by your Lexus dealer. Inappropriate handling of the pretensioner may cause it to activate or operate improperly and may cause death or serious injury.

#### Using a seat belt extender
- Do not wear the seat belt extender, if you can fasten the seat belt without the extender.
- Do not use the seat belt extender when installing a child restraint system, because the belt will not securely hold the child restraint system, increasing the risk of death or injury in the event of a collision.
- The personalized extender may not be safe on another vehicle, when used by another person, or at a different seating position other than the one originally intended.

#### Precaution for pre-collision seat belts
Do not rely solely on the pre-collision system to avoid accidents. Always pay attention to the surrounding conditions, and drive safely and responsibly.
Before driving

1-3. Adjustable components (seats, mirrors, steering wheel)

⚠️ NOTICE

- When using a seat belt extender
  When releasing the seat belt, press on the buckle release button on the extender, not on the seat belt. This helps prevent damage to the vehicle interior and the extender itself.
The steering wheel can be adjusted to a comfortable position while the “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.

Auto tilt away and auto return

When the “ENGINE START STOP” switch is turned OFF, the steering wheel returns to its stowed position by moving up and away to enable easier driver entry and exit.

Switching to ACCESSORY or IGNITION ON mode will return the steering wheel to the original position.

CAUTION

While driving

Do not adjust the steering wheel. Doing so may cause the driver to mishandle the vehicle and an accident, resulting in death or serious injury.
1-3. Adjustable components (seats, mirrors, steering wheel)

Inside rear view mirror

In the auto mode, sensors are used to detect the headlights of vehicles behind and automatically reduces the reflected light.

**Turns auto mode on/off**

The indicator comes on when auto mode is turned on.

The mirror is automatically set to auto whenever the “ENGINE START STOP” switch is turned to IGNITION ON mode.

---

**To prevent sensor error**

To ensure correct functioning of the sensors, do not touch or cover the sensors.

---

**CAUTION**

**While driving**

Do not adjust the position of the mirror. Doing so may lead to mishandling of the vehicle and an accident, or resulting in death or serious injury.
1-3. Adjustable components (seats, mirrors, steering wheel)
Outside rear view mirrors

Mirror angle can be adjusted using the switch when the “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.

1. Select the mirror to adjust (“L”: left or “R”: right)
2. Adjust the mirror up, down, in, or out using the switch.

Folding the mirrors

1. Press the switch
Pressing again will extend the mirrors.

When the mirrors are fogged up
Turn on the mirror heaters to defog the mirrors. (→P. 225)

Auto anti-glare function
When the inside rear view mirror is set to auto mode, the outside rear view mirrors will activate in conjunction with the inside rear view mirror to reduce reflected light. (→P. 61)
1-3. Adjustable components (seats, mirrors, steering wheel)

■ Linked mirror function when reversing
The outside rear view mirrors will automatically angle downwards when the vehicle is reversing in order to give a better view of the ground. However, this function will not operate when the mirror select switch is in the neutral position (neither “L” nor “R” selected).

■ One-touch adjustment of the mirror angle
(vehicles with driving position memory)
A desired mirror face angle can be entered to memory and adjusted with the touch of a button. (→P. 47)

❗ CAUTION

■ While driving
Observe the following precautions. Failing to do so may result in losing control of the vehicle and cause an accident, resulting in death or serious injury.
- Do not adjust the mirrors.
- Do not drive with the mirrors folded back.
- Before driving, be sure to extend mirrors and make an adjustment properly.

■ When a mirror is moving
To avoid injury and mirror malfunction, be careful not to get your hand caught by the moving mirror.

■ When the mirror heaters are operating
Do not touch the mirror surface as the mirror surface becomes hot.
1-4. Opening and closing the windows and moon roof

Power windows

The power windows can be opened and closed using the following switches.

1. Closing
2. One-touch closing*
3. Opening
4. One-touch opening*

*: Pushing the switch in the opposite direction will stop window travel partway.

Lock switch

Press the switch down to lock passenger window switches.

Use this switch to prevent children from accidentally opening or closing a passenger window.

May 13, 2008 5:14 pm
The power windows can be operated when
The “ENGINE START STOP” switch is in IGNITION ON mode.

Linked door lock window operation
- The power windows can be opened and closed using the mechanical key. (→P. 526)
- The power windows can be opened using the wireless remote control. (→P. 34)
- The power windows can be closed using the smart access system with push-button start. (→P. 22)

Operating the power windows after turning the “ENGINE START STOP” switch OFF
The power windows can be operated for approximately 45 seconds even after the “ENGINE START STOP” switch is switched to ACCESSORY mode or turned OFF. They cannot, however, be operated once the driver’s or front passenger’s door is opened.

Jam protection function
If an object becomes caught between the window and the window frame, window travel is stopped and the window is opened slightly.

Customization that can be configured at Lexus dealer
Settings (e.g. linked door lock operation) can be changed. (Customizable features →P. 571)
1-4. Opening and closing the windows and moon roof

1-4. Opening and closing the windows and moon roof

Moon roof (if equipped)

Use the overhead switches to open, close, and tilt the moon roof up and down.

■ Opening and closing

1 Open
Stops just before it is opened fully. Press the switch again to fully open.

2 Close
To stop partway, press the switch lightly.

■ Tilt up and down

1 Tilt up
2 Tilt down
To stop partway, press the switch lightly.
1-4. Opening and closing the windows and moon roof

- The moon roof can be operated when
  The “ENGINE START STOP” switch is in IGNITION ON mode.

- Linked door lock moon roof operation
  - The moon roof can be opened and closed using the mechanical key. (→P. 526)
  - The moon roof can be opened using the wireless remote control. (→P. 34)
  - The moon roof can be closed using the smart access system with push-button start. (→P. 22)

- Operating the moon roof after turning the “ENGINE START STOP” switch OFF
  The moon roof can be operated for approximately 45 seconds even after the “ENGINE START STOP” switch is switched to ACCESSORY mode or turned OFF. It cannot, however, be operated once the driver’s door is opened.

- Jam protection function
  If an object is detected between the moon roof and the frame while closing or tilting down, travel is stopped and the moon roof opens slightly.

- If the moon roof cannot be closed automatically
  Keep the close switch depressed.

- To reduce moon roof wind noise
  Drive with the moon roof opened automatically (just before fully opened position).

- Sunshade
  The sunshade can be opened and closed manually. However, the sunshade will open automatically when the moon roof is opened.

- Customization that can be configured at Lexus dealer
  Settings (e.g. linked door lock operation) can be changed.
  (Customizable features →P. 571)

</tbody>
</table>
Perform the following steps to open the fuel tank cap.

■ Before refueling the vehicle
  Turn the "ENGINE START STOP" switch OFF and ensure that all the doors and windows are closed.

■ Opening the fuel tank cap

Press the fuel filler door opener switch.

Turn the fuel tank cap slowly to open.

Hang the fuel tank cap on the back of the fuel filler door.
1-5. Refueling

Closing the fuel tank cap

After refueling, turn the fuel tank cap clockwise until you hear a click. The cap will revolve slightly in the opposite direction once released.

■ Fuel types

Use premium unleaded gasoline. (91 Octane Rating [Research Octane Number 96] or higher)

■ Fuel tank capacity

Approximately 18.7 gal. (71 L, 15.6 Imp.gal.)

■ When the fuel filler door opener switch is inoperable

The lever can be used to open the fuel filler door if the fuel filler door cannot be opened using the inside switch because the 12 volt battery is discharged or for any other reason.
1-5. Refueling

**CAUTION**

- **When refueling the vehicle**
  - Observe the following precautions while refueling the vehicle. Failure to do so, may result in death or serious injury.
  - Touch the vehicle or some other metal surface to discharge any static electricity. Sparks resulting from discharging static electricity may cause the fuel vapors to ignite.
  - Always hold the grips on the fuel tank cap and turn it slowly to remove it. A whooshing sound may be heard when the fuel tank cap is loosened. Wait until the sound cannot be heard before fully removing the cap. In hot weather, pressurized fuel may spray out of the filler neck and cause injury.
  - Do not allow anyone that has not discharged static electricity from their bodies to come close to an open fuel tank.
  - Do not inhale vaporized fuel. Fuel contains substances that are harmful if inhaled.
  - Do not smoke while refueling the vehicle. Doing so may cause the fuel to ignite and cause a fire.
  - Do not return to the vehicle or touch any person or object that is statically charged. This may cause static electricity to build up, resulting in a possible ignition hazard.

- **When replacing the fuel tank cap**
  - Do not use anything but a genuine Lexus fuel tank cap designed for your vehicle. Failure to do so may cause a fire or other incident which may result in death or serious injury.

**NOTICE**

- **Refueling**
  - Do not spill fuel during refueling. Failing to do so may damage the vehicle, such as causing the exhaust systems to operate abnormally or damaging fuel system components or the vehicle’s painted surface.
1-6. Theft deterrent system

Immobilizer system

The vehicle’s keys have built-in transponder chips that prevent the engine from starting if the key has not been previously registered in the vehicle’s on-board computer.

Never leave the keys inside the vehicle when you leave the vehicle.

The indicator light flashes after the “ENGINE START STOP” switch has been turned OFF to indicate that the system is operating.

- System maintenance
  The vehicle has a maintenance-free type of immobilizer system.

- Conditions that may cause the system to malfunction
  - If the grip portion of the key is in contact with a metallic object.
  - If the key is in close proximity to or touching a key to the security system (key with a built-in transponder chip) of another vehicle.

- Certifications for the immobilizer system
  - For vehicles sold in the U.S.A.
  
  FCC ID: NI4TMIMB-1

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
For vehicles sold in Canada

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

**CAUTION**

- Certifications for the immobilizer system
  Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

**NOTICE**

- For proper system operation
  Do not modify, remove or disable the immobilizer system. If any unauthorized changes or modifications are made, the proper operation of the system cannot be guaranteed.
The system sounds the alarm and flashes lights when forcible entry is detected.

**Triggering of the alarm**
The alarm is triggered in the following situations.

- A locked door or trunk is unlocked or opened in any way other than using the smart access system with push-button start, wireless remote control or mechanical key. (The doors will lock again automatically.)
- The hood is opened while the vehicle is locked.

**Setting the alarm system**
Close the doors, trunk and hood, and lock all doors. The system will be set automatically after 30 seconds. The indicator light changes from being on to flashing when the system is set.

**Deactivating or stopping the alarm**
Do one of the following to deactivate or stop the alarm.

- Unlock the doors or trunk.
- Turn the “ENGINE START STOP” switch to the ACCESSORY or IGNITION ON mode. (The alarm will be deactivated or stopped after a few seconds.)
Items to check before locking the vehicle

To prevent unintended triggering of the alarm and vehicle theft, make sure of the following.

- Nobody is in the vehicle.
- The windows and moon roof (if equipped) are closed before the alarm is set.
- No valuables or other personal items are left in the vehicle.

Triggering of the alarm

The alarm may be triggered in the following situations. (Stopping the alarm deactivates the alarm system.)

- A person inside the vehicle opens a door, the trunk or hood.
- The 12 volt battery is recharged or replaced when the vehicle is locked.

When the 12 volt battery is disconnected

Be sure to cancel the alarm system. If the 12 volt battery is disconnected before canceling the alarm, the system may be triggered when the battery is reconnected.

Panic mode

When (/png) is pushed for longer than about one second, the headlights/tail lights/emergency flashers will flash, the front and rear interior lights will come on, and an alarm will sound for about 60 seconds to deter any person from trying to break into or damage your vehicle.

To stop the alarm, push any button on the wireless remote control.
Theft prevention labels (U.S.A.)

These labels are attached to the vehicle to reduce vehicle theft by facilitating the tracing and recovery of parts from stolen vehicles. Do not remove under penalty of law.
1-7. Safety information
Correct driving posture

Drive with a good posture as follows:

1. Sit upright and well back in the seat. (→ P. 45)
2. Adjust the position of the seat forward or backward to ensure the pedals can be reached and easily depressed to the extent required. (→ P. 45)
3. Adjust the seatback so that the controls are easily operable.
4. Adjust the tilt and telescopic positions of the steering wheel downward so the airbag is facing your chest. (→ P. 60)
5. Lock the head restraint in place with the center of the head restraint closest to the top of your ears. (→ P. 51)
6. Wear the seat belt correctly. (→ P. 53)
1-7. Safety information

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>

- **While driving**
  - Do not adjust the position of the driver’s seat. Doing so could cause the driver to lose control of the vehicle.
  - Do not place a cushion between the driver or passenger and the seatback. A cushion may prevent correct posture from being achieved, and reduce the effectiveness of the seat belt and head restraint, increasing the risk of death or serious injury to the driver or passenger.
  - Do not place anything under the front seats. Objects placed under the front seats may become jammed in the seat tracks and stop the seat from locking in place. This may lead to an accident. The adjustment mechanism may also be damaged.

- **Adjusting the seat position**
  - Take care when adjusting the seat position to ensure that other passengers are not injured by the moving seat.
  - Do not put your hands under the seat or near the moving parts to avoid injury. Fingers or hands may become jammed in the seat mechanism.
The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.

► Front airbags
1) Driver airbag/front passenger airbag
   Can help protect the head and chest of the driver and front passenger from impact with interior components.
2) Knee airbag
   Can help provide driver and front passenger protection.

► Side and curtain shield airbags
3) Front side airbag/rear side airbag (rear side airbags are optional)
   Can help protect the torso of the front occupants and rear outboard occupants.
Curtain shield airbag
Can help protect primarily the head of front occupants and rear out-board occupants.

**Airbag system components**

1. **Occupant detection system (ECU and sensors)**
2. Front passenger’s seat belt buckle switch
3. Knee airbag
4. Front passenger airbag
5. Curtain shield airbag
6. Front side airbag
7. Side and curtain shield airbag sensor
8. Curtain shield and rear side airbag sensor
9. SRS warning light
10. Rear side airbag (if equipped)
11. Driver airbag
12. Driver’s seat belt buckle switch
13. Driver’s seat position sensor
14. “AIR BAG ON” and “AIR BAG OFF” indicator lights
15. Airbag sensor assembly
16. Front airbag sensor
Your vehicle is equipped with “ADVANCED AIRBAGS” designed based on US motor vehicle safety standards (FMVSS208). The airbag system controls airbag deployment power for the driver and front passenger. The driver airbag system consists of the driver’s seat position sensor etc. The front passenger’s airbag system consists of the front passenger occupant classification sensor etc.

The main SRS airbag system components are shown above. The SRS airbag system is controlled by the airbag sensor assembly. The airbag sensor assembly consists of a safing sensor and an airbag sensor.

In certain types of severe frontal or side impacts, the SRS airbag system triggers the airbag inflators. A chemical reaction in the inflators quickly fills the airbags with non-toxic gas to help restrain the motion of the occupants.

If the SRS airbags deploy (inflate)

- Bruising and slight abrasions may result from contact with a deploying (inflating) SRS airbag.
- A loud noise and white powder will be emitted.
- Parts of the airbag module (steering wheel hub, airbag cover and inflator) as well as the seats, and parts of the front pillar and roof side rail, may be hot for several minutes. The airbag itself may also be hot.
- The windshield may crack.
1.7. Safety information

■ Operating conditions (front airbags)

● The SRS front airbags will deploy if the severity of the frontal impact is above the designed threshold level, comparable to an approximate 15 mph (25 km/h) collision when the vehicle impacts straight into a fixed barrier that does not move or deform.

However, this threshold velocity will be considerably higher if the vehicle strikes an object, such as a parked vehicle or sign pole, which can move or deform on impact, or if the vehicle is involved in an underride collision (e.g. a collision in which the front of the vehicle “underrides”, or goes under, the bed of a truck, etc.).

● It is possible that in some collisions where the forward deceleration of the vehicle is very close to the designed threshold level, the SRS front airbags and the seat belt pretensioners may not activate together.

● The SRS front passenger airbags will not activate, if there is no passenger sitting in the front passenger seat. However, the front passenger airbag may deploy, if the heavy luggage is put in the seat, even if the seat is unoccupied.

■ Operating conditions (side and curtain shield airbags)

● The SRS side airbags and curtain shield airbags are designed to inflate when the passenger compartment is subjected to a severe impact from the side.

● The SRS front side airbag on the passenger seat will not activate if there is no passenger sitting in the front passenger seat. However, the front side airbag on the passenger seat may deploy if the heavy luggage is put in the seat, even if the seat is unoccupied. (→P. 92)
Conditions under which the SRS airbags may deploy (inflate), other than a collision

The SRS front airbags may also deploy if a serious impact occurs to the underside of your vehicle. Some examples are shown in the illustration.

- Hitting a curb, edge of pavement or hard surface
- Falling into or jumping over a deep hole
- Landing hard or vehicle falling

Types of collisions that may not deploy the SRS airbag (front airbags)

The SRS front airbags are generally not designed to inflate if the vehicle is involved in a side or rear collision, if it rolls over, or if it is involved in a low-speed frontal collision. But, whenever a collision of any type causes sufficient forward deceleration of the vehicle, deployment of the SRS front airbags may occur.

- Collision from the side
- Collision from the rear
- Vehicle rollover
Types of collisions that may not deploy the SRS airbag
(side and curtain shield airbags)

The SRS side airbag and curtain shield airbag system may not activate if the vehicle
is subjected to a collision from the side at certain angles, or a collision to the side of
the vehicle body other than the passenger compartment.

- Collision from the side to the vehicle body
- Collision from the side at an angle
- Collision from the front
- Collision from the rear
- Vehicle rollover

The SRS side airbags and curtain shield airbags are generally not designed to
inflate if the vehicle is involved in a frontal or rear collision, if it rolls over, or if it is
involved in a low-speed side collision.
When to contact your Lexus dealer

In the following cases, contact your Lexus dealer as soon as possible. Do not disconnect the 12 volt battery cables before contacting your Lexus dealer.

- Any of the SRS airbags have been inflated.
- The front of the vehicle is damaged or deformed, or was involved in an accident that was not severe enough to cause the SRS airbags to inflate.
- A portion of the doors is damaged or deformed, or the vehicle was involved in an accident that was not severe enough to cause the SRS side airbags and curtain shield airbags to inflate.
- The pad section of the steering wheel, front passenger airbag cover or lower portion of the instrument panel is scratched, cracked, or otherwise damaged.
- The surface of the seats with the side airbag is scratched, cracked, or otherwise damaged.
- The portion of the front pillars, rear pillars or roof side rail garnishes (padding) containing the curtain shield airbags inside is scratched, cracked, or otherwise damaged.
CAUTION

SRS airbag precautions

Observe the following precautions regarding the airbags. Failure to do so may cause death or serious injury.

- The driver and all passengers in the vehicle must wear their seat belts properly. The SRS airbags are supplemental devices to be used with the seat belts.
- The SRS driver airbag deploys with considerable force, and can cause death or serious injury especially if the driver is very close to the airbag. The National Highway Traffic Safety Administration ("NHTSA") advises:

Since the risk zone for driver airbag is the first 2 - 3 in. (50 - 75 mm) of inflation, placing yourself 10 in. (250 mm) from your driver airbag provides you with a clear margin of safety. This distance is measured from the center of the steering wheel to your breastbone. If you sit less than 10 in. (250 mm) away now, you can change your driving position in several ways:

- Move your seat to the rear as far as you can while still reaching the pedals comfortably.
- Slightly recline the back of the seat. Although vehicle designs vary, many drivers can achieve the 10 in. (250 mm) distance, even with the driver seat all the way forward, simply by reclining the back of the seat somewhat. If reclining the back of your seat makes it hard to see the road, raise yourself by using a firm, non-slippery cushion, or raise the seat if your vehicle has that feature.
- If your steering wheel is adjustable, tilt it downward. This points the airbag toward your chest instead of your head and neck.

The seat should be adjusted as recommended by NHTSA above, while still maintaining control of the foot pedals, steering wheel, and your view of the instrument panel controls.
SRS airbag precautions

- If the seat belt extender has been connected to the driver’s seat belt buckle but the seat belt extender has not also been fastened to the latch plate of the driver’s seat belt, the SRS driver’s airbag system will judge that the driver is wearing the seat belt even though the seat belt has not been connected. In this case, the driver’s airbag may not activate correctly in a collision, resulting in death or serious injury in the event of collision. Be sure to wear the seat belt with the seat belt extender.

- The SRS front passenger airbag also deploys with considerable force, and can cause death or serious injury especially if the front passenger is very close to the airbag. The front passenger seat should be as far from the airbag as possible with the seatback adjusted, so the front passenger sits upright.

- Improperly seated and/or restrained infants and children can be killed or seriously injured by a deploying airbag. An infant or child who is too small to use a seat belt should be properly secured using a child restraint system. Lexus strongly recommends that all infants and children be placed in the rear seats of the vehicle and properly restrained. The rear seats are the safest for infants and children. (→P. 98)
CAUTION

SRS airbag precautions

- Do not sit on the edge of the seat or lean against the dashboard.

- Do not allow a child to stand in front of the SRS front passenger airbag unit or sit on the knees of a front passenger.

- Do not drive the vehicle while the driver or passenger have items resting on their knees.

- Do not lean against the door, the roof side rail or the front, side and rear pillars.

- Do not allow anyone to kneel on the passenger seat toward the door or put their head or hands outside the vehicle.
### CAUTION

**SRS airbag precautions**

- Do not attach anything to or lean anything against areas such as the dashboard, steering wheel pad or lower portion of the instrument panel. These items can become projectiles when SRS driver, front passenger and knee airbags deploy.

- Do not attach anything to areas such as the door, windshield glass, side door glass, front and rear pillars, roof side rail or assist grip.

- Do not hang coat hangers or other hard objects on the coat hooks. All of these items could become projectiles and seriously injure or kill you, should the SRS curtain shield airbag deploy.

- If the vinyl cover is put on the area where the SRS knee airbag will deploy, be sure to remove it.

- Do not use seat accessories which cover the parts where the SRS side airbags inflate as they may interfere with inflation of the airbags.

- Do not strike or apply significant levels of force to the area of the SRS airbag components shown on P. 81. Doing so can cause the SRS airbags to malfunction.

- Do not touch any of the component parts immediately after the SRS airbags have deployed (inflated) as they may be hot.
CAUTION

■ SRS airbag precautions

● If breathing becomes difficult after the SRS airbag has deployed, open a door or window to allow fresh air in, or leave the vehicle if it is safe to do so. Wash off any residue as soon as possible to prevent skin irritation.

● If the areas where the SRS airbags are stored, such as the steering wheel pad and front pillar garnish, are damaged or cracked, have them replaced by your Lexus dealer.

● Do not place anything, such as a cushion, on the front passenger’s seat. Doing so will disperse the passenger’s weight, which prevents the sensor from detecting the passenger’s weight properly. As a result, the SRS front passenger airbag may not deploy in the event of a collision.

■ Modification and disposal of SRS airbag system components

Do not dispose of your vehicle or perform any of the following modifications without consulting your Lexus dealer. The SRS airbags may malfunction or deploy (inflate) accidentally, causing death or serious injury.

● Installation, removal, disassembly and repair of the SRS airbags

● Repairs, modifications, removal or replacement of the steering wheel, instrument panel, dashboard, seats or seat upholstery, front, side and rear pillars or roof side rail

● Repairs or modifications of the front fender, front bumper, or side of the occupant compartment

● Installation of snow plows, winches, etc. to the front grille (bull bars, kangaroo bar etc.)

● Modifications to the vehicle’s suspension system

● Installation of electronic devices such as mobile two-way radios or CD players

● Modifications to your vehicle for a person with a physical disability
Your vehicle is equipped with a front passenger occupant classification system. This system detects the conditions of the front passenger seat and activates or deactivates the devices for front passenger.

1. SRS warning light
2. "AIR BAG OFF" indicator light
3. "AIR BAG ON" indicator light

| Front passenger’s seat belt pretensioner | }
1-7. Safety information

*1: The system judges a person of adult size as an adult. When a smaller adult sits in the front passenger seat, the system may recognize him/her as a child depending on his/her physique and posture.

*2: In the event the front passenger does not wear a seat belt.

*3: When a large child who has outgrown a child restraint system sits in the front passenger seat, the system may recognize him/her as an adult depending on his/her physique and posture.

*4: Never install a rear-facing child restraint system on the front passenger seat. A forward-facing child restraint system should only be installed on the front passenger seat when it is unavoidable. (→P. 98)

*5: In case the indicator is not illuminated, consult this manual as for installing the child restraint system properly. (→P. 102)

⚠️ CAUTION

Front passenger occupant classification system precautions

Observe the following precautions regarding the front passenger occupant classification system.

Failure to do so may cause death or serious injury.

- Wear the seat belt properly.
- Make sure the front passenger’s seat belt tab has not been left inserted into the buckle before someone sits in the front passenger seat.
CAUTION

Front passenger occupant classification system precautions

- Make sure the “AIR BAG OFF” indicator light is not illuminated when using the seat belt extender for the front passenger seat. If the “AIR BAG OFF” indicator light is illuminated, disconnect the extender tongue from the seat belt buckle, then reconnect the seat belt. Reconnect the seat belt extender after making sure the “AIR BAG ON” indicator light is illuminated. If you use the seat belt extender while the “AIR BAG OFF” indicator light is illuminated, the front passenger airbag, side airbag on the front passenger side and front passenger knee airbag may not activate correctly, which could cause death or serious injury in the event of a collision.

- Do not apply a heavy load to the front passenger seat or equipment.

- Do not put weight on the front passenger seat by putting your hands or feet on the front passenger seat seatback from the rear seat.

- Do not let a rear seat passenger lift the front passenger seat with their feet or press on the seatback with their legs.

- Do not put objects under the front passenger seat.

- Do not recline the front passenger seatback so far that it touches a rear seat. This may cause the “AIR BAG OFF” indicator light to be illuminated, which indicates that the passenger’s airbags will not deploy in the event of a severe accident. If the seatback touches the rear seat, return the seatback to a position where it does not touch the rear seat. Keep the front passenger seatback as upright as possible when the vehicle is moving. Reclining the seatback excessively may lessen the effectiveness of the seat belt system.
### Front passenger occupant classification system precautions

- If an adult sits in the front passenger seat, the "AIR BAG ON" indicator light is illuminated. If the "AIR BAG OFF" indicator is illuminated, ask the passenger to sit up straight, well back in the seat, feet on the floor, and with the seat belt worn correctly. If the "AIR BAG OFF" indicator still remain illuminated, either ask the passenger to move to the rear seat, or if that is not possible, move the front passenger seat fully rearward.

- When it is unavoidable to install a forward-facing child restraint system on the front passenger seat, install the child restraint system on the front passenger seat in the proper order. (→P. 102)

- Do not modify or remove the front seat.

- Do not kick the front passenger seat or subject it to severe impact. Otherwise, the SRS warning light may come on to indicate a malfunction in the detection system. In this case, contact your Lexus dealer immediately.

- Do not use a seat accessory, such as a cushion or seat cover, that covers the seat cushion surface.

- Child restraint systems installed on the rear seat should not contact the front seatbacks.
Child restraint systems

Points to remember

Studies have shown that installing a child restraint on a rear seat is much safer than installing one to the front passenger seat.

- Choose a child restraint system appropriate to the age and size of the child.
- For installation details, follow the instructions provided with the child restraint system.
  General installation instructions are provided in this manual. (→P. 102)

Types of child restraints

Child restraint systems are classified into the following 3 types according to the age and size of the child.

- Infant seat
Selecting an appropriate child restraint system

Get an appropriate child restraint system for the child. If a child is too large for a child restraint system, sit the child on a rear seat and use the vehicle's seat belt. (→P. 53)
CAUTION

Child restraint precautions

● For effective protection in automobile accidents and sudden stops, a child must be properly restrained, using a seat belt or child restraint system depending on the age and size of the child. Holding a child in your arms is not a substitute for a child restraint system. In an accident, the child can be crushed against the windshield, or between you and the vehicle’s interior.

● Lexus strongly urges the use of a proper child restraint system that conforms to the size of the child, installed on the rear seat. According to accident statistics, the child is safer when properly restrained in the rear seat than in the front seat.

● Never install a rear-facing child restraint system on the front passenger seat even if the “AIR BAG OFF” indicator light is illuminated. In the event of an accident, the force of the rapid inflation of the front passenger airbag can cause death or serious injury to the child if the rear-facing child restraint system is installed on the front passenger seat.

● A forward-facing child restraint system should allowed to be installed on the front passenger seat only when it is unavoidable. Always move the seat as far back as possible even if the “AIR BAG OFF” indicator light is illuminated, because the front passenger airbag could inflate with considerable speed and force. Otherwise, the child may be killed or seriously injured.

● Do not use the seat belt extender when installing a child restraint system on the front or rear passenger seat. If installing a child restraint system with the seat belt extender connected to the seat belt, the seat belt will not securely hold the child restraint system, which could cause death or serious injury to the child or other passengers in the event of collision.
CAUTION

Child restraint precautions

* Do not allow the child to lean his/her head or any part of his/her body against the door or the area of the seat, front pillar or roof side rail from which the side airbags or curtain shield airbags deploy even if the child is seated in the child restraint system. It is dangerous if the side airbags and curtain shield airbags inflate, and the impact could cause death or serious injury to the child.

* Make sure you have complied with all installation instructions provided by the child restraint manufacturer and that the system is properly secured. If it is not secured properly, it may cause death or serious injury to the child in the event of a sudden stop or accident.

When the child restraint system is not in use

* Keep the child restraint system properly secured on the seat even if it is not in use.
  * Do not store the restraint unsecured in the passenger compartment.

* If it is necessary to detach the child restraint system, remove it from the vehicle or store it securely in the trunk. This will prevent it from injuring passengers in the event of a sudden stop or accident.
Follow the child restraint system manufacturer’s instructions. Firmly secure child restraints to the outboard rear seats using a seat belt or a child restraint lower anchors belt. Attach the top strap when installing a child restraint.

1. Seat belts equipped with a child restraint locking mechanism (ALR/ELR belts except driver’s seat belt)

2. Child restraint lower anchors
   Lower anchors are provided for the outboard rear seats. (Buttons displaying the location of the anchors are attached to the seats.)

3. Anchor bracket (for top strap)
   Anchor brackets are provided for all rear seats.
Installing child restraints using a seat belt (child restraint lock function belt)

Rear-facing — Infant seat/convertible seat

**STEP 1**
Place the child restraint system on the rear seat facing the rear of the vehicle.

**STEP 2**
Run the seat belt through the child restraint system and insert the plate into the buckle. Make sure that the belt is not twisted.

**STEP 3**
Fully extend the shoulder belt and then allow it to retract slightly in order to activate the ALR lock mode.

Lock mode allows the seat belt to retract only.
While pushing the child restraint system down into the rear seat, allow the shoulder belt to retract until the child restraint system is securely in place.

After the shoulder belt has retracted to a point where there is no slack in the belt, pull the belt to check that it cannot be extended.

**Forward-facing — Convertible seat**

Place the child restraint system on the seat facing the front of the vehicle.

Run the seat belt through the child restraint system and insert the plate into the buckle. Make sure that the belt is not twisted.

Fully extend the shoulder strap and then allow it to retract slightly into the ALR lock mode.

Lock mode allows the seat belt to retract only.
While pushing the child restraint system into the rear seat, allow the shoulder belt to retract until the child restraint system is securely in place.

After the shoulder belt has retracted to a point where there is no slack in the belt, pull the belt to check that it cannot be extended.

**Booster seat**

Place the child restraint system on the seat facing the front of the vehicle.

Sit the child in the child restraint system. Fit the seat belt to the child restraint system according to the manufacturer’s instructions and insert the plate into the buckle. Make sure that the belt is not twisted.

Check that the shoulder belt is correctly positioned over the child’s shoulder, and that the lap belt is as low as possible. (→P. 53)
Removing a child restraint installed with a seat belt

Push the buckle release button and fully retract the seat belt.

Installation with child restraint lower anchors

Type A

STEP 1 Widen the gap between the seat cushion and seatback slightly.
STEP 2 Latch the hooks of the lower straps onto the anchors.
If the child restraint has a top strap, the top strap should be latched onto the anchors.

For owners in Canada:
The symbol on a child restraint system indicates the presence of a lower connector system.
Type B

**Before driving**

**STEP 1** Widen the gap between the seat cushion and seatback slightly.

**STEP 2** Latch the buckles onto the anchors.

If the child restraint has a top strap, the top strap should be latched onto the anchors.

For owners in Canada:
The symbol on a child restraint system indicates the presence of a lower connector system.

**Child restraint systems with a top strap**

**STEP 1** Secure the child restraint system using a seat belt or lower anchors, and move the head restraint in place at the lowest position.
Open the anchor bracket cover, latch the hook onto the anchor bracket and tighten the top strap.

Make sure the top strap is securely latched.

---

**Laws and regulations pertaining to anchorages**

Anchorages conform to FMVSS225 or CMVSS210.2. Child restraint systems conforming to FMVSS213 or CMVSS213 specifications can be used. This vehicle is designed to conform to the SAE J1819.

---

**CAUTION**

**When installing a booster seat**

Do not fully extend the shoulder belt to prevent the belt from going to ALR lock mode: (→P. 55)

- ALR mode causes the belt to tighten only which could cause injury or discomfort to the child.
- Do not allow the child to play with the seat belt or the child could be killed or serious injured.
CAUTION

When installing a child restraint system
Follow the directions given in the child restraint system installation manual and fix
the child restraint system securely in place.
If the child restraint system is not correctly fixed in place, the child or other passen-
gers may be injured or even killed in the event of sudden braking or an accident.

- If the driver’s seat interferes with the child restraint system and prevents it from being attached correctly, attach the child restraint system to the right-hand rear seat.

- Only put a forward-facing child restraint system on the front seat when unavoidable. When installing a forward-facing child restraint on the front passenger seat, move the seat as far back as possible even if the “AIR BAG OFF” indicator light is illuminated. Failing to do so may result in death or serious injury if the airbags deploy (inflate).

- When a booster seat is installed, always ensure that the shoulder belt is positioned across the center of the child’s shoulder. The belt should be kept away from the child’s neck, but not so that it could fall off the child’s shoulder. Failing to do so may result in death or serious injury in the event of an accident or sudden braking.
CAUTION

■ When installing a child restraint system
  ● Ensure the belt and tab are securely locked and that the seat belt is not twisted.
  ● Push and pull the child restraint system in different directions to be sure it is secure.
  ● Follow all installation instructions provided by the child restraint system manufacturer.

■ Do not use a seat belt extender
  If a seat belt extender is used when installing a child restraint system, the seat belt will not securely hold the child restraint system, which could cause death or serious injury to the child or other passengers in the event of a collision.

■ To correctly attach a child restraint system to the anchors
  When using the lower anchors, be sure that there are no foreign objects around the anchors and that the seat belt is not caught behind the child restraint system. Make sure the child restraint system is securely attached, or it may cause death or serious injury to the child or other passengers in the event of a sudden stop or accident.
When driving

- Trailer towing .................... 204
- Dinghy towing .................... 205
The following procedures should be observed to ensure safe driving.

- **Starting the engine** (→ P. 121)
- **Driving**
  - **STEP 1** With the brake pedal depressed, shift the shift lever to "D". (→ P. 125)
  - **STEP 2** Release the parking brake. (→ P. 131)
  - **STEP 3** Gradually release the brake pedal and gently push the accelerator pedal to accelerate the vehicle.
- **Stopping**
  - **STEP 1** With the shift lever in "D", push the brake pedal.
  - **STEP 2** If necessary, set the parking brake. When the vehicle is stopped for an extended period of time, shift the shift lever to "P". (→ P. 125)
- **Parking the vehicle**
  - **STEP 1** With the shift lever in "D", push the brake pedal.
  - **STEP 2** Set the parking brake. (→ P. 131)
  - **STEP 3** Shift the shift lever to "P". (→ P. 125)
  - **STEP 4** Stop the engine.
  - **STEP 5** Lock the door, making sure that you have the electronic key on your person.

**Starting on a steep incline**

- **STEP 1** Firmly set the parking brake and shift the shift lever to "D".
- **STEP 2** Gently depress the accelerator pedal.
- **STEP 3** Release the parking brake.
Driving procedures

Driving in the rain

- Drive carefully when it is raining, because visibility will be reduced, the windows may become fogged-up, and the road will be slippery.
- Drive carefully when it starts to rain, because the road surface will be especially slippery.
- Refrain from high speeds when driving on an expressway in the rain, because there may be a layer of water between the tires and the road surface, preventing the steering and brakes from operating properly.

Breaking in your new Lexus

To extend the life of the vehicle, the following precautions are recommended to observe:

- For the first 186 miles (300 km): Avoid sudden stops.
- For the first 621 miles (1000 km):
  - Do not drive at extremely high speeds.
  - Avoid sudden acceleration.
  - Do not drive continuously in the low range in the “S” position.
  - Do not drive at a constant speed for extended periods.

Operating your vehicle in a foreign country

Comply with the relevant vehicle registration laws and confirm the availability of the correct fuel. (→P. 543)

When starting on an incline

The hill-start assist control may operate. (→P. 184)
## 2-1. Driving procedures

### CAUTION

<table>
<thead>
<tr>
<th>When starting the vehicle</th>
</tr>
</thead>
<tbody>
<tr>
<td>Always keep your foot on the brake pedal while stopped with the engine running. This prevents the vehicle from creeping.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>When driving the vehicle</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not drive if you are unfamiliar with the location of the brake and accelerator pedals to avoid depressing the wrong pedal.</td>
</tr>
<tr>
<td>• Accidentally depressing the accelerator pedal instead of the brake pedal will result in sudden acceleration that may lead to an accident that could result in death or serious injury.</td>
</tr>
<tr>
<td>• When backing up, you may twist your body around, leading to a difficulty in operating the pedals. Make sure to operate the pedals properly.</td>
</tr>
<tr>
<td>• Make sure to keep a correct driving posture even when moving the vehicle only slightly, allowing you to depress the brake and accelerator pedals properly.</td>
</tr>
<tr>
<td>• Depress the brake pedal using your right foot. Depressing the brake pedal using your left foot may delay response in an emergency, resulting in an accident.</td>
</tr>
<tr>
<td>Do not drive the vehicle over or stop the vehicle near flammable materials. The exhaust system and exhaust gases can be extremely hot. This may cause a fire if there is any flammable material nearby.</td>
</tr>
<tr>
<td>Do not let the vehicle roll backwards while the shift lever is in a driving position, or roll forward while the shift lever is in “R”. Doing so may cause the engine not to operate or lead to poor brake and steering performance, resulting in an accident or damage to the vehicle.</td>
</tr>
<tr>
<td>If the smell of exhaust is noticed inside the vehicle, open the windows and check that the trunk is closed. Large amounts of exhaust in the vehicle can cause driver drowsiness and an accident, resulting in death or a serious health hazard. Have the vehicle inspected by your Lexus dealer immediately.</td>
</tr>
<tr>
<td>Do not under any circumstances shift the shift lever to “P”, “R” or “N” while the vehicle is moving. Doing so can cause significant damage to the automatic transmission and may result in a loss of vehicle control.</td>
</tr>
</tbody>
</table>
When driving the vehicle

- Do not shift the shift lever to "N" while the vehicle is moving. Doing so may cause the engine brake not to operate properly and lead to an accident.

- Do not turn the engine off while driving. The power steering and brake actuator (GS460) or brake booster (GS350) will not operate properly if the engine is off.

- Use engine braking (downshift) to maintain a safe speed when driving down a steep hill. Using the brakes continuously may cause the brakes to overheat and lose effectiveness. (\(\rightarrow\) P. 127)

- When stopped on an inclined surface, use the brake pedal and parking brake to prevent the vehicle from rolling backward or forward and causing an accident.

- Be careful when driving on slippery surfaces, as the vehicle may spin or skid when downshifting, rapidly accelerating, braking or turning.

- Do not adjust the position of the steering wheel, the seat, or the inside or outside rear view mirrors while driving. Doing so may result in a loss of vehicle control that can cause accidents that may result in death or serious injury.

- Always check that all passengers’ arms, heads or other parts of their bodies are not outside the vehicle, as this may result in death or serious injury.

- Do not drive in excess of the speed limit. Even if the legal speed limit permits it, do not drive over 85 mph (140 km/h) unless your vehicle has high-speed capability tires. Driving over 85 mph (140 km/h) may result in tire failure, loss of control and possible injury. Be sure to consult a tire dealer to determine whether the tires on your vehicle are high-speed capability tires or not before driving at such speeds.
### 2-1. Driving procedures

<table>
<thead>
<tr>
<th><strong>CAUTION</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>When driving on slippery road surfaces</strong></td>
</tr>
<tr>
<td>● Sudden braking, acceleration and steering may cause tire slippage and reduce your ability to control the vehicle, resulting in an accident.</td>
</tr>
<tr>
<td>● Sudden changes in engine speed, such as engine braking caused by up-shifting or down-shifting, may cause the vehicle to skid, resulting in an accident.</td>
</tr>
<tr>
<td>● After driving through a puddle, lightly depress the brake pedal to make sure that the brakes are functioning properly. Wet brake pads may prevent the brakes from functioning properly. If the brakes on only one side are wet and not functioning properly, steering control may be affected, resulting in an accident.</td>
</tr>
<tr>
<td><strong>When shifting the shift lever</strong></td>
</tr>
<tr>
<td>Be careful not to shift the shift lever with the accelerator pedal depressed. This may lead to unexpected rapid acceleration of the vehicle that may cause an accident and result in death or serious injury.</td>
</tr>
<tr>
<td><strong>When the vehicle is stopped</strong></td>
</tr>
<tr>
<td>● Do not race the engine. If the vehicle is in any positions other than “P” or “N” the vehicle may accelerate suddenly and unexpectedly, and may cause an accident.</td>
</tr>
<tr>
<td>● Do not leave the vehicle with the engine on for a long time. If such a situation cannot be avoided, park the vehicle in an open space and check that exhaust fumes do not enter the vehicle interior.</td>
</tr>
<tr>
<td>● Always keep a foot on the brake pedal while the engine is running to prevent an accident caused by the vehicle moving.</td>
</tr>
</tbody>
</table>
### CAUTION

**When the vehicle is parked**
- Do not leave glasses, cigarette lighters, spray cans, or soft drink cans in the vehicle when it is in the sun. Failure to do so may result in the following:
  - Gas may leak from a cigarette lighter or spray can, and may lead to a fire.
  - The temperature inside the vehicle may cause the plastic lenses and plastic material of eye glasses to deform or crack.
  - Soft drink cans may fracture, causing the contents to spray over the interior of the vehicle, and may also cause a short circuit in the vehicle's electrical components.
- Always apply the parking brake, shift the shift lever to "P", stop the engine and lock the vehicle. Do not leave the vehicle unattended while the engine is running.
- Do not touch the exhaust pipe while the engine is running or immediately after turning the engine off. Doing so may cause burns.
- Do not leave the engine running in an area with snow build-up, or where it is snowing. If snowbanks build up around the vehicle while the engine is running, exhaust gases may collect and enter the vehicle. This may lead to death or a serious health hazard.

**Exhaust gases**
Exhaust gases include harmful carbon monoxide (CO) that is colorless and odorless. Inhaling exhaust gases may lead to death or a serious health hazard.
- If the vehicle is in a poorly ventilated area, stop the engine. In a closed area, such as a garage, exhaust gases may collect and enter the vehicle. This may lead to death or a serious health hazard.
- The exhaust should be checked occasionally. If there is a hole or crack caused by corrosion, damage to a joint or abnormal exhaust noise, be sure to have the vehicle inspected and repaired by your Lexus dealer. Failure to do so may allow exhaust gases to enter the vehicle, resulting in death or a serious health hazard.
## CAUTION

### When taking a nap in the vehicle

Always turn the engine off. Otherwise, you may accidentally move the shift lever or depress the accelerator pedal, which could cause an accident or fire due to engine overheating. Additionally, if the vehicle is parked in a poorly ventilated area, exhaust gases may collect and enter the vehicle, leading to death or a serious health hazard.

### When braking the vehicle

- When the brakes are wet, drive more cautiously. Braking distance increases when the brakes are wet, and may cause one side of the vehicle to brake differently than the other side. Also the parking brake may not securely hold the vehicle.
- If the brake actuator (GS460) or brake booster (GS350) does not operate, do not follow other vehicles closely and avoid downhill or sharp turns that require making. In this case, braking is still possible, but it will require more force on the pedal than usual. Braking distance may also increase.
- Do not pump the brake pedal if turning the engine off. Each push on the brake pedal uses up the reserve for the power-assisted brakes.
- The brake system consists of 3 (GS460) or 2 (GS350) individual hydraulic systems: If one of the systems fails, the other will still operate. In this case, the brake pedal should be depressed more firmly than usual and braking distance becomes longer. Do not drive your vehicle with only a single brake system. Have your brakes fixed immediately.

### If the vehicle becomes stuck or bogged (4WD models)

Do not spin the wheels recklessly when any of the tires is up in the air, or stuck in sand or mud, etc. This may damage the drive system components or propel the vehicle forward (or in another direction) and cause an accident.
2-1. Driving procedures

**NOTICE**

- **While driving the vehicle**
  Do not use the accelerator pedal or depress accelerator and brake pedals together to hold the vehicle on a hill.

- **When parking the vehicle**
  Always put the shift lever in “P”. Failure to do so may cause the vehicle to move or the vehicle may accelerate suddenly if the accelerator pedal is accidentally depressed.

- **Avoiding damage to vehicle parts**
  - Do not turn the steering wheel fully in either direction and hold it there for a long time.
    Doing so may damage the power steering motor.
  - When driving over bumps in the road, drive as slowly as possible to avoid damaging the wheels, underside of the vehicle, etc.

- **If you hear a squealing or scraping noise (brake pad wear limit indicators)**
  Have your Lexus dealer check and replace the brake pads as soon as possible.
  The rotor damage can result if the pads are not replaced when needed.

  Front brake only: Moderate levels of the brake pad and disc wear allow enhanced front braking power. As a result, the discs may wear more quickly than conventional brake discs. Therefore, when replacing the brake pads, Lexus recommends that you also have the thickness of the discs measured.

  It is dangerous to drive the vehicle when the wear limits of the brake pads and/or that of the brake discs are exceeded.
2.1. Driving procedures

![NOTICE]

- **If you get a flat tire while driving**
  A flat or damaged tire may cause the following situations. Hold the steering wheel firmly and gradually press the brake pedal to slow down the vehicle.
  - It may be difficult to control your vehicle.
  - The vehicle will make abnormal sounds.
  - The vehicle will behave abnormally.
  Replace a flat tire with a new one. (→P. 515)

- **When encountering flooded roads**
  Do not drive on a road that has flooded after heavy rain etc. Doing so may cause the following serious damage to the vehicle.
  - Engine stalling
  - Short in electrical components
  - Engine damage caused by water immersion

  In the event that you drive on a flooded road and the vehicle is flooded, be sure to have your Lexus dealer check the following.
  - Brake function
  - Changes in quantity and quality of oil and fluid used for the engine, automatic transmission, transfer (4WD models), differentials, etc.
  - Lubricant condition for the propeller shaft (4WD models), bearings and suspension joints (where possible) and the function of all joints, bearings, etc.
Starting the engine

**STEP 1** Check that the parking brake is set.

**STEP 2** Check that the shift lever is set in “P”.

**STEP 3** Sit in the driver’s seat and firmly depress the brake pedal.

The “ENGINE START STOP” switch indicator turns green.

**STEP 4** Press the “ENGINE START STOP” switch.
Changing “ENGINE START STOP” switch mode

Modes can be switched by pressing the “ENGINE START STOP” switch when carrying the electronic key on your person. (The engine can be started in any mode by operating the switch at the same time as depressing the brake pedal.)

1. OFF*
   Emergency flashers can be used.

2. ACCESSORY mode
   Some electrical components such as the audio system can be used.
   The “ENGINE START STOP” switch indicator turns amber.

3. IGNITION ON mode
   All electrical components can be used.
   The “ENGINE START STOP” switch indicator turns amber.

*: The power cannot be switched to OFF unless the shift lever is in “P”.
If the engine does not start
The immobilizer system may not have been deactivated. (→P. 73)

When the steering lock cannot be released
The green indicator light on the “ENGINE START STOP” switch will flash and a message will be shown on the multi-information display. Press the “ENGINE START STOP” switch again while turning the steering wheel left and right.

When the “ENGINE START STOP” switch indicator flashes in amber
The system may be malfunctioning. Have the vehicle inspected by your Lexus dealer immediately.

Auto power OFF function
If the vehicle is left in the ACCESSORY mode for more than an hour with the shift lever in “P”, the “ENGINE START STOP” switch will automatically turn OFF.

Electronic key battery depletion
→P. 28

When the electronic key battery is discharged
→P. 440

Conditions affecting operation
→P. 26

Leak detection pump
Several hours after the engine is turned off, you may hear a sound coming from underneath the luggage compartment for several minutes. This is normal operation and does not indicate a malfunction.
### 2-1. Driving procedures

</tr>
</tbody>
</table>
2-1. Driving procedures
Automatic transmission

Select a shift position appropriate for the driving conditions.

■ Shifting the shift lever

While the “ENGINE START STOP” switch is in IGNITION ON mode, depress the brake pedal and move the shift lever.

■ Shift position uses

<table>
<thead>
<tr>
<th>Shift position</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Parking the vehicle or starting the engine</td>
</tr>
<tr>
<td>R</td>
<td>Reversing</td>
</tr>
<tr>

<td>Neutral</td>
</tr>
<tr>
<td>D</td>
<td>Normal driving*1</td>
</tr>
<tr>
<td>S</td>
<td>“S” mode driving*2 (+P.127)</td>
</tr>
</tbody>
</table>

*1: To improve fuel consumption and reduce noises, set the shift lever in the “D” position for normal driving.

*2: By selecting shift ranges using “S” mode, you can control engine braking forces.
Selecting a driving mode

The following patterns can be selected to suit current driving and operating conditions.

1. **Power mode**
   - For powerful acceleration and driving in mountainous regions.

2. **Normal mode**

3. **Snow mode**
   - For accelerating and driving on slippery road surfaces, such as on snow.
   - Press “SNOW” to return to normal mode.
Changing shift ranges in “S” mode

Shift the shift lever to the “S” position and operate the shift lever.

1 Upshifting
2 Downshifting

► GS460

The initial shift range in “S” mode is automatically set to “7”, “6”, “5” or “4” according to vehicle speed. However, the initial shift range may not be set to “4” if the AI-SHIFT has operated while the shift lever was in the “D” position. (→P. 129)

► GS350

The initial shift range in “S” mode is automatically set to “5” or “4” according to vehicle speed. However, the initial shift range may be set to “3” or “2” if the AI-SHIFT has operated while the shift lever was in the “D” position. (→P. 129)
2-1. Driving procedures

**Shift ranges and their functions**
- You can choose from 8 levels (GS460) or 6 levels (GS350) of engine braking force.
- A lower shift range will provide greater engine braking force than a higher shift range, and the engine revolutions will also increase.
- If you accelerate while in ranges “1” to “7” (GS460) or “1” to “5” (GS350), the shift range may automatically range up in accordance with the vehicle’s speed.

**“S” mode**
When the shift range is “6” (GS460) or “4” (GS350) or lower, holding the shift lever toward “+” sets the shift range to “8” (GS460) or “6” (GS350).

**Downshifting restrictions warning buzzer (in the “S” mode)**
To help ensure safety and driving performance, downshifting operation may sometimes be restricted. In some circumstances, downshifting may not be possible even when the shift lever is operated. (The warning buzzer will sound twice.)

**When driving with the cruise control system (or dynamic radar cruise control system)**
The engine brake will not operate in the “S” mode, even when downshifting to “7”, “6”, “5” or “4” (GS460) or “5” or “4” (GS350). (→P. 150, 153)

**Snow mode automatic deactivation**
Snow mode is automatically deactivated if the “ENGINE START STOP” switch is turned to ACCESSORY or IGNITION ON mode after driving in snow mode.

**If the shift lever cannot be shifted from “P”**
→P. 524
If the S indicator does not come on even after shifting the shift lever to “S”

This may indicate a malfunction in the automatic transmission. Have the vehicle inspected by your Lexus dealer immediately.
(In this situation, the vehicle will operate as if the shift lever is in “D”.)

AI-SHIFT

The AI-SHIFT automatically shifts the gear to the optimal position according to the driver’s input and driving conditions.

GS460: The AI-SHIFT automatically operates when the shift lever is in the “D” or “S” position.

GS350: The AI-SHIFT automatically operates when the shift lever is in the “D” position. (Shifting the shift lever to the “S” position cancels the function.)
2-1. Driving procedures

Turn signal lever

- Turn signals can be operated when
  The “ENGINE START STOP” switch is in IGNITION ON mode.
- If the indicators flash faster than usual
  Check that a light bulb in the front or rear turn signal lights has not burned out.
2-1. Driving procedures
Parking brake

**NOTICE**

- **Before driving**

  Fully release the parking brake.
  Driving the vehicle with the parking brake set will lead to brake components overheating, which may affect braking performance and increase brake wear.

Sets the parking brake*
(Depressing the pedal again releases the parking brake.)

*: Fully depress the parking brake pedal with your left foot while depressing the brake pedal with your right foot.
The units used on the speedometer may differ depending on the target region.

The following gauges, meters and display illuminate when the “ENGINE START STOP” switch is in IGNITION ON mode.

1 Tachometer
   Displays the engine speed in revolutions per minute.

2 Speedometer
   Displays the vehicle speed.

3 Fuel gauge
   Displays the quantity of fuel remaining in the tank.

4 Engine coolant temperature gauge
   Displays the engine coolant temperature.

5 Multi-information display
   → P.139
2-2. Instrument cluster

Odometer and trip meter

- Odometer
  Displays the total distance the vehicle has been driven.
- Trip meter
  Displays the distance the vehicle has been driven since the meter was last reset. Trip meters A and B can be used to record and display different distances independently.

Odometer/trip meter and trip meter reset buttons

1. Changes the display
2. Resets the trip meter driving range to "0".

Instrument panel light control

The brightness of the instrument panel lights excluding the clock and outside temperature display, can be adjusted.

1. Brighter
2. Darker
3. Maximum brightness
To reduce glare or reflection of the instrument cluster, the cluster glass is tinted automatically or manually. You can select a setting from 7 modes.

Display the present setting, then change the mode.

To change the mode, press the button once and then again within 6 seconds. Each time you press the button, the mode changes in the following order:

1. “AUTO - Norm”
2. “AUTO - Lo”
3. “AUTO - Hi”
4. “MANUAL - 1”
5. “MANUAL - 2”
6. “MANUAL - 3”
7. “MANUAL - 4”

Mode 1 to 3: The cluster glass tint will be adjusted automatically depending on the intensity of sunlight in the surrounding.

Mode 4 to 7: The cluster glass tint will be fixed when a certain level of sunlight is reached in the surrounding.

(“Norm” to “Hi”, “1” to “4” referring to the level of cluster glass tint.)

The indicator and warning lights on the instrument cluster and center panel inform the driver of the status of the vehicle’s various systems.

Instrument cluster

The units used on the speedometer and some indicators may differ depending on the target region.

Center panel
2-2. Instrument cluster

The indicators inform the driver of the operating state of the vehicle’s various systems.

- **Turn signal indicator** ([→P.130](#))
- **Damping mode indicator** ([→P.183](#))
- **Headlight high beam indicator** ([→P.142](#))
- **Shift position and shift range indicators** ([→P.127](#))
- **Headlight indicator** ([→P.142](#))
- **Cruise control indicator** ([→P.153](#))
- **Tail light indicator** ([→P.142](#))
- **Intuitive parking assist indicator** ([→P.165](#))
- **Fog light indicator** ([→P.145](#))
- **Slip indicator** ([→P.185](#))
- **“AFS OFF” indicator** ([→P.143](#))
- **“VSC OFF” indicator** ([→P.186](#))
- **“ECT SNOW” indicator** ([→P.126](#))
- **“AIR BAG ON” and “AIR BAG OFF” indicators** ([→P.92](#))
- **“ECT PWR” indicator** ([→P.126](#))
2-2. Instrument cluster

■ Warning lights

Warning lights inform the driver of malfunctions in the indicated vehicle’s systems. (→P. 488)

* These lights turn on when the “ENGINE START STOP” switch is turned to IGNITION ON mode to indicate that a system check is being performed. They will turn off after the engine is on, or after a few seconds. There may be a malfunction in a system if the lights do not come on, or turn off. Have the vehicle inspected by your Lexus dealer.

CAUTION

■ If a safety system warning light does not come on

Should a safety system light such as ABS and the SRS airbag warning light not come on when you turn to IGNITION ON mode, this could mean that these systems are not available to help protect you in an accident, which could result in death or serious injury. Have the vehicle inspected by your Lexus dealer immediately if this occurs.
2-2. Instrument cluster
Multi-information display

The multi-information display presents the driver with a variety of driving-related data, including the current driving range.

- **Trip information** (→P.140)
  Displays driving range, fuel consumption and other cruising related information.
- **Intuitive parking assist display (if equipped)** (→P.166)
  Automatically displayed when using intuitive parking assist.
- **Dynamic radar cruise control display (if equipped)** (→P.153)
  Automatically displayed when using dynamic radar cruise control.
- **Warning messages** (→P.497)
  Automatically displayed when a malfunction occurs in one of the vehicle's systems.
2-2. Instrument cluster

Display items can be switched by pushing the “DISP” switch.

Trip information

■ Driving range

Displays the estimated maximum distance that can be driven with the quantity of fuel remaining.

- This distance is computed based on your average fuel consumption. As a result, the actual distance that can be driven may differ from that displayed.
- When only a small amount of fuel is added to the tank, the display may not be updated.

■ Average fuel consumption after refueling

Displays the average fuel consumption since the vehicle was last refueled.

■ Current fuel consumption

Displays the current rate of fuel consumption.

■ Outside temperature

Displays the outside air temperature.

The temperature range that can be displayed is from -40°F (-40°C) to 122°F (50°C).
### System check display

After switching the "ENGINE START STOP" switch to IGNITION ON mode, "CHECK" is displayed while system operation is checked. When the system check is complete, "COMPLETED" is displayed before returning to the normal screen.

### NOTICE

- **The multi-information display at low temperatures**

  Allow the interior of the vehicle to warm up before using the liquid crystal information display. At extremely low temperatures, the information display monitor may respond slowly, and display changes may be delayed.
2-3. Operating the lights and windshield wipers

Headlight switch

The headlights can be operated manually or automatically.

The side marker, parking, tail, license plate and instrument panel lights turn on.

The headlights and all lights listed above turn on.

The headlights and all the lights listed above turn on and off automatically. (When the “ENGINE START STOP” switch is in IGNITION ON mode.)

Turning on the high beam headlights

1. With the headlights on, push the lever forward to turn on the high beams.

Pull the lever back to the center position to turn the high beams off.

2. Pull the lever toward you to turn on the high beams.

Release to turn them off. You can flash the high beams with the headlights on or off.
2-3. Operating the lights and windshield wipers

**AFS (Adaptive Front lighting System) (if equipped)**

AFS improves visibility at intersections and on curves by automatically adjusting the level of the headlights according to vehicle speed and the degree of the tire angle that are controlled by steering input.

Operates at speeds of 6 mph (10 km/h) or higher.

**Deactivating AFS**

Press the switch to turn it off.

The indicator turns on when the AFS is deactivated.

---

**Daytime running light system**

To make your vehicle more visible to other drivers, the headlights turn on automatically (at a reduced intensity) whenever the engine is started and the parking brake is released. Daytime running lights are not designed for use at night.

**Headlight control sensor**

The sensor may not function properly if an object is placed on the sensor, or anything that blocks the sensor is affixed to the windshield.

Doing so interferes with the sensor detecting the level of ambient light and may cause the automatic headlight system to malfunction.
2-3. Operating the lights and windshield wipers

- **Automatic light off system**
  The headlights and tail lights turn off 30 seconds after all doors are closed if the “ENGINE START STOP” switch has been switched to ACCESSORY mode or turned OFF while the headlights are turned on. (The lights turn off immediately if the button on the key is pressed after all doors are locked.)
  To turn the lights on again, switch to IGNITION ON mode, or turn the light switch off once and then back to the position.

- **Automatic headlight leveling system**
  The level of the headlights is automatically adjusted according to the number of passengers and the loading condition of the vehicle to ensure that the headlights do not interfere with other road users.

- **If the indicator flashes...**
  It may indicate a malfunction in the system. Contact your Lexus dealer.

- **Customization that can be configured at Lexus dealer**
  Settings (e.g. light sensor sensitivity) can be changed.
  (Customizable features → P. 572)

**NOTICE**

- **To prevent 12 volt battery discharge**
  Do not leave the lights on longer than necessary when the engine is off.
2-3. Operating the lights and windshield wipers

Fog light switch

The fog lights improve visibility in difficult driving conditions, such as in rain or fog. They can be turned on only when the headlights are on low beam.
2-3. Operating the lights and windshield wipers

Windshield wipers and washer

■ Intermittent wiper with interval adjuster

Wiper intervals can be adjusted for intermittent operation (when is selected).

1. Decreases the intermittent windshield wiper frequency
2. Increases the intermittent windshield wiper frequency
3. Intermittent wiper operation
4. Low speed wiper operation
5. High speed wiper operation
6. Temporary operation
7. Wash/wipe operation

■ Rain-sensing windshield wipers

With “AUTO” selected, the wipers will operate automatically when the sensor detects falling rain. The system automatically adjusts wiper timing in accordance with rain volume and vehicle speed.

1. Sensor sensitivity (low)
2. Sensor sensitivity (high)
3. Rain-sensing wiper operation
4. Low speed wiper operation
5. High speed wiper operation
6. Temporary operation
7. Wash/wipe operation
The windshield wiper and washer can be operated when
The “ENGINE START STOP” switch is in IGNITION ON mode.

Dripping prevention wiper sweep
After washing and wiping operation several times, the wipers operate one more
time after a short delay to prevent dripping.
However, the last sweep will not happen if the vehicle is traveling above 106 mph
(170 km/h).

Effects of vehicle speed on wiper operation
Vehicle speed affects the following even when the wipers are not “AUTO” mode.
- Intermittent wiper interval (\(\text{ intermittent }\) mode)
- Wiper operation when the washer is being used (delay until drip prevention
  wiper sweep occurs)
With \(\text{ intermittent }\) selected, wiper operation will be switched from low speed to intermittent wiper operation only when the vehicle is stationary.

Rain drop sensor (vehicles equipped with rain-sensing windshield wipers)
The sensor judges the amount of raindrops.
2-3. Operating the lights and windshield wipers

■ If no windshield washer fluid sprays
  Check that the washer nozzles are not blocked if there is washer fluid in the windshield washer fluid reservoir.

■ In extremely hot or cold weather
  The system will turn off if the windshield gets extremely hot (at more than 176°F [80°C]) or cold (at less than 14°F [-10°C]).

■ Customization that can be configured at Lexus dealer
  Settings (e.g. drip prevention function) can be changed. (Customizable features → P. 573)

⚠️ CAUTION

■ Caution regarding the use of windshield wipers in “AUTO” mode
  The windshield wipers may operate unexpectedly if the sensor is touched or the windshield is subject to vibration in “AUTO” mode. Take care that your fingers or anything else do not become caught in the windshield wipers.

⚠️ NOTICE

■ When the windshield is dry
  Do not use the wipers, as they may damage the windshield.

■ When there is no washer fluid spray from the nozzle
  Damage to the washer fluid pump may be caused if the lever is pulled toward you and held continually.
2-3. Operating the lights and windshield wipers

Headlight cleaner switch (if equipped)

Washer fluid can be sprayed on the headlights.

Press the switch to clean the headlights.

- The headlight cleaner can be operated when
  The “ENGINE START STOP” switch is in IGNITION ON mode and the headlight switch is turned ON.

⚠️ NOTICE

- When the washer fluid tank is empty
  Do not use this function, as the washer fluid pump may overheat.
Use the cruise control to maintain a set speed without using the accelerator.

- **Set the vehicle speed**
  
  Press the “ON-OFF” button to activate the cruise control.
  
  Press the button once more to deactivate the cruise control.

  ![Cruise Control Button](image)

  Accelerate or decelerate to the desired speed and press the lever down to set the cruise control speed.

- **Adjusting the speed setting**
  
  1. Increase speed
  2. Decrease speed

  Hold the lever until the desired speed setting is obtained.

  Fine adjustment of the set speed (approximately 1.0 mph [1.6 km/h]) can be made by lightly pressing the lever up or down and releasing it.
151

2.4. Using other driving systems

Canceling and resuming regular acceleration

| 1 Cancel | Pull the lever towards you to cancel cruise control. The setting is also canceled when the brake pedal is depressed. |
| 2 Resume | To resume cruise control and return to the set speed, push the lever up. |

Cruise control can be set when

- The shift lever is in the “D” or “4”, “5”, “6”, “7” or “8” (GS460) or “4”, “5”, or “6” (GS350) range of “S”.
- Vehicle speed is between approximately 25 mph (40 km/h) and 125 mph (200 km/h).

Accelerating

The vehicle can be accelerated normally. After acceleration, the set speed resumes.

Automatic cruise control cancelation

The set speed is automatically canceled in any of the following situations.

- Actual vehicle speed falls more than 10 mph (16 km/h) below the preset vehicle speed
  At this time, the memorized set speed is not retained.
- Actual vehicle speed is below 25 mph (40 km/h)
- VSC is activated
2-4. Using other driving systems

■ If the cruise control indicator light flashes

Turn the “ON-OFF” button off once, and then reactivate the system.
If the cruise control speed cannot be set or if the cruise control cancels immediately after being activated, there may be a malfunction in the cruise control system. Have the vehicle inspected by your Lexus dealer.

⚠️ CAUTION

■ To avoid operating the cruise control by mistake

Keep the “ON-OFF” button off when not in use.

■ Situations unsuitable for cruise control

Do not use cruise control in any of the following situations. Doing so may result in control of the vehicle being lost and could cause serious or fatal accident.

● In heavy traffic
● On roads with sharp bends
● On slippery roads, such as those covered with rain, ice or snow
● On steep hills
    Vehicle speed may exceed the set speed when driving down a steep hill.
● On winding roads
Dynamic radar cruise control (if equipped)

Dynamic radar cruise control supplements conventional cruise control with a vehicle-to-vehicle distance control. In the vehicle-to-vehicle distance control mode, the vehicle automatically accelerates or decelerates in order to maintain a set following distance from vehicles ahead.

**Set the vehicle speed**

1. Press the “ON-OFF” button to activate the cruise control.
2. Press the button once more to deactivate.
3. Accelerate or decelerate to the desired speed and press the lever down to set.
2-4. Using other driving systems

Selecting conventional constant speed control mode

Press the “ON-OFF” button to activate the cruise control.
Press the button once more to deactivate the cruise control.
Switch to constant speed control mode.
(Push the lever away from you and hold for approximately 1 second.)
Vehicle-to-vehicle distance control mode is always reset when the “ENGINE START STOP” switch is switched to IGNITION ON mode.

Adjusting the speed setting

Increase speed
Decrease speed
Hold the lever until the desired speed setting is displayed.
In the constant speed control mode, fine adjustment of the set speed (approximately 1.0 mph [1.6 km/h]) can be made by lightly pressing the lever up or down and releasing it.
2-4. Using other driving systems

■ Canceling and resuming the speed setting

1. Cancel
   Pull the lever towards you to cancel cruise control.
   The setting is also canceled when the brake pedal is depressed.

2. Resume
   To resume cruise control and return to the set speed, push the lever up.

■ Changing the vehicle-to-vehicle distance

Each pull of the switch changes the vehicle-to-vehicle distance:

1. Long
2. Medium
3. Short

The vehicle-to-vehicle distance is automatically set to the long mode when the “ENGINE START STOP” switch is set to the IGNITION ON mode.

A mark will be displayed to indicate the presence of the vehicle if a vehicle is running ahead of you.
Cruising in vehicle-to-vehicle distance control mode

This mode employs a radar sensor to detect the presence of vehicles within 400 ft. (120 m) ahead and to judge the distance between your vehicle and those vehicles.

Note that vehicle-to-vehicle distance will close when traveling on long downhill slopes.

1. Example of constant speed cruising
   When there are no vehicles ahead
   The vehicle travels at the speed set by the driver. The desired vehicle-to-vehicle distance can also be set by operating the vehicle-to-vehicle distance switch.

2. Example of deceleration cruising
   When the vehicle ahead is driving slower than the set speed
   When a vehicle is detected running ahead of you, in the same lane, the system automatically decelerates your vehicle. When a greater reduction in vehicle speed is necessary, the system applies the brakes. A warning tone warns you when the system cannot decelerate sufficiently to prevent your vehicle from closing on the vehicle ahead.
Example of follow-up cruising
When following a vehicle driving slower than the set speed
The system continues follow-up cruising while adjusting for changes in the speed of the vehicle ahead in order to maintain the vehicle-to-vehicle distance set by the driver.

Example of acceleration
When there are no longer vehicles driving slower than the set speed in the lane ahead
When the vehicle ahead of you executes a lane change, the system slowly accelerates until the set vehicle speed is reached. The system then returns to fixed speed cruising.

Approach warning
When your vehicle is too close to a vehicle ahead, and sufficient automatic deceleration via the cruise control is not possible, the display will flash and buzzer will sound to alert the driver. An example of this would be if another driver cuts in front of you while you are following a vehicle. Apply the brakes to ensure an appropriate vehicle-to-vehicle distance.

Warning lights and messages for dynamic radar cruise control
Warning lights, messages and buzzers are used to indicate a system malfunction or to inform the driver of the need for caution while driving. (→P. 500)

Switching modes
The mode cannot be switched to constant speed control mode if vehicle-to-vehicle distance control mode has been used. The mode also cannot be switched from constant speed control to vehicle-to-vehicle control mode. Turn the system off by pressing the “ON-OFF” button, and turn it on again.
2-4. Using other driving systems

- The dynamic radar cruise can be set when
  - The shift lever is in “D” or the “4”, “5”, “6”, “7” or “8” (GS460) or “4”, “5” or “6” (GS350) range of “S”.
  - Vehicle speed is between approximately 27 mph (43 km/h) and 87 mph (139 km/h).

- Accelerating
  The vehicle can be accelerated normally.

- Automatically canceling vehicle-to-vehicle distance control
  Vehicle-to-vehicle distance control driving is automatically canceled in the following situations.
  - Actual vehicle speed falls below 25 mph (40 km/h)
  - VSC is activated
  - The windshield wipers are operating at high speed
  - The mode select switch is set to snow mode
  - The sensor cannot operate correctly because it is covered in some way
    Vehicle-to-vehicle distance control driving must be reset by turning the “ON-OFF” button on again.

  If vehicle-to-vehicle distance control driving is automatically canceled for any other reason, there may be a malfunction in the system. Contact your Lexus dealer.

- Automatically canceling constant speed control
  The set speed is automatically canceled in the following situations.
  - Actual vehicle speed is more than 10 mph (16 km/h) below the preset vehicle speed
  - Actual vehicle speed falls below 25 mph (40 km/h)
  - VSC is activated
2-4. Using other driving systems

Vehicle-to-vehicle distance settings
Select a distance from the table below. Note that the distances shown correspond to a vehicle speed of 50 mph (80 km/h). Vehicle-to-vehicle distance increases/decreases in accordance with vehicle speed.

<table>
<thead>
<tr>
<th>Distance options</th>
<th>Vehicle-to-vehicle distance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Long</td>
<td>Approximately 210 ft. (65 m)</td>
</tr>
<tr>
<td>Medium</td>
<td>Approximately 150 ft. (45 m)</td>
</tr>
<tr>
<td>Short</td>
<td>Approximately 100 ft. (30 m)</td>
</tr>
</tbody>
</table>

Radar sensor and grille cover
Always keep the sensor and grille cover clean to ensure that the vehicle-to-vehicle distance control operates properly. (Some obstructions, such as snow, ice or plastic objects, cannot be detected by the obstruction sensor.) Dynamic radar cruise control is canceled if an obstruction is detected.

Grille cover 1
Radar sensor 2
2-4. Using other driving systems

Certification

► For vehicles sold in the U.S.A.

FCC WARNING
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF exposure information
This device complies with the FCC RF exposure requirements.

► For vehicles sold in Canada

Operation is subject to the following two conditions;
(1) This device may not cause interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation of the device.
CAUTION

■ Before using dynamic radar cruise control
Do not overly rely on vehicle-to-vehicle distance control. Be aware of the set vehicle speed. If automatic deceleration/acceleration is not appropriate, adjust the vehicle speed, as well as the distance between your vehicle and vehicles ahead by applying the brakes, etc.

■ To avoid operating the dynamic radar cruise control by mistake
Keep the “ON-OFF” button off when not in use.

■ Situations unsuitable for dynamic radar cruise control
Do not use dynamic radar cruise control in any of the following situations. Doing so may result in inappropriate control of speed and could cause serious or fatal accident.

- In heavy traffic
- On roads with sharp bends
- On winding roads
- On slippery roads, such as those covered with rain, ice or snow
- On steep downhills, where there are sudden changes between sharp up and down gradients
  Vehicle speed may exceed the set speed when driving down a steep hill.
- At entrances to expressways
- When weather conditions are bad enough that they may prevent the sensors from functioning correctly (fog, snow, sandstorm, etc.)
- When the approach warning buzzer can be heard often
2-4. Using other driving systems

</tbody>
</table>
2-4. Using other driving systems

CAUTION

■ To ensure the radar sensor functions correctly

Do not do the following to the sensor or grille cover as doing so may cause the sensor not to function correctly and could result in an accident.

- Stick or attach anything to them
- Leave them dirty
- Disassemble, subject them to strong shocks
- Modify or paint them
- Replace them with non-genuine parts

■ Handling the radar sensor

Observe the following to ensure the cruise control system can function effectively.

- Keep the sensor and front grille clean at all times.
  Clean the sensor and front grille with a soft cloth so you do not mark or damage them.

- Do not subject the sensor or surrounding area to a strong impact.
  If the sensor moves even slightly off position, the system may malfunction. If the sensor or surrounding area is subject to a strong impact, always have the area inspected and adjusted by a Lexus dealer.

- Do not disassemble the sensor.
- Do not attach accessories or stickers to the sensor, grille or surrounding area.
- Do not modify or paint the sensor and grille.
Intuitive parking assist uses sensors in the front and rear of the vehicle to detect the distance between the vehicle and any obstacles, and informs the driver of this distance using the multi-information display, the touch screen, and warning beeps. The system may be used at speeds less than about 6 mph (10 km/h).

**Sensor types**

1. **Dual sensors**
   - There are 4 sensors installed in the front bumper, two in the center section to detect obstacles directly ahead, and one in each corner of the bumper, to detect obstacles in those areas.
   - The dual sensors detect obstacles ahead of the vehicle, and judge whether avoidance maneuvers are necessary (whether the obstacle will come within 0.8 ft. [25 cm] of the vehicle), according to the distance between the obstacle and the vehicle, and the steering wheel position. The screen display and beeps will change accordingly.

2. **Rear corner sensors**
   - These sensors detect obstacles around the rear corners of the vehicle.

3. **Back sensors**
   - These sensors detect obstacles behind the vehicle.
Intuitive parking assist switch

Press the switch to turn the system on/off.

If the intuitive parking assist is turned on, the indicator light will come on, and the system will operate under the following conditions:

- The dual sensors will operate if the shift lever is in a position other than "R" or "P".
- All corner sensors and the back sensors will operate if the shift lever is in "R".

When driving
2-4. Using other driving systems

Multi-information display and touch screen

If the sensors detect an obstacle, it is displayed on the multi-information display in the instrument cluster. You can change the conditions under which information is displayed on the touch screen. (→P.173)

▲ Multi-information display

1. Dual sensor detection
2. Steering guide symbol
3. Rear corner sensor detection
4. Back sensor detection

▲ Touch screen

1. Dual sensor detection
2. Steering guide symbol
3. Rear corner sensor detection
4. Back sensor detection

If the intuitive parking assist is operated while the rear view monitor is showing, the intuitive parking assist will be shown in the upper right corner of the screen. (→P.169)
2-4. Using other driving systems

Sensor detection display, obstacle distance and beeps

When the intuitive parking assist is activated, the approximate distance to the obstacle is displayed. Also, if an obstacle with which a collision is possible is detected, a warning beep will sound.

Steering guide symbol

Displays the steering maneuvers required to avoid an obstacle. Move the steering wheel in the direction shown by the arrow.

The steering guide symbol only shows the maneuvers necessary to avoid an obstacle.

When using the system, always check your surroundings for safety.

Beeps and obstacle distance

A beep sounds when an obstacle with which there is a danger of collision is detected. As the vehicle moves closer to the obstacle, the interval of the beep becomes shorter.

- When the following obstacle distances are reached, the beep changes from intermittent to continuous:
  - If the distance to the obstacle detected by the dual sensors or rear corner sensors is less than 0.8 ft. (25 cm).
  - If the distance to the obstacle detected by the back sensors is less than 1.1 ft. (35 cm).
- If obstacles are detected by the dual sensors in 2 places at once, or if both rear corner sensors detect obstacles at the same time, the system will sound a warning beep for the closer of the 2 obstacles.
2-4. Using other driving systems

If multiple obstacles are detected in front and behind the vehicle at the same time, the warning beep will change in the following manner:

- If an obstacle has been detected within 0.8 ft. (25 cm) of the front or rear of the vehicle (a continuous beep is sounding), and a new obstacle is detected near a different area of the vehicle, the warning beep will sound 6 beeps then one continuous beep.
- If an obstacle has been detected within 0.8 ft. (25 cm) of the front or rear of the vehicle (a continuous beep is sounding), and a new obstacle is detected within 0.8 ft. (25 cm) of a different area of the vehicle, the warning beeps will sound 2 beeps then one continuous beep.

You can change the volume of the warning beeps. (→P.173)

### Obstacle detection range

1. About 10.0 ft. (300 cm)
2. About 3.0 ft. (100 cm)
3. About 5.0 ft. (150 cm)
4. About 1.5 ft. (50 cm)

The detection area of the sensors is shown to the left.

If obstacles move too close to the sensors, they will not be detected.
If the malfunction screen is displayed, the dual sensor detection range will be shortened from 3.0 ft. (100 cm) to 1.5 ft. (50 cm).
Warning beep volume and touch screen settings

You can change the warning beep volume and touch screen operating conditions.

Press \( \text{INFO} \) to display the “Information” screen. Then touch \( \text{Set} \).

- **Changing the warning beep volume**
  
  **STEP 1** Touch \( \text{Volume} \).
  
  **STEP 2** Adjust the beep volume, then touch \( \text{OK} \).

- **Changing the touch screen operating conditions**
  
  **STEP 1** Touch \( \text{Display Setting} \).
  
  **STEP 2** Set one of the following operating condition, then touch \( \text{OK} \).

  - \( \text{Static} \): Displays when the sensors detect an obstacle.
  - \( \text{Dynamic} \): Displays if maneuvers are required to avoid an obstacle (if an obstacle is likely to come within 0.8 ft. [25 cm] of the vehicle).
  - \( \text{Display Off} \): Does not display the intuitive parking assist detection screen.

When an obstacle is detected while the rear view monitor is in use, the warning indicator will appear in the top right of the screen even if \( \text{Display Off} \) has been selected.
The intuitive parking assist can be operated when
The “ENGINE START STOP” switch is in the IGNITION ON mode.

When the system malfunctions
- If a malfunction occurs and no obstacles have been detected, a warning is displayed, and a malfunction beep sounds for 7 seconds.
  If an obstacle has been detected, or another malfunction occurs in a different sensor, the malfunction beeps will not sound.
- In the following circumstances the displayed warning will disappear:
  - If you switch the screen to a different mode.
  - If you turn off the intuitive parking assist main switch.
  - If the vehicle speed exceeds 6 mph (10 km/h). Once the vehicle speed drops below 6 mph (10 km/h), the warning will be displayed again.
- If the malfunction screen is displayed, the detection range of the dual sensors is shortened. In this case, the necessity for obstacle evasion (whether the obstacle will come within 0.8 ft. [25 cm] of the vehicle or not) will not be calculated.
When using the intuitive parking assist

- The sensors’ detection areas and reaction times are limited. When moving forward or reversing, check the areas surrounding the vehicle (especially the sides of the vehicle) for safety, and drive slowly, using the brake to control the vehicle’s speed.
  
  - The sensors’ detection areas are limited to the areas around the vehicle’s front and rear bumpers.
  - Depending on the shape of the obstacle and other factors, the detection distance may shorten, or detection may be impossible.
  - There will be a short delay between obstacle detection and display. Even at slow speeds, there is a possibility that the obstacle will come within 0.8 ft. (25 cm) of the vehicle before the display is shown and the warning beep sounds.
  - Braking distance may differ according to the road conditions (rain, gravel etc.).
  - It might be difficult to hear beeps due to the volume of audio system or air flow noise of air conditioning system.
  - For long obstacles such as walls, the obstacle warning may change as the obstacle gets closer.
In the following situations, the intuitive parking assist may not function correctly, possibly leading to an accident.

- There is ice, snow or mud on the sensors. (Wiping the sensors will resolve this problem.)
- The sensor area is frozen. (Thawing the area will resolve this problem.)
  In especially cold weather, if a sensor is frozen the screen may show an abnormal display, or obstacles may not be detected.
- The vehicle angle is especially wide.
- In harsh sunlight or intense cold weather.
- When driving on bumpy, sloped or gravel roads, or over grass.
- If there is something producing ultrasonic waves nearby, such as another vehicle’s horn, motorcycle engine noise, air braking sound from heavy-duty vehicles, or another vehicle using the intuitive parking assist.
- In heavy rain, or if water is splashed on the sensors.
- If a commercial fender pole or radio antenna is installed.
- If towing eyelet is installed on your vehicle.
- If moving towards a high curb or a curb corner.
- Objects such as signs may cause the detection distance to shorten.
- The area directly under the bumpers is not detected.
  Objects lower than the sensors or thin stakes etc. may be detected initially, but as they draw closer, they may cease to be detected.
- If obstacles draw too close to the sensor.

Obstacles that may not be detected correctly
The following obstacles may not be detected.
- Thin objects such as wire, fencing or rope.
- Objects that absorb sound waves, such as cotton or snow.
- Objects with sharp corners.
- Objects where the upper section projects out over the lower section.
- Low objects.

If the display flashes and a message is displayed
→ P. 507
2.4. Using other driving systems

**Certification**

- For vehicles sold in the U.S.A.

This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions;
(1)  This device may not cause harmful interference, and
(2)  This device must accept any interference received, including interference that may cause undesired operation.

- For vehicles sold in Canada

This ISM device complies with Canadian ICES-001.
Cet appareil ISM est conforme a la norme NMB-001 du Canada.

**CAUTION**

- **While driving**

To reduce the chance of injury in the event of an accident or sudden stop, keep the switch box closed.

- **When using the intuitive parking assist**

Observe the following precautions.

- The back sensors and rear corner sensors do not judge whether there is danger of a collision, nor whether the obstacle can be avoided using the steering wheel. When reversing, always check your surroundings and behind the vehicle for safety.

- The steering guide symbol (arrow) is an approximate guide regarding obstacles. It is not driving instructions. When moving forward or reversing, always check your surroundings for safety and drive carefully.

- Do not install accessories within the sensors’ detection areas, as this may cause the intuitive parking assist to function incorrectly, possibly leading to an accident.
2-4. Using other driving systems

The rear view monitor system assists the driver by displaying an image of the view behind the vehicle while reversing. The image is displayed in reverse on the screen. This allows the image to appear in the same manner as that of the rear view mirror.

Rear view image is displayed when the shift lever is in “R”.

If you move the lever out of “R”, the screen returns to the previous one.
### Rear view monitor system camera

In the following cases, it may be difficult to see the images on the screen, even when the system is functioning correctly.

- In the dark (e.g. at night).
- If the temperature near the lens is extremely high or low.
- If water droplets get on the camera, or when humidity is high (e.g. when it rains).
- If foreign matter (e.g. snow or mud) get on the camera lens.
- If the sun or headlights are shining directly into the camera lens.

### Smear effect

If a bright light (for example, sunlight reflected off the vehicle body) is picked up by the camera, a smear effect* peculiar to the camera may occur.

*: Smear effect—A phenomenon that occurs when a bright light (for example, sunlight reflected off the vehicle body) is picked up by the camera; when transmitted by the camera, the light source appears to have a vertical streak above and below it.
When using the rear view monitor system

- Never depend solely on the monitor system when reversing.
- Always check visually and with the mirrors to confirm your intended path is clear.
- Depicted distances between objects and flat surfaces differ from actual distances.
- Do not use the system if the trunk is open.

Conditions which may affect the rear view monitor system

- If the back of the vehicle is hit, the camera’s position and mounting angle may change. Contact your Lexus dealer.
- Rapid temperature changes, such as when hot water is poured on the vehicle in cold weather, may cause the system to function abnormally.
- If the camera lens is dirty, it cannot transmit a clear image. Rinse with water and wipe with a soft cloth. If extremely dirty, wash with a mild cleanser and rinse.
- The displayed image may be darker and moving images may be slightly distorted when the system is cold.
### NOTICE

**Displayed area**

The area covered by the camera is limited. Objects which are close to either corner of the bumper or under the bumper cannot be seen on the screen.

The area displayed on the screen may vary according to vehicle orientation or road conditions.

![Displayed area](image_url)
AVS controls the suspension according to the road and driving conditions. Selecting an optimum driving mode allows good vehicle posture and steering wheel operation in conjunction with VGRS, EPS and active stabilizer suspension system (if equipped).

1. **Sports mode**
   For winding mountain road driving or high speed driving.

2. **Normal mode**
   For normal driving.
To help enhance driving safety and performance, the following systems operate automatically in response to various driving situations. Be aware, however, that these systems are supplementary and should not be relied upon too heavily when operating the vehicle.

■ ABS (Anti-lock Brake System)
  Helps to prevent wheel lock when the brakes are applied suddenly, or if the brakes are applied while driving on a slippery road surface.

■ Brake assist
  Generates an increased level of braking force after the brake pedal is depressed, when the system detects a panic stop situation.

■ VSC (Vehicle Stability Control)
  Helps the driver to control skidding when swerving suddenly or turning on slippery road surfaces.

■ TRAC (Traction Control)
  Maintains drive power and prevents the rear wheels from spinning when starting the vehicle or accelerating on slippery roads.

■ Hill-start assist control
  Helps prevent the vehicle from rolling backwards when starting on an incline or slippery slope. It operates for approximately 5 seconds at maximum.

■ EPS (Electric Power Steering)
  Employs an electric motor to reduce the amount of effort needed to turn the steering wheel.

■ Active stabilizer suspension system (if equipped)
  Turns at smaller angles to maintain the stable vehicle posture.
When driving

2-4. Using other driving systems

- PCS (Pre-Collision System) (if equipped)
  → P. 190
- VGRS (Variable Gear Ratio Steering) (GS460)
  Adjusts the wheel turning angle in accordance with the vehicle speed and steering wheel movement.
- VDIM (Vehicle Dynamics Integrated Management)
  Provides integrated control of the ABS, VSC, TRAC, hill-start assist control, VGRS (GS460) and EPS systems.
  Maintains vehicle stability when swerving on slippery road surfaces by controlling the brakes, engine output, and the movement of the front wheels.

When the VSC/TRAC/hill-start assist control systems are operating

If the vehicle is in danger of slipping, rolling backwards when starting on an incline, or if the rear wheels (2WD models) or all wheels (4WD models) spin, the slip indicator light flashes to indicate that the VSC/TRAC/hill-start assist control systems have been engaged.

A buzzer (intermittent) sounds to indicate that VSC is operating.

The stop lights and high mounted stoplight turn on when the hill-start assist control system is operating.

The slip indicator light flashes as well when ABS is operating.
To disable TRAC and/or VSC

If the vehicle gets stuck in fresh snow or mud, TRAC and VSC may reduce power from the engine to the wheels. You may need to turn the system off to enable you to rock the vehicle in order to free it.

■ Turning off TRAC only

Quickly push and release the button to turn off TRAC.

The slip indicator light should come on.

Push the button again to turn the system back on.

■ Turning off both TRAC and VSC

Push and hold the button for more than 3 seconds while the vehicle is stopped to turn off TRAC and VSC.

The slip and VSC OFF indicator light should come on.

Push the button again to turn the system back on.
2.4. Using other driving systems

- **Automatic reactivation of TRAC and VSC**
  Turning the “ENGINE START STOP” switch OFF after turning off the TRAC and VSC systems will automatically re-enable them.

- **Automatic TRAC reactivation**
  If only the TRAC system is turned off, the TRAC system will turn on when the vehicle speed increases.

- **Automatic TRAC and VSC reactivation**
  If the TRAC and VSC systems are turned off, the systems will not turn on even when the vehicle speed increases.

- **Sounds and vibrations caused by the ABS, brake assist, VSC, TRAC, hill-start assist control and VGRS (GS460) systems**
  - A sound may be heard from the engine compartment when the engine is started or just after the vehicle begins to move. This sound does not indicate that a malfunction has occurred in any of these systems.
  - Any of the following conditions may occur when the above systems are operating. None of these indicates that a malfunction has occurred.
    - Vibrations may be felt through the vehicle body and steering.
    - A motor sound may be heard after the vehicle comes to a stop.
    - The brake pedal may pulsate slightly after the ABS is activated.
    - The brake pedal may move down slightly after the ABS is activated.

- **Hill-start assist control operating conditions**
  This system comes into operation under the following conditions after the brake pedal has been depressed and the vehicle has come to a stop:
  - The shift lever is in the “D” or “S”.
  - The system has detected that the vehicle is moving backwards.
  - GS350: The brake pedal is not depressed.
2-4. Using other driving systems

■ Reduced effectiveness of EPS

The effectiveness of EPS is reduced to prevent the system from overheating when there is frequent steering input over an extended period of time. The steering wheel may feel heavy as a result. Should this occur, refrain from excessive steering input or stop the vehicle and turn the engine off. The system should return to normal about 10 minutes.

■ GS460: VGRS is disabled in the following situations

● During stopping or the steering wheel has been moved for a long time while driving at lower speeds.
● After the engine is restarted at less than -22°F (-30°C).

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Any of the following conditions may result in an accident which could cause death or serious injury:</td>
</tr>
</tbody>
</table>

■ The ABS does not operate effectively when

● The limits of tire gripping performance have been exceeded.
● The vehicle hydroplanes while driving at high speed on the wet or slick road.

■ Stopping distance when the ABS is operating will exceed that of normal conditions

The ABS is not designed to shorten the vehicle's stopping distance. Always maintain a safe distance from the vehicle in front of you in the following situations.

● When driving on dirt, gravel or snow-covered roads
● When driving with tire chains
● When driving over bumps in the road
● When driving over roads with potholes or roads with uneven roads

■ TRAC may not operate effectively when

Directional control and power may not be achievable while driving on slippery road surfaces, even if the TRAC is operating.

Do not drive the vehicle in conditions where stability and power may be lost.
### CAUTION

- **The hill-start assist control may not operate effectively when**
  - On steep inclines.
  - On icy surfaces.
- **When the VSC is activated**
  The slip indicator light flashes and a warning buzzer sounds. Always drive carefully. Reckless driving may cause an accident. Exercise particular care when the indicator light flashes and a buzzer sounds.
- **When TRAC and VSC are off**
  Be especially careful and drive at a speed appropriate to the road conditions. As these are systems to ensure vehicle stability and driving force, do not turn off TRAC and VSC unless necessary.
- **Replacing tires**
  Make sure that all tires are of the same size, brand, tread pattern and total load capacity. In addition, make sure that the tires are inflated to the specified tire pressure level.
  The ABS and VSC will not function correctly if different tires are fitted on the vehicle.
  Contact your Lexus dealer for further information when replacing tires or wheels.
- **Handling of tires and suspension**
  Using tires with any kind of problem or modifying the suspension will affect the driving assist systems, and may cause the system to malfunction.
2-4. Using other driving systems

PCS (Pre-Collision System) (if equipped)

Safety systems such as the brakes and seat belts are automatically engaged to lessen impact and injuries to occupants as well as vehicle damage when the radar sensor detects an unavoidable frontal collision.

■ Pre-collision seat belts (front seats only)
The seat belts are immediately retracted as the effect of the pretensioner is increased (→ P. 54), to help prepare the driver and passengers. In the event of sudden braking or skidding, the system will operate even if no obstacle has been detected.

■ Pre-collision brake assist
Applies greater braking force in relation to how strongly the brake pedal is depressed.

■ Pre-collision AVS
If the system determines that the collision is unavoidable, the operation of AVS (→ P. 183) helps prevent the vehicle front from going down when hard brakes are applied.

Radar sensor

Detects vehicles or other obstacles on or near the road ahead and determines whether a collision is imminent based on the position, speed, and heading of the obstacles.

1 Grille cover
2 Radar sensor
Obstacles not detected
The sensor cannot detect plastic obstacles such as pylons. There may also be occasions when the radar sensor cannot detect pedestrians, animals, bicycles, motorcycles, trees, or snowdrifts.

The pre-collision system is operational when
- Seat belts (linked to the radar sensor)
  - Vehicle speed is above 3 mph (5 km/h).
  - The speed at which your vehicle is approaching the obstacle or oncoming vehicle exceeds 18 mph (30 km/h).
  - The front occupants are wearing a seat belt.
- Seat belts (linked to brake operation)
  - Vehicle speed exceeds 18 mph (30 km/h).
  - The system detects sudden braking or skidding.
  - The front occupants are wearing a seat belt.
- Brake assist
  - Vehicle speed is above 18 mph (30 km/h).
  - The speed at which your vehicle is approaching the obstacle or oncoming vehicle exceeds 18 mph (30 km/h).
  - The brake pedal is depressed.
- AVS
  - Vehicle speed is above 3 mph (5 km/h).
  - The speed at which your vehicle is approaching the obstacle or oncoming vehicle exceeds 18 mph (30 km/h).
2-4. Using other driving systems

- **Conditions that may trigger the system even if there is no danger of collision**
  - When there is an object by the roadside at the entrance to a curve
  - When passing an oncoming vehicle on a curve
  - When driving over a narrow iron bridge
  - When there is a metal object on the road surface
  - When driving on an uneven road surface
  - When passing an oncoming vehicle on a left-turn
  - When your vehicle rapidly closes on the vehicle in front

  When the system is activated in the situations described above there is also a possibility that the seat belts will retract quickly and the brakes will be applied with a force greater than normal. When the seat belt is locked in the retracted position, stop the vehicle in a safe place, release the seat belt and refasten.

- **When there is a malfunction in the system**

  Warning lights and/or warning messages will turn on or flash. (→P. 489, 499)
<table>

2-5. Driving information

Cargo and luggage

Take notice of the following information about storage precautions, cargo capacity and load.

- Stow cargo and luggage in the trunk whenever possible. Be sure all items are secured in place.
- Be careful to keep the vehicle level. Placing the weight as far forward as possible helps maintain vehicle balance.
- For better fuel economy, do not carry unnecessary weight.

Capacity and distribution

Cargo capacity depends on the total weight of the occupants.

\[
\text{(Cargo capacity)} = (\text{Total load capacity}) - (\text{Total weight of occupants})
\]

Steps for Determining Correct Load Limit—

1. Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs.” on your vehicle’s placard.
2. Determine the combined weight of the driver and passengers that will be riding in your vehicle.
3. Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.
(4) The resulting figure equals the available amount of cargo and luggage load capacity.

For example, if the “XXX” amount equals 1400 lbs. and there will be five 150 lb passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs. \((1400 - 750 \times 150) = 650 \text{ lbs.}\)

(5) Determine the combined weight of luggage and cargo being loaded on the vehicle.

That weight may not safely exceed the available cargo and luggage load capacity calculated in Step 4.

(6) If your vehicle will be towing a trailer, load from your trailer will be transferred to your vehicle. Consult this manual to determine how this reduces the available cargo and luggage load capacity of your vehicle. (→P. 198)

Lexus does not recommend towing a trailer with your vehicle. Your vehicle is not designed for trailer towing.
Example on your vehicle

When 2 people with the combined weight of 366 lb. (166 kg) are riding in your vehicle, which has a total load capacity of 815 lb. (370 kg), the available amount of cargo and luggage load capacity will be as follows:

815 lb. – 366 lb. = 449 lb. (370 kg – 166 kg = 204 kg)

In this condition, if 3 more passengers with the combined weight of 388 lb. (176 kg) get on, the available cargo and luggage load will be reduced as follows:

449 lb. – 388 lb. = 61 lb. (204 kg – 176 kg = 28 kg)

As shown in the above example, if the number of occupants increases, the cargo and luggage load equaling the combined weight of the occupants who got on later, by an amount. In other words, if an increase in the number of occupants causes an excess of the total load capacity (combined weight of occupants plus cargo and luggage load), you must reduce the cargo and luggage on your vehicle.
## CAUTION

### Things that must not be carried in the trunk

The following things may cause a fire if loaded in the trunk.
- Receptacles containing gasoline
- Aerosol cans

### Storage precautions

- Do not place anything on the package tray behind the rear seatback. Such items may be thrown about and possibly injure people in the vehicle during sudden braking or in an accident.
- Do not drive with objects on top of the instrument panel. They may interfere with the driver’s field of view or move during sharp acceleration or turning, thus impairing the driver’s control of the vehicle. In an accident they may injure the vehicle occupants.
- Secure all items in the occupant compartment, as they may shift and injure someone during an accident or sudden braking.

### Weight of the load

- Improper loading may cause deterioration of steering or braking control resulting in an accident which may cause death or serious injury.
- Do not exceed the maximum axle weight rating or the total vehicle weight rating.
- Even if the total load of occupant’s weight and the cargo load is less than the total load capacity, do not apply the load unevenly. Improper loading may cause deterioration of steering or braking control which may cause death or serious injury.
Vehicle load limits include total load capacity, seating capacity, towing capacity and cargo capacity.

- **Total load capacity**: 815 lb. (370 kg)
  
  Total load capacity means the combined weight of occupants, cargo and luggage.

- **Seating capacity**: 5 occupants (Front 2, Rear 3)
  
  Seating capacity means the maximum number of occupants whose estimated average weight is 150 lb. (68 kg) per person.
  
  Even if the number of occupants are within the seating capacity, do not exceed the total load capacity.

- **Towing capacity**
  
  Lexus does not recommend towing a trailer with your vehicle.

- **Cargo capacity**
  
  Cargo capacity may increase or decrease depending on the weight and the number of occupants.

---

**Total load capacity and seating capacity**

These details are also described on the tire and loading information label. (→P. 431)

---

**CAUTION**

- **Overloading the vehicle**
  
  Do not overload the vehicle.
  
  It may not only cause damage to the tires, but also degrade steering and braking ability, resulting in an accident.
Carry out the necessary preparations and inspections before driving the vehicle in winter. Always drive the vehicle in a manner appropriate to the prevailing weather conditions.

- **Pre-winter preparations**
  - Use fluids that are appropriate to the prevailing outside temperatures.
    - Engine oil
    - Engine coolant
    - Washer fluid
  - Have a service technician inspect the level and specific gravity of battery electrolyte.
  - Have the vehicle fitted with four snow tires or purchase a set of tire chains for the rear tires.
    - Ensure that all tires are the same size and brand, and that chains match the size of the tires.

- **Before driving the vehicle**
  Perform the following according to the driving conditions.
  - Do not try to forcibly open a window or move a wiper that is frozen. Pour warm water over the frozen area to melt the ice. Wipe away the water immediately to prevent it from freezing.
  - To ensure proper operation of the climate control system fan, remove any snow that has accumulated on the air inlet vents in front of the windshield.
  - Remove any ice that has accumulated on the vehicle chassis.
  - Periodically check for and remove any excess ice or snow that may have accumulated in the wheel well or on the brakes.
2-5. Driving information

- **When driving the vehicle**
  Accelerate the vehicle slowly and drive at a reduced speed suitable to road conditions.

- **When parking the vehicle**
  Park the vehicle and move the shift lever to “P” without setting the parking brake. The parking brake may freeze up, preventing it from being released.

**Regulations on the use of snow chains**

- Regulations regarding the use of tire chains vary according to location and type of road. Always check local regulations before installing chains.

- Use SAE Class “S” type radial tire chains, with the exception of radial cable chains or V-bar type chains.
  - Install the chains on the rear tires.
  - Refer to the explanation that comes with the tire chains for installation instructions.

- Retighten the chains after driving 1/4 - 1/2 mile (0.5 - 1.0 km).
Shifting the windshield wiper position

You can shift the wipers to the rest position manually. (In heavy snow or icy condition etc.)

Grip the hook section of the wiper arm firmly when shifting the wiper position.

► To rest position

Raise the wiper in line with the windshield.

You can stand the wipers up for the rest position.

*: More than 3.9 in. (10 cm)

► To retract position

Lower the wipers by pressing on the upper part of the hook section.
2-5. Driving information

Snow chain installation

- Install and remove tire chains in a safe location.
- Install tire chains on the rear tires only. Do not install tire chains on front tires.
- Install tire chains following the instructions provided in the accompanying instructions.

Driving with snow tires

- Use tires of the size specified for your vehicle.
- Maintain the specified level of tire inflation pressure.
- Do not drive in excess of 75 mph (120 km/h), regardless of the type of snow tires being used.
- Use snow tires on all, not just some wheels.

Driving with snow chains

- Do not drive in excess of the speed limit specified for the tire chains being used, or 30 mph (50 km/h), whichever is lower.
- Avoid driving on bumpy road surfaces or over potholes.
- Avoid sudden turns and braking, as use of chains may adversely affect vehicle handling.
- Slow down sufficiently before entering a curve to ensure that vehicle control is maintained.

3-1. Using the touch screen

### The initial screen

If the “ENGINE START STOP” switch is set to ACCESSORY or IGNITION ON mode, the initial-izing screen will be displayed for a few seconds as the system starts up.

### Trip information

Trip information such as driving distance, average vehicle speed, fuel consumption, etc. can be displayed on the screen. The displayed figure is for general information and may not always reflect precise and actual conditions.

#### Displaying the screen

1. Press on the “Information” screen.
2. Touch on the “Information” screen.

| 1 | Average fuel consumption |
| 2 | Cruising range |
| 3 | Average vehicle speed |
| 4 | Total distance |
3-1. Using the touch screen

■ Resetting the data
Touching [Reset] will reset the “Average Speed” and “Distance”.

■ To avoid damaging the touch screen
● Touch the screen lightly with your finger. If there is no response, remove your finger from the screen and try again.
● Remove any dirt on the screen by wiping with a soft cloth. Do not use detergent.

■ When using the touch screen
● If the screen is cold, the display may be dark, or the system may seem to be operating slightly slower than normal.
● The screen may seem dark and hard to see when viewed through sunglasses. Change your angle of viewing, adjust the display on the “Display” screen or remove your sunglasses.
3-1. Using the touch screen

Setting the touch screen

You can change the touch screen to your desired settings.

**Language settings**

The language used for all voice guidance, messages and touch screen switches may be changed.

**STEP 1** Press "Info".

**STEP 2** Touch "Information" on the "Information" screen.

**STEP 3** Select the desired language.

**STEP 4** Touch "OK".

**Turning off the beep sound**

The beep that sounds when a touch screen button is touched can be turned off.

**STEP 1** Press "Info".

**STEP 2** Touch "Beep Off".
Adjusting the display

**STEP 1** Press \( \text{DVR} \).

**STEP 2** Adjust the display as desired using \( \text{R} / - \) and \( \text{G} / + \).

If you do not touch the screen for 20 seconds, the system will return to the previous screen.

- **With CD player**

- **With DVD player**

</tbody>
</table>
3-1. Using the touch screen

■ “Day Mode”
When the headlights are turned on, the screen dims. However the screen can be switched to “Day Mode”.
The screen will stay in “Day Mode” when the headlights are turned on until is touched again.
If the instrument panel light control is set to “MAX”, “Day Mode” is not displayed.

■ To turn off the picture display
If is touched, the screen display is turned off, and guidance is by voice only.
Screen settings

**STEP 1** Press .

**STEP 2** Touch on the “Information” screen.

The following screen settings can be changed.

1. **Automatic transition**
   20 seconds after air conditioning or audio system use, the system will return the display to the previous screen.

2. **Switch color**
   You can select the switch color.

3. **Delete personal data**
   The following personal data is deleted:
   - User selection settings
   - Phone book data
   - Dialed numbers and received calls
   - Speed dial
   - Bluetooth® phone data
   - Security code
   - Maintenance conditions*
   - Maintenance information off setting*
   - Memory points*
   - Areas to avoid*
   - Previous points*
   - Route trace*

*: If the navigation system is equipped
3-1. Using the touch screen

■ Setting automatic transition

**STEP 1** Touch **ON** or **OFF**.

**STEP 2** Press **OK**.

■ Setting the switch color

**STEP 1** Touch **Blue** or **Gold**.

**STEP 2** Press **OK**.

■ To delete personal data

**STEP 1** Touch **Delete personal data**.

**STEP 2** Touch **Delete**.

Check carefully beforehand, as data cannot be retrieved once initialized.

■ When deleting personal data

Data can only be deleted when the vehicle is stopped.

■ When selling the vehicle

Be sure to initialize both the call history and personal data. (→P. 215)

■ If you touch

The display returns to the previous screen.
3-2. Using the air conditioning system and defogger

**Automatic air conditioning system**

Airflow and outlets are automatically adjusted according to the temperature setting.

Press \( \text{ } \) to display the air conditioning operation screen.

The above illustration is for a vehicle equipped with the navigation system. The position of \( \) is slightly different for vehicles not equipped with the navigation system.
3-2. Using the air conditioning system and defogger

**Using the automatic mode**

**STEP 1** Press \( \text{AUTO} \).

\( \Rightarrow \) The air conditioning system will begin to operate. Air outlets and fan speed are automatically adjusted according to the temperature setting.

**STEP 2** Press \( \text{AUX/Rec} \) to switch to automatic mode.

\( \Rightarrow \) Automatically switches between outside air and recirculated air modes.

**STEP 3** Press \( \text{A} \) to increase the temperature and \( \text{V} \) to decrease the temperature on \( \text{TEMP} \).

The temperature for the driver and passenger seats can be set separately.

**Adjusting the settings**

- **Adjusting the temperature setting**

  Press \( \text{A} \) to increase the temperature and \( \text{V} \) to decrease the temperature on \( \text{TEMP} \).

  Press \( \text{A} \) (increase) or \( \text{V} \) (decrease) on \( \text{TEMP} \) to separately adjust the temperature for the passenger and driver sides (dual mode). Touch \( \text{DUAL} \) to return the driver and passenger side temperatures to the same setting (simultaneous mode).

  The air conditioning system switches between dual and simultaneous modes each time \( \text{DUAL} \) is touched.
3-2. Using the air conditioning system and defogger

■ Adjusting the fan speed

Touch any switch of \(\text{LO} \quad \text{M} \quad \text{HI}\) (decrease ↔ increase) on the operating screen.

Press \(\text{Off}\) to turn the fan off.

■ Changing the air outlets

Touch any mode on the operating screen.

Air flows to the upper body.

*: Only in the automatic mode

Air flows to the upper body and feet.
Air flows to the feet.

Air flows to the feet and the windshield defogger operates.

Switching between outside air and recirculated air modes

Press ![Switching button].

The mode switches between ![Recirculation](image) (recycles air inside the vehicle), "AUTO" and ![Outside air](image) (introduces air from outside the vehicle) modes each time the button is pressed.

When the system is switched to automatic mode, the air conditioning system operates automatically.
3-2. Using the air conditioning system and defogger

### Defogging the windshield

**Press** 🎥

The air conditioning system control operates automatically.

### Micro dust and pollen filter

**Press** 🎥

Outside air mode switches to 🎥 (recirculated air) mode. Pollen is removed from the air and the air flows to the upper part of the body.

Usually the system will turn OFF automatically approximately 3 minutes later.

To stop the operation, press 🎥 again.
3-2. Using the air conditioning system and defogger

Adjusting the sensitivity of the air intake control in automatic mode

**STEP 1** Press until the smog sensor screen appears while the vehicle is stopped.

**STEP 2** Touch any switch of (lower sensitivity ↔ higher sensitivity) on the operating screen.

Adjusting the position of and opening and closing the air outlets

► Front outlets

1. Direct air flow to the left or right, up or down
2. Turn the knob to open or close the vent
3-2. Using the air conditioning system and defogger

- **Rear seat outlets**

  1. Direct air flow to the left or right, up or down
  2. Turn the knob to open or close the vent

- **Using the automatic mode**

  Fan speed is adjusted automatically in accordance with the temperature setting and ambient conditions. As a result, the following may occur.

  - The system may switch automatically to recirculated mode when the coolest temperature setting is selected in summer.
  - Immediately after the switch is pressed, the fan may stop for a while until warm or cool air is ready to flow.
  - Cool air may flow to the area around the upper body when the heater is on.

- **Using the system in recirculated air mode**

  The windows will fog up more easily if the recirculated air mode is used for an extended period.

- **Window defogger feature**

  Recirculated air mode may automatically switch to (outside air) mode in situations where the windows need to be defogged.

- **Outside temperature approaches 32°F (0°C)**

  The air conditioning system may not operate even when is touched.
3-2. Using the air conditioning system and defogger

■ Automatic mode for air intake control

In automatic mode, the system detects exhaust gas and other pollutants and automatically switches between outside air and recirculated air modes.

When the air conditioning is off, and the fan is operating, turning the auto mode ON will activate the air conditioning system.

■ Micro dust and pollen filter

● In order to prevent the windows from fogging up when the outside air is cold, the following may occur:
  • Outside air mode does not switch to 🍀.
  • The air conditioning system operates automatically.
  • The operation cancels after 1 minute.
● In rainy weather, the windows may fog up. Press 🌦.

■ When the indicator light on 🍀 flashes

Touch 🍀 and turn off the air conditioning system before turning it on once more. There may be a problem in the air conditioning system if the indicator light continues to flash. Turn the air conditioning system off and have it inspected by your Lexus dealer.

⚠️ CAUTION

■ To prevent the windshield from fogging up

Do not use 🌧 during cool air operation in extremely humid weather. The difference between the temperature of the outside air and that of the windshield can cause the outer surface of the windshield to fog up, blocking your vision.

⚠️ NOTICE

■ To prevent 12 volt battery discharge

Do not leave the automatic air conditioning system on longer than necessary when the engine is off.
3-2. Using the air conditioning system and defogger

Rear window and outside rear view mirror defoggers

These features are used to defog the rear window, and to remove raindrops, dew and frost from the outside rear view mirrors.

Press the button.

Press the button to turn on the rear window and outside rear view mirror defoggers. The defoggers will automatically turn off after approximately 15 minutes. Pressing the button again also turns the defoggers off.

Operating conditions

The “ENGINE START STOP” switch must be in the IGNITION ON mode.

CAUTION

When the outside rear view mirror defoggers are on

Do not touch the rear view mirror surfaces, as they can become very hot and burn you.

NOTICE

To prevent 12 volt battery discharge

Turn the defoggers off when the engine is off.
3-3. Using the audio system

Audio system type

CD and (optional) DVD player with changer, cassette player, and AM/FM radio

This illustration below is for a vehicle equipped with the DVD player.

The audio system appearance and screen may differ slightly for vehicles not equipped with the DVD player. In addition, the position of is slightly different for vehicles not equipped with the navigation system.
Using the audio system

CD player: Plays audio CDs, CD text, MP3 discs and WMA discs.
DVD player: Plays audio CDs, CD text, video CDs, MP3 discs, WMA discs, DVD video discs and DVD audio discs.

**Using cellular phones**

Interference may be heard through the audio system's speakers if a cellular phone is being used inside or close to the vehicle while the audio system is operating.
CAUTION

- For vehicles sold in the U.S.A. and Canada
  - Part 15 of the FCC Rules
    - FCC Warning:
      Any unauthorized changes or modifications to this equipment will void the user’s authority to operate this device.
  - Laser products
    - Do not take this unit apart or attempt to make any changes yourself.
      This is an intricate unit that uses a laser pickup to retrieve information from the surface of compact discs. The laser is carefully shielded so that its rays remain inside the cabinet. Therefore, never try to disassemble the player or alter any of its parts since you may be exposed to laser rays and dangerous voltages.
    - This product utilizes a laser.
      Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

NOTICE

- To prevent 12 volt battery discharge
  - Do not leave the audio system on longer than necessary with the engine off.
- To avoid damaging the audio/video system
  - Take care not to spill drinks or other fluids over the audio system.
3-3. Using the audio system
Using the radio

Press \text{AM\textasciitilde} or \text{FM\textasciitilde} to choose either an AM or FM band.

When you press \text{SCAN\textasciitilde} while listening to the radio, the following audio con-
trol screen appears.

![Display audio control screen]

- Power
- Volume
- Seek frequency
- AM-SAT/FM mode buttons
- Scan for receivable stations
- Preset stations
- Preset tuning
- Adjust the frequency (AM, FM mode) or channel (SAT mode)
- Scan for receivable stations (AM mode only)
3-3. Using the audio system

**Setting station presets (excluding XM® Satellite Radio)**

**STEP 1** Search for desired stations by turning or pressing 

or 

**STEP 2** Touch and hold one of the preset stations (1 - 6) until you hear a beep.

**Scanning radio stations (excluding XM® Satellite Radio)**

- **Scanning the preset radio stations**
  - **AM station**
    - **STEP 1** Touch on the screen or press until “P.SCAN” appears.
      - Preset stations will be played for a few seconds each.
    - **STEP 2** When the desired station is reached, touch or press once again.
  - **FM station**
    - **STEP 1** Press until “P.SCAN” appears.
    - **STEP 2** When the desired station is reached, press the button once again.
Scanning all radio stations within range

- **AM station**

  **STEP 1** Touch **SCAN** on the screen or press **SCAN**.
  “SCAN” appears on the screen and all stations with reception will be played for a few seconds each.

  **STEP 2** When the desired station is reached, touch **SCAN** or press **SCAN** once again.

- **FM station**

  **STEP 1** Press **SCAN**.
  “SCAN” appears on the screen and all stations with reception will be played for a few seconds each.

  **STEP 2** When the desired station is reached, press the button once again.

**RDS (Radio Data System)**

This feature allows your radio to receive station identification information and program information (classical, jazz, etc.) from radio stations which broadcast this information.

**Receiving RDS broadcasts**

**STEP 1** Touch **▲▲** or **▲▲** on the screen.
3-3. Using the audio system

The type of program changes each time the button is pressed.

● ROCK
● EASYLIS (Easy listening)
● CLS/JAZZ (Classical music and Jazz)
● R&B (Rhythm and Blues)
● INFORM (Information)
● RELIGION
● MISC (Miscellaneous)
● ALARM (Emergency messages)

If the system receives no RDS stations, “NO PTY” appears on the display.

When a program is set, “TYPE SEEK” appears.

STEP 2: Touch \[ \text{TYPE SEEK} \] on the screen or press \( \wedge \) or \( \vee \) on .

The radio seeks or scans the station by the relevant program type.

If no radio station of that type is found, “NOTHING” appears on the screen.

Displaying radio text messages

Touch \[ \text{MSG} \] on the screen.

If “MSG” appears on the screen, a text message may be displayed.
■ Traffic announcement

Touch TRAF on the screen.

“TRAF SEEK” appears on the display, and the radio will start seeking any station broadcasting traffic program information.

If no traffic program station is found, “NOTHING” appears on the display.

■ XM® Satellite Radio (if equipped)

■ Receiving XM® Satellite Radio

Press AMSAT until “SAT” appears on the screen.

The display changes as follows each time the switch is pressed.

AM → SAT1 → SAT2 → SAT3

STEP 1

STEP 2

Turn to select a desired channel from all the categories or press ▲ or ▼ on to select a desired channel in the current category.

■ Presetting XM® Satellite Radio channels

Select the desired channel. Touch one of the preset stations (1 - 6) and hold it until you hear a beep.
Changing the channel category

Touch \( \text{TYPE} \) or \( \text{TYPE} \) on the screen.

Scanning XM® Satellite Radio channels

- Scanning channels in the current category
  
  **STEP 1** Touch \( \text{TYPE} \) on the screen or press \( \text{SCAN} \).  
  "SCAN" appears on the screen.
  
  **STEP 2** When the desired channel is reached, touch \( \text{TYPE} \) or press the button once again.

- Scanning preset channels
  
  **STEP 1** Touch \( \text{TYPE} \) on the screen or press \( \text{SCAN} \) and hold it until you hear a beep.  
  "P-SCAN" appears on the screen.
  
  **STEP 2** When the desired channel is reached, touch \( \text{TYPE} \) or press the button once again.

Displaying the title and artist name

Touch \( \text{TEXT} \) on the screen.

The screen will display up to 16 characters.

Touch the button once again to return to the previous screen.
- When the 12 volt battery is disconnected
  All preset stations are erased.

- Reception sensitivity
  - Maintaining perfect radio reception at all times is difficult due to the continually changing position of the antenna, differences in signal strength and surrounding objects, such as trains, transmitters, etc.
  - The radio antenna is mounted inside the rear window. To maintain clear radio reception, do not attach metallic window tinting or other metallic objects to the antenna wire mounted inside the rear window.

- Receiving XM® Satellite Radio
  The optional Lexus genuine satellite radio tuner and antenna allows you to receive and play XM® Satellite Radio broadcasts. (Subscription is required. Not available in Hawaii and Alaska.)*
  - XM® subscriptions
    For detailed information about XM® Satellite Radio or to subscribe, visit XM® on the web at www.xmradio.com or call (800) 967-2346.
  - Radio ID
    You will need the radio ID when activating XM® service or reporting a problem. Select “CH000” using the dial, and the receiver’s 8-character ID number will appear.
  - Satellite tuner
    The tuner supports only Audio Services (Music and Talk) and the accompanying Text Information of XM® Satellite Radio.

* Terms and services provided by XM® Satellite Radio are subject to change without notice.
If the satellite radio does not operate normally

If a problem occurs with the XM® tuner, a message will appear on the screen. Refer to the table below to identify the problem, and take the suggested corrective action.

<table>
<thead>
<tr>
<th>Condition</th>

Certifications for the radio tuner
This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by trying one or more of the following:

- Reorienting or relocating the receiving antenna.
- Increasing the separation between the equipment and receiver.
- Connecting the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consulting the dealer or an experienced radio/TV technician for help.
Insert a cassette tape or press \textbf{TAPE} with a tape inserted.

When you press \textbf{TAPE} while listening to the tape, the following audio control screen appears.
Selecting a track

■ Skip a number of tracks at a time

**STEP 1** Press \(\wedge\) on .

Press \(\wedge\) until the number you want to skip appears.
9 tracks can be skipped at a time.

**STEP 2**

■ Rewind a number of tracks at a time

**STEP 1** Press \(\vee\) on .

Press \(\vee\) until the number you want to rewind appears.
9 tracks can be rewound at a time. Note that the number includes the current track.
3-3. Using the audio system

Using Dolby® Noise Reduction

Touch on the screen.

Reduces the level of noise for tapes recorded with Dolby NR only.

Dolby noise reduction is manufactured under license from Dolby Laboratories Licensing Corporation. DOLBY and the double-D symbol are registered trademarks of Dolby Laboratories.

Canceling noise reduction, skip play, repeat play, rewind and fast forward

To cancel and : Touch the corresponding button on the screen.

To cancel and : Touch the corresponding button on the screen or press .

Auto-reverse feature

After the cassette player reaches the end of a tape, it automatically reverses and begins to play the other side, regardless of whether the cassette was playing or fast-forwarding.

When the cassette player does not operate correctly due to the cassette recording conditions

Forwarding to the beginning of a track, repeat, blank tape skip and fast-forward may not be possible in the following situations:

● The interval between tracks is less than 3 seconds (beginning of track and repeat playback) or less than 15 seconds (blank tape skip).
● When there is noise between 2 tracks.
● The beginning and end of subsequent tracks are not clearly defined.
3-3. Using the audio system

- Cleaning the cassette player
  Cassette player components (heads, capstan, pinch rollers) should be cleaned at least once a month using a cleaning tape to remove dirt and dust that can easily build up.

- Using long playing cassette tapes
  Avoid using tapes with a length of more than 90 minutes, as the tape used is very thin and may become tangled in the cassette player.

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>

</table>
3-3. Using the audio system

Using the CD player

Insert a CD or press with a CD inserted.

When you press while listening to a CD, the following audio control screen appears.
3-3. Using the audio system

Loading a CD

■ Loading a single CD

**STEP 1** Press LOAD.

**STEP 2** When the indicator changes from flashing amber to green, insert a CD after the CD/DVD player door opens.

■ Loading multiple CDs

**STEP 1** Press and hold LOAD until you hear a beep.

**STEP 2** When the indicator changes from flashing amber to green, insert a CD after the CD/DVD player door opens.

**STEP 3** After inserting a CD, wait until the indicator changes from flashing amber to green, then insert the next CD after the CD/DVD door has opened.
Repeat steps 2 and 3 until you have inserted all CDs.

To cancel the operation, press the LOAD or REC button. If you do not insert a CD within 15 seconds, loading will be canceled automatically.

Ejecting CDs

■ Ejecting a CD

**STEP 1** To select the CD to be ejected, touch the desired disc number (1 - 6) on the screen or press ↓ or ↑ on .

**STEP 2** Press and remove the CD.

■ Ejecting all CDs

Press and hold until you hear a beep, then remove the CDs.
Selecting, fast forwarding and scanning tracks

Selecting a track
Press ▲ to move up and ▼ to move down using until the desired track number appears on the screen.

To fast forward or rewind, press and hold ▲ or ▼ on .

Selecting a track from the track list
Touch TRACK on the screen.

Touch the desired track number.
▼ or ▲: Changes the list by 6 track groups.
This function is available only when the vehicle is not moving.

Scanning a CD
Touch SCAN on the screen.
“SCAN” appears on the screen.
The first 10 seconds of each track will be played.

Touch SCAN once again when the desired track is reached.
3-3. Using the audio system

Selecting a CD

- To select a CD to play
  Touch the desired disc number (1 - 6) on the screen or press \( \wedge \) or \( \vee \) on.

- To scan loaded CDs
  \[\text{STEP 1}\] Touch and hold \( \text{SCAN} \) on the screen until “D-SCAN” appears.
  The first 10 seconds of the first track on each CD will be played.
  \[\text{STEP 2}\] Touch \( \text{SCAN} \) once again when the desired CD is reached.

Random playback

- Current CD
  Touch \( \text{RAND} \) on the screen.
  Songs are played in random order until random playback is canceled.

- All CDs
  Touch and hold \( \text{RAND} \) on the screen until “D-RAND” appears.
  Tracks on all loaded CDs are played in random order until the button is touched once again.

Repeating a track or a disc

- Repeating a track
  Touch \( \text{RPT} \) on the screen.

- Repeating a disc
  Touch and hold \( \text{RPT} \) on the screen until “D-RPT” appears.
3-3. Using the audio system

- **Canceling random, repeat and scan playback**
  Touch \(\text{RND}\), \(\text{RPT}\), or \(\text{SCAN}\) on the screen once again.

- **Displaying the title and artist name**
  If a CD-TEXT disc is inserted, the title of the disc and track will be displayed. Up to 16 letters can be displayed.

- **Error messages**
  \(\rightarrow\) P. 270
3-3. Using the audio system
Playing MP3 and WMA discs

Insert an MP3 or WMA disc or press \[ \text{Disc} \] with a disc inserted.
When you press \[ \text{Audio} \] during playback of the disc, the following audio control screen appears.
Loading, ejecting and selecting MP3 and WMA discs

Refer to the section titled “Using the CD player” for details. (→P. 242)

Selecting a folder

Selecting a folder
Touch “FOLDER ” or “ ” on the screen to select the previous/next folder.

Selecting a folder from the folder list

STEP 1 Touch on the screen.
Touch the desired folder number.

STEP 2

or : Changes the list by 6 folder groups.

: Displays the details of the file currently playing.

: Displays the file list. This function is available only when the vehicle is not moving.

Selecting the desired folder by cueing the first file of each folder
Touch and hold on the screen until “FLD-SCAN” appears. When the desired folder is reached, touch once again.
Selecting and scanning files

■ Selecting one file at a time

Turn or press ▲ or ▼ on to select the desired file.

■ Selecting a file from the file list

**STEP 1** Touch on the screen to turn the folder list on.

Touch on the folder list screen.

Touch the desired file number.

▲ or ▼: Changes the list by 6 groups.

_FOLDER_: Displays the folder list.

_Detail_: Displays the details of the file currently playing.

This function is available only when the vehicle is not moving.

■ Selecting a desired file by cueing the files in the folder

Touch on the screen.

When the desired file is reached, touch once again.
3-3. Using the audio system

File repeat
Touch RPT on the screen.

Folder repeat
Touch and hold RPT on the screen until the “FLD RPT” appears.

Random playback
- To play files from a particular folder in random order
  Touch RAND on the screen.
- To play all the files on a disc in random order
  Touch and hold RAND on the screen until the “FLD RAND” appears.

Canceling random, repeat and scan playback
Touch RAND, RPT or SCAN on the screen once again.

Error messages
→ P. 270
Insert a disc or press \( \text{Disc} \) with a disc inserted.

When you press \( \text{Audio} \) during the playback of the disc, the following audio/video control screen appears.

Display audio/video control screen

Disc load

Display audio/video control screen
Loading a discs

Loading a single disc

**STEP 1** Push **LOAD**.

**STEP 2** When the indicator changes from flashing amber to green, insert a disc after the DVD player door opens.

Loading multiple discs

**STEP 1** Press and hold **LOAD** until you hear a beep.

**STEP 2** When the indicator changes from flashing amber to green, insert a disc after the DVD player door opens.

**STEP 3** After inserting a disc, wait until the indicator changes from flashing amber to green, then insert the next disc after the DVD player door has opened.

**STEP 4** Repeat steps 2 and 3 until you have inserted all discs.

To cancel the operation, press the **LOAD** or **DISC** button. If you do not insert a disc within 15 seconds, loading will be canceled automatically.

**DVD hint screen**

This screen appears when a DVD video, DVD audio or video CD is first selected with the “ENGINE START STOP” switch in ACCESSORY or IGNITION ON mode.

Touch **OK** once you have read the message.
Ejecting discs

■ Ejecting a disc

**STEP 1** To select the disc to be ejected, touch the desired disc on the screen or press ▲ or ▼ on.

**STEP 2** Press ▲ and remove the disc.

■ Ejecting all discs

Press and hold ▲ until you hear a beep, then remove the discs.

Selecting a disc

■ To select a disc to play

Touch the desired disc on the screen or press ▲ or ▼ on.

- Audio CD, CD text → P. 242
- MP3/WMA disc → P. 247
- DVD video/audio → P. 254
- Video CD → P. 266
3-3. Using the audio system
Playing DVD video/audio

For safety reasons, you can enjoy the visual contents of discs only when the vehicle is completely stopped with the “ENGINE START STOP” switch in ACCESSORY or IGNITION ON mode and the parking brake applied. While you are driving, only audio contents may be played.

■ Video control screen

Press AUDIO while the disc is playing, the following screen appears.
Control icon screen
Touch any part of the screen if no icons are shown while watching video, the following screen appears.

- DVD video mode

![Diagram showing control icons]

If appears on the screen when you touch an icon, the operation relevant to that control is not permitted.
If ❌ appears on the screen when you touch an icon, the operation relevant to that control is not permitted.
Loading, ejecting and selecting discs

→ P. 252

Fast forwarding/rewinding disc

Touch and hold \( \rightarrow \) or \( \leftarrow \) on the screen or press and hold \( \wedge \) or \( \vee \) on \( \text{SEEK TRACK} \) until you hear a beep.

Slow playback

Touch \( \text{II} \) and then touch \( \rightarrow \). Video is played slowly while you are touching \( \rightarrow \).

Searching a desired screen

Searching by title (DVD video mode)

STEP 1 Touch \( \text{Search} \) in the control icons.

STEP 2 Input the desired title number and then touch \( \text{Enter} \).

\( \text{Clear} \) : Deletes the last input number.
\( \text{OFF} \) : Hides the icons. To display the icons, touch \( \text{ON} \).
\( \text{\downarrow} \) : Returns to previous screen.
3-3. Using the audio system

■ Searching by group (DVD audio mode)

**STEP 1** Touch in the control icons.

**STEP 2** Input the group number and then touch .

: Deletes the last input number.

: Hides the icons. To display the icons, touch .

: Returns to previous screen.

■ Playing a bonus group (DVD audio mode only, if the DVD has bonus options)

**STEP 1** Touch in the control icons.

**STEP 2** Input the desired bonus group number on the group search screen and touch .

: Deletes the number.

: Returns the number.

: Returns to previous screen.

■ Searching by chapter/track

Press or on to select a chapter/track.
Selecting a menu number (DVD audio mode only)

**STEP 1** Touch **Select Number** in the control icons.

**STEP 2** Input the desired menu number on the screen and touch **Enter**.

Using the DVD menu

**STEP 1** Touch **Menu** or **Top Menu** in the control icons.

Touch **<** if the menu control key does not appear on the menu screen.

**STEP 2** Touch **<**, **>**, **<<**, or **>>** to select a menu item, then touch **Enter** to select.

- **Moves icons up or down.**
- **Hides icons. To display icons, touch **ON**.**
- **Returns to previous screen.**

Note that specific items or the operating method differs from one DVD to another. Refer to the manual that comes with the DVD disc. (The above image is an example.)
3-3. Using the audio system

### Changing the subtitle language

Touch the subtitle button in the control icons. Each time you touch the button, the next available language is selected.
- Hide: Hides the control icons.
- : Returns to previous screen.

### Changing the audio language (DVD video only)

Touch the audio button in the control icons. Each time you touch the button, the next available language is selected.
- : Returns to previous screen.

### Changing the audio format (DVD audio only)

Touch the audio button in the control icons. Each time you touch the button, the next available audio format is selected.
- : Returns to previous screen.
### Changing the angle (If the angle option is available)

**STEP 1** Touch **Angle** in the control icons.

**STEP 2** Touch the **Angle** button.

Each time you touch the button, the next available angle is selected.

 retorn to previous screen.

### Initial DVD setup

- **Displaying “Setup Menu” screen**
  **STEP 1** Touch **Setup** in the control icons.
  **STEP 2** After you change the initial settings, touch **Enter**.

- **Setting audio language**
  **STEP 1** Touch **Audio Language**.
  **STEP 2** Select the desired language.
  If you cannot find the desired language, touch **Other** and input the desired language code. (→P. 263)

 retorn to previous screen.
3-3. Using the audio system

■ Setting subtitle language

**STEP 1** Touch .
**STEP 2** Select the desired language.
If you cannot find the desired language, touch Other and input the desired language code. (→P. 263)

: Returns to previous screen.

■ Setting menu language

**STEP 1** Touch .
**STEP 2** Select the desired language.
If you cannot find the desired language, touch Other and input the desired language code. (→P. 263)

: Returns to previous screen.

■ Setting angle mark ON or OFF
If the DVD has angle options, you can turn the angle mark on or off.

Touch . Each time you touch the button, the multi angle mark on the screen turns on or off alternately.

■ Parental lock

**STEP 1** Touch Parental Lock .
**STEP 2** Input the 4-digit password and then touch Enter .
If you enter wrong numbers, touch to delete the numbers.
Touch 10 times to initialize the personal code.

**STEP 3** Select a parental level (1 - 8).

: Returns to previous screen.
3-3. Using the audio system

Entering a language code

If you touch 'Other' on the “Select Audio Language” screen, “Select Subtitle Language” screen or “Select DVD Language” screen, you can select a language by entering the 4-digit language code if that language is available.

Input the 4-digit language code and then touch .

- Deletes the last input digit.
- Returns to previous screen.

### DVD compatibility

Use only discs marked as shown to the left. The following products may not be playable on your DVD player:

- SACDs
- dts-CDs
- Copy-protected CDs
- DVD-Rs
- DVD+Rs
- DVD-RWs
- DVD+RWs
- DVD-ROMs
- DVD-RAMs

### CD/DVD player protection feature

To protect the internal components, playback is automatically stopped when a problem is detected.

**If discs are left inside the CD/DVD player or in the ejected position for extended periods**

Discs may be damaged and may not play properly.

### Lens cleaners

Do not use lens cleaners. Doing so may damage the CD/DVD player.
■ DVD video disc information

- DVD video discs
  Digital Versatile Disc that holds video. DVD video discs have adopted “MPEG2”, one of the world standards of digital compression technologies. The picture data is compressed by 1/40 on average and stored. Variable rate encoding technology in which the volume of data assigned to the picture is changed depending on the picture format has also been adopted. Audio data is stored using PCM and Dolby digital, which enables higher quality of sound. Furthermore, multi-angle and multi-language features will also help you enjoy the more advanced technology of DVD video.

- Viewer restrictions
  This feature limits what can be viewed in conformity with the level of restrictions of the country. The level of restrictions varies depending on the DVD video disc. Some DVD video discs cannot be played at all, or violent scenes are skipped or replaced with other scenes.
  - Level 1: DVD video discs for children can be played.
  - Level 2-7: DVD video discs for children and G-rated movies can be played.
  - Level 8: All types of DVD video discs can be played.

- Multi-angle option
  You can enjoy the same scene from different angles.

- Multi-language option
  You can select the subtitle and audio languages.

- Region codes
  The region codes are found on DVD players and DVD discs. If a DVD video disc does not have the same region code as the DVD player, you cannot play the disc on that DVD player. (→P. 271)
3-3. Using the audio system

- Audio
  This DVD player can play linear PCM, Dolby Digital and MPEG audio format DVD. Other decoded types cannot be played.

- Title and chapter
  Video and audio programs stored in DVD video discs are divided into parts by title and chapter.

  Title: The largest unit of the video and audio programs stored on DVD video discs. Usually, one movie, one album, or one audio program is assigned as a title.

  Chapter: A title is comprised of one or more chapters.

- Sound

  - Dolby Digital

3-3. Using the audio system

MP3 and WMA files

MP3 (MPEG Audio Layer 3) is a standard audio compression format. Files can be compressed to approximately 1/10 of their original size by using MP3 compression.

WMA (Windows Media Audio) is a Microsoft audio compression format. This format compresses audio data to a size smaller than that of the MP3 format. There is a limit to the MP3 and WMA file standards and to the media/formats recorded by them that can be used.

- **MP3 file compatibility**
  - Compatible standards
    - MP3 (MPEG1 Layer3, MPEG2 LSF Layer3)
  - Compatible sampling frequencies
    - MPEG1 Layer3: 32, 44.1, 48 (kHz)
    - MPEG2 LSF Layer3: 16, 22.05, 24 (kHz)
  - Compatible bit rates
    - MPEG1 Layer3: 64, 80, 96, 112, 128, 160, 192, 224, 256, 320 (kbps)
    - MPEG2 LSF Layer3: 64, 80, 96, 112, 128, 144, 160 (kbps)
  - *: Compatible with VBR
  - Compatible channel modes: stereo, joint stereo, dual channel and monaural

- **WMA file compatibility**
  - Compatible standards
    - WMA Ver. 7, 8, 9
  - Compatible sampling frequencies
    - 32, 44.1, 48 (kHz)
  - Compatible bit rates
    - Ver. 7, 8: CBR 48, 64, 80, 96, 128, 160, 192 (kbps)
    - Ver. 9: CBR 48, 64, 80, 96, 128, 160, 192, 256, 320 (kbps)
  - *: Only compatible with 2-channel playback
3-3. Using the audio system

● Compatible media
   Media that can be used for MP3 and WMA playback are CD-Rs and CD-RWs. Playback in some instances may not be possible, depending on the status of the CD-R or CD-RW. Playback may not be possible or the audio may jump if the disc is scratched or marked with fingerprints.

● Compatible disc formats
   The following disc formats can be used.
   • Disc formats: CD-ROM Mode 1 and Mode 2
     CD-ROM XA Mode 2, Form 1 and Form 2
   • File formats: ISO9660 level 1, level 2, (Romeo, Joliet)
     MP3 and WMA files written in any format other than those listed above may not play correctly, and their file names and folder names may not be displayed correctly.

Items related to standards and limitations are as follows:
   • Maximum directory hierarchy: 8 levels
   • Maximum length of folder names/file names: 32 characters
   • Maximum number of folders: 192 (including the root)
   • Maximum number of files per disc: 255

● File names
   The only files that can be recognized as MP3/WMA and played are those with the extension .mp3 or .wma.
3-3. Using the audio system

- **Multi-sessions**
  As the audio system is compatible with multi-sessions, it is possible to play discs that contain MP3 and WMA files. However, only the first session can be played.

- **ID3 and WMA tags**
  ID3 tags can be added to MP3 files, making it possible to record the track title and artist name, etc.
  The system is compatible with ID3 Ver. 1.0, 1.1, and Ver. 2.2, 2.3 ID3 tags. (The number of characters is based on ID3 Ver. 1.0 and 1.1.)
  WMA tags can be added to WMA files, making it possible to record the track title and artist name in the same way as with ID3 tags.

- **MP3 and WMA playback**
  When a disc containing MP3 or WMA files is inserted, all files on the disc are first checked. Once the file check is finished, the first MP3 or WMA file is played. To make the file check finish more quickly, we recommend you do not write in any files other than MP3 or WMA files or create any unnecessary folders.
  Discs that contain a mixture of music data and MP3 or WMA format data cannot be played.

- **Extensions**
  If the file extensions .mp3 and .wma are used for files other than MP3 and WMA files, they will be mistakenly recognized and played as MP3 and WMA files. This may result in large amounts of interference and damage to the speakers.
3-3. Using the audio system

● Playback
  • To play MP3 files with steady sound quality, we recommend a fixed bit rate of 128 kbps and a sampling frequency of 44.1 kHz.
  • CD-R or CD-RW playback may not be possible in some instances, depending on the characteristics of the disc.
  • There is a wide variety of freeware and other encoding software for MP3 and WMA files on the market, and depending on the status of the encoding and the file format, poor sound quality or noise at the start of playback may result. In some cases, playback may not be possible at all.
  • When files other than MP3 or WMA files are recorded on a disc, it may take more time to recognize the disc and in some cases, playback may not be possible at all.
  • Microsoft, Windows, and Windows Media are the registered trademarks of Microsoft Corporation in the U.S. and other countries.

■ CD-R and CD-RW discs
  ● CD-R/CD-RW discs that have not been subject to the "finalizing process" (a process that allows discs to be played on a conventional CD player) cannot be played.
  ● It may not be possible to play CD-R/CD-RW discs recorded on a music CD recorder or a personal computer because of disc characteristics, scratches or dirt on the disc, or dirt, condensation, etc. on the lens of the unit.
● It may not be possible to play discs recorded on a personal computer depending on the application settings and the environment. Record with the correct format. (For details, contact the appropriate application manufacturers of the applications.)

● CD-R/CD-RW discs may be damaged by direct exposure to sunlight, high temperatures or other storage conditions. The unit may be unable to play damaged discs.

● If you insert a CD-RW disc into the MP3/WMA player, playback will begin more slowly than with a conventional CD or CD-R disc.

● Recordings on CD-R/CD-RW cannot be played using the DDCD (Double Density CD) system.

**CAUTION**

**DVD video precaution**

Conversational speech on some DVDs is recorded at a low volume to emphasize the impact of sound effects. If you adjust the volume assuming that the conversations represent the maximum volume level that the DVD will play, you may be startled by louder sound effects or when you change to a different audio source.

Loud sounds may have a significant impact on the human body or pose a driving hazard. Keep this in mind when you adjust the volume.
## NOTICE

**Discs and adapters that cannot be used**

Do not use the following types of discs, 3 in. (8 cm) disc adapters or Dual Disc. Doing so may damage the player and render the disc insert/eject function unusable.

- Discs that have a diameter that is not 4.7 in. (12 cm).
- Low-quality and deformed discs.
- Discs with a transparent or translucent recording area.
- Discs that have tape, stickers or CD-R labels attached to them, or that have the label peeled off.
**NOTICE**

**Player precautions**

Failure to follow the precautions below may result in damage to the discs or the player itself.

- Do not insert anything other than discs into the disc slot.
- Do not apply oil to the player.
- Store discs away from direct sunlight.
- Never try to disassemble any part of the player.

![No Insert More Than One Disc](image)

- Do not insert more than one disc at a time.
3-3. Using the audio system
Optimal use of the audio/video system

Press \( \text{Audio} \) on the panel to display the audio/video control screen.

- Operating the radio, cassette and audio CD

- Operating the DVD video/audio and video CD
3-3. Using the audio system

Adjusting sound quality and balance

**STEP 1** Touch \( \text{SOUND} \) on the screen.

**STEP 2** Adjust the settings, referring to the following table.

Once you have finished, touch \( \text{OK} \).

<table>
<thead>
<tr>
<th>Sound quality mode</th>
<th>Display</th>
<th>Level</th>
<th>Touch</th>
</tr>
</thead>
<tbody>
<tr>
<td>High-pitched tones*</td>
<td><img src="image" alt="TREBLE" /></td>
<td>-5 to 5</td>
<td>- or +</td>
</tr>
<tr>
<td>Mid-pitched tones*</td>
<td><img src="image" alt="MID" /></td>
<td>-5 to 5</td>
<td></td>
</tr>
<tr>
<td>Low-pitched tones*</td>
<td><img src="image" alt="BASS" /></td>
<td>-5 to 5</td>
<td></td>
</tr>
<tr>
<td>Front/rear volume balance</td>
<td><img src="image" alt="FRONT to REAR" /></td>
<td>F7 to R7</td>
<td>FRONT or REAR</td>
</tr>
<tr>
<td>Left/right volume balance</td>
<td><img src="image" alt="LEFT to RIGHT" /></td>
<td>L7 to R7</td>
<td>L or R</td>
</tr>
</tbody>
</table>

*: The sound quality level is adjusted individually in each radio, cassette tape, CD or DVD mode.
3-3. Using the audio system

Setting DSP

The following features can be set as desired by touching the DSP button on the screen.

▶ With CD player

▶ With DVD player

■ Turning Automatic Sound Levelizer (ASL) ON or OFF

Touch ON or OFF.

ASL automatically adjusts the volume and tone quality according to the noise level as you drive your vehicle.
Changing the listening position (with CD player)

The speaker balance can be changed to produce the best sound for each listening position.

Touch .

The listening position changes as follows each time the switch is touched.

<table>
<thead>
<tr>
<th>Display</th>
<th>Listening position</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="position.png" alt="Image" /></td>
<td>Position best suited to the driver’s seat</td>
</tr>
<tr>
<td><img src="position.png" alt="Image" /></td>
<td>Position best suited to the driver’s and front passenger’s seat</td>
</tr>
<tr>
<td><img src="position.png" alt="Image" /></td>
<td>Position best suited to the rear seats</td>
</tr>
<tr>
<td><img src="position.png" alt="Image" /></td>
<td>Position best suited to all seats</td>
</tr>
</tbody>
</table>

Turning the surround ON or OFF (with DVD player)

Touch ON or OFF.
Setting the screen ratio mode (with DVD player)

**STEP 1** Touch **WIDE** on the screen.

**STEP 2** Touch one of the **NORMAL**, **WIDE1**, or **WIDE2** to match screen ratio printed on the DVD.

<table>
<thead>
<tr>
<th>Screen ratio mode</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORMAL</td>
<td>Suitable for 4:3 screen ratio</td>
</tr>
<tr>
<td>WIDE1</td>
<td>Expand the Normal screen horizontally to fill the display</td>
</tr>
<tr>
<td>WIDE2</td>
<td>Suitable for 16:9 screen ratio</td>
</tr>
</tbody>
</table>
3-3. Using the audio system
Using the AUX adapter

This adapter can be used to connect a portable audio device and listen to it using the vehicle’s speakers.

**Connect the portable audio device.**

**STEP 1**

**STEP 2**

- **Operating portable audio devices connected to the audio system**
  - The volume can be adjusted using the vehicle’s audio controls. All other adjustments must be made on the portable audio device itself.
3-3. Using the audio system

Using the steering switches

Some audio features can be controlled using the steering switches.

1. Power on, select audio source
2. Volume
3. Radio: Select radio stations
   - Cassette: Fast forward, rewind and selecting tracks
   - CD: Select tracks, discs and file
   - DVD: Select tracks, discs and chapter

Turning on the power

Press \( \text{Mode} \) when the audio system is off.

The audio system can be turned off by holding the switch down for 1 second or more.

Changing the audio source

Press \( \text{Mode} \) when the audio system is on. The audio source changes as follows each time the button is pressed. If a cassette tape or discs is not inserted, that mode will be skipped.

FM1 → FM2 → cassette player → CD/DVD player → AUX → AM → SAT1 → SAT2 → SAT3
3-3. Using the audio system

Adjusting the volume

Press “+” on the volume buttons to increase the volume and “-” to decrease the volume.

Hold down the button to continue increasing or decreasing the volume.

Selecting a radio station

**STEP 1** Press the radio mode button.
**STEP 2** Press the up or down buttons to select a radio station.

To scan for receivable stations, press and hold the switch until you hear a beep.

Fast forwarding or rewinding the cassette

**STEP 1** Press the cassette mode button.
**STEP 2** Press and hold the up or down buttons until you hear a beep.

To stop fast forwarding or rewinding, press the same switch.

Selecting a track/file or chapter

**STEP 1** Press the mode button to select the cassette mode, CD or DVD mode.
**STEP 2** Press the up or down buttons to select the desired track or chapter.

Cassette mode only: you can skips maximum 9 tracks.
Selecting a disc in the CD or DVD player

**STEP 1** Press \( \Rightarrow \) to select the CD or DVD mode.

**STEP 2** Press and hold \( \wedge \) or \( \vee \) on \( \Rightarrow \) until you hear a beep.

**CAUTION**

To reduce the risk of an accident

Exercise care when operating the audio switches on the steering wheel.
Hands-free system (for cellular phone)

The hands-free system is a function that allows you to use your mobile phone without touching it.

This system supports Bluetooth® mobile phones. Bluetooth® is a wireless data system that allows the mobile phone to wirelessly connect to the hands-free system and make/receive calls.

- Telephone switch

1. Sending/Receiving/"Telephone” screen display (when stopped)
2. End call

- Microphone

The person you are speaking to can be heard from the driver’s side speaker.

To use the hands-free system you must register your Bluetooth® phone in the system. (→P.296)
3-4. Using the hands-free system (for cellular phone)

**Status display**

You can check such indicators as signal strength and battery charge on the “Telephone” screen.

![Status display screen](image)

<table>
<thead>
<tr>
<th>Indicators</th>
<th>Conditions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Connection status</td>
<td>Blue: Good</td>
</tr>
<tr>
<td></td>
<td>Yellow: Bad</td>
</tr>
<tr>
<td></td>
<td>: Not connected</td>
</tr>
<tr>
<td>Battery charge</td>
<td>: Full</td>
</tr>
<tr>
<td></td>
<td>: Low</td>
</tr>
<tr>
<td>Call area</td>
<td>“Rm”: Roaming area</td>
</tr>
<tr>
<td></td>
<td>“Hm”: Home area</td>
</tr>
<tr>
<td>Signal strength</td>
<td>: Good</td>
</tr>
<tr>
<td></td>
<td>: Bad</td>
</tr>
<tr>
<td></td>
<td>: Not connected</td>
</tr>
</tbody>
</table>
3-4. Using the hands-free system (for cellular phone)

- **When using the hands-free system**
  - The audio system and voice guidance are muted when making a call.
  - If both parties speak at the same time, it may be difficult to hear.
  - If the received call volume is overly loud, an echo may be heard.
  - Try to face toward the microphone as much as possible when speaking.
  - In the following circumstances it may be difficult to hear the other party.
    - When driving on unsealed roads
    - When driving at high speeds
    - If a window is open
    - If the air conditioning is blowing directly on the microphone
    - If the air conditioning is set to high

- **Conditions under which the system will not operate**
  - If using a mobile phone that does not support Bluetooth®.
  - If the mobile phone is switched off.
  - If you are outside service range.
  - If the mobile phone is not connected.
  - If the mobile phone's battery is low.

- **Bluetooth® antenna**
  The antenna is built into the display. If the mobile phone is behind the seat or in the console box, or touching or covered by metal objects, connection status may deteriorate.
3-4. Using the hands-free system (for cellular phone)

■ Battery charge/Signal status
This display may not correspond exactly with the mobile phone itself.

■ About Bluetooth®
Bluetooth is a registered trademark of Bluetooth SIG, Inc.

■ Compatible models
Compatible with HFP (Hands Free Profile) Ver. 1.0 and OPP (Object Push Profile) Ver. 1.1.
If your cellular phone does not support HFP, you cannot enter the Bluetooth® phone, and take OPP service individually.

■ Certification for the hands-free system

FCC ID: HYQBT0501A
IC ID: 1551A-BT0501A

This device complies with Part 15 of the FCC Rules and RSS-210. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.
<table>
<thead>
<tr>
<th><strong>CAUTION</strong></th>
</tr>
</thead>
<tbody>

</tbody>
</table>
3-4. Using the hands-free system (for cellular phone)

Using the Bluetooth® phone

To display the screen shown above, press \( \text{INFO} \) then touch \( \text{?} \) on the “Information” screen.

Registering a Bluetooth® phone

You can register up to 6 phones in the system.

**STEP 1** Press \( \text{INFO} \).

**STEP 2** Touch \( \text{?} \) on the “Information” screen.

**STEP 3** Touch \( \text{Settings} \) on the “Telephone” screen.
3-4. Using the hands-free system (for cellular phone)

**STEP 4**
Touch 📞.

**STEP 5**
Touch 🔍.

**STEP 6**
Input the passkey displayed on screen into your phone.

If the message “Bluetooth* connection successful” is displayed, registration is complete.

If the message “Bluetooth* connection failed. Please check the “Passkey” and the settings of the telephone” is displayed, start again from the beginning.

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
3-4. Using the hands-free system (for cellular phone)

**Bluetooth® phone connection**

There are two connection methods available—automatic and manual.

**STEP 1** Press the Bluetooth® phone connection button.

**STEP 2** Touch Settings on the “Information” screen.

**STEP 3** Touch Telephone on the “Telephone” screen.

**STEP 4** Choose one of the following methods.

1. **Automatic connection**

   If the “ENGINE START STOP” switch is in the ACCESSORY or IGNITION ON mode, the system will automatically connect to the Bluetooth® phone. Touching automatic connection will turn it on/off.

2. **Manual connection**

   If automatic connection fails or is turned off, connection must be made manually.

   If the message “Bluetooth connection successful” is displayed, connection is complete.

   *: Bluetooth is a registered trademark of Bluetooth SIG, Inc.

**Reconnecting to the Bluetooth® phone**

If the system cannot connect due to poor signal strength with the “ENGINE START STOP” switch in the ACCESSORY or IGNITION ON mode, the system will automatically attempt to reconnect.

If the phone is turned off, the system will not attempt to reconnect. In this case, connection must be made manually, or the phone must be re-selected.
Making a call

Once the Bluetooth® phone is registered, you can make a call using the following procedure.

- **Dialing**
  - **STEP 1** Press .
  - **STEP 2** Touch on the “Information” screen.

- **Inputting the phone number.**
  - To delete the input phone number, touch .
  - To dial the last input phone number, touch .

- **STEP 4** Touch or press on the steering wheel.
Dialing from the phone book

You can dial a number from the phone book data imported from your mobile phone. Up to 1000 entries may be stored in the phone book. (→P. 320)

**STEP 1** Press \( \text{INFO} \).  
**STEP 2** Touch \( \text{?} \) on the "Information" screen.  
**STEP 3** Touch \( \text{Phone Book} \) on the “Telephone” screen.

Choose the data to call from the list.

**STEP 4**

Choose the number and then touch \( \text{c} \) or press \( \text{\#} \) on the steering wheel.

**STEP 5**
Dialing from history

You can make a call from past dialed numbers or received calls. Up to 5 numbers are stored, with the last recent number being deleted to make room for a new number.

**STEP 1** Press \( \text{INFO} \).

**STEP 2** Touch \( \text{ INFO} \) on the “Information” screen.

**STEP 3** Touch \( \text{ Call Log } \) on the “Telephone” screen.

Choose the number to call from the list.

To choose a number from the incoming calls history, touch \( \text{ Incoming Call} \) and choose a number to call.

Touch \( \text{ } \) or press \( \text{ } \) on the steering wheel.
3-4. Using the hands-free system (for cellular phone)

■ Calling using speed dial
You can make a call using numbers registered from the phone book and call history. (→P. 312)

STEP 1 Press on the “Information” screen.
STEP 2 Touch on the “Telephone” screen.
STEP 3 Touch on the “Telephone” screen.

Choose the desired number to make a call.

To change the page, touch or .
■ Calling using voice recognition
Using voice recognition, you can call by name from the “Phone Book” screen, call by number from the “Telephone” screen, and send tones from the “Call” screen. (→ P. 308)

► Talk switch

Calling by name from the “Phone Book” screen

STEP 1 Press the talk switch.

STEP 2 Following the system guidance, wait until the beep and then say the desired name.
If there are multiple entries for the same name, “Next” will be displayed.
To select the next candidate, touch Next or say “Next candidate”.

STEP 3 Following the system guidance, press the talk switch.

STEP 4 Following the system guidance, wait until the beep and then say “Dial”.

3-4. Using the hands-free system (for cellular phone)
3-4. Using the hands-free system (for cellular phone)

- **Calling by number from the “Telephone” screen**
  
  **STEP 1** Press the talk switch.

  **STEP 2** Following the system guidance, wait until the beep and then say the desired number.

  **STEP 3** Following the system guidance, press the talk switch.

  **STEP 4** Following the system guidance, wait until the beep and then say “Dial”.

- **Sending tones from the “Call” screen**
  
  **STEP 1** Press the talk switch.

  **STEP 2** Following the system guidance, wait until the beep and then say the desired number.

  **STEP 3** Following the system guidance, press the talk switch.

  **STEP 4** Following the system guidance, wait until the beep and then say “Yes”.

304
3-4. Using the hands-free system (for cellular phone)

■ Calling using POI
   You can make a call using a Point Of Interest. (→ “Navigation System Owner’s Manual”)

■ Made/Received call history list
   If you make a call to or receive a call from a number registered in the phone book, the name is displayed in the call history.
   If you make multiple calls to the same number, only the last call made is displayed in the made calls history.
   is displayed to the left of phone number for unanswered calls.
   is displayed to the left of the phone number for refused calls.
   Calls where the number is unavailable, such as public telephones, are not stored in the call history.

■ When driving
   The functions “Dialing”, “Dialing from the phone book”, and “Dialing from history” are unavailable.
   If you press on the steering wheel, the “Speed Dial” screen is displayed. At this time phone numbers will not be displayed. Choose from the names displayed to make a call.

■ International calls
   You may not be able to make international calls, depending on the mobile phone in use.
3-4. Using the hands-free system (for cellular phone)

To display the voice recognition command list

- Press and hold the talk switch.
- Press on the steering wheel.
- Say “Cancel”.
- Press (excluding command verification)

To display the voice recognition operating guide

- After pressing the talk switch, press . If the “Operating Guide” screen is displaying, press .
- Press .

To cancel voice recognition

- Press and hold the talk switch.
- Press on the steering wheel.
- Say “Cancel”.
- Press (excluding command verification)

When using voice recognition

Use correct commands and speak clearly, otherwise the system may not correctly recognize the command. Wind or other noises may also cause the system not to recognize the desired command.
Receiving a call

When a call is received, the following screen is displayed together with a sound.

Touch 📞 or press 📞 on the steering wheel.

To refuse a call
Touch and hold 📞.

To adjust the received call volume
Press the 📞 or 📞. You can also adjust the volume using the steering switches.

International calls

Received international calls may not be displayed correctly, depending on the mobile phone in use.
3-4. Using the hands-free system (for cellular phone)

**Speaking on the phone**

The following screen is displayed when speaking on the phone.

![Call screen](image)

- **To adjust the received call volume**
  - Press the or . You can also adjust the volume using the steering switches.

- **To prevent the other party from hearing your voice**
  - Touch .

- **Inputting a key**
  - When using phone services such as an answering service or a bank, you can store phone numbers and code numbers in the phone book.
3-4. Using the hands-free system (for cellular phone)

**STEP 1** Touch 0-9. Input the number.

**STEP 2**

If repeated tone symbols* are stored in the phone book, and are displayed on the right side of the screen.

*: Repeated tone symbols are symbols or numbers displayed as p or w that come after the phone number.
(e.g. 056133p0123w#1*)

**STEP 3** Confirm the number displayed on screen, and touch Send. If you touch , operation is completed without making a call.

- **To transfer a call**
  Touch .

- **To hang up**
  Touch or press on the steering wheel.
3-4. Using the hands-free system (for cellular phone)

- **Transferring calls**
  - It is not possible to transfer from hands-free to the mobile phone while driving.
  - If you transfer from the mobile phone to hands-free, the hands-free screen will be displayed, and you can operate the system using the screen.
  - Transfer method and operation may vary according to the mobile phone used.
  - For operation of the mobile phone in use, see the phone’s manual.

- **To send a tone by speed tone**
  - Touch 0, 9, then touch . Choose the desired number from the speed tone list displayed.

- **While driving**
  - Key input is unavailable.
3-4. Using the hands-free system (for cellular phone)

Setting the hands-free system

You can speed dial, register in and edit the phone book, and set the Bluetooth® phone.

Settings screen

To display the screen shown above, press , touch on the “Information” screen, then touch on the “Telephone” screen.
3-4. Using the hands-free system (for cellular phone)

Registering/Deleting a speed dial item

Registering a speed dial item
You can register a number from the phone book or the call history. Up to 17 entries may be stored.

**STEP 1** Press .

**STEP 2** Touch on the “Information” screen.

**STEP 3** Touch on the “Telephone” screen.

**STEP 4** Touch on the “Settings” screen.

**STEP 5** Touch in the “Speed Dial” section of the “Speed Dial Settings” screen.

**STEP 6** Select the data to be registered.
3-4. Using the hands-free system (for cellular phone)

Select the number to be registered.

Press the desired switch.

The last dialed number will be registered in position 6.

Deleting a speed dial item

**STEP 1** Press .

**STEP 2** Touch  on the “Information” screen.

**STEP 3** Touch  on the “Telephone” screen.

**STEP 4** Touch  on the “Settings” screen.

**STEP 5** Touch  in the “Speed Dial” section of the “Speed Dial Settings” screen.

**STEP 6** Select the data to be deleted.

**STEP 7** A confirmation message will be displayed. If everything is correct, touch .
3-4. Using the hands-free system (for cellular phone)

■ To delete all speed dial items
Follow the steps for “Deleting a speed dial item” to “STEP 5”. In the “Speed Dial” section of the “Speed Dial Settings” screen, touch the . A confirmation message will be displayed. If everything is correct, touch .

Registering/Editing/Deleting a Speed Tone

■ Registering a speed tone
You can register up to 6 items.

STEP 1 Press .
STEP 2 Touch on the “Information” screen.
STEP 3 Touch on the “Telephone” screen.
STEP 4 Touch on the “Settings” screen.

STEP 5 Touch in the “Speed Tone” section.

STEP 6 Input the desired name and touch .

A-Z : Letter input
0-9 : Number/Symbol input
Space : Space
← : Backspace
3-4. Using the hands-free system (for cellular phone)

Input the number and touch **OK**.

Touch the desired switch.

**Editing a speed tone**

**STEP 1** Press on the “Information” screen.

**STEP 2** Touch on the “Telephone” screen.

**STEP 3** Touch on the “Settings” screen.

**STEP 4** Touch in the “Speed Tone” section of the “Speed Dial Settings” screen.

Touch the switch to be edited.
3-4. Using the hands-free system (for cellular phone)

STEP 7 Input the name and touch OK.
STEP 8 Input the number and touch OK.

■ Deleting a speed tone

STEP 1 Press on the “Information” screen.
STEP 2 Touch on the “Information” screen.
STEP 3 Touch on the “Telephone” screen.
STEP 4 Touch on the “Settings” screen.
STEP 5 Touch in the “Speed Tone” section of the “Speed Dial Settings” screen.
STEP 6 Choose the data to delete.
STEP 7 A confirmation message will be displayed. If everything is correct, touch Yes.

■ To delete all speed tone data

Follow the steps “Deleting a speed tone” to “STEP 5”. In the “Speed Tone” section, touch : A confirmation message will be displayed. If everything is correct, touch Yes.
Setting the volume

**STEP 1** Press on the “Information” screen.

**STEP 2** Touch on the “Telephone” screen.

**STEP 3** Touch on the “Settings” screen.

**STEP 4** Touch or to lower or raise the volume.

Voice Volume: Change the speaker volume
Ring Volume: Change the ring volume

■ Adaptive volume control
When traveling at 50 mph (80 km/h) or over, the system automatically raises the volume one level.
If the vehicle’s speed drops to 43 mph (70 km/h), the volume will return to its original level.
You can turn this function on/off by touching.

■ To return to the default volume settings
Touch Default, then Yes.
Changing the screen settings

**STEP 1** Press on the "Information" screen.

**STEP 2** Touch on the "Telephone" screen.

**STEP 3** Touch on the "Settings" screen.

The following settings can be changed.

** Incoming Call Display**

The incoming call screen settings can be changed.

**Auto Answer**

When a call is received, the system automatically switches to the talking screen after the set period of time, meaning you can speak without pressing anything.

**Show Bluetooth* connection status at startup**

You can set the system to show the status confirmation display when connecting.

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
3-4. Using the hands-free system (for cellular phone)

■ “Incoming Call Display” settings
Select the desired switch.

Full : The hands-free screen is displayed when a call is received, and you can operate the system from that screen.

Icon : A message is displayed at the top of the screen, and you can only operate the system with the steering switches.

■ “Auto Answer” settings

STEP 1 Touch .
STEP 2 Set the wait time using - and +. (1 - 60 seconds)

■ “Show Bluetooth* connection status at startup” settings

Touch ON / OFF.

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.

■ To set the screen settings to default

Touch Default, then Yes.
3-4. Using the hands-free system (for cellular phone)

Phone book settings

Up to 1000 names, 2 items per name, can be registered.

Transferring mobile phone data

**STEP 1** Press .

**STEP 2** Touch on the “Information” screen.

**STEP 3** Touch on the “Telephone” screen.

**STEP 4** Touch on the “Settings” screen.

**STEP 5** Touch .

**STEP 6** Select the group to transfer to.
3-4. Using the hands-free system (for cellular phone)

To overwrite data, touch \textit{Overwrite}.

To add to existing data, touch \textit{Add To}.

Transfer will begin. If you wish to cancel the transfer before finished, touch \textit{Cancel}.

Transfer is complete when “Transfer completed” is displayed. If “Transfer failed” is displayed, restart the process from the beginning.

### Registering by input

**STEP 1** Press \textit{Add}.

**STEP 2** Touch \textit{Add} on the “Information” screen.

**STEP 3** Touch \textit{Settings} on the “Telephone” screen.

**STEP 4** Touch \textit{Settings} on the “Settings” screen.

**STEP 5** Touch the \textit{Register} in the “Phone Book” section.
3-4. Using the hands-free system (for cellular phone)

**STEP 6** Choose the switch to register.

- **Name**: Input the name on the "Name" screen.
- **TEL1**, **TEL2**: Input the number(s) on the "Telephone Number" screen. When you touch **OK**, the "Select Icon" screen will appear. Choose the desired icon.
- **Group**: Select the desired group from the "Select Group" screen. (No Group, 01 - 09)
- **Voice Rec**: Select the desired phone number and touch **REC** to record a voice tag. To play the voice tag, touch **PLAY**. To delete the voice tag, touch **Delete**.

**STEP 7** Once input is complete, touch **OK**.
3-4. Using the hands-free system (for cellular phone)

- Add history data to a registered entry

**STEP 1** Press \( \text{ } \) on the "Information" screen.

**STEP 2** Touch \( \text{ } \) on the "Telephone" screen.

**STEP 3** Touch \( \text{ } \) on the "Telephone" screen.

**STEP 4** Choose the desired number from the list.

To choose from the received call history, touch \( \text{ } \) then select the desired number.

**STEP 5** Touch \( \text{ } \) .

**STEP 6** Choose the phone book entry to be added to.

**STEP 7** Check the data to be added, then touch \( \text{ } \).

■ To delete all data

Follow the steps “Deleting phone book data” to “STEP 5”. In the “Phone Book” section of the “Phone Book Management” screen, touch  . To delete all data within a group, touch  , then select the group to delete. To delete all contact data, touch  . Check that everything is correct, then touch  .

■ Registering/Editing/Deleting from the phone book

You can register data in the phone book, edit registered data, and delete items.

**STEP 1** Press  .

**STEP 2** Touch  on the “Information” screen.

**STEP 3** Touch  on the “Telephone” screen.

**STEP 4** To register data, touch  on the “Phone Book” screen.

To delete all data, touch  .

To delete or edit specific data, select the data to delete/edit, then touch  to delete, or  to edit.

■ The phone book

The method for transferring phone book data from the phone to the system varies with phone model. See the phone’s manual.
Changing the phone book group name settings

Registering a group name

**STEP 1** Press .

**STEP 2** Touch on the “Information” screen.

**STEP 3** Touch on the “Telephone” screen.

**STEP 4** Touch on the “Settings” screen.

**STEP 5** Touch the switch in the “Group Name” section of the “Phone Book Management” screen.

**STEP 6** Select the group to register (“01” - “19”).

**STEP 7** Select the switch to be edited.

- **Icon** - The below screen will be displayed. Select the desired icon.
- **Name** - Input the name on the “Name” screen.

**STEP 8** Once editing is complete, touch .
Deleting a group name

STEP 1 Press .

STEP 2 Touch on the “Information” screen.

STEP 3 Touch on the “Telephone” screen.

STEP 4 Touch on the “Settings” screen.

STEP 5 Touch in the “Group Name” section of the “Phone Book Management” screen.

STEP 6 Select the group name to delete.

STEP 7 A confirmation message will be displayed. If everything is correct, touch .

To delete all data

Follow the steps “Deleting phone book data” procedure to “STEP 5”. In the “Phone Book” section of the “Phone Book Management” screen, touch . A confirmation message will be displayed. If everything is correct, touch .
3-4. Using the hands-free system (for cellular phone)

Deleting the history

**STEP 1** Press on the “Information” screen.

**STEP 2** Touch on the “Information” screen.

**STEP 3** Touch on the “Telephone” screen.

**STEP 4** Select the data to delete from the list.

To delete data from the received calls history, touch , then select the data to delete.

**STEP 5** Touch .

**STEP 6** Check that everything is correct, then touch Yes.

To delete all data

Follow the steps “Deleting a group name” to “STEP 4”. Touch on the “Outgoing Calls” screen. To delete all received call history data, touch , then touch . Check that everything is correct, then touch Yes.
Changing the security settings

You can disable certain hands-free system functions. Use the security settings when you do not wish other people to see the registered data, for example when having the vehicle valet parked at a hotel.

To enable or disable security, the security code (4 digits) is required. The default code is "0000". Be sure to change the security code before use.

- Changing the security code

1. Press on the “Information” screen.
2. Touch on the “Telephone” screen.
3. Touch on the “Settings” screen.
3-4. Using the hands-free system (for cellular phone)

---

**STEP 6**
Input the current security code, and touch **OK**.

**STEP 7**
Input the new security code, and touch **OK**.

**STEP 8**
A confirmation message will appear. If everything is correct, touch **Yes**.

**Enabling security**

**STEP 1**
Press **INFO**.

**STEP 2**
Touch **?** on the “Information” screen.

**STEP 3**
Touch **Settings** on the “Telephone” screen.

**STEP 4**
Touch **?** on the “Settings” screen.

**STEP 5**
Touch **ON** in the “Phone Book Lock” section of the “Phone Book Lock” screen.

**STEP 6**
Input the security code, and touch **OK**.

---
Setting the security code to default

**STEP 1** Press \( \text{No} \) on the “Information” screen.

**STEP 2** Touch \( \text{on} \) on the “Telephone” screen.

**STEP 3** Touch \( \text{Settings} \) on the “Settings” screen.

**STEP 4** Touch \( \text{Default} \) on the “Phone Book Lock” screen.

**STEP 5** Input the security code on the “Security Code” screen, then touch \( \text{OK} \).

**STEP 6** A confirmation message will appear. If everything is correct, touch \( \text{Yes} \).
If the “Phone Book Lock” is set

If the security code is input and the “Phone Book Lock” set, the following functions are locked.

- Display of the phone book screen and transferring, registering, editing, deleting the phone book data.
- Display of speed dial screen, registering, deleting the speed dial and speed dialing.
- Display of the other party’s name for calls being received or made.
- Display of dialed numbers screen and received calls screen, deleting dialed numbers and received numbers.
- Display of phone information screen.
- Changing the security code.

The speed dial screen is not displayed while driving.

When changing the security code

- Be sure to choose a number difficult for strangers to guess.
- Do not forget the security code. Even your Lexus dealer will be unable to disable the security. If you do forget the code, initialize all personal data. (→P. 215)
Setting a Bluetooth® phone

Selecting a Bluetooth® phone

If multiple Bluetooth® phones are registered, follow the below procedure to select the Bluetooth® phone to be used. You may only use one phone at a time.

**STEP 1** Press .

**STEP 2** Touch on the “Information” screen.

**STEP 3** Touch on the “Telephone” screen.

**STEP 4** Touch .

Select the phone to be used, then touch .

If no phones are registered, “Empty” will be displayed.

If “Bluetooth* connection successful” is displayed, registration was successful.

If another Bluetooth® phone is already connected, a confirmation message is displayed. Touch or .

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
3-4. Using the hands-free system (for cellular phone)

■ Displaying Bluetooth® information
You can check the device address and device name.

STEP 1 Press  on the “Information” screen.
STEP 2 Touch  on the “Information” screen.
STEP 3 Touch  on the “Telephone” screen.
STEP 4 Touch  on the “Settings” screen.
STEP 5 On the “Select Telephone” screen, select the desired phone and touch  .

To change the device name, touch  in the “Device Name” section, and input the name on the “Name” screen (max. 20 characters).

■ To change the Bluetooth® settings
You can change the device name and passkey.

STEP 1 Press  on the “Information” screen.
STEP 2 Touch  on the “Information” screen.
STEP 3 Touch  on the “Telephone” screen.
STEP 4 Touch  on the “Settings” screen.
To change the device name, touch in the “Device Name” section, and input the name on the “Name” screen (max. 20 characters).

To change the passkey, touch in the “Passkey” section, and input 4 - 8 digits on the “Passkey” screen.

■ Setting the Bluetooth® settings to default

STEP 1 Press .

STEP 2 Touch on the “Information” screen.

STEP 3 Touch on the “Telephone” screen.

STEP 4 Touch on the “Settings” screen.

STEP 5 Touch on the “Bluetooth* Settings” screen.

STEP 6 A confirmation message is displayed. If everything is correct, touch .

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
To delete the Bluetooth® settings

STEP 1 Press .

STEP 2 Touch  on the “Information” screen.

STEP 3 Touch  on the “Telephone” screen.

STEP 4 Touch  on the “Settings” screen.

STEP 5 Touch  in the “Bluetooth® Telephone” section of the “Bluetooth® Settings” screen.

STEP 6 On the “Delete Telephone” screen, select the phone to delete.
   To check the device address, touch .

STEP 7 If you touch , a confirmation message is displayed. If everything is correct, touch .

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
Illuminated entry system: The various lights automatically turn on/off according to the presence of the electronic key, whether the doors are locked/unlocked, whether the doors are open/closed, and the “ENGINE START STOP” switch mode.

When the instrument panel light control switch is turned to minimum, the foot lights, inside door handle lights and shift lever light will turn off. (→P.133)
3-5. Using the interior lights

- To prevent 12 volt battery discharge
  If the interior lights, personal lights and steering spot light remain ON when the door is not fully closed or the interior light switch in “DOOR” position, the lights will go off automatically after 20 minutes.

- Customization that can be configured at Lexus dealer
  Setting (e.g. The time elapsed before lights turn off) can be changed.
  (Customizable features → P. 573)

### Interior lights

1. “ON”
2. “OFF”
3. “DOOR”

The interior lights are turned on/off by the illuminated entry system.

Clock

■ Adjust clock

➤ With navigation system
   → “Navigation System Owner’s Manual”.

➤ Without navigation system
   Perform the following steps.

STEP 1 Press Info.
STEP 2 Touch Adjust Clock.

STEP 3

Adjust Clock

Daylight Saving Time

1 2 3

ON OFF

H M :00

1 Adjust hours.
2 Adjust minutes.
3 Round the nearest hour.
4 Turn daylight saving time on.
5 Turn daylight saving time off.

After setting, touch OK.

The clock is displayed when
The “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.

■ When the 12 volt battery is disconnected
The time display will automatically be set to 1:00.
The displayed temperature ranges from -40°F (-40°C) up to 122°F (50°C).

- The outside temperature is displayed when
  The “ENGINE START STOP” switch is in IGNITION ON mode.
- When “--” or “E” is displayed
  The system may be malfunctioning. Take your vehicle to your Lexus dealer.
- On the multi-information display
  → P. 140
- Display
  In the following situations, the correct outside temperature may not be displayed, or
  the display may take longer than normal to change.
  ● When stopped, or driving at low speeds (less than 12 mph [20 km/h])
  ● When the outside temperature has changed suddenly (at the entrance/exit of a
    garage, tunnel, etc.)
3-7. Other interior features
Ashtrays

Front
Slide the lid to open.
Push the lever to remove the ashtray.
Push the lid to close.

Rear
Pull the lid to open.
Hold the plate down and pull the ashtray upwards to remove.

CAUTION

- When not in use
  Keep the ashtray closed.
  Injuries may result in the event of an accident or sudden braking.

- To prevent fire
  - Fully extinguish matches and cigarettes before putting them in the ashtray, then make sure the ashtray is fully closed.
  - Do not place paper or any other type of flammable object in the ashtray.
The cigarette lighter can be used when the “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.

**CAUTION**

- To avoid burns or fires
  - Do not touch the metal parts of the cigarette lighter.
  - Do not hold the cigarette lighter down. It could overheat and cause a fire.
  - Do not insert anything other than the cigarette lighter into the outlet.

- When not in use
  - Keep the ashtray lid closed.
  - Injuries may result in the event of an accident or sudden braking.
3-7. Other interior features

Power outlet

The power outlet can be used for 12V accessories that run on less than 10A.

- The power outlet can be used when
  The “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.

**NOTICE**

- To avoid damaging the power outlet
  Close the power outlet lid when not in use. Foreign objects or liquids that enter the power outlet may cause a short circuit.

- To prevent the fuse from being blown
  Do not use an accessory that uses more than 12V/10A.

- To prevent 12 volt battery discharge
  Do not use the power outlet longer than necessary when the engine is off.
The temperature of the seats can be adjusted individually.

**Seat heaters**

1. Heats the seats
   - The indicator light comes on.
   - The higher the number, the warmer the seats become.

**Seat heaters/ventilators**

1. Heats the seats
   - The indicator light (red) comes on.
   - The higher the number, the warmer the seats become.

2. Blows air from the seats
   - The indicator light (green) comes on.
   - The higher the number, the stronger the airflow becomes.

---

- **The seat heaters/ventilators can be used when**
  - The “ENGINE START STOP” switch is in IGNITION ON mode.
- **When not in use**
  - Set the dial to “0”. The indicator light turns off.
CAUTION

■ Burns

● Use caution when seating the following persons in a seat with the seat heater on to avoid the possibility of burns:
  • Babies, small children, the elderly, the sick and the disabled
  • Persons with sensitive skin
  • Persons who are fatigued
  • Persons who have taken alcohol or drugs that induce sleep (sleeping drugs, cold remedies, etc.)

● Do not cover the seat with anything when using the seat heater. Using the seat heater with a blanket or cushion increases the temperature of the seat and may lead to overheating.

NOTICE

■ To prevent damage to the seat heaters/ventilators

Do not put heavy objects on the seat and do not stick sharp objects (needles, nails, etc.) into the seat.

■ To prevent 12 volt battery discharge

Turn the switches off when the engine is off.
Pull the armrest down for use.

**NOTICE**

- **To prevent damage to the armrest**
  - Do not place too much strain on the armrest.
The rear sunshade can be used when
The “ENGINE START STOP” switch is in IGNITION ON mode.

Reverse operation feature
To ensure adequate rear visibility, the sunshade automatically lowers when the shift lever is shifted to “R”.
However, the rear sunshade is raised again if any of the following occurs:
- Shift the shift lever into “P”.
- The switch is pressed again.
- The shift lever is shifted out of “R”, and the vehicle reaches a speed of 9 mph (15 km/h).

If the engine is turned off when the rear sunshade has been lowered due to the reverse operation feature, it will not be raised even when the engine is turned on again and the vehicle reaches a speed of 9 mph (15 km/h). To raise the sunshade again, press the switch.

After the “ENGINE START STOP” switch is turned to OFF
The rear sunshade can be raised and lowered for approximately 1 minute.
### CAUTION

- **When the rear sunshade is being raised or lowered**
  
  Do not place fingers or other objects in the fastener section or in the opening. They may get caught, causing injury.

### NOTICE

- **To prevent 12 volt battery discharge**
  Do not operate the rear sunshade when the engine is off.

- **To ensure normal operation of the sunshade**
  
  Observe the following precautions.
  - Do not place excessive load on the motor or other components.
  - Do not place objects where they may hinder opening and closing operations.
  - Do not attach items to the rear sunshade.
  - Keep the opening clean and clear of obstructions.
  - Do not operate the rear sunshade continuously over long periods of time.
3-7. Other interior features

Floor mats

Securely place a mat that matches the size of the space on the carpet.

Secure the floor mat using the hooks provided.

**CAUTION**

- When inserting the floor mat
  
  Observe the following precautions. Failure to do so may result in the floor mat slipping and interfering with the movement of the pedals during driving, resulting in an accident.
  
  - Make sure the floor mat is properly placed on the vehicle carpet and the correct side face upward.
  - Do not place floor mats on the top of existing mats.
3-7. Other interior features

Trunk features

- **Cargo hooks**
  - Cargo hooks are provided for securing loose items.

- **Shopping bag hooks**

- **First-aid kit storage belt**
  - 1 Loosen
  - 2 Tighten
**Luggage mat**

Pull the lever upwards when lifting the luggage mat up.

The lever can be hooked on the edge of the trunk.

---

**Trunk storage extension**

Pull down the rear armrest.

1. Open (push down the handle)
2. Unlock with the mechanical key
3. Lock with the mechanical key
3-7. Other interior features

⚠️ CAUTION

- **While driving**
  - To avoid injury, always return the cargo hooks to their positions when they are not in use.
  - Always keep the trunk storage extension door closed to reduce the chance of injury in case of an accident or sudden stop.

⚠️ NOTICE

- **When closing the trunk**
  - Do not leave the luggage mat lever hooked on the edge of the trunk. The luggage mat may get damaged.
3-7. Other interior features

Garage door opener

The garage door opener can be programmed to operate garage doors, gates, entry doors, door locks, home lighting systems, and security systems, and other devices.

The garage door opener (HomeLink® Universal Transceiver) is manufactured under license from HomeLink®.

Programming the HomeLink® (for U.S.A. owners)

The HomeLink® compatible transceiver in your vehicle has 3 buttons which can be programmed to operate 3 different devices. Refer to the programming method below appropriate for the device.

1. Indicator
2. Buttons

Point the remote control for the device 1 to 3 in. (25 to 75 mm) from the HomeLink® control buttons.

Keep the indicator light on the HomeLink® in view while programming.
Press and hold one of the buttons on the HomeLink® and the button on the transmitter. When the indicator light on the HomeLink® changes from a slow to a rapid flash after 20 seconds, you can release both buttons.

Test the operation of the HomeLink® by pressing the newly programmed button.

If programming a garage door opener, check to see if the garage door opens and closes. If the garage door does not operate, see if your garage transmitter is of the Rolling Code type. Press and hold the programmed HomeLink® button. The garage door has the rolling code feature if the indicator light (on the HomeLink®) flashes rapidly for 2 seconds and then remains lit. If your transmitter is the Rolling Code type, proceed to the heading “Programming a rolling code system”.

Repeat the steps above to program another device for each of the remaining HomeLink® buttons.
Programming a Rolling Code system (for U.S.A. owners)

If your device is Rolling Code equipped, follow the steps under the heading “Programming the HomeLink®” before proceeding with the steps listed below.

**STEP 1** Locate the training button on the ceiling mounted garage door opener motor. The exact location and color of the button may vary by brand of garage door opener.

Refer to the operation manual supplied with the garage door opener for the location of the training button.

**STEP 2** Press the training button.

**STEP 3** Press and release the vehicle’s programmed HomeLink® button twice. The garage door may open.

If the garage door opens, the programming process is complete. If the door does not open, press and release the button a third time. This third press and release will complete the programming process by opening the garage door.

The ceiling mounted garage door opener motor should now recognize the HomeLink® transceiver and operate the garage door.

**STEP 4** Repeat the steps above to program another rolling code system for any of the remaining HomeLink® buttons.
3-7. Other interior features

■ Programming an entry gate (for U.S.A. owners)/Programming all devices in the Canadian market

**STEP 1**  Place your transmitter 1 to 3 in. (25 to 75 mm) away from the surface of the HomeLink®.

  Keep the indicator light on the HomeLink® in view while programming.

**STEP 2**  Press and hold the selected HomeLink® button.

**STEP 3**  Repeatedly press and release (cycle) the device’s remote control button for two seconds each until step 4 is completed.

**STEP 4**  When the indicator light on the HomeLink® compatible transceiver starts to flash rapidly, release the buttons.

**STEP 5**  Test the operation of the HomeLink® by pressing the newly programmed button. Check to see if the gate/device operates correctly.

**STEP 6**  Repeat the steps above to program another device for each of the remaining HomeLink® buttons.

■ Programming other devices

To program other devices such as home security systems, home door locks or lighting, contact your authorized Lexus dealer for assistance.

■ Reprogramming a button

The individual HomeLink® buttons cannot be erased but can be reprogrammed. To reprogram a button, follow the “Basic programming” instructions.
Operating the HomeLink®

Press the appropriate HomeLink® button. The HomeLink® indicator light on the HomeLink® transceiver should turn on.

The HomeLink® continues to send a signal for up to 20 seconds as long as the button is pressed.

Erasing the entire HomeLink® memory (all three programs)

Press and hold the 2 outside buttons for 20 seconds until the indicator light flashes.

If you sell your vehicle, be sure to erase the programs stored in the HomeLink® memory.

Before programming

● Install a new battery in the transmitter.
● The battery side of the transmitter must be pointed away from the HomeLink®.

Certification for the garage door opener

This device complies with Part 15 of the FCC Rules and with RSS-210 of the IC Rules.
Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

WARNING: This transmitter has been tested and complies with FCC and IC rules. Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the device.
### CAUTION

- **When programming a garage door or other remote control device**
  
  The garage door may operate, so ensure people and objects are out of danger to prevent potential harm.

- **Conforming to federal safety standards**
  
  Do not use the HomeLink® Compatible Transceiver with any garage door opener or device that lacks safety stop and reverse features as required by federal safety standards. This includes any garage door that cannot detect an obstruction object. A door or device without these features increases the risk of death or serious injury.
3-7. Other interior features
Compass

The compass on the inside rear view mirror indicates the direction in which the vehicle is heading.

**Operation**

To turn the compass on or off, press "AUTO" for 3 seconds.

**Displays and directions**

<table>
<thead>
<tr>
<th>Display</th>
<th>Direction</th>
</tr>
</thead>
<tbody>
<tr>
<td>N</td>
<td>North</td>
</tr>
<tr>
<td>NE</td>
<td>Northeast</td>
</tr>
<tr>
<td>E</td>

<tr>
<td>NW</td>
<td>Northwest</td>
</tr>
</tbody>
</table>
Calibrating the compass

The direction display deviates from the true direction determined by the earth's magnetic field. The amount of deviation varies according to the geographic position of the vehicle.

If you cross over a map boundary shown in illustration, the compass will deviate.
To obtain higher precision or perfect calibration, refer to the following.

■ Deviation calibration

**STEP 1** Stop the vehicle where it is safe to drive in a circle.

**STEP 2** Press “AUTO” until a number (1 to 15) appears on the compass display.

**STEP 3** Press “AUTO”, and referring to the map above, select the number of the zone where you are.
Wait a few seconds until the compass direction is displayed. The calibration is complete.

**Circling calibration**

If “CAL” appears on the display, drive the vehicle at 5 mph (8 km/h) or less in a circle until a direction is displayed.

If there is not enough space to drive in a circle, drive around the block until the direction is displayed.

**Conditions unfavorable to correct operation**

The compass may not show the correct direction in the following conditions:

- The vehicle is stopped immediately after turning.
- The vehicle is on an inclined surface.
- The vehicle is in a place where the earth's magnetic field is subject to interference by artificial magnetic fields (underground car park/parking lot, under a steel tower, between buildings, roof car park/parking lot, near an intersection, near a large vehicle, etc.).
- The vehicle has become magnetized. (There is a magnet or metal object near the inside rear view mirror.)
- The 12 volt battery has been disconnected.
- A door is open.
3-7. Other interior features

**CAUTION**

- **While driving**
  Do not adjust the display.
  Be sure to adjust the display only when the vehicle is stopped.
- **When doing the circling calibration**
  Be sure to secure a wide space, and watch out for people and vehicles in the neighborhood. Do not violate any local traffic rules while performing circling calibration.

**NOTICE**

- **To avoid the compass malfunctions**
  Do not place magnets or any metal objects near the inside rear view mirror.
  Doing this may cause a malfunction of the compass sensor.
- **To ensure normal operation of the compass**
  - Do not perform circling calibration of the compass in a place where the earth’s magnetic field is subject to interference by artificial magnetic fields.
  - During calibration, do not operate electric systems (moon roof, power windows, etc.) as they may interfere with the calibration.
3-7. Other interior features
Lexus Link System (if equipped)

The Lexus Link System is a communication service that uses Global Positioning System (GPS) data and cellular service to provide you with safety, security and convenience. This system is only operational in GPS and cellular coverage areas. Button operation and voice commands are used to operate the system. To operate the system, follow the voice guidance instructions. For details about service and subscription, call the Lexus Link Call Center at 1-800-25-LEXUS (1-800-255-3987) (toll-free).

■ Buttons

1. Voice keypad button
2. Volume control
3. Phone button
4. “SERVICES” button
5. Emergency button

■ Services

The Lexus Link System offers the following services.

- Airbag deployment notification (→P. 375)
- Emergency assistance (→P. 375)
- Stolen vehicle location assistance (→P. 376)
- Remote horn/lights and remote door lock/unlock (→P. 376)
- Advisor record (→P. 377)
- Personal calling (→P. 377)
- Other services (→P. 376)

Operating the Lexus Link System during a Bluetooth® phone call will terminate the Bluetooth® phone call.
Safety information for the Lexus Link System

Important! Read this information before using the Lexus Link System.

■ Exposure to radio frequency signals
The Lexus Link System installed in your vehicle is a low power ratio transmitter and receiver. When the "ENGINE START STOP" switch is in the IGNITION ON mode, it receives and also sends radio frequency (RF) signals.

In August 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for mobile wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies.

- ICNIRP (International Commission on Non-Ionizing Radiation Protection) [1996]

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. Over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1).

The design of the Lexus Link System complies with the FCC guidelines in addition to those standards.
Indicator and warning lights

1. Operation indicator light
   If your subscription has expired, the operation indicator light will go off.

2. Warning light
   If the warning light (red light) comes on, have the vehicle inspected by your Lexus dealer.

Airbag deployment notification

If an airbag deploys, an emergency call is automatically placed to the Lexus Link Call Center, and your vehicle’s location is identified. The Lexus Link Advisor will attempt to contact you and assess the situation. The Advisor can quickly contact the nearest emergency services provider, describe the situation and request that assistance be sent to your location.

The Lexus Link Advisor can, if requested, connect you to an emergency services operator.

Emergency assistance

When you press the button, a priority call is placed to the Lexus Link Call Center with your vehicle’s location. At the Call Center, the Lexus Link Advisor can determine your vehicle’s location, communicate with you, and, if appropriate, contact the nearest emergency service provider.

If you have accidentally pressed the button, tell the Lexus Link Advisor that you are not experiencing an emergency.
3-7. Other interior features

**Stolen vehicle location assistance**

If your vehicle is stolen, call the Lexus Link Call Center at 1-800-25-LEXUS (1-800-255-3987) (toll-free) and select the option for Lexus Link.

To protect subscribers’ privacy, the location of a vehicle will not be provided to anyone other than a law enforcement authority.

**Remote horn/lights and remote door lock/unlock**

The remote operations are performed by contacting the Lexus Link Call Center from the outside of the vehicle. When necessary, call the Lexus Link Call Center at 1-800-25-LEXUS (1-800-255-3987) (toll-free) and select the option for Lexus Link.

● In the case that you forget to lock the vehicle or you are locked out, the Lexus Link Call Center can send a signal to lock or unlock the vehicle remotely.

● In the case that you forget where you parked the vehicle, such as in a large parking lot, the Lexus Link Call Center can send a signal to flash the headlights and sound the horn to help you locate the vehicle.

When contacting the Lexus Link Call Center from the outside of the vehicle, you need the Lexus Link PIN (Personal Identification Number). Write the PIN down and carry it with you.

**Other services**

Press the button in the vehicle or call the Lexus Link Call Center at 1-800-25-LEXUS (1-800-255-3987) (toll-free), and then select the option for Lexus Link. The services provided will depend on the service plan level.
3-7. Other interior features

**Advisor record**

- **Recording a conversation with an advisor**
  Press the button to record a conversation. To stop recording, press the button again.
  - Up to 2 minutes of recording time is available.
  - Recording a new conversation deletes the previously recorded conversation.

- **Playing the recorded conversation**
  **STEP 1** Press the or button.
  **STEP 2** Say “Advisor playback”.
  Press the button again to stop the playback.
  To restart the playback, press the button, say “Advisor playback” and then select either of the following methods.
  - Say “Resume” to resume the playback.
  - Say “Play” to start from the beginning.

**Personal calling**

The hands-free personal calling feature can be added to the Lexus Link System as an option. You can purchase a package of minutes that works best for you. As you make and receive calls, minutes are deducted from your plan. They are easily billed to a credit card that is kept on file so no separate phone bill is needed.

- Personal calling universal voice recognition commands:
  - “Help” The system will provide a list of available commands.
  - “Clear” When you are entering digits, this command will erase the last digit entered.
  - “Cancel” This command takes you from the current function to the “Lexus Link ready” prompt. If the last response from the system was “Lexus Link ready”, this command will exit voice mode.
Voice recognition error message:

- **“Pardon”** The system responds with this message if the system does not recognize your voice command properly. Say the command slowly again. After the third time this happens, the system will try to guess the command you are requesting. If correct, say “Yes”. If not, say “No”, and the system will prompt you with its next-best guess.

- **“Slower please”** The system responds with this message if you say a command before the system is ready to listen or if your voice command cannot be recognized because of substantial background noise. Try to wait slightly longer before speaking.

**There are 5 ways to make a call.**

**Dialing a specific number**

1. **STEP 1** Press the \( \mathbb{P} \) button. When the system responds with “Lexus Link ready”, say “Dial”.

2. **STEP 2** When the system responds with “Phone number to dial please”, say the entire number you wish to dial without pausing.

3. **STEP 3** The system will repeat the number and ask “Yes or No”.

4. **STEP 4** Say “Yes” (or “No” to try again).

5. **STEP 5** The system responds with “Dialing” (your call will then be connected).

**Dialing digit-by-digit (“Digit Dial”)**

“Digit Dial” enables you to dial a phone number by individual digit. This is helpful when there is background noise and also improves voice recognition.

1. **STEP 1** Press the \( \mathbb{P} \) button. When the system responds with “Lexus Link ready”, say “Digit dial”.

2. **STEP 2** When the system responds with “Digit please”, say the first digit of the number to be dialed and wait for it to be repeated back to you.

3. **STEP 3** Continue one digit at a time until all digits are entered.
When finished, say “Dial”. The system responds with “Dialing” and your call is placed.

If you have problems storing a number using the continuous number method, you can store numbers one digit at a time using “Digit Store”. Simply follow the instructions above for “Digit Dial”, except say “Digit Store” in STEP 1 and “Store” in STEP 4.

- Dialing a phone number saved as a nametag

A nametag is a convenient way to store important or frequently called phone numbers for easy access at any time. To do this, choose a frequently-called number to store, the example below uses your home telephone number.

- How to store a nametag

1. Press the \[ \] button. When the system responds with “Lexus Link ready”, say “Store”.
2. When the system responds with “Phone number to store, please”, say the entire number you wish to store with no pauses. The system will repeat the number and ask “Yes or No”.
3. Say “Yes” (or “No” to try again).
4. When the system responds with “Nametag, please”, say “home”.
5. When the system responds with “About to store home. Does that sound OK?”, say “Yes” (or “No” to try again).
6. The system responds with “Storing home”.
   - The system can store up to 20 nametags.
   - Try to use multi-syllable nametags such as “my home”, and “the office”.
   - Try to avoid similar-sounding nametags like “Tim” and “Kim”.

When using the “Dial” and “Store” commands, the system will recognize 7, 10, and 11-digit phone numbers. When dialing or storing a phone number, you can say “zero” or “oh” for 0.
3-7. Other interior features

● How to place a call using a stored nametag

**STEP 1.** Press the button. When the system responds with “Lexus Link ready”, say “Call”.

**STEP 2.** When the system responds with “Nametag, please”, say the stored nametag.

**STEP 3.** The system responds with “Calling [nametag]”.

● How to hear a list of your stored nametags

**STEP 1.** Press the button. When the system responds with “Lexus Link ready”, say “Directory”.

**STEP 2.** The system will list your nametags.

▶ Dialing the last number you called (“Redial”)
You can dial the last number you called by using the “Redial” feature.

**STEP 1.** Press the button. When the system responds with “Lexus Link ready”, say “Redial”.

**STEP 2.** The system will respond with “Redialing [#]”.

▶ Dialing a number a Lexus Link Advisor downloaded to your vehicle

**STEP 1.** Press the button. When the system responds with “Lexus Link ready”, say “Number recall”.

**STEP 2.** The system will respond with “Connecting to number recall”.

■ Receiving a call
When someone calls you, you will hear a ring tone. Press the button to answer the call.

If you do not answer within 30 seconds, the system will terminate the incoming call.

■ Ending a call
When your call is finished, press the button to end the call.
Accessing voicemail and sending number tones to an automated phone system

You can access a voicemail system and respond to a number request from an automated phone system. When you receive the request for a number while in a call, press the \( \text{button} \) after saying the numbers one at a time, say “Dial”.

If you do not say any commands within 5 seconds after pressing the button, or if you press the button twice, the system cannot receive the number tones you are trying to send. Press the button to try again.

How to retrieve your phone number

1. **STEP** Press the \( \text{button} \). When the system responds with “Lexus Link ready”, say “My number”.

2. **STEP** The system responds with “Your number is [#]”.

If the response is “Personal calling unavailable”, this means your personal calling feature is not yet active, this may take a few days from vehicle delivery. It could also mean that the personal calling service is not available in your area. Press the \( \text{button} \) to check with an Advisor. Now that you have your number, take a moment to practice by making your first call to your home phone. Remember, the system recognizes numbers better when you say them quickly.
3-7. Other interior features

- **Verifying remaining units (minutes)**
  - To verify remaining minutes
    1. **STEP 1** Press the button. When the system responds with “Lexus Link ready”, say “Units”.
    2. **STEP 2** When the system responds with “Verify or add”, say “Verify”.
    3. **STEP 3** The system responds with “You have [#] units remaining”.
  - To add more calling units (minutes)
    1. **STEP 1** Press the button. When the system responds with “Lexus Link ready”, say “Units”.
    2. **STEP 2** When the system responds with “Verify or add”, say “Add”.
    3. **STEP 3** The system responds with “Connecting to the Personal Calling Center”.

- **Security code/locking your system**
  The personal calling function can be locked using a 4-digit security code. While the system is locked, it is only possible to communicate with the Lexus Link Call Center.

  To turn on/off the security
    1. **STEP 1** Press the button. When the system responds with “Lexus Link ready”, say “Security”.
    2. **STEP 2** When the system responds with “Enter first digit of code please”, say your 4-digit code one digit at a time.
    3. **STEP 3** After the fourth digit, the system responds with “Security (code ####) is now on/off”. 

GS_G_U

May 13, 2008 5:14 pm
### Speech recognition information

The Lexus Link speech recognition systems use speech technology that is designed to understand a wide range of speakers of American English. However, the technology may not work as well if a regional or ethnic accent is encountered. If the speech recognition system does not work properly, refer to the following.

- The system does not recognize your command properly if noise is present. Perform the following to improve voice command recognition.
  - Turn down or off the air conditioning system.
  - Slow down to reduce wind noise.
  - Close the windows and the moon roof to block outside noise.
  - Have all occupants be quiet so that the system does not recognize their conversation as a command.

- When to speak
  Say a command within 5 seconds after the system prompts you to speak.

- How to speak
  - Speak forcefully and clearly.
  - Speak calmly and naturally.
  - The driver should speak while facing forward, and the passenger should speak facing the inside rear view mirror.
  - Avoid speaking with a rising intonation. Use a flat or falling intonation.

- Tips for one-word commands
  - The system recognizes only one word at a time for personal calling. (There are some exceptions, such as “Advanced services” and “My number”.)
  - When inputting the security codes or voice-activated keypad number, you must say them one digit at a time. When inputting a phone number, the speech recognition system can recognize 7, 10, and 11-digit numbers as well as the number 911.
3-7. Other interior features

Tips for entering a phone number using the “Dial” and “Store” commands

• You do not need to say “Dial”, “Store” or “Verify” after the phone number.
• If the phone number entered is not 7, 10, or 11 digits, use the “Dial” or “Store” command.
• Do not pause between the digits.
• Speech recognition does not recognize the words “Hundred” or “Thousand”. Instead, say each digit.
• Speech recognition often works better when the digits are combined smoothly into a single phrase.
• If the system does not recognize your command properly, use the “Digit dial” command to enter one digit at a time.

If problems continue

• Say each one of the syllables in the word clearly.
• Be sure to articulate each sound in the word.
• If the system is confusing 2 commands that are similar, be sure to pronounce the distinction.
• Avoid clipping short words and syllables.
• Try speaking louder to prevent background noise from drowning out your voice.

Audible voice prompts

Some of the voice guidance instructions can be changed to Spanish. Press the button and ask a Lexus Link Advisor.

Information on Advanced Services

See the Lexus Link area of the Lexus website at www.lexus.com/lexuslink/ or call the Lexus Link Call Center at 1-800-25-LEXUS (1-800-255-3987) (toll-free) for more information.
Certification for the Lexus Link System

FCC ID: SCWTR-423-A2

NOTE:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION

FCC WARNING
Changes or modifications in construction not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
Radio Frequency Exposure. This device is approved for Mobile Application only and, to comply with applicable FCC radio frequency exposure regulations, must be used with a distance of at least 7.9 in. (20 cm) between the antenna and the body of any person at all time during use.

4-1. Maintenance and care

Cleaning and protecting the vehicle exterior

Perform the following to protect the vehicle and maintain it in prime condition.

- Working from top to bottom, liberally apply water to the vehicle body, wheel wells and underside of the vehicle to remove any dirt and dust.
  
  Wash the vehicle body using a sponge or soft cloth, such as a chamois.
- For hard-to-remove marks, use car wash soap and rinse thoroughly with water.
- Wipe away any water.
- Wax the vehicle when the waterproof coating deteriorates.
  
  If water does not bead on a clean surface, apply wax when the vehicle body is cool.

- Automatic car washes
  
  - Fold the mirrors back before washing the vehicle.
  - Brushes used in automatic car washes may scratch the vehicle surface and harm your vehicle’s paint.
  - Before entering an automatic car wash, check that the fuel filler door is closed.

- High pressure washers
  
  Do not allow the nozzles of the washers to come within close proximity of the windows and fuel filler door.
Maintenance and care

**Aluminum wheels**

Remove any dirt immediately by using a neutral detergent. Do not use hard brushes or abrasive cleaners. Do not use strong or harsh chemical cleaners. Use the same mild detergent and wax as used on the paint.

**Bumpers and side moldings**

Do not scrub with abrasive cleaners.

**To prevent paint deterioration and corrosion on the body**

- Wash the vehicle immediately in the following cases:
  - After driving near the sea coast
  - After driving on salted roads
  - If you see coal tar or tree sap on the paint surface
  - If you see dead insects, insect droppings or bird droppings on the paint
  - After driving in an area contaminated with soot, oily smoke, mine dust, iron powder or chemical substances
  - If the vehicle becomes heavily soiled in dust or mud
  - If liquids such as benzene and gasoline are spilled on the paint surface
- If the paint is chipped or scratched, have it repaired immediately.

**CAUTION**

**Caution about the exhaust pipe**

Exhaust gasses cause the exhaust pipe to become quite hot. When washing the vehicle, be careful not to touch the pipe until it has cooled sufficiently, as touching a hot exhaust pipe can cause burns.
### NOTICE

#### To protect your vehicle’s painted surfaces
Do not use organic cleaners such as benzene or gasoline.

#### Cleaning the exterior lights
- Wash carefully. Do not use organic substances or scrub with a hard brush. This may damage the surfaces of the lights.
- Do not apply wax on the surfaces of the lights. Wax may cause damage to the lenses.

#### When using an automatic car wash (with rain-sensing windshield wipers)
Set the wiper switch to “OFF”. If the wiper switch is in “AUTO”, the wipers may operate and the wiper blades may be damaged.

![](image.png)
Cleaning and protecting the vehicle interior

The following procedures will help protect your vehicle’s interior and keep it in top condition:

■ Protecting the vehicle interior
  Remove dirt and dust using a vacuum cleaner. Wipe dirty surfaces with a cloth dampened with lukewarm water.

■ Cleaning the leather areas
  ● Remove dirt and dust using a vacuum cleaner.
  ● Wipe any excess dirt and dust with a soft cloth dampened with diluted detergent.
    Use a diluted water solution of approximately 5% neutral wool detergent.
  ● Wring out any excess water from the cloth and thoroughly wipe off all remaining traces of detergent.
  ● Wipe the surface with a dry, soft cloth to remove any remaining moisture. Allow the leather to dry in a shaded and ventilated area.

■ Synthetic leather areas
  ● Remove loose dirt using a vacuum cleaner.
  ● Apply a mild soap solution to the synthetic leather using a sponge or soft cloth.
  ● Allow the solution to soak in for a few minutes. Remove the dirt and wipe off the solution with a clean, damp cloth.
4.1. Maintenance and care

- **Cleaning the inside of the rear window**
  Do not use glass cleaner to clean the rear window, as this may cause damage to the rear window defogger heater wires. Use a cloth dampened with lukewarm water to gently wipe the window clean. Wipe the window in strokes running parallel to the heater wires.

- **Caring for leather areas**
  Lexus recommends cleaning the interior of the vehicle at least twice a year to maintain the quality of the vehicle's interior.

- **Shampooing the carpets**
  There are several commercial foaming-type cleaners available. Use a sponge or brush to apply the foam. Rub in overlapping circles. Do not apply water. The excellent results are obtained by keeping the carpet as dry as possible.

- **Seat belts**
  Clean with mild soap and lukewarm water using a cloth or sponge. Also check the belts periodically for excessive wear, fraying or cuts.

<table>

GS_G_U
May 13, 2008 5:14 pm
**NOTICE**

- **Cleaning detergents**
  Do not use the following types of detergent, as they may discolor the vehicle interior or cause streaks or damage to painted surfaces.
  - Non-seat portions: Organic substances such as benzene or gasoline, alkaline or acidic solutions, dye, or bleach.
  - Seats: Acidic solutions, such as thinner, benzene, or alcohol.

- **Preventing damage to leather surfaces**
  Observe the following precautions to avoid damage to and deterioration of leather surfaces.
  - Remove any dust or dirt on leather surfaces immediately.
  - Do not expose the vehicle to direct sunlight for extended periods of time. Park the vehicle in the shade, especially during summer.
  - Do not place items made of vinyl, plastic, or that contain wax on the upholstery, as they may stick to the leather surface if the vehicle interior heats up significantly.

- **Water on the floor**
  Do not wash the vehicle floor with water. Vehicle systems such as the audio system may be damaged if water comes into contact with electrical components under the floor of the vehicle, and may also cause the body to rust.

- **Cleaning the inside of the rear window**
  Be careful not to scratch or damage the heater wires or antenna.
4-2. Maintenance

Maintenance requirements

To ensure safe and economical driving, day-to-day care and regular maintenance is essential. It is the owner’s responsibility to perform regular checks. Lexus recommends the following maintenance.

- **General maintenance**
  Should be performed on a daily basis. This can be done by yourself or by a Lexus dealer.

- **Scheduled maintenance**
  Should be performed at specified intervals according to the maintenance schedule.

  For details about maintenance items and schedules, refer to the “Warranty and Services Guide/Owner’s Manual Supplement/Scheduled Maintenance”.

- **Do-it-yourself maintenance**
  You can perform some maintenance procedures yourself. Please be aware that do-it-yourself maintenance may affect warranty coverage.

  The use of Lexus Repair Manuals is recommended.

  For details about warranty coverage, see the separate “Owner’s Guide”, “Warranty and Services Guide”, “Owner’s Manual Supplement” or “Warranty Booklet”.

- **Repair and replacement**
  It is recommended that genuine Lexus parts be used for repair to ensure performance of each system. If non-Lexus parts are used in replacement or if a repair shop other than a Lexus dealer performs repairs, confirm the warranty coverage.
Allow inspection and repairs to be performed by a Lexus dealer

- Lexus technicians are well-trained specialists and are kept up to date with the latest service information. They are well informed about the operations of all systems on your vehicle.
- Keep a copy of the repair order. It proves that the maintenance that has been performed is under warranty coverage. If any problem should arise while your vehicle is under warranty, your Lexus dealer will promptly take care of it.

CAUTION

Hazardous materials

- Engine exhaust, some of its constituents, and a wide variety of automobile components contain or emit chemicals known to the State of California to cause cancer and birth defects and other reproductive harm. Work in a well ventilated area.
- Oils, fuels and fluids contained in vehicles as well as waste produced by component wear contain or emit chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Avoid exposure and wash any affected area immediately.
- 12 volt battery posts, terminals and related accessories contain lead and lead compounds which are known to cause brain damage. Wash your hands after handling. (→ p. 417)
- Used engine oil contains chemicals that have been shown to cause cancer in laboratory animals. Avoid prolonged and repeated contact. Always protect your skin by washing thoroughly with soap and water.
Listed below are the general maintenance items that should be performed at the intervals specified in the “Warranty and Services Guide/Owner’s Manual Supplement”. It is recommended that any problem you notice should be brought to the attention of your Lexus dealer or qualified service shop for advice.

<tr>
<td></td>
<td>• Wheel nuts are not loose?</td>
</tr>
</tbody>
</table>

**CAUTION**

- **If the engine is running**

  Turn off the engine and ensure that there is adequate ventilation before performing maintenance checks.
Some states have vehicle emission inspection programs which include OBD (On Board Diagnostics) checks. The OBD system monitors the operation of the emission control system.

■ If the malfunction indicator lamp comes on
  The OBD system determines that a problem exists somewhere in the emission control system. Your vehicle may not pass the I/M test and may need to be repaired. Contact your Lexus dealer to service the vehicle.

■ Your vehicle may not pass the I/M test:
  ● When the 12 volt battery is disconnected or discharged
    Readiness codes that are set during ordinary driving are erased. Also, depending on your driving habits, the readiness codes may not be completely set.
  ● When the fuel tank cap is loose
    The malfunction indicator lamp comes on as a temporary malfunction and your vehicle may not pass the I/M test.

■ When the malfunction indicator lamp goes off after several driving trips
  The error code in the OBD system will not be cleared unless the vehicle is driven 40 or more times.

■ If your vehicle does not pass the I/M test
  Contact your Lexus dealer to prepare the vehicle for re-testing.
## 4-3. Do-it-yourself maintenance
### Do-it-yourself service precautions

If you perform maintenance yourself, be sure to follow the correct procedure given in these sections.

<table>
<thead>
<tr>
<th>Items</th>
<th>Parts and tools</th>

CAUTION

The engine compartment contains many mechanisms and fluids that may move suddenly, become hot, or become electrically energized. To avoid death or serious injury, observe the following precautions.

■ When working on the engine compartment
  - Keep hands, clothing, and tools away from the moving fan and engine drive belt.
  - Be careful not to touch the engine, radiator, exhaust manifold, etc. right after driving as they may be hot. Oil and other fluids may also be hot.
  - Do not leave anything that may burn easily, such as paper or rags, in the engine compartment.
  - Do not smoke, cause sparks or expose an open flame to fuel or the 12 volt battery. Fuel and 12 volt battery fumes are flammable.
  - Be extremely cautious when working on the 12 volt battery. It contains poisonous and corrosive sulfuric acid.

■ When working near the electric cooling fan or radiator grille
  Be sure the “ENGINE START STOP” switch is OFF.
  With the “ENGINE START STOP” switch in IGNITION ON mode, the electric cooling fan may automatically start to run if the air conditioning is on and/or the coolant temperature is high. (→P. 415)

■ Safety glasses
  Wear safety glasses to prevent flying or falling material, fluid spray, etc. from getting in the eyes.

NOTICE

■ If you remove the air cleaner filter
  Driving with the air cleaner filter removed may cause excessive engine wear due to dirt in the air. Also a backfire could cause a fire in the engine compartment.
4-3. Do-it-yourself maintenance

Hood

Release the lock from the inside of the vehicle to open the hood.

Pull the hood lock release lever. The hood will pop up slightly.

Lift the hood catch and lift the hood.

**CAUTION**

- **Pre-driving check**
  
  Check that the hood is fully closed and locked. If the hood is not locked properly it may open while the vehicle is in motion and cause an accident, which may result in death or serious injury.
When raising your vehicle with a floor jack, position the jack correctly. Improper placement may damage your vehicle or cause injury.

► Front

► Rear
CAUTION

When raising your vehicle

Make sure to observe the following to reduce the possibility of death or serious injury.

- Lift up the vehicle using a floor jack such as the one shown in the illustration.

- Do not use the jack that was supplied with your vehicle.
- Do not put any part of your body or get underneath the vehicle supported only by the floor jack. Always use automotive jack stands or a solid, level surface.
- Do not start the engine while the vehicle is supported by the floor jack.
- Stop the vehicle on level firm ground, firmly set the parking brake and put the shift lever in “P”.
- Make sure to set the floor jack properly at the jack point. Raising the vehicle with an improperly positioned floor jack will damage the vehicle and may cause the vehicle to fall off the floor jack.
- Do not raise the vehicle while someone is in the vehicle.
- When raising the vehicle, do not place any objects on top of or underneath the floor jack.
4-3. Do-it-yourself maintenance

Engine compartment

GS460

1. Engine oil level dipstick (→P. 409)
2. Engine oil filler cap (→P. 410)
3. Brake fluid reservoir (→P. 416)
4. Fuse box (→P. 442)
5. Washer fluid tank (→P. 420)
6. Engine coolant reservoir (→P. 414)
7. Electric cooling fans
8. Condenser (→P. 415)
9. Radiator (→P. 415)
10. Fuse box
11. 12 volt battery (→P. 417)
4-3. Do-it-yourself maintenance

GS350

1. Engine oil level dipstick  (→P. 409)
2. Engine oil filler cap  (→P. 410)
3. Brake fluid reservoir  (→P. 416)
4. Fuse box  (→P. 442)
5. Washer fluid tank  (→P. 420)
6. Engine coolant reservoir  (→P. 414)
7. Electric cooling fans  
8. Condenser  (→P. 415)
9. Radiator  (→P. 415)
10. Fuse box  (→P. 442)
11. 12 volt battery  (→P. 417)
Engine compartment cover

- Removing the cover

  - Front

  - Right-hand side

  - Left-hand side
■ Installing the clips

1. Push up center portion
2. Insert
3. Press

■ Engine oil

With the engine at operating temperature and turned off, check the oil level on the dipstick.

■ Checking the engine oil

**STEP 1** Park the vehicle on level ground. After turning off the engine, wait a few minutes for the oil to drain back into the bottom of the engine.

**STEP 2** Hold a rag under the end and pull the dipstick out.

**STEP 3** Wipe the dipstick clean.

**STEP 4** Reinsert the dipstick fully.

**STEP 5** Holding a rag under the end, pull the dipstick out and check the oil level.
4-3. Do-it-yourself maintenance

Adding engine oil

If the oil level is below or near the low level mark, add engine oil of the same type as already in the engine.

Make sure to check the oil type and prepare the items needed before adding oil.

<table>
<thead>
<tr>
<th>Oil grade</th>
<th>ILSAC multigrade engine oil</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oil quantity</td>
<td>1.6 qt. (1.5 L, 1.3 Imp. qt.)</td>
</tr>
<tr>
<td>Items</td>
<td>Clean funnel</td>
</tr>
</tbody>
</table>

**STEP 6** Wipe the dipstick and reinsert it fully.

**STEP 1** Remove the oil filler cap.
**STEP 2** Add engine oil slowly, checking the dipstick.
**STEP 3** Install the filler cap, turning it clockwise.
■ Recommended viscosity

GS460

SAE 5W-20 or 0W-20 engine oil may be used. However, SAE 0W-20 is the best choice for good fuel economy and good starting in cold weather.

GS350

SAE 5W-30 is the best choice for good fuel economy, and good starting in cold weather.

If SAE 5W-30 oil is not available, SAE 10W-30 oil may be used. However, it should be replaced with SAE 5W-30 at the next oil change.

■ How to read oil container labels

The ILSAC (International Lubricant Standardization and Approval Committee) Certification Mark is added to some oil containers to help you select the oil you should use.
4-3. Do-it-yourself maintenance

- **Engine oil consumption**
  - The amount of engine oil consumed depends on the oil viscosity, the quality of the oil and the way the vehicle is driven.
  - More oil is consumed under driving conditions such as high speeds, frequent acceleration and deceleration.
  - A new engine consumes more oil.
  - When judging the amount of oil consumption, keep in mind that the oil may have become diluted, making it difficult to judge the true level accurately.
  - Oil consumption: Max. 1.1 qt./600 miles, 0.9 lmp.qt./600 miles (1.0 L per 1000 km). If the vehicle consumes more than this amount, contact your Lexus dealer.

- **Resetting the engine oil maintenance data (U.S.A. only)**
  Perform the following steps:
  
  **STEP 1**: Press the “DISP” switch (→P. 140) to change the multi-information display to blank.
  
  **STEP 2**: Turn the “ENGINE START STOP” switch to OFF.
  
  **STEP 3**: Turn the “ENGINE START STOP” switch to IGNITION ON mode with the trip meter reset button held down.
  
  **STEP 4**: Keep pressing the button for longer than 7 seconds after the “ENGINE START STOP” switch is in IGNITION ON mode.
  
  After the above operation, the message shown in the left will appear on the display.
  The master warning light and tone will turn on. After 5 seconds, the system reset is completed.
## CAUTION

**Used engine oil**
- Used engine oil contains potentially harmful contaminants which may cause skin disorders such as inflammation or skin cancer, so care should be taken to avoid prolonged and repeated contact. To remove used engine oil from your skin, wash thoroughly with soap and water.
- Dispose of used oil and filters only in a safe and acceptable manner. Do not dispose of used oil and filters in household trash, in sewers or onto the ground. Call your Lexus dealer, service station or auto parts store for information concerning recycling or disposal.
- Do not leave used engine oil within the reach of children.

## NOTICE

**To prevent serious engine damage**
Check the oil level on regular basis.

**When replacing the engine oil**
- Be careful not to spill engine oil on the vehicle components.
- Avoid overfilling, or the engine could be damaged.
- Check the oil level on the dipstick every time you refill the vehicle.
- Be sure the engine oil filler cap is properly tightened.
Coolant

The coolant level is satisfactory if it is between the “FULL” and “LOW” lines on the reservoir when the engine is cold.

1 Reservoir cap
2 “FULL”
3 “LOW”

If the level is on or below the “LOW” line, add coolant up to the “FULL” line.

- If the coolant level drops within a short time after replenishing
  Visually check the radiator, hoses, reservoir cap, radiator cap, drain cock and water pump.
  If you cannot find a leak, have your Lexus dealer pressure test the cap and check for leaks in the cooling system.

- Coolant selection
  Only use “Toyota Super Long Life Coolant” or similar high quality ethylene glycol based non-silicate, non-amine, non-nitrite, and non-borate coolant with long-life hybrid organic acid technology.

  U.S.A.: “Toyota Super Long Life Coolant” is a mixture of 50% coolant and 50% deionized water. (Enabled: -31°F [-35°C])
  Canada: “Toyota Super Long Life Coolant” is a mixture of 55% coolant and 45% deionized water. (Enabled: -44°F [-42°C])

  For more details about coolant, contact your Lexus dealer.
Check the radiator and condenser and clear any foreign objects.
If either of the above parts are extremely dirty or you are not sure of their condition, have your vehicle checked by your Lexus dealer.

---

**CAUTION**

■ **When the engine is hot**
Do not remove the radiator and reservoir cap. The cooling system may be under pressure and may spray hot coolant if the cap is removed, causing burns or other injuries.

---

**NOTICE**

■ **When adding the coolant**
Coolant is neither plain water not straight antifreeze. The correct mixture of water and antifreeze must be used to provide proper lubrication, corrosion protection and cooling. Be sure to read the antifreeze or coolant label.

■ **If you spill coolant**
Be sure to wash it off with water to prevent it from damaging to parts or paint.

---

**Radiator and condenser**

Check the radiator and condenser and clear any foreign objects.
If either of the above parts are extremely dirty or you are not sure of their condition, have your vehicle checked by your Lexus dealer.

---

**CAUTION**

■ **When the engine is hot**
Do not touch the radiator or condenser, as they may be hot and you may be burned.
Brake fluid

- Checking fluid level

The brake fluid level should be between the “MAX” and “MIN” lines on the tank.

Make sure to check the fluid type and prepare the necessary items.

- Adding fluid

<table>
<thead>
<tr>
<th>Fluid type</th>
<th>FMVSS No.116 DOT 3 or SAE J1703 brake fluid</th>
</tr>
</thead>
<tbody>
<tr>
<td>Items</td>
<td>Clean funnel</td>
</tr>
</tbody>
</table>

- Brake fluid can absorb moisture from the air

Excess moisture in the fluid can cause a dangerous loss of braking efficiency. Use only newly opened brake fluid.

⚠️ CAUTION

- When filling the reservoir

Take care because brake fluid can harm your hands or eyes and damage painted surfaces.
If fluid gets in your eyes, flush your eyes with clean water immediately.
If you still experience discomfort, see a doctor.
4-3. Do-it-yourself maintenance

**NOTICE**

- **If the fluid level is low or high**
  It is normal for the brake fluid level to go down slightly as the brake pads wear or when the fluid level in the accumulator is high.
  If the reservoir needs frequent refilling, it may indicate a serious problem.

**12 volt battery**

Check the battery as follows.

- **Exterior**
  Make sure that the battery terminals are not corroded and that there are no loose connections, cracks, or loose clamps.

- **Check battery condition**
  Check the battery condition by the indicator color.
  
  1. Blue: Good condition
  2. White: Charging necessary
  3. Red: Not working properly, have the battery checked by your Lexus dealer.
4-3. Do-it-yourself maintenance

■ Before recharging
When recharging, the battery produces hydrogen gas which is flammable and explosive. Therefore, before recharging:
● If recharging with the battery installed on the vehicle, be sure to disconnect the ground cable.
● Make sure the power switch on the charger is off when connecting and disconnecting the charger cables to the battery.

■ After recharging/reconnecting the battery
In some cases, the engine may not start. Follow one or both of the following procedures:
● After opening and closing the driver’s door, wait 10 seconds then attempt to start the engine. (If the system does not start first time, repeat the procedure.)
● With the shift lever in “P” and the “ENGINE START STOP” switch is OFF, open and close any door, then attempt to start the engine.
If the system will not start even after multiple attempts at both methods, contact your Lexus dealer.
CAUTION

Chemicals in the battery
A battery contains poisonous and corrosive sulfuric acid and may produce hydrogen gas which is flammable and explosive. To reduce the risk of death or serious injury, take the following precautions while working on or near battery:

● Do not cause sparks by touching the battery terminals with tools.
● Do not smoke or light a match near the battery.
● Avoid contact with eyes, skin and clothes.
● Never inhale or swallow electrolyte.
● Wear protective safety glasses when working near the battery.
● Keep children away from the battery.

Where to safety charge the battery
Always charge the battery in an open area. Do not charge the battery in a garage or closed room where there is not sufficient ventilation.

How to recharge the battery
Only perform a slow charge (5A or less). The battery may explode if charged at a quicker rate.

Emergency measures regarding electrolyte

● If electrolyte gets in your eyes
  Flush your eyes with clean water for at least 15 minutes and get immediate medical attention. If possible, continue to apply water with a sponge or cloth while traveling to the nearest medical facility.

● If electrolyte gets on your skin
  Wash the affected area thoroughly. If you feel pain or a burning sensation, seek medical attention immediately.

● If electrolyte gets on your clothes
  It can soak through clothing on to your skin. Immediately take off the clothing and follow the procedure above if necessary.

● If you accidentally swallow electrolyte
  Drink a large quantity of water or milk. Follow with milk of magnesia, beaten raw egg or vegetable oil. Get emergency medical attention immediately.
4-3. Do-it-yourself maintenance

**NOTICE**

- **When recharging the battery**
  Never recharge the battery while the engine is on. Also, be sure all accessories are turned off.

**Washer fluid**

If any washer does not work or the warning message appears on the multi-information display, the washer tank may be empty. Add washer fluid.

**CAUTION**

- **When refilling the washer fluid**
  Do not refill the washer fluid when the engine is hot or running, as the washer fluid contains alcohol and may catch the fire if spilled on the engine etc.

**NOTICE**

- **Do not use any fluid other than washer fluid**
  Do not use soapy water or engine antifreeze instead of washer fluid. Doing so may cause streaking on the vehicle’s painted surfaces.

- **Diluting washer fluid**
  Dilute washer fluid with water as necessary. Refer to the freezing temperatures listed on the washer fluid tank.
Replace or rotate tires in accordance with maintenance schedule and treadwear.

### Checking tires

- **1** New tread
- **2** Treadwear indicator
- **3** Worn tread

The location of treadwear indicators is shown by the “TWI” or “Δ” marks, etc., molded on the sidewall of each tire.

Check spare tire condition and inflation pressure if not rotated.

### Tire rotation

Rotate the tires in the order shown.

To equalize tire wear and extend tire life, Lexus recommends that tire rotation is carried out at the same interval as tire inspection.

### The tire pressure warning system

Your Lexus is equipped with a tire pressure warning system that uses tire pressure warning valves and transmitters to detect low tire inflation pressure before serious problems arise. (→P. 490, 498)
Installing tire pressure warning valves and transmitters

When replacing tires or wheels, tire pressure warning valves and transmitters must also be installed.

When new tire pressure warning valves and transmitters are installed, new tire pressure warning valve and transmitter ID codes must be registered in the tire pressure warning computer and tire pressure warning system must be initialized. Have tire pressure warning valve and transmitter ID codes registered by your Lexus dealer. (→ P. 424)

Initializing the tire pressure warning system

■ The tire pressure warning system must be initialized in the following circumstances:
  ● When rotating the tires on vehicles differing with front and rear tire inflation pressures.
  ● When changing the tire inflation pressure by changing traveling speed or load weight, etc.

When the tire pressure warning system is initialized, the current tire inflation pressure is set as the pressure benchmark.
How to initialize the tire pressure warning system

1. Park the vehicle in a safe place and turn the "ENGINE START STOP" switch to OFF.

While the vehicle is moving, initialization is not performed.

2. Adjust the tire inflation pressure to the specified cold tire inflation pressure level. (→P. 550)

Make sure to adjust the tire pressure to the specified cold tire inflation pressure level. The tire pressure warning system will operate based on this pressure level.

3. Turn the "ENGINE START STOP" switch to IGNITION ON mode.

4. Push and hold the tire pressure warning reset switch until the tire pressure warning light blinks slowly three times and the message "PRESSURE INITIAL" appears on the multi-information display.

5. Wait for a few minutes with the IGNITION ON mode, and then turn "ENGINE START STOP" switch to the OFF.
Registering and selecting ID codes

Registering ID codes

2 sets of tire pressure warning valve and transmitter ID codes can be registered. Once a second set of tires is registered at “2nd”, you can switch between tire set settings simply by pressing the tire pressure warning select switch.

There are 2 settings:

“MAIN” position: The ID code of the tire pressure warning valve and transmitter on the tires originally installed on the vehicle is registered.

“2nd” position: The ID code is not registered. When you replace a new set of tires, purchase tire pressure warning valves and transmitters from your Lexus dealer and have the new ID code registered by your Lexus dealer.

Selecting ID codes

When replacing tires, make sure to select the ID code set that matches the new tire set. If the tire pressure warning select switch is set to the wrong tire setting, the tire pressure warning system will not operate properly. After driving for about 20 minutes, the tire pressure warning light comes on after blinking for 1 minute to indicate a system malfunction.

1 “MAIN”
2 “2nd”
When to replace your vehicle’s tires

Tires should be replaced if:

- You have tire damage such as cuts, splits, cracks deep enough to expose the fabric or bulges indicating internal damage
- A tire goes flat repeatedly or cannot be properly repaired due to the size or location of a cut or other damage

If you are not sure, consult with your Lexus dealer.

Replacing tires and wheels

If the ID code of the tire pressure warning valve and transmitter is not registered, the tire pressure warning system will not work properly. After driving for about 20 minutes, the tire pressure warning light comes on after blinking for 1 minute to indicate a system malfunction.

Tire life

Any tire over 6 years old must be checked by a qualified technician even if they have seldom or never been used or damage is not obvious.

- If the tread wears down below 0.16 in. (4 mm) on snow tires
  The effectiveness of snow tires is lost.

- Low profile tires (245/40R18, P245/40R18 and 245/40ZR18 tires)
  Generally, low profile tires will wear more rapidly and tire grip performance will be reduced on snowy and/or icy roads when compared to standard tires. Be sure to use snow tires or snow chains on snowy and/or icy roads and drive carefully at a speed appropriate for road and weather conditions.

Initializing the tire pressure warning system

Initialize the tires with the tire inflation pressure adjusted to the specified level.
Maximum load of tire

Check that the maximum load of the replaced tire is greater than 1/2 of the Gross Axle Weight Ratings (GAWR) of either the front axle or the rear axle, whichever is greater.

As for the maximum load of the tire, see the load limit at maximum cold tire inflation pressure mentioned on the sidewall of the tire, and as for the Gross Axle Weight Ratings (GAWR), see the Certification Label. (→P. 431, 556).

Tire types

1. Summer tires

Summer tires are high-speed performance tires best suited to highway driving under dry conditions. Since summer tires do not have the same traction performance as snow tires, summer tires are inadequate for driving on snow-covered or icy roads. For driving on snow-covered roads or icy roads, the use of snow tires is recommended. When installing snow tires, be sure to replace all four tires.

2. All season tires

All season tires are designed to provide better traction in snow and to be adequate for driving in most winter conditions, as well as for use year round. All season tires, however, do not have adequate traction performance compared with snow tires in heavy or loose snow. Also, all season tires fall short in acceleration and handling performance compared with summer tires in highway driving.

3. Snow tires

For driving on snow-covered roads or icy roads, we recommend using snow tires. If you need snow tires, select tires of the same size, construction and load capacity as the originally installed tires. Since your vehicle has radial tires as original equipment, make sure your snow tires also have radial construction. Do not install studded tires without first checking local regulations for possible restriction. Snow tires should be installed on all wheels. (→P. 199)
Initializing the tire pressure warning system

Initialize the tires with the tire inflation pressure adjusted to the specified level.

If you push the tire pressure warning reset switch accidentally

If initialization is performed, adjust the tire inflation pressure to the specified level and initialize the system again.

When the initialization of the tire pressure warning system has failed

Initialization can be completed in a few minutes. However, in the following cases, the settings have not been recorded and the system will not operate properly. If repeated attempts to record tire inflation pressure settings are unsuccessful, have the vehicle inspected by your Lexus dealer.

- When operating the tire pressure warning reset switch, the tire pressure warning light does not flash 3 times and the setting message does not appear on the multi-information display.
- After carrying out the initialization procedure, the tire pressure warning light blinks for 1 minute then stays on after driving for 20 minutes.

Routine tire inflation pressure checks

The tire pressure warning system does not replace routine tire inflation pressure checks. Make sure to check tire inflation pressure as part of your routine of daily vehicle checks.
4-3. Do-it-yourself maintenance

- Tire pressure warning system certification
  - For vehicles sold in the U.S.A.
  
  **NOTE:**
  This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

  **NOTICE:**
  This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  
  ● Reorient or relocate the receiving antenna.
  
  ● Increase the separation between the equipment and receiver.
  
  ● Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  
  ● Consult the dealer or an experienced radio/TV technician for help.

  **FCC WARNING:**
  Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
For vehicles sold in Canada

NOTE:
Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

CAUTION

■ When inspecting or replacing tires
  Observe the following precautions to prevent accidents. Failure to do so may cause damage to parts of the drive train, as well as dangerous handling characteristics, which may lead to fatal or injury accidents.
  ● Do not mix tires of different makes, models, tread patterns or treadwear.
  ● Do not use tire sizes other than those recommended by Lexus.
  ● Do not mix radial, bias-belted, or bias-ply tires.
  ● Do not mix summer, all season and winter tires.
  ● Do not use tires that have been used on another vehicle.
    Do not use tires if you do not know how they were used previously.

■ When initializing the tire pressure warning system
  Do not push the tire pressure warning reset switch without first adjusting the tire inflation pressure to the specified level. Otherwise, the tire pressure warning light may not come on even if the tire inflation pressure is low, or it may come on when the tire inflation pressure is actually normal.
### NOTICE

- **Repairing or replacing tires, wheels and tire pressure warning valves and transmitters**
  > When removing or fitting the wheels, tires or the tire pressure warning valve and transmitter, contact your Lexus dealer as the tire pressure warning valve and transmitter may be damaged if not handled correctly.

- **To avoid damaging the tire pressure warning valves and transmitters**
  > Do not use liquid sealants on flat tires.

- **Driving on rough roads**
  > Take particular care when driving on roads with loose surfaces or potholes. These conditions may cause losses in tire inflation pressure, reducing the cushioning ability of the tires. In addition driving on rough roads may cause damage to the tires themselves, as well as the vehicle’s wheels and body.

- **Low profile tires (245/40R18, P245/40R18 and 245/40ZR18 tires)**
  > Low profile tires may cause greater damage than usual to the tire wheel when receiving impact from the road surface. Therefore pay attention to the following:
    - Be sure to use proper tire inflation pressure. If tires are under-inflated, they may be damaged more severely.
    - Avoid hot holes, uneven pavement, curbs and other road hazards. Failure to do so can lead to severe tire and wheel damage.

- **If tire inflation pressures become low while driving**
  > Do not continue driving, or your tires and/or wheels may be ruined.
4-3. Do-it-yourself maintenance
Tire inflation pressure

■ Tire inflation pressure
The recommended cold tire inflation pressure and tire size is displayed on the tire and loading information label. (→P. 550)
4-3. Do-it-yourself maintenance

**Tire inflation pressure check interval**

You should check tire inflation pressure every 2 weeks, or at least once a month. If equipped, do not forget to check the spare.

---

**Inspection and adjustment procedure**

**STEP 1** Remove the tire valve cap.

**STEP 2** Press the tip of the tire pressure gauge onto the tire valve.

**STEP 3** Read the pressure using the graduations of the gauge.

**STEP 4** If the tire inflation pressure is not within the recommended levels, adjust tire pressure.
   If you add too much air, press the center of the valve to lower.

**STEP 5** After completing the tire inflation pressure measurement and adjustment, apply soapy water to the valve and check for leakage.

**STEP 6** Reinstall the tire valve cap.
4-3. Do-it-yourself maintenance

Effects of incorrect tire inflation pressure
Driving with incorrect tire inflation pressure may result in the following:
- Reduced fuel efficiency
- Reduced driving comfort and tire life
- Reduced safety
- Damage to the drive train

If a tire needs frequent refilling, have it checked by your Lexus dealer.

Instructions for checking tire inflation pressure
When checking tire inflation pressure, observe the following:
- Check only when the tires are cold.
  If your vehicle has been parked for at least 3 hours and has not been driven for more than 1 mile or 1.5 km, you will get an accurate cold tire inflation pressure reading.
- Always use a tire pressure gauge.
  The appearance of the tire can be misleading. In addition, tire inflation pressures that are even just a few pounds off can degrade ride and handling.
- Do not bleed or reduce tire inflation pressure after driving. It is normal for the tire inflation pressure to be higher after driving.
- Never exceed the vehicle capacity weight.
  Passengers and luggage weight should be placed so that the vehicle is balanced.
### CAUTION

- **Proper inflation is critical to save tire performance**
  
  Keep your tires properly inflated. Otherwise, the following conditions may occur and result in an accident causing death or serious injury.
  
  - Excessive wear
  - Uneven wear
  - Poor handling
  - Possibility of blowouts resulting from overheated tires
  - Poor sealing of the tire bead
  - Wheel deformation and/or tire separation
  - A greater possibility of tire damage from road hazards

### NOTICE

- **When inspecting and adjusting tire inflation pressure**
  
  Be sure to reinstall the tire valve caps.

  Without the valve caps, dirt or moisture could get into the valve and cause air leakage, which could result in an accident. If the caps have been lost, replace them as soon as possible.
Wheels

If a wheel is bent, cracked or heavily corroded, it should be replaced. Otherwise, the tire may separate from the wheel or cause loss of handling control.

- **Wheel selection**
  When replacing wheels, care should be taken to ensure that they are equivalent to those removed in load capacity, diameter, rim width, and offset. Replacement wheels are available at your Lexus dealer.
  Lexus does not recommend using:
  - Wheels of different sizes or types
  - Used wheels
  - Bent wheels that have been straightened

- **Aluminum wheel precautions**
  - Use only Lexus wheel nuts and wrenches designed for use with your aluminum wheels.
  - After rotating, repairing or changing your tires, check that the wheel nuts are still tight after driving 1000 miles (1600 km).
  - Be careful not to damage the aluminum wheels when using tire chains.
  - Use only Lexus genuine balance weights or equivalent when balancing your wheels.
When replacing wheels

The wheels of your Lexus are equipped with tire pressure warning valves and transmitters that allow the tire pressure warning system to provide advanced warning in the event of a loss in tire inflation pressure. Whenever wheels are replaced, the tire pressure warning valves and transmitters must be installed. (→P. 422)

**CAUTION**

- Do not use wheels that are a different size from those recommended in the Owner’s Manual, as this may result in loss of handling control.
- Never use an inner tube in a leaking wheel which is designed for a tubeless tire. Doing so may result in an accident, causing death or serious injury.

**NOTICE**

- Because tire repair or replacement may affect the tire pressure warning valves and transmitters, make sure to have tires serviced by your Lexus dealer or other qualified service shop. In addition, make sure to purchase your tire pressure warning valves and transmitters at your Lexus dealer.
- Ensure that only genuine Lexus wheels are used on your vehicle. Tire pressure warning valves and transmitters may not work properly with non-genuine wheels.
The air conditioning filter must be cleaned or changed regularly to maintain air conditioning efficiency.

**Removal method**

**STEP 1** Set the air conditioning system to recirculated mode.

The air conditioning filter case cannot be removed with the system in the outside air mode.

**STEP 2** Turn the “ENGINE START STOP” switch to OFF.

Open the glove box and remove the partition.

**STEP 3** Remove the filter cover.

**STEP 4** Press the tabs and remove the filter case.
4-3. Do-it-yourself maintenance

**Cleaning method**

If the filter is dirty, clean by blowing compressed air through the filter from the downward side.

Hold the air gun 2 in. (5 cm) from the filter and blow for approximately 2 minutes at 73 psi (500 kPa, 5.1 kgf/cm² or bar).

If it is not available, have the filter cleaned by your Lexus dealer.

**Replacement method**

Remove the air conditioning filter from the filter case and replace it with a new one.

The “UP” marks shown on the filter and the filter case should be pointing up.
Checking interval
Inspect and replace the air conditioning filter according to the maintenance schedule. In dusty areas or areas with heavy traffic flow, early replacement may be required. (For scheduled maintenance information, refer to the “Warranty and Services Guide/Owner’s Manual Supplement/Scheduled Maintenance”.)

If air flow from the vents decreases dramatically
The filter may be clogged. Check the filter and replace if necessary.

⚠️ NOTICE

To prevent damage to the system
● When using the air conditioning system, make sure that a filter is always installed.
● When cleaning the filter, do not clean the filter with water.
4-3. Do-it-yourself maintenance
Electronic key battery

Replace the battery with a new one if it is discharged.

- You will need the following items:
  - Flathead screwdriver
  - Small Phillips-head screwdriver
  - Lithium battery (CR1632)

- Replacing the battery

  **STEP 1**
  Take out the mechanical key.

  **STEP 2**
  Remove the cover.

  **STEP 3**
  Remove the depleted battery.
  Insert a new battery with the “+” terminal facing up.
If the electronic key battery is discharged
The following symptoms may occur.
- The smart access system with push-button start and wireless remote control will not function properly.
- The operational range is reduced.

Use a CR1632 lithium battery
- Batteries can be purchased at your Lexus dealer, jewelers, or camera stores.
- Replace only with the same or equivalent type recommended by your Lexus dealer.
- Dispose of used batteries according to the local laws.

CAUTION

Removed battery and other parts
Keep away from children.
These parts are small and if swallowed by a child they can cause choking.

NOTICE

For normal operation after replacing the battery
Observe the following precautions to prevent accidents.
- Always work with dry hands.
  Moisture may cause the battery to rust.
- Do not touch or move any other components inside the electronic key.
- Do not bend the battery terminals.
If any of the electrical components do not operate, a fuse may have blown. If this happens, check and replace the fuses as necessary.

1. Turn the “ENGINE START STOP” switch to OFF.
2. Remove the engine compartment cover if necessary. → P. 408
3. Open the fuse box cover.

**Engine compartment**

- **Type A**
  - Push the tabs in and lift the lid off.

- **Type B**
  - Push the tabs in and lift the lid off.
4-3. Do-it-yourself maintenance

■ Front controller in the engine compartment fuse box (engine compartment: type B)
Lift the lid off while pushing the tabs on either side.

■ Left side instrument panel
Remove the lid.

■ Right side instrument panel
Remove the lid.
4-3. Do-it-yourself maintenance

■ Luggage compartment

Remove the cover.

■ Luggage compartment (vehicles with active stabilizer suspension system)

Remove the lid.

**STEP 4.** After a system failure, see “Fuse layout and amperage ratings” (→P. 447) for details about which fuse to check.

**STEP 5.** Remove the fuse with the pull-out tool.
3. Check if the fuse has blown.

**Type A**

1. Normal fuse
2. Blown fuse

Replace it with one of an appropriate amperage rating. The amperage rating can be found on the fuse box lid.

**Type B**

1. Normal fuse
2. Blown fuse

Replace it with one of an appropriate amperage rating. The amperage rating can be found on the fuse box lid.

**Type C**

1. Normal fuse
2. Blown fuse

Contact your Lexus dealer.
4.3. Do-it-yourself maintenance

Type D

1 Normal fuse
2 Blown fuse
Contact your Lexus dealer.

After a fuse is replaced
- If the lights do not turn on even after the fuse has been replaced, a bulb may need replacement. (→P. 470)
- If the replaced fuse blows again, have the vehicle inspected by your Lexus dealer.

If there is an overload in the circuits
The fuses are designed to blow before the entire wiring harness is damaged.
### CAUTION

- **To prevent system breakdowns and vehicle fire**
  - Observe the following precautions.
  - Failing to do so may cause damage, and possibly a fire or injury.
  - Never use a fuse of a higher amperage rating than indicated, or use any other object in place of a fuse.
  - Always use a genuine Lexus fuse or equivalent.
  - Never replace a fuse with a wire, even as a temporary fix.
  - This can cause extensive damage or even fire.
  - Do not modify fuses or the fuse box.

### NOTICE

- **Before replacing fuses**
  - Have the cause of electrical overload determined and repaired by your Lexus dealer.
4-3. Do-it-yourself maintenance

Headlight aim

**Gauges**

1. High beam vertical position
2. Low beam vertical position
3. High beam horizontal position
4. Low beam horizontal position

**Adjustment bolts**

1. High beam horizontal adjustment
2. High beam vertical adjustment
3. Low beam adjustment bolt A
4. Low beam adjustment bolt B
4-3. Do-it-yourself maintenance

Before checking the headlight aim

**STEP 1** Make sure the vehicle has a full tank of gas and the area around the headlight is not deformed.

**STEP 2** Park the vehicle on level ground.

**STEP 3** Sit in the driver’s seat.

**STEP 4** Bounce the vehicle several times.

Adjusting the headlight aim

**Low beam (vertical adjustment)**

Using a Phillips-head screwdriver, turn adjustment bolt A so that the bubble is within the 2 center lines.

Remember the turning direction and the number of turns.

Turn bolt B the same number of turns and in the same direction as step 1.
4-3. Do-it-yourself maintenance

► Low beam (horizontal adjustment)
Turn adjustment bolt A so that the red line on the gauge is in the middle of the "O" mark (within the blue lines to either side of the gauge).

► High beam (vertical and horizontal adjustment)
Turn each adjustment bolt in either direction so that the bubble is within the 2 center lines (vertical), and the red line on the gauge is in the middle of the "O" mark (within the blue lines to either side of the gauge) (horizontal).

If you feel that there is a large deviation, have the headlight aim adjusted at a Lexus dealer.
You may replace the following bulbs yourself. For more information about replacing other light bulbs, contact your Lexus dealer.

- Prepare a replacement light bulb
  Check the wattage of the light bulb being replaced. (→P. 552)

- Remove the engine compartment cover if necessary
  →P. 408

- Front bulb locations

- Rear bulb locations

Rear turn signal light  Back-up light
Replacing light bulbs

Headlight high beam

STEP 1
Unplug the connector while depressing the lock release.

STEP 2
Turn the bulb base counterclockwise to remove it.
4-3. Do-it-yourself maintenance

**Parking light**

**STEP 1**

Turn the bulb base counterclockwise.

**STEP 2**

Remove the light bulb.

**Back-up light**

**STEP 1**

Open the trunk lid. Remove the trunk handle and panel cover clips.

**STEP 2**

Partly remove the trunk panel cover and turn the bulb bases counterclockwise.
4-3. Do-it-yourself maintenance

Rear turn signal light

STEP 1
Open the trunk lid and remove the cover.

STEP 2
Turn the bulb base counterclockwise.

STEP 3
Remove the light bulb.

STEP 3
Remove the light bulb.
4-3. Do-it-yourself maintenance

- Bulbs other than the above
  If any of the bulbs listed below has burnt out, have your Lexus dealer replace it.
  - Headlight low beams (high-intensity discharge bulbs)
  - Fog lights
  - Front turn signal lights
  - Front side marker lights
  - Side turn signal lights
  - Tail/stop lights
  - Tail lights
  - Rear side marker lights
  - High mounted stoplight
  - License plate lights

- Condensation build-up on the inside of the lens
  Contact your Lexus dealer for more information in the following situations. Temporary condensation build-up on the inside of the headlight lens does not indicate a malfunction.
  - Large drops of water are built up on the inside of the lens.
  - Water has built up inside the headlight.

- LED light bulbs
  The side turn signal lights, tail, tail/stop and high mounted stoplights consist of a number of LEDs. If any of the LEDs burn out, take your vehicle to your Lexus dealer to have the light replaced.
  If two or more LEDs in a stoplight burn out, your vehicle may not conform to local laws (SAE).

- High-intensity discharge (HID) headlights
  If voltage to the high-intensity discharge bulbs is insufficient, the light may not come on, or may go out temporarily. The high-intensity discharge bulbs will come on when normal power is restored.
## 4-3. Do-it-yourself maintenance

### Maintenance and care

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Replacing light bulbs</strong></td>
</tr>
<tr>
<td>• Turn off the headlights. Do not attempt to replace the bulb immediately after turning off the headlights. The bulbs become very hot and may cause burns.</td>
</tr>
<tr>
<td>• Do not touch the glass portion of the light bulb with bare hands. Hold the bulb by the plastic or metal portion. If the bulb is scratched or dropped it may blow out or crack.</td>
</tr>
<tr>
<td>• Fully install light bulbs and any parts used to secure them. Failing to do so may result in heat damage, fire, or water entering the headlight unit. This may damage the headlights or cause condensation to build up on the lens.</td>
</tr>
<tr>
<td>• Do not attempt to take apart or repair the low beam discharge headlight bulbs, connectors, power supply circuits, or related components. Doing so could result in electric shock and death or serious injury.</td>
</tr>
<tr>
<td><strong>High-intensity discharge (HID) headlights</strong></td>
</tr>
<tr>
<td>• Contact your Lexus dealer before replacing high-intensity discharge headlights (including light bulbs).</td>
</tr>
<tr>
<td>• Do not touch the high-intensity discharge headlight's high voltage socket when the headlights are turned on. An extremely high voltage of 20000 V will be discharged and could result in death or serious injury by electric shock.</td>
</tr>
<tr>
<td><strong>To prevent damage or fire</strong></td>
</tr>
<tr>
<td>Make sure bulbs are fully seated and locked.</td>
</tr>
</tbody>
</table>
4.3 Do-it-yourself maintenance
When trouble arises

5

5-1. Essential information

- If your vehicle needs to be towed
- If you think something is wrong
- Fuel pump shut off system
- Event data recorder

5-2. Steps to take in an emergency

- If a warning light turns on or a warning buzzer sounds
- If a warning message is displayed
- If you have a flat tire (Vehicles with standard tires)
- If you have a flat tire (Vehicles with run-flat tires)
- If the engine will not start
- If the shift lever cannot be shifted from “P”
- If you lose your keys
- If the electronic key does not operate properly
- If the 12 volt battery is discharged
- If your vehicle overheats
- If the vehicle becomes stuck
5-1. Essential information

If your vehicle needs to be towed

If towing is necessary, we recommend having your vehicle towed by your Lexus dealer or a commercial towing service, using a lift-type truck or a flat bed truck.

Use a safety chain system for all towing, and abide by all state/provincial and local laws.

If towing from the rear, the wheels and axle on the ground must be in good condition.

If they are damaged, use a towing dolly or flat bed truck.

Before towing

The following may indicate a problem with your automatic transmission. Contact your Lexus dealer before towing.

- The engine is running, but the vehicle will not move.
- The vehicle makes an abnormal sound.

Emergency towing

If a tow truck is not available, in an emergency your vehicle may be temporarily towed using a cable or chain secured to the emergency towing eyelet. This should only attempted on hard, surfaced roads for short distances at low speeds.

A driver must be in the vehicle to steer and operate the brakes. The vehicle's wheels, drive train, axles, steering and brakes must be in good condition.
When trouble arises

5-1. Essential information

Towing eyelet

Emergency towing procedure

STEP 1. Release the parking brake.
STEP 2. Put the shift lever in “N”.
STEP 3. The “ENGINE START STOP” switch must be in the ACCESSORY mode (engine off) or the IGNITION ON mode (engine on).

CAUTION

While towing
- Use extreme caution when towing the vehicle. Avoid sudden starts or erratic driving maneuvers which place excessive stress on the emergency towing eyelet and the cable or chain.
- If the engine is not running, the power assist for the brakes and steering will not function, making steering and braking more difficult.

NOTICE

To prevent causing serious damage to the automatic transmission
Never tow this vehicle from the front with the rear wheels (2WD models) or four wheels (4WD models) on the ground.
This may cause serious damage to the automatic transmission.
Installing towing eyelet

**STEP 1**
Remove the eyelet cover using a flathead screwdriver. To protect the bodywork, place a rag between the screwdriver and the vehicle body, as shown in the illustration.

**STEP 2**
Insert the towing eyelet into the hole and tighten partially by hand.

**STEP 3**
Tighten down the towing eyelet securely using a wheel nut wrench.

---

Location of the emergency towing eyelet
→ P. 512
When trouble arises

**CAUTION**

- **Installing towing eyelet to the vehicle**
  Make sure that towing eyelet is installed securely.
  If not securely installed, towing eyelet may come loose during towing. This may lead to accidents that cause serious injury or even death.

**Towing with a sling-type truck**

**NOTICE**

- **To prevent body damage**
  Do not tow with a sling-type truck, either from the front or rear.
Towing with a wheel lift-type truck

▶ From front
Use a towing dolly under the rear wheels.

▶ From rear (2WD models)
Turn the “ENGINE START STOP” switch to the ACCESSORY mode so that the steering wheel is unlocked.

▶ From rear (4WD models)
Use a towing dolly under the front wheels.
Using a flat bed truck

If your Lexus is transported by a flat bed truck, it should be tied down at the locations shown in the illustration.

If you use chains or cables to tie down your vehicle, the angles shaded in black must be 45°.

Do not overly tighten the tie downs or the vehicle may be damaged.

NOTICE

To prevent causing serious damage to the automatic transmission
Never tow this vehicle from the front with the rear wheels on the ground.

To prevent damaging the vehicle
- Do not tow the vehicle with the “ENGINE START STOP” switch is OFF.
  The steering lock mechanism is not strong enough to hold the front wheel straight.
- When raising the vehicle, ensure adequate ground clearance for towing at the opposite end of the raised vehicle. Without adequate clearance, the vehicle could be damaged while being towed.
If you notice any of the following symptoms, your vehicle probably needs adjustment or repair. Contact your Lexus dealer as soon as possible.

■ Visible symptoms
  ● Fluid leaks under the vehicle
    (Water dripping from the air conditioning after use is normal.)
  ● Flat-looking tires or uneven tire wear
  ● Engine coolant temperature gauge needle continually points higher than normal

■ Audible symptoms
  ● Changes in exhaust sound
  ● Excessive tire squeal when cornering
  ● Strange noises related to the suspension system
  ● Pinging or other noises related to the engine

■ Operational symptoms
  ● Engine missing, stumbling or running rough
  ● Appreciable loss of power
  ● Vehicle pulls heavily to one side when braking
  ● Vehicle pulls heavily to one side when driving on a level road
  ● Loss of brake effectiveness, spongy feeling, pedal almost touches the floor
5-1. Essential information
Fuel pump shut off system

To minimize the risk of fuel leakage when the engine stalls or an airbag inflates upon collision, the fuel pump shut off system stops supplying fuel to the engine.

Follow the procedure below to restart the engine after the system is activated.

STEP 1 Turn the “ENGINE START STOP” switch to the ACCESSORY mode or OFF.

STEP 2 Restart the engine.

⚠️ NOTICE

Before starting the engine
Inspect the ground under the vehicle.
If you find that fuel has leaked on to the ground, the fuel system has been damaged and is in need of repair. Do not restart the engine.
5-1. Essential information

Event data recorder

Your vehicle has computers that monitor and control certain aspects of your vehicle. These computers assist in driving and maintaining optimal vehicle performance.

Besides storing data useful for troubleshooting, there is a system to record data in a crash or a near car crash event. This is called an Event Data Recorder (EDR).

In a crash or a near car crash event

The SRS airbag sensor assembly contains the EDR. In a crash or a near car crash event, this device may record some or all of the following information:

- Engine speed
- Whether the brake pedal was applied or not
- Vehicle speed
- To what extent the accelerator pedal was depressed
- Position of the automatic transmission shift lever
- Whether the driver and front passenger wore seat belts or not
- Driver’s seat position
- SRS airbag deployment data
- SRS airbag system diagnostic data
- Front passenger’s occupant classification
Disclosure of the data

Lexus will not disclose the data recorded in an EDR to a third party except when:

● An agreement from the vehicle’s owner (or the leasing company for a leased vehicle) is obtained
● Officially requested by the police or other authorities
● Used as a defense for Lexus in a law suit
● Ordered by a court

However, if necessary Lexus will:

● Use the data for research on Lexus vehicle safety performance
● Disclose the data to a third party for research purposes without disclosing details of the vehicle owner, and only when it is deemed necessary
● Disclose summarized data cleared of vehicle identification information to a non-Lexus organization for research purposes
5-2. Steps to take in an emergency

If a warning light turns on or a warning buzzer sounds...

Calmly perform the following actions if any of the warning lights turn on or flash. If a light turns on or flashes, but then turns off, this does not necessarily indicate a malfunction in the system.

Stop the vehicle immediately. Continuing to drive the vehicle may be dangerous.

The following warning indicates a possible problem in the brake system. Immediately stop the vehicle in a safe place and contact your Lexus dealer.

<table>
<thead>
<tr>

<th>Correction procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Master warning light</strong>&lt;br&gt;A buzzer sounds and the warning light comes on and flashes to indicate that the master warning system has detected a malfunction.</td>
<td>Take appropriate action in accordance with the message displayed on the multi-information display.</td>
<td></td>
</tr>
</tbody>
</table>

**3. Open door warning buzzer:**

→ P. 502

**4. Driver’s and front passenger’s seat belt reminder buzzer:**

The driver’s and front passenger’s seat belts reminder sounds to alert the driver and front passenger that his or her seat belt is not fastened. The buzzer sounds intermittently for 10 seconds after the vehicle has reached a speed of at least 12 mph (20 km/h). Then, if the seat belt is still unfastened, the buzzer will sound in a different tone for 20 more seconds.

---

### If the malfunction indicator lamp comes on while driving

First check the following:

- **Is your vehicle low on gas?**
  - If it is, refuel the vehicle immediately.

- **Is the fuel tank cap loose?**
  - If it is, tighten it securely.

The light will go off after taking several driving trips.

If the light does not go off even after several trips, contact your Lexus dealer as soon as possible.
5-2. Steps to take in an emergency

- **Front passenger detection sensor and passenger seat belt reminder**
  - If luggage is placed on the front passenger seat, the front passenger detection sensor may cause the warning light to flash, even if a passenger is not sitting in the seat.
  - If a cushion is placed on the seat, the sensor may not detect a passenger, and the warning light may not operate properly.

- **SRS warning light**
  - This warning light system monitors the following:
    - The airbag sensor assembly
    - Front airbag sensors
    - The curtain shield and rear side airbag sensors
    - The side and curtain shield airbag sensors
    - The front passenger occupant classification ECU
    - "AIR BAG ON" and "AIR BAG OFF" indicator lights
    - The pressure sensor
    - The belt tension sensor
    - The seat belt buckle switches
    - The driver’s seat position sensor
    - The inflators
    - The warning light
    - The interconnecting wiring and power sources

- **If the tire pressure warning light comes on after blinking for 1 minute frequently**
  - If the tire pressure warning light comes on after blinking for 1 minute frequently when the "ENGINE START STOP" switch is turned to IGNITION ON mode, have it checked by your Lexus dealer.
5-2. Steps to take in an emergency

■ When the tire pressure warning light comes on
  Check the tire inflation pressure and adjust to the appropriate level. Pushing the tire pressure warning reset switch does not turn off the tire pressure warning light.

■ If the tire pressure warning system is inoperative
  The tire pressure warning system will be disabled in the following conditions:
  (When the condition becomes normal, the system will work properly.)
  ● If tires not equipped with tire pressure warning valves and transmitters are used.
  ● If the ID code on the tire pressure warning valves and transmitters is not registered in the tire pressure warning computer.
  ● If the tire pressure warning select switch is set to a different tire setting.
  ● If the tire inflation pressure is 73 psi (500 kPa, 5.1 kgf/cm² or bar) or higher.
  The tire pressure warning system may be disabled in the following conditions:
  (When the condition becomes normal, the system will work properly.)
  ● If electronic devices or facilities using similar radio wave frequencies are nearby.
  ● If a radio set at similar frequencies is in use in the vehicle.
  ● If a window tint that affects the radio wave signals is installed.
  ● If there is a lot of snow or ice on the vehicle, in particular around the wheels or wheel housings.
  ● If non-genuine Lexus wheels are used. (Even if you use Lexus wheels, the tire pressure warning system may not work properly with some types of tires.)
  ● If tire chains are used.

■ The tire pressure warning light may turn on due to natural causes
  The tire pressure warning light may turn on due to natural causes such as natural air leaks or tire inflation pressure changes caused by temperature. In this case, adjusting the tire inflation pressure will turn off the warning light (after a few minutes).

■ When a tire is replaced with a spare tire
  The compact spare tire is not equipped with the tire pressure warning valve and transmitter. If a tire goes flat, the tire pressure warning light will not turn off even though the flat tire is replaced with the spare tire. Replace the spare tire with the repaired tire and adjust the proper tire inflation pressure. The tire pressure warning light will turn off after a few minutes.
5-2. Steps to take in an emergency

[CAUTION]

- **If the tire pressure warning light comes on**
  Be sure to observe the following precautions. Failure to do so could cause loss of vehicle control and result in death or serious injury.
  - Vehicles with standard tires:
    - Stop your vehicle in a safe place as soon as possible. Adjust the tire inflation pressure immediately.
    - If the tire pressure warning light comes on even after tire inflation pressure adjustment, it is probable that you have a flat tire. Check the tires. If the tire is flat, change to the spare tire and have the flat tire repaired by the nearest Lexus dealer.
    - Avoid abrupt maneuvering and braking. If the vehicle tires deteriorate, you could lose control of the steering wheel or the brakes.
  - Vehicles with run-flat tires:
    - Decelerate to the lowest appropriate speed as soon as possible. Do not drive over 55 mph (90 km/h).
    - Check and adjust the tire inflation pressure immediately.
    - If the tire pressure warning light comes on even after tire inflation pressure adjustment, it is probable that you have a flat tire. Have the tire replaced by the nearest Lexus dealer.
    - Avoid abrupt maneuvering and braking. If the vehicle tires deteriorate, you could lose control of the steering wheel or the brakes.

- **If a blowout or sudden air leakage should occur**
  The tire pressure warning system may not activate immediately.
CAUTION

Maintenance of the tires

Each tire, including the spare (if provided), should be checked monthly when cold and inflated to the inflation pressure recommended by the vehicle manufacturer on the vehicle placard or tire inflation pressure label (tire and load information label). (If your vehicle has tires of a different size than the size indicated on the vehicle placard or tire inflation pressure label [tire and load information label], you should determine the proper tire inflation pressure for those tires.)

As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS-tire pressure warning system) that illuminates a low tire pressure telltale (tire pressure warning light) when one or more of your tires is significantly under-inflated. Accordingly, when the low tire pressure telltale (tire pressure warning light) illuminates, you should stop and check your tires as soon as possible, and inflate them to the proper pressure. Driving on a significantly under-inflated tire causes the tire to overheat and can lead to tire failure. Under-inflation also reduces fuel efficiency and tire tread life, and may affect the vehicle’s handling and stopping ability.

Please note that the TPMS (tire pressure warning system) is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger illumination of the TPMS low tire pressure telltale (tire pressure warning light).

Your vehicle has also been equipped with a TPMS (tire pressure warning system) malfunction indicator to indicate when the system is not operating properly. The TPMS (tire pressure warning system) malfunction indicator is combined with the low tire pressure telltale (tire pressure warning light). When the system detects a malfunction, the telltale will flash for approximately one minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists. When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended.

TPMS (tire pressure warning system) malfunctions may occur for a variety of reasons, including the installation of replacement or alternate tires or wheels on the vehicle that prevent the TPMS (tire pressure warning system) from functioning properly. Always check the TPMS (tire pressure warning system) malfunction telltale after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels allow the TPMS (tire pressure warning system) to continue to function properly.
5-2. Steps to take in an emergency

⚠️ NOTICE

- Precaution when installing a different tire

  When a tire of a different specification or maker is installed, the tire pressure warning system may not operate properly.
5-2. Steps to take in an emergency
If a warning message is displayed

If a warning is shown on the multi-information display, stay calm and perform the following actions:

If any of the warning light turns on again after performing the following actions, contact your Lexus dealer.

Stop the vehicle immediately.

A buzzer sounds and a warning message is shown on the multi-information display. The following warnings indicate the possibility of damage to the vehicle that may lead to an accident. Immediately stop the vehicle in a safe place and contact your Lexus dealer.

<table>
<thead>
<tr>

<td></td>
<td></td>
</tr>
<tr>
<td><strong>(If equipped)</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>(If equipped, flashing)</strong></td>
<td>Your vehicle is nearing the vehicle ahead (in radar cruise mode).</td>
<td>Slow the vehicle by applying the brakes.</td>
</tr>
</tbody>
</table>

- **After changing the engine oil (U.S.A. only)**
  Make sure to reset the oil maintenance data. (→ P. 412)

- **Approach warning message**
  In the following instances, there is the possibility that the approach warning will not activate even when the vehicle-to-vehicle distance decreases.
  - When your vehicle and the vehicle ahead are traveling at the same speed or the vehicle ahead is traveling more quickly than your vehicle.
  - When the vehicle ahead is traveling at very low speed.
  - Immediately after cruise control speed is set.
  - At the instant the accelerator pedal is depressed.
Other messages

If the following message is displayed, take appropriate action and confirm that the message has disappeared.

<table>
<thead>
<tr>
<th>Message</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Steering Wheel Icon]</td>
<td>Calibrate the neutral position of the steering wheel.</td>
</tr>
<tr>
<td>(If equipped)</td>
<td></td>
</tr>
</tbody>
</table>

- Initializing the steering sensor

Use one of the following methods.

- With the vehicle stopped, turn the steering wheel all the way to the left and right. (The order is not important.)
- Drive for more than 5 minute on an un-crowded road with as few curves and corners as possible.

If the steering guide symbol disappears, the steering sensor has been initialized. If the steering guide symbol does not disappear, have the vehicle checked by your Lexus dealer.
Have the malfunction repaired immediately.

After taking the specified steps to correct the suspected problem, check that the warning message and light turn off.

5-2. Steps to take in an emergency
If you have a flat tire (Vehicles with standard tires)

Remove the flat tire and replace it with the spare provided.

- **Before jacking up the vehicle**
  - Stop the vehicle on a hard, flat surface.
  - Set the parking brake.
  - Shift the shift lever to “P”.
  - Stop the engine.
  - Turn on the emergency flashers.

- **Location of the spare tire, jack and tools**

![Diagram showing the location of the spare tire, jack and tools]
5-2. Steps to take in an emergency

■ Compact spare tire
   The compact tire saves space in your luggage compartment, and its lighter weight helps to enhance fuel economy and permits easier installation in case of a flat tire.

   The compact spare tire is designed for temporary emergency use only.

   The compact spare tire is identified by the label “TEMPORARY USE ONLY” on the tire sidewall.
   Use the compact spare tire temporarily only in an emergency.
   Make sure to check the tire inflation pressure of the compact spare tire. (→ P. 550)

■ Tread life
   The compact spare tire can be used many times, if necessary. It has tread life of up to 3000 miles (4800 km) depending on road conditions and your driving habits. When treadwear indicators appear on the tire, replace the tire. (→ P. 421)

■ When using the compact spare tire
   As the spare tire is not equipped with the tire pressure warning valve and transmitter, low inflation pressure of the spare tire will not be warned. Also, if you replace the compact spare tire after the tire pressure warning light comes on, the light remains on.
5-2. Steps to take in an emergency

**Taking out the spare tire**

1. Lift up the hook of the panel on the trunk floor.

2. Secure the panel using the hook provided. Then take out the tool tray.

3. Loosen the center fastener that secures the spare tire.

   If the center fastener cannot be turned by hand, use the wrench that is stored in the trunk. (To secure the tire, tighten the center fastener by hand. Do not use the wrench or other tools.)
Replacing a flat tire

**STEP 1**

Chock the tires.

<table>
<thead>
<tr>
<th>Flat tire</th>
<th>Wheel chock positions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Front</td>
<td>Left-hand side: Behind the rear right-hand side tire</td>
</tr>
<tr>
<td></td>
<td>Right-hand side: Behind the rear left-hand side tire</td>
</tr>
<tr>
<td>Rear</td>
<td>Left-hand side: In front of the front right-hand side tire</td>
</tr>
<tr>
<td></td>
<td>Right-hand side: In front of the front left-hand side tire</td>
</tr>
</tbody>
</table>

**STEP 2**

Slightly loosen the wheel nuts (one turn).
5-2. Steps to take in an emergency

Turn the tire jack portion “A” by hand until the notch of the jack is in contact with the jack point.

Raise the vehicle until the tire is slightly raised off the ground.

Remove all the wheel nuts and the tire.

When resting the tire on the ground, place the tire so that the wheel design faces up to avoid scratching the wheel surface.
Installing the spare tire

**STEP 1**
Remove any dirt or foreign matter from the wheel contact surface.
If foreign matter is on the wheel contact surface, the wheel nuts may loosen while the vehicle is in motion, and the tire may come off the vehicle.

**STEP 2**
Install the spare tire and loosely tighten each wheel nut by hand to approximately the same amount.
Tighten the wheel nuts until the tapered portion comes into loose contact with the disc wheel sheet.

**STEP 3**
Lower the vehicle.
5-2. Steps to take in an emergency

Firmly tighten each nut two or three times in the order shown in the illustration.

Tightening torque:
76 ft•lbf (103 N•m, 10.5 kgf•m)

STEP 5 Stow the flat tire, tire jack and all tools.

If you have a flat rear tire on a road covered with snow or ice
Install the compact spare tire on the front of the vehicle. Perform the following steps and fit tire chains to the rear tires.

STEP 1 Replace a front tire with the compact spare tire.
STEP 2 Replace the flat rear tire with the tire removed from the front of the vehicle.
STEP 3 Fit tire chains to the rear tires.

After completing the tire change
The tire pressure warning system must be reset. (→P. 422)
CAUTION

- Using the tire jack
  Improper use of the tire jack may lead to death or injuries due to the vehicle suddenly falling off the jack.
  - Do not use the tire jack for any purpose other than replacing tires or installing and removing tire chains.
  - Only use the tire jack that comes with this vehicle for replacing a flat tire. Do not use it on other vehicles, and do not use other tire jacks for replacing tires on this vehicle.
  - Always check that the tire jack is securely set to the jack point.
  - Do not raise the vehicle while someone is in it.
  - When raising the vehicle, do not put an object on or under the jack.
  - Do not raise the vehicle to a height greater than that required to replace the tire.
  - Use a jack stand if it is necessary to get under the vehicle.
  - Do not put any part of your body under the vehicle supported by a jack.
  - Do not start or run the engine while your vehicle is supported by the jack.
  Take particular care when lowering the vehicle to ensure that no one working on or near the vehicle may be injured.

- Replacing a flat tire
  Observe the following precautions to reduce the risk of death or serious injury.
  - Never use oil or grease on the wheel bolts or wheel nuts.
    The oil or grease can cause the wheel nuts to loosen, causing a serious accident. Remove any oil or grease on the wheel bolts or wheel nuts.
  - Have the wheel nuts tightened with a torque wrench to 76 ft•lb (103 N•m, 10.5 kgf•m) as soon as possible after changing wheels.
    Failure to follow these precautions could cause the nuts to loosen and the wheels may fall off, which could lead to an accident causing death or serious injury.
5-2. Steps to take in an emergency

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ When using the compact spare tire</td>
</tr>
<tr>
<td>● Remember that your spare tire is specifically designed for use with your vehicle. Do not use your spare tire on another vehicle.</td>
</tr>
<tr>
<td>● Do not use two spare tires simultaneously.</td>
</tr>
<tr>
<td>● Replace the spare tire with a standard tire as soon as possible.</td>
</tr>
<tr>
<td>● Avoid sudden acceleration, deceleration and braking, as well as sharp cornering.</td>
</tr>
<tr>
<td>■ Speed limit when using the compact spare tire</td>
</tr>
<tr>
<td>Do not drive at speeds in excess of 50 mph (80 km/h) when a compact spare tire is installed on the vehicle.</td>
</tr>
<tr>
<td>The compact spare tire is not designed for driving at high speeds. Failing to observe this precaution may lead to an accident causing death or serious injury.</td>
</tr>
</tbody>
</table>
### NOTICE

- **Do not drive the vehicle with a flat tire**
  Do not continue driving with a flat tire. Driving even a short distance with a flat tire can damage the tire and the wheel beyond repair.

- **Be careful when driving over bumps with the compact spare tire installed on the vehicle**
  The vehicle becomes lower when driving with the compact spare tire compared to when driving with standard tires. Be careful when driving over uneven road surfaces.

- **Driving with tire chains and the compact spare tire**
  Do not fit tire chains to the compact spare tire. Tire chains may damage the vehicle body and adversely affect driving performance.

- **When replacing the tires**
  When removing or fitting the wheels, tires or the tire pressure warning valve and transmitter, contact your Lexus dealer as the tire pressure warning valve and transmitter may be damaged if not handled correctly.

- **To avoid damaging the tire pressure warning valves and transmitters**
  Do not use liquid sealants on flat tires.
5-2. Steps to take in an emergency
If you have a flat tire (Vehicles with run-flat tires)

Take your vehicle to the nearest Lexus dealer or authorized tire dealer as soon as possible.

■ Run-flat tires (A “RFT” or “DSST” mark is molded on the sidewall)

You can continue driving a vehicle with run-flat tires even if any tire goes flat.

It is able to run for a maximum of 100 miles (160 km) at a speed below 55 mph (90 km/h) after the tire pressure warning light comes on. (→P. 490)

■ In some condition (such as at high temperatures)

You can not continue driving for up to 100 miles (160 km).

■ If you cannot distinguish between the standard tires and run-flat tires

Consult your Lexus dealer.

■ For the detailed information on run-flat tires

See the tire warranty book.

⚠️ NOTICE

■ When replacing the tires

Have the tires replaced by the nearest Lexus dealer or authorized tire dealer. The tire pressure warning valves and transmitters will be affected by the installation or removal of tires.

■ To avoid damaging the tire pressure warning valves and transmitters

Do not use liquid sealants on flat tires.
5-2. Steps to take in an emergency
If the engine will not start

If the engine will not start even though correct starting procedures are being followed (→P.121), consider each of the following points.

■ The engine will not start even if you are carrying the correct electronic key
   One of the following may be the cause of the problem.
   ● There may not be sufficient fuel in the vehicle’s tank.
      Add fuel to the vehicle.
   ● The engine may be flooded.
      Try to restart the engine once more following correct starting procedures. (→P.121)
   ● There may be a malfunction in the immobilizer system. (→P. 73)

■ The starter motor turns over slowly, the interior lights and headlights are dim, or the horn does not sound or sounds at a low volume
   One of the following may be the cause of the problem.
   ● The 12 volt battery may be discharged. (→P. 529)
   ● The 12 volt battery terminal connections may be loose or corroded.

■ The starter motor does not turn over, the interior lights and headlights do not turn on, or the horn does not sound
   One of the following may be the cause of the problem.
   ● One or both of the 12 volt battery terminals may be disconnected.
   ● The 12 volt battery may be discharged. (→P. 529)

Contact your Lexus dealer if the problem cannot be repaired, or if repair procedures are unknown.
If the shift lever cannot be shifted with your foot on the brake, there may be a problem with the shift lock system (a system to prevent accidental operation of the shift lever). Have the vehicle inspected by your Lexus dealer immediately.

The following steps may be used as an emergency measure to ensure that the shift lever can be shifted.

**STEP 1** Set the parking brake.

**STEP 2** Turn the “ENGINE START STOP” switch to the ACCESSORY mode.

**STEP 3** Depress the brake pedal.

**STEP 4** Pry the cover up with a flathead screwdriver or equivalent.

**STEP 5** Press the shift lock override button.

The shift lever can be shifted while the button is pressed.
When trouble arises

5-2. Steps to take in an emergency

If you lose your keys

New genuine Lexus keys can be made by your Lexus dealer using one of the other keys and the key number stamped on your key number plate.
5-2. Steps to take in an emergency

If the electronic key does not operate properly

If communication between the electronic key and vehicle is interrupted (→P. 26) or the electronic key cannot be used because the battery is depleted, the smart access system with push-button start and wireless remote control cannot be used. In such cases, the doors and trunk can be opened or the engine can be started by following the procedure below.

Locking and unlocking the doors, unlocking the trunk and key linked functions

 Doors

Using the mechanical key in order to perform the following operations:

1. Locks all doors
2. Closes the windows/moon roof (turn and hold)
3. Unlocks the door
   - Turning the key rearward unlocks the driver’s door.
   - Turning the key once again unlocks the other doors.
4. Opens the windows/moon roof (turn and hold)
5-2. Steps to take in an emergency

Trunk

Turn the mechanical key clockwise to open.

Changing “ENGINE START STOP” switch modes and starting the engine

**STEP 1** Put the shift lever in “P” and apply the brakes.

**STEP 2** Touch the Lexus emblem side of the electronic key to the “ENGINE START STOP” switch.

An alarm will sound to indicate that the start function cannot detect the electronic key that is touched to the “ENGINE START STOP” switch if any of the doors is opened and closed while the key is touched to the switch.
5-2. Steps to take in an emergency

**STEP 3** To change the “ENGINE START STOP” switch modes: Within 10 seconds of the buzzer sounding, release the brake pedal and press the “ENGINE START STOP” switch. Modes can be changed each time the switch is pressed. (→P.122)

To start the engine: Press the “ENGINE START STOP” switch within 10 seconds after the buzzer sounds, keeping the brake pedal depressed.

If the “ENGINE START STOP” switch still cannot be operated, contact your Lexus dealer.

- **Stopping the engine**
  Shift the shift lever to “P” and press the “ENGINE START STOP” switch as you normally do when stopping the engine.

- **Replacing the key battery**
  As the above procedure is the temporary measure, it is recommended that the electronic key battery be replaced immediately when the battery depletes. (→P.440)
5-2. Steps to take in an emergency
If the 12 volt battery is discharged

The following procedures may be used to start the engine if the 12 volt battery is discharged.
You can call your Lexus dealer or qualified repair shop.

If you have a set of jumper (or booster) cables and a second vehicle with a 12 volt battery, you can jump start your Lexus following the steps below.

**STEP 1** Open the door using the mechanical key, then open the hood.
GS350: Remove the engine compartment covers.
**STEP 2** Connecting the jumper cables.

► GS460
5-2. Steps to take in an emergency

1. Positive (+) battery terminal on your vehicle.
2. Positive (+) battery terminal on the second vehicle.
3. Negative (-) battery terminal on the second vehicle.
4. Connect the jumper cable to ground on your vehicle as shown.

**STEP 3** Start the engine of the second vehicle. Increase the engine speed slightly and maintain at that level for approximately 5 minutes to recharge the 12 volt battery of your vehicle.

**STEP 4** Open and close any of the doors with the “ENGINE START STOP” switch is OFF.
5-2. Steps to take in an emergency

**Starting the engine when the 12 volt battery is discharged**

The engine cannot be started by push-starting.

**To prevent 12 volt battery discharge**

- Turn off the headlights and the audio system while the engine is turned off.
- Turn off any unnecessary electrical components when the vehicle is running at a low speed for an extended period, such as in heavy traffic, etc.

**When the 12 volt battery is removed or discharged**

The following systems must be initialized.

- Tire pressure warning system (→P. 422)
- Intuitive parking assist (→P. 507)

---

**CAUTION**

**Avoiding battery fires or explosions**

Observe the following precautions to prevent accidentally igniting the flammable gas that may be emitted from the battery.

- Make sure the jumper cable is connected to the correct terminal and that it is not unintentionally in contact with any part other than the intended terminal.
- Do not allow the jumper cables to come into contact with the “+” and “-” terminals.
- Do not allow open flame or use matches, cigarette lighters or smoke near the battery.

---

**STEP 5** Maintain the engine speed on the second vehicle and turn the "ENGINE START STOP" switch to the IGNITION ON mode, then start the vehicle’s engine.

**STEP 6** Once the vehicle’s engine has started, remove the jumper cables in the exact reverse order in which they were connected.

Once the engine starts, have the vehicle checked at your Lexus dealer as soon as possible.
## CAUTION

### Battery precautions

The battery contains poisonous and corrosive acidic electrolyte, while related parts contain lead and lead compounds. Observe the following precautions when handling the battery:

- When working with the battery, always wear safety glasses and take care not to allow any battery fluids (acid) to come into contact with skin, clothing or the vehicle body.
- Do not lean over the battery.
- If the battery fluid comes into contact with the skin or eyes, immediately wash the affected area with water and seek medical attention. Place a wet sponge or cloth over the affected area until medical attention can be received.
- Always wash your hands after handling the battery support, terminals, and other battery-related parts.
- Do not allow children near the battery.

## NOTICE

### When handling jumper cables

Be careful that the jumper cables do not become tangled in the cooling fan or any of the belts when connecting or disconnecting them.
If your vehicle overheats:

**STEP 1** Stop the vehicle in a safe place and turn off the air conditioning system.

**STEP 2** Check to see if steam is coming out from under the hood.
  - If you see steam:
    - Stop the engine and carefully lift the hood.
  - If you do not see steam:
    - Leave the engine running and carefully lift the hood.

**STEP 3** Remove the engine compartment cover. (→P. 408)

**STEP 4** Check to see if the cooling fan is operating.
  - If the fan is operating:
    - Wait until the engine coolant temperature gauge begins to fall and then stop the engine.
  - If the fan is not operating:
    - Stop the engine immediately and call your local Lexus dealer.

After the engine has cooled down sufficiently, check the coolant level and inspect the radiator core (radiator) for any leaks.
5-2. Steps to take in an emergency

Overheating
In the following situations, your vehicle may be overheating.
- The engine coolant temperature gauge enters the red zone or a loss of power is experienced.
- Steam is coming from under the hood.

**CAUTION**
- To prevent an accident or injury when inspecting under the hood of your vehicle
  - Keep hands and clothing away from the fan and engine drive belt while the engine is running.
  - Do not loosen the radiator cap while the engine and radiator are hot. Serious injury, such as burns, may result from hot coolant and steam released under pressure.

Add coolant if necessary. Water can be used in an emergency measure if coolant is unavailable. (→P. 546)

Have the vehicle checked at your nearest Lexus dealer as soon as possible.
5-2. Steps to take in an emergency

⚠️ NOTICE

- **When adding coolant**
  
  Wait until the engine has cooled down before adding coolant. When adding coolant, do so slowly. Adding cool coolant to a hot engine too quickly can cause damage to the engine.
5-2. Steps to take in an emergency
If the vehicle becomes stuck

Carry out the following procedures if the tires spin or the vehicle becomes stuck in mud, dirt, or snow.

**STEP 1** Stop the engine. Set the parking brake and shift the shift lever in “P”.

**STEP 2** Remove the mud, snow, or sand from around the stuck tire.

**STEP 3** Place wood, stones or some other material to help provide traction under the tires.

**STEP 4** Restart the engine.

**STEP 5** Shift the shift lever to the “D” or “R” position and carefully apply the accelerator to free the vehicle. Turn off TRAC/VSC if these functions are hampering your attempts to free the vehicle. (→P. 186)

**CAUTION**

- **When attempting to free a stuck vehicle**
  
  If you choose to rock the vehicle back and forth to free it, make sure the surrounding area is clear, to avoid striking other vehicles, objects or persons. The vehicle may also lunge forward or lunge back suddenly as it becomes free. Use extreme caution.

- **When shifting the shift lever**
  
  Be careful not to shift the shift lever with the accelerator pedal depressed. This may lead to unexpected rapid acceleration of the vehicle that may cause an accident and result in death or serious injury.
5-2. Steps to take in an emergency

⚠️ NOTICE

- To avoid damaging the automatic transmission and other components
  - Avoid spinning the wheels and racing the engine.
  - If the vehicle remains stuck after trying these procedures, the vehicle may require towing to be freed.

Vehicle identification

The vehicle identification number (VIN) is the legal identifier for your vehicle. This is the primary identification number for your Lexus. It is used in registering the ownership of your vehicle.

This number is stamped on the top left of the instrument panel and in the engine compartment.

This number is also on the Certification Label.
6-1 Specifications

#### Recommended oil viscosity

Use Lexus approved “Toyota Genuine Motor Oil” or equivalent to satisfy the grade and viscosity shown below.

#### Oil viscosity:
- The 0W portion of the oil viscosity rating indicates the characteristic of the oil which allows cold startability. Oils with a lower value before the W allow for easier starting of the engine in cold weather.
- The 20 in 0W-20 indicates the oil viscosity when the oil is at its operating temperature. An oil with a higher viscosity may be better suited if the vehicle is operated at high speeds, or under extreme load condition.
Oil viscosity:

- The 5W portion of the oil viscosity rating indicates the characteristic of the oil which allows cold startability. Oils with a lower value before the W allow for easier starting of the engine in cold weather.

- The 30 in 5W-30 indicates the oil viscosity when the oil is as its operating temperature. An oil with a higher viscosity may be better suited if the vehicle is operated at high speeds, or under extreme load condition.
6-1. Specifications

**Cooling system**

| Capacity | GS460 | 11.7 qt. (11.0 L, 9.7 Imp.qt.) |
| GS350   | 9.6 qt. (9.1 L, 8.0 Imp.qt.) |

**Coolant type**

- Use either of the following:
  - "Toyota Super Long Life Coolant"
  - Similar high-quality ethylene glycol-based non-silicate, non-amine, non-nitrite, and non-borate coolant with long-life hybrid organic acid technology
- Do not use plain water alone.

**Ignition system**

| Spark plug | Make | DENSO | FK20HBR11 |
| Gap | 0.043 in. (1.1 mm) |

⚠️ **NOTICE**

- **Iridium-tipped spark plugs**
  - Use only iridium-tipped spark plugs. Do not adjust gap when tuning engine.
### Electrical system

12 volt battery

Open voltage at 68°F (20°C): 12.2 — 12.4V Half charged
11.8 — 12.0V Discharged
(Voltage is checked 20 minutes after the engine and all lights are turned off.)

Charging rates: 5A max.

### Differential

E: HB4 halogen bulbs  
F: Double end bulbs
Your vehicle must use only unleaded gasoline. Premium unleaded gasoline with an Octane Rating 91 (Research Octane Number 96) or higher required for optimum engine performance.

At minimum, the gasoline you use should meet the specifications of ASTM D4814 in the U.S.A. and CGSB3.5-M93 in Canada.

- **Fuel tank opening for unleaded gasoline**
  
  To help prevent incorrect fueling, your Lexus has a fuel tank opening that only accommodates the special nozzle on unleaded fuel pumps.

- **If premium gasoline is not available**

  If 91 Octane cannot be obtained, you may use unleaded gasoline with an Octane Rating as low as 87 (Research Octane Number 91). However, use of unleaded fuel with an Octane Rating lower than 91 may result in engine knocking or drastically reduce output to protect itself while driving with a heavy load. Persistent knocking can lead to engine damage and should be corrected by refueling with higher octane unleaded gasoline.

- **If your engine knocks**
  
  - Consult your Lexus dealer.
  - You may occasionally notice light knocking for a short time while accelerating or driving uphill. This is normal and there is no need for concern.

- **Gasoline quality**

  In very few cases, driveability problems may be caused by the brand of gasoline you are using. If driveability problems persist, try changing the brand of gasoline. If this does not correct the problem, consult your Lexus dealer.
Gasoline quality standards

- Automotive manufacturers in the US, Europe and Japan have developed a specification for fuel quality called World-Wide Fuel Charter (WWFC) that is expected to be applied worldwide.
- The WWFC consists of four categories that are based on required emission levels. In the US, category 4 has been adopted.
- The WWFC improves air quality by lowering emissions in vehicle fleets, and customer satisfaction through better performance.

Lexus recommends the use of gasoline containing detergent additives

- Lexus recommends the use of gasoline that contains detergent additives to avoid build-up of engine deposits.
- All gasoline sold in the US contains detergent additives to clean and/or keep clean intake systems.

Lexus recommends the use of cleaner burning gasoline

Cleaner burning gasoline, including reformulated gasoline that contains oxygenates such as ethanol or MTBE (Methyl Tertiary Butyl Ether) is available in many areas.

Lexus recommends the use of cleaner burning gasoline and appropriately blended reformulated gasoline. These types of gasoline provide excellent vehicle performance, reduce vehicle emissions and improve air quality.

Lexus does not recommend blended gasoline

- Lexus allows the use of oxygenate blended gasoline where the oxygenate content is up to 10% ethanol or 15% MTBE.
- If you use gasohol in your Lexus, be sure that it has an octane rating no lower than 87.
- Lexus DOES NOT recommend the use of gasoline containing methanol.
■ Lexus does not recommend gasoline containing MMT

Some gasoline contains octane enhancing additive called MMT (Methylclopentadienyl Manganese Tricarbonyl).

Lexus DOES NOT recommend the use of gasoline that contains MMT. If fuel containing MMT is used, your emission control system may be adversely affected.

The malfunction indicator lamp on the instrument cluster may come on. If this happens, contact your Lexus dealer for service.

⚠️ NOTICE

■ Notice on gasoline quality

● Do not use leaded gasoline.
  Leaded gasoline can cause damage to your vehicle’s three-way catalytic converters causing the emission control system to malfunction.

● Do not use gasohol other than that stated here.
  Other gasohol may cause fuel system damage or vehicle performance problems.

● Using unleaded gasoline with an octane number or rating lower than that stated here will cause persistent heavy knocking.
  At worst, this will lead to engine damage.

■ Fuel-related poor driveability

If after using a different type of fuel, poor driveability is encountered (poor hot starting, vaporization, engine knocking, etc.), discontinue the use of that type of fuel.

■ When refueling with gasohole

Take care not to spill gasohol. It can damage your vehicle’s paint.
Typical tire symbols

1. Tire size  
2. DOT and Tire Identification Number (TIN)  
3. Location of treadwear indicators  
4. Run-flat tire (RFT) or standard tire

This vehicle can be equipped with either run-flat tires (RFT) or standard tires. A “RFT” or “DSST” mark is molded on the sidewall of the run-flat tire.
6-1. Specifications

Tire ply composition and materials
Plies are layers of rubber-coated parallel cords. Cords are the strands which form the plies in a tire.

Radial tires or bias-ply tires
A radial tire has RADIAL on the sidewall. A tire not marked RADIAL is a bias-ply tire.

TUBELESS or TUBE TYPE
A tubeless tire does not have a tube and air is directly filled in the tire. A tube type tire has a tube inside the tire and the tube maintains the air pressure.

Load limit at maximum cold tire inflation pressure (→P. 562)
Maximum cold tire inflation pressure (→P. 562)
This means the pressure to which a tire may be inflated.

Uniform tire quality grading
For details, see “Uniform Tire Quality Grading” that follows.

Summer tire or all season tire (→P. 426)
An all season tire has “M+S” on the sidewall. A tire not marked “M+S” is a summer tire.

“TEMPORARY USE ONLY”
A compact spare tire is identified by the phrase “TEMPORARY USE ONLY” molded into its sidewall. This tire is designed for temporary emergency use only.
Typical DOT and tire identification number (TIN)

1. DOT symbol*
2. Tire Identification Number (TIN)
3. Tire manufacturer’s identification mark
4. Tire size code
5. Manufacturer’s optional tire type code (3 or 4 letters)
6. Manufacturing week
7. Manufacturing year

*: The DOT symbol certifies that the tire conforms to applicable Federal Motor Vehicle Safety Standards.
### Tire size

#### Typical tire size information

The illustration indicates typical tire size.

1. **Tire use**
   - (P = Passenger car, T = Temporary use)
2. **Section width (millimeters)**
3. **Aspect ratio**
   - (tire height to section width)
4. **Tire construction code**
   - (R = Radial, D = Diagonal)
5. **Wheel diameter (inches)**
6. **Load index (2 or 3 digits)**
7. **Speed symbol**
   - (alphabet with one letter)

#### Tire dimensions

1. **Section width**
2. **Tire height**
3. **Wheel diameter**
6-1. Specifications

8. Carcass
9. Rim lines
10. Bead wires
11. Chafer

Uniform Tire Quality Grading

This information has been prepared in accordance with regulations issued by the National Highway Traffic Safety Administration of the U.S.A. Department of Transportation. It provides the purchasers and/or prospective purchasers of Lexus vehicles with information on uniform tire quality grading.

Your Lexus dealer will help answer any questions you may have as you read this information.
DOT quality grades

All passenger vehicle tires must conform to Federal Safety Requirements in addition to these grades. Quality grades can be found where applicable on the tire sidewall between tread shoulder and maximum section width.

For example: Treadwear 200 Traction AA Temperature A

Treadwear

The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course.

For example, a tire graded 150 would wear one and a half (1 1/2) times as well on the government course as a tire graded 100.

The relative performance of tires depends upon the actual conditions of their use, however, and may depart significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate.

Traction AA, A, B, C

The traction grades, from highest to lowest, are AA, A, B and C, and they represent the tire’s ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete.

A tire marked C may have poor traction performance.

Warning: The traction grade assigned to this tire is based on braking (straight ahead) traction tests and does not include cornering (turning) traction.
Temperature A, B, C

The temperature grades are A (the highest), B, and C, representing the tire’s resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel.

Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure.

The grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109.

Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.

Warning: The temperature grades for this tire are established for a tire that is properly inflated and not overloaded. Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure.

Glossary of tire terminology

<table>
<thead>
<tr>
<th>Tire related term</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cold tire inflation pressure</td>
<td>Tire pressure when the vehicle has been parked for three hours or more, or has not been driven more than 1 mile or 1.5 km under that condition</td>
</tr>
<tr>
<td>Maximum inflation pressure</td>
<td>The maximum cold inflated pressure to which a tire may be inflated, shown on the sidewall of the tire</td>

### Tire related term | Meaning
--- | ---
Pneumatic tire | A mechanical device made of rubber, chemicals, fabric and steel or other materials, that, when mounted on an automotive wheel, provides the traction and contains the gas or fluid that sustains the load.
Radial ply tire | A pneumatic tire in which the ply cords that extend to the beads are laid at substantially 90 degrees to the centerline of the tread.
Reinforced tire | A tire designed to operate at higher loads and at higher inflation pressures than the corresponding standard tire.
Section width | The linear distance between the exteriors of the sidewalls of an inflated tire, excluding elevations due to labeling, decoration, or protective bands.
Sidewall | That portion of a tire between the tread and bead.
Sidewall separation | The parting of the rubber compound from the cord material in the sidewall.
Snow tire | A tire that attains a traction index equal to or greater than 110, compared to the ASTM E-1136 Standard Reference Test Tire, when using the snow traction test as described in ASTM F-1805-00, Standard Test Method for Single Wheel Driving Traction in a Straight Line on Snow-and Ice-Covered Surfaces, and which is marked with an Alpine Symbol (❄️) on at least one sidewall.

6-2. Customization

Customizable features

Your vehicle includes a variety of electronic features that can be personalized to your preferences. Programming these preferences requires specialized equipment and may be performed by an authorized Lexus dealership.

Some function settings are changed simultaneously with other functions being customized. Contact your Lexus dealer for further details.

For owners

Reporting safety defects for U.S. owners ...................... 578
Seat belt instructions for Canadian owners (in French) ............... 579
Reporting safety defects for U.S. owners

If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying the Lexus Division of Toyota Motor Sales, U.S.A., Inc. (Toll-free: 1-800-25-LEXUS).

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or the Lexus Division of Toyota Motor Sales, U.S.A., Inc.

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at 1-888-327-4236 (TTY: 1-800-424-9153); go to http://www.safercar.gov; or write to: Administrator, NHTSA, 1200 New Jersey Ave, S.E., Washington, DC 20590. You can also obtain other information about motor vehicle safety from http://www.safercar.gov.
Seat belt instructions for Canadian owners (in French)

The following is a French explanation of seat belt instructions extracted from the seat belt section in this manual.

See the seat belt section for more detailed seat belt instructions in English.

Utilisation adéquate des ceintures de sécurité

1. Tirez sur la ceinture épaullière jusqu’à ce qu’elle recouvre entièrement l’épaule; elle ne doit cependant pas toucher le cou ni glisser de l’épaule.
2. Placez la ceinture abdominale le plus bas possible sur les hanches.
4. Ne vrillez pas la ceinture de sécurité.

Guide des ceintures de sécurité (sièges latéraux arrière)

Si la ceinture épaullière est trop près du cou d’une personne, glissez le guide de la ceinture vers l’avant.
Entretien et soin

Ceintures de sécurité

Avec un tissu ou une éponge, nettoyez à l’aide d’un savon doux et de l’eau tiède. Vérifiez aussi les ceintures régulièrement pour vous assurer qu’elles ne présentent pas d’usure excessive, d’effilochage ou de coupures.

ATTENTION

Dommages et usure de la ceinture de sécurité

Vérifiez périodiquement le système de ceintures de sécurité. Assurez-vous qu’il n’y a pas de coupures, d’effilochures ni de pièces desserrées. N’utilisez pas une ceinture de sécurité endommagée avant qu’elle soit remplacée. Les ceintures de sécurité endommagées ne peuvent pas protéger les occupants contre les blessures.
