For your information

Main Owner’s Manual

Please note that this manual applies to all models and explains all equipment, including options. Therefore, you may find some explanations for equipment not installed on your vehicle.

All specifications provided in this manual are current at the time of printing. However, because of the Lexus policy of continual product improvement, we reserve the right to make changes at any time without notice.

Depending on specifications, the vehicle shown in the illustration may differ from your vehicle in terms of color and equipment.

Noise from under vehicle after turning off the engine

Approximately five hours after the engine is turned off, you may hear sound coming from under the vehicle for several minutes. This is the sound of a fuel evaporation leakage check and, it does not indicate a malfunction.
Accessories, spare parts and modification of your Lexus

A wide variety of non-genuine spare parts and accessories for Lexus vehicles are currently available in the market. You should know that Toyota does not warrant these products and is not responsible for their performance, repair, or replacement, or for any damage they may cause to, or adverse effect they may have on, your Lexus vehicle.

This vehicle should not be modified with non-genuine Lexus products. Modification with non-genuine Lexus products could affect its performance, safety or durability, and may even violate governmental regulations. In addition, damage or performance problems resulting from the modification may not be covered under warranty.

Installation of a mobile two-way radio system

As the installation of a mobile two-way radio system in your vehicle could affect electronic systems such as the multiport fuel injection system/sequential multiport fuel injection system, cruise control system, anti-lock brake system, SRS airbag system and seat belt pretensioner system, be sure to check with your Lexus dealer for precautionary measures or special instructions regarding installation.
**Scraping of your Lexus**

The SRS airbag and seat belt pretensioner devices in your Lexus contain explosive chemicals. If the vehicle is scrapped with the airbags and seat belt pretensioners left as they are, this may cause an accident such as fire. Be sure to have the systems of the SRS airbag and seat belt pretensioner removed and disposed of by a qualified service shop or by your Lexus dealer before you scrap your vehicle.

**Perchlorate Material**

Special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate. Your vehicle has components that may contain perchlorate. These components may include airbag, seat belt pretensioners, and wireless remote control batteries.
CAUTION

■ General precautions while driving

Driving under the influence: Never drive your vehicle when under the influence of alcohol or drugs that have impaired your ability to operate your vehicle. Alcohol and certain drugs delay reaction time, impair judgment and reduce coordination, which could lead to an accident that could result in death or serious injury.

Defensive driving: Always drive defensively. Anticipate mistakes that other drivers or pedestrians might make and be ready to avoid accidents.

Driver distraction: Always give your full attention to driving. Anything that distracts the driver, such as adjusting controls, talking on a mobile phone or reading can result in a collision with resulting death or serious injury to you, your occupants or others.

■ General precaution regarding children’s safety

Never leave children unattended in the vehicle, and never allow children to have or use the key.

When left unattended, children may be able to start the vehicle or shift the vehicle into neutral. There is also a danger that children may injure themselves by playing with the cigarette lighter, the windows, the moon roof, or other features of the vehicle. In addition, heat build-up or extremely cold temperatures inside the vehicle can be fatal to children.
Symbols used throughout this manual

Cautions & Notices

⚠️ CAUTION

This is a warning against anything which may cause injury to people if the warning is ignored. You are informed about what you must or must not do in order to reduce the risk of injury to yourself and others.

⚠️ NOTICE

This is a warning against anything which may cause damage to the vehicle or its equipment if the warning is ignored. You are informed about what you must or must not do in order to avoid or reduce the risk of damage to your Lexus and its equipment.

Symbols used in illustrations

Safety symbol

The symbol of a circle with a slash through it means “Do not”, “Do not do this”, or “Do not let this happen.”

Arrows indicating operations

➡️ Indicates the action (pushing, turning, etc.) used to operate switches and other devices.

➡️ Indicates the outcome of an operation (e.g. a lid opens).

1-1. Key information

Keys

The following keys are provided with the vehicle.

1. Electronic keys
   • Operating the smart access system with push-button start (→P. 26)
   • Operating the wireless remote control function (→P. 38)

2. Mechanical keys

3. Key number plate

Using the mechanical key

Take out the mechanical key.

After using the mechanical key, store it in the electronic key. Carry the mechanical key together with the electronic key. If the electronic key battery is depleted or the entry function does not operate properly, you will need the mechanical key.

When required to leave a key to the vehicle with a parking attendant

Turn the trunk opener main switch OFF and lock the glove box and the armrest door as circumstances demand. (→P. 44, 318, 337)

Remove the mechanical key for your own use and provide the attendant with the electronic key only.

Key number plate

Keep the plate in a safe place such as your wallet, not in the vehicle. In the event that a mechanical key is lost, a new key can be made at your Lexus dealer using the key number plate. (→P. 480)
When riding in an aircraft

When bringing an electronic key onto an aircraft, make sure you do not press any buttons on the electronic key while inside the aircraft cabin. If you are carrying an electronic key in your bag etc, ensure that the buttons are not likely to be pressed accidentally. Pressing a button may cause the electronic key to emit radio waves that could interfere with the operation of the aircraft.

NOTICE

To prevent key damage

- Do not subject the keys to strong shocks, expose them to high temperatures by placing them in direct sunlight, or get them wet.
- Do not expose the keys to electromagnetic materials or attach any material that blocks electromagnetic waves to the key surface.
- Do not disassemble the electronic key.
1-2. Opening, closing and locking the doors and trunk

Smart access system with push-button start

The following operations can be performed simply by carrying the electronic key on your person, for example in your pocket. (The driver should always carry the electronic key.)

1. Locks and unlocks the doors (→P. 27)
2. Unlocks the trunk (→P. 27)
3. Starts the engine (→P. 126)
Unlocking and locking the doors

Grip the handle to unlock the door.

Make sure to touch the sensor on the back of the handle.

The door cannot be unlocked for 3 seconds after the door is locked.

Press the lock button to lock the door.

Pressing and holding the button closes the windows and standard moon roof.

Unlocking the trunk

Press and hold the button to unlock the trunk.
Antenna location and effective range

Antenna location

1. Antennas outside cabin
2. Antennas inside cabin
3. Antenna outside trunk
- Effective range (areas within which the electronic key is detected)

- When locking or unlocking the doors
  The system can be operated when the electronic key is within about 2.3 ft. (70 cm) of any of the outside door handles. (Only the doors detecting the key can be operated.)

- When unlocking the trunk
  The system can be operated when the electronic key is within about 2.3 ft. (70 cm) of the trunk release button.

- When starting the engine or changing “ENGINE START STOP” switch modes
  The system can be operated when the electronic key is inside the vehicle.
■ Operation signals

Doors: A buzzer sounds and the emergency flashers flash to indicate that the doors have been locked/unlocked. (Locked: Once; Unlocked: Twice)

Trunk: A buzzer sounds to indicate that the trunk has been unlocked.

Windows and standard moon roof: A buzzer sounds to indicate that the windows and standard moon roof are operating.

■ Door lock buzzer

If a door is not fully closed, a buzzer sounds for 10 seconds if an attempt to lock the door is made. Fully close the door to stop the buzzer, and lock the vehicle once more.

■ Conditions affecting operation

The smart access system with push-button start uses weak radio waves. In the following situations, the communication between the electronic key and the vehicle may be affected, preventing the smart access system with push-button start and wireless remote control from operating properly:

(Ways of coping: →P. 481)

● When the electronic key battery is depleted

● Near a TV tower, electric power plant, gas station, radio station, large display, airport or other facility that generates strong radio waves or electrical noise

● When carrying a portable radio, mobile phone, cordless phone or other wireless communication devices

● When the electronic key is in contact with, or is covered by the following metallic objects
  • Cards to which aluminum foil is attached
  • Cigarette boxes that have aluminum foil inside
  • Metallic wallets or bags
  • Coins
  • Hand warmers made of metal
  • Media such as CDs and DVDs

● When multiple electronic keys are in the vicinity
1-2. Opening, closing and locking the doors and trunk

When carrying or using the electronic key together with the following devices that emit radio waves

- Another vehicle’s electronic key or a wireless key that emits radio waves
- Personal computers or personal digital assistants (PDAs)
- Digital audio players
- Portable game systems

If window tint with a metallic content or metallic objects are attached to the rear window

Switching the door unlock function

It is possible to set which doors the entry function unlocks.

**STEP 1** Turn the “ENGINE START STOP” switch OFF.

**STEP 2** When the indicator on the key surface is turned off, push and hold , , or for approximately 5 seconds while pushing on the key.

The setting changes each time an operation is performed, as shown below. (When changing the setting continuously, release the buttons, wait for at least 5 seconds, and repeat step 2.)

<table>
<thead>
<tr>
<th>Multi-information display</th>
<th>Unlocking doors</th>
<th>Beep</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Hold the driver’s door handle to unlock only the driver’s door</td>
<td>Exterior: Beeps three times Interior: Pings once</td>
</tr>
<tr>
<td></td>
<td>Hold the door handle except a driver’s door handle to unlock all doors</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Hold any door handle to unlock all doors</td>
<td>Exterior: Beeps twice Interior: Pings once</td>
</tr>
</tbody>
</table>

**STEP 3** Unlock the doors using the wireless remote control and open one of the doors.

If a door is not opened within 60 seconds after is pressed, the doors will be locked again and the alarm will automatically be set.

In case that the alarm is triggered, immediately stop the alarm. (→ P. 81)
# Battery-saving function

In the following circumstances, the entry function is disabled in order to prevent the vehicle and electronic key batteries from discharging.

- When the entry function has not been used for 2 weeks or more
- When the electronic key has been left within approximately 6 ft. (2 m) of the vehicle for 10 minutes or more

The system will resume operation when...

- The vehicle is locked using the door handle lock switch.
- The vehicle is locked/unlocked using the wireless remote control function. (→P. 38)
- The vehicle is locked/unlocked using the mechanical key. (→P. 481)

## Electronic key battery depletion

- The standard battery life is 1 to 2 years.
- If the battery becomes low, an alarm will sound in the cabin when the engine stops. (→P. 464)
- The battery becomes depleted even if the electronic key is not used because the key always transmits radio waves. If the smart access system with push-button start or the wireless remote control does not operate, or the detection area becomes smaller, the battery may be depleted. Replace the battery when necessary. (→P. 411)

To avoid serious deterioration, do not leave the electronic key within 3 ft. (1 m) of the following electrical appliances that produce a magnetic field.

- TVs
- Personal computers
- Mobile phones, cordless phones and battery chargers
- Recharging mobile phones or cordless phones
- Glass top ranges
- Table lamps
To operate the system properly

Make sure to carry the electronic key when operating the system. Do not get the electronic key too close to the vehicle when operating the system from the outside of the vehicle.

Depending on the position and holding condition of the electronic key, the key may not be detected correctly and the system may not operate properly. (The alarm may go off accidentally, or the door lock prevention may not function.)

Note for the entry function

- Even when the electronic key is within the effective range (detection areas), the system may not operate properly in the following cases.
  - The electronic key is too close to the window or outside door handle, near the ground, or in a high place when the doors are locked or unlocked.
  - The electronic key is near the ground or in a high place, or too close to the rear bumper center when the trunk is unlocked.
  - The electronic key is on the instrument panel, rear package tray or floor, or in the glove box when the engine is started or “ENGINE START STOP” switch modes are changed.
- As long as the electronic key is within the effective range, the doors may be locked or unlocked by anyone.
- Even if the electronic key is not inside the vehicle, it may be possible to start the engine if the electronic key is near the window.
- The doors may unlock if a large amount of water splashes on the door handle, such as in the rain or in a car wash. (The doors will automatically be locked after approximately 60 seconds if the doors are not opened and closed.)
- Gripping the door handle when wearing a glove may not unlock the door.
- If the wireless remote control is used to lock the doors when the electronic key is near the vehicle, there is a possibility that the door may not be unlocked by the entry function. (Use the wireless remote control to unlock the doors.)
- A sudden approach to the effective range or door handle may prevent the doors from being unlocked. In this case, return the door handle to the original position and check that the doors unlock before pulling the door handle again.

When the vehicle is not driven for extended periods

To prevent theft of the vehicle, do not leave the electronic key within 6 ft. (2 m) of the vehicle.
1-2. Opening, closing and locking the doors and trunk

■ Security feature

If a door is not opened within approximately 60 seconds after the vehicle is unlocked, the anti-theft system automatically locks the vehicle again.

■ Alarms and warning indicators

A combination of exterior and interior alarms as well as warnings displayed on the multi-information display are used to prevent theft of the vehicle and unforeseeable accidents resulting from erroneous operation. Take appropriate measures in response to any warning indications on the multi-information display. (→P. 455)

The following table describes circumstances and correction procedures when only alarms are sounded.

<table>
<thead>
<tr>
<th>Alarm</th>
<th>Situation</th>
<th>Correction procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exterior alarm sounds once for 2 seconds</td>
<td>Tried to lock the doors using the entry function while the electronic key is still inside the passenger compartment</td>
<td>Retrieve the electronic key from the passenger compartment and lock the doors again.</td>
</tr>
<tr>
<td></td>
<td>Closed the trunk while the electronic key is still inside the trunk and all doors are locked</td>
<td>Retrieve the electronic key from the trunk and close the trunk lid.</td>
</tr>
<tr>
<td>Exterior alarm sounds once for 60 seconds</td>
<td>Tried to exit the vehicle with the electronic key and lock the doors without first turning the “ENGINE START STOP” switch OFF</td>
<td>Turn the “ENGINE START STOP” switch OFF and lock the doors again.</td>
</tr>
<tr>
<td>Exterior alarm sounds once for 10 seconds</td>
<td>Tried to lock the vehicle using the entry function while a door is open</td>
<td>Close all of the doors and lock the doors again.</td>
</tr>
</tbody>
</table>

**CAUTION**

**Caution regarding interference with electronic devices**

- People with implanted pacemakers or cardiac defibrillators should keep away from the smart access system antennas. (→P. 28)
  The radio waves may affect the operation of such devices. If necessary, the entry function can be disabled. Ask your Lexus dealer for details, such as the frequency of radio waves and timing of emitting the radio waves. Then, consult your doctor to see if you should disable the entry function.

- User of any electrical medical device other than implanted pacemakers and implanted cardiac defibrillators should consult the manufacturer of the device for information about its operation under the influence of radio waves. Radio waves could have unexpected effects on the operation of such medical devices.

  Ask your Lexus dealer for details for disabling the entry function.
1-2. Opening, closing and locking the doors and trunk

Wireless remote control

The wireless remote control can be used to lock and unlock the vehicle and the trunk from outside the vehicle.

1. Locks all doors
2. Unlocks all doors
   Pressing the button unlocks the driver’s door. Pressing the button again within 3 seconds unlocks the other doors.
3. Opens the windows and standard moon roof (push and hold)*
4. Unlocks the trunk (push and hold)
5. Sounds alarm (push and hold) (→P. 81)

*: This setting must be customized at your Lexus dealer.

■ Operation signals
  Doors: A buzzer sounds and the emergency flashers flash to indicate that the doors have been locked/unlocked. (Locked: Once; Unlocked: Twice)
  Trunk: A buzzer sounds to indicate that the trunk has been unlocked.

■ Door lock buzzer
  If a door is not fully closed, a buzzer sounds for 10 seconds if an attempt to lock the door is made. Fully close the door to stop the buzzer, and lock the vehicle once more.

■ Electronic key battery depletion
  →P. 32

■ Security feature
  →P. 34
1-2. Opening, closing and locking the doors and trunk

The vehicle can be locked and unlocked using the entry function, wireless remote control or door lock switch.

- **Entry function**
  → P. 26

- **Wireless remote control**
  → P. 38

- **Door lock switch**

  1. Locks all doors
  2. Unlocks all doors

- **Inside lock button**

  1. Locks the door
  2. Unlocks the door

  The front doors can be opened by pulling the inside handle even if the lock buttons are in the lock position.
1-2. Opening, closing and locking the doors and trunk

Locking the front doors from the outside without a key

The door cannot be locked if the “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode, or the electronic key is left inside the vehicle.

Depending on the position of the electronic key, the key may not be detected correctly and the door may be locked.

Rear door child-protector lock

The door cannot be opened from inside the vehicle when the locks are set.

These locks can be set to prevent children from opening the rear doors. Push down on each rear door switch to lock both rear doors.

Automatic door locking and unlocking systems

The following functions can be set or cancelled:

<table>
<thead>
<tr>
<th>Function</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shift position linked door locking function</td>
<td>Shifting the shift lever out of P locks all doors.</td>
</tr>
<tr>
<td>Shift position linked door unlocking function</td>
<td>Shifting the shift lever to P unlocks all doors.</td>
</tr>
<tr>
<td>Speed linked door locking function</td>
<td>All doors are locked when the vehicle speed is approximately 12 mph (20 km/h) or higher.</td>
</tr>
<tr>
<td>Driver’s door linked door unlocking function</td>
<td>All doors are unlocked when the driver’s door is opened within 10 seconds after turning the “ENGINE START STOP” switch OFF.</td>
</tr>
</tbody>
</table>
Setting and canceling the functions (vehicles without a navigation system only)

To switch between setting and canceling, follow the procedure below:

**STEP 1** Close all the doors and switch the “ENGINE START STOP” switch to IGNITION ON mode. (Perform the step 2 within 10 seconds.)

**STEP 2** Shift the shift lever to P or N, and press and hold the driver’s door lock switch ( or ) for approximately 5 seconds and then release.

The shift lever and switch positions corresponding to the desired function to be set are shown as follows. Use the same procedure to cancel the function.

<table>
<thead>
<tr>
<th>Function</th>
<th>Shift lever position</th>
<th>Driver’s door lock switch position</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shift position linked door locking function</td>
<td>P</td>
<td></td>
</tr>
<tr>
<td>Shift position linked door unlocking function</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Speed linked door locking function</td>
<td>N</td>
<td></td>
</tr>
<tr>
<td>Driver’s door linked door unlocking function</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

When the setting or canceling operation is complete, all doors are locked and then unlocked.
1-2. Opening, closing and locking the doors and trunk

■ Impact detection door lock release system
In the event that the vehicle is subject to a strong impact, all the doors are unlocked. Depending on the force of the impact or the type of accident, however, the system may not operate.

■ Using the mechanical key
The doors can also be locked and unlocked with the mechanical key. (→P. 481)

■ Customization that can be configured at Lexus dealer
Settings (e.g. unlocking function using a key) can be changed. (Customizable features →P. 517)

CAUTION

■ To prevent an accident
Observe the following precautions while driving the vehicle. Failing to do so may result in a door opening and an occupant falling out, resulting in death or serious injury.

● Always use a seat belt.
● Always lock all doors.
● Ensure that all doors are properly closed.
● Do not pull the inside handle of the doors while driving.
  The doors may be opened and the passengers are thrown out of the vehicle and it may result in serious injury or death.
  Be especially careful for the front doors, as the doors may be opened even if the inside lock buttons are in locked position.
● Set the rear door child protector locks when children are seated in the rear seat.
1-2. Opening, closing and locking the doors and trunk

Trunk

The trunk can be opened using the trunk opener, entry function or wireless remote control.

■ Opening the trunk from inside the vehicle

Release the trunk lid.

■ Opening the trunk from outside the vehicle

► Entry function
  → P. 26

► Wireless remote control
  → P. 38

Locking the trunk opener feature

Turn the main switch in the glove box OFF to disable the trunk opener.

1 ON
2 OFF

The trunk lid cannot be opened even with the trunk opener, the wireless remote control or the entry function.
- **Trunk handle**
  
  Use the trunk handle when closing the trunk.

- **Internal trunk release lever**
  
  The trunk lid can be opened by pulling down on the glow-in-the-dark lever located on the inside of trunk lid.
  
  The lever will continue to glow for some time after the trunk lid is closed.

- **Trunk light**
  
  The trunk light turns on when the trunk is opened.

- **Which key to the vehicle is to leave with a parking attendant after disabling the trunk opener main switch**
  
  → P. 24
1-2. Opening, closing and locking the doors and trunk

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Caution while driving</strong></td>
</tr>
<tr>
<td>- Keep the trunk lid closed while driving. If the trunk lid is left open, it may hit nearby objects while driving or luggage in the trunk may be unexpectedly thrown out, causing an accident. In addition, exhaust gases may enter the vehicle, causing death or a serious health hazard. Make sure to close the trunk lid before driving.</td>
</tr>
<tr>
<td>- Before driving the vehicle, make sure that the trunk lid is fully closed. If the trunk lid is not fully closed, it may open unexpectedly while driving, causing an accident.</td>
</tr>
<tr>
<td>- Never let anyone sit in the trunk. In the event of sudden braking or a collision, they are susceptible to death or serious injury.</td>
</tr>
<tr>
<td><strong>When children are in the vehicle</strong></td>
</tr>
<tr>
<td>Observe the following precautions. Failure to do so may result in death or serious injury.</td>
</tr>
<tr>
<td>- Do not allow children to enter the trunk. If a child is accidentally locked in the trunk, they could overheat or suffocate.</td>
</tr>
<tr>
<td>- Do not allow a child to open or close the trunk lid. Doing so may cause the trunk lid to operate unexpectedly, or cause the child’s hands, head, or neck to be caught by the closing trunk lid.</td>
</tr>
</tbody>
</table>
Using the trunk

Observe the following precautions. Failure to do so may cause parts of the body to be caught, resulting in serious injury.

- Remove any heavy loads, such as snow and ice, from the trunk lid before opening it. Failure to do so may cause the trunk lid to fall closed again after it is opened.
- When opening or closing the trunk lid, thoroughly check to make sure the surrounding area is safe.
- If anyone is in the vicinity, make sure they are safe and let them know that the trunk is about to open or close.
- Use caution when opening or closing the trunk lid in windy weather as it may move abruptly in strong wind.

- The trunk lid may fall if it is not opened fully. It is more difficult to open or close the trunk lid on an incline than on a level surface, so beware of the trunk lid unexpectedly opening or closing by itself. Make sure that the trunk lid is fully open and secure before using the trunk.
- When closing the trunk lid, take extra care to prevent your fingers etc. from being caught.
- When closing the trunk lid, make sure to press it lightly on its outer surface. If the trunk handle is used to fully close the trunk lid, it may result in hands or arms being caught.

- Do not attach any accessories other than genuine Lexus parts to the trunk lid. Such additional weight on the trunk lid may cause the lid to fall closed again after it is opened.
1-3. Adjustable components (seats, mirrors, steering wheel)

Front seats

CAUTION

- **Seat adjustment**
  Do not recline the seat more than necessary when the vehicle is in motion to reduce the risk of sliding under the lap belt.
  If the seat is too reclined, the lap belt may slide past the hips and apply restraint forces directly to the abdomen or your neck may contact the shoulder belt, increasing the risk of death or serious injury in the event of an accident.
Your preferred driving position (the position of the driver’s seat, steering wheel and outside rear view mirrors) can be memorized and recalled with the touch of a button. It is also possible to set this function to activate automatically when the doors are unlocked.

Two different driving positions can be entered into memory.

■ Entering a position to memory

**STEP 1** Turn the “ENGINE START STOP” switch to IGNITION ON mode.

**STEP 2** Adjust the driver’s seat, steering wheel, and outside rear view mirrors to the desired positions.

**STEP 3** Push the “SET” button, then within 3 seconds push button 1 or 2 until the signal beeps.

If the selected button has already been preset, the previously recorded position will be overwritten.
Recalling the memorized position
Check that the shift lever is set in P.

**STEP 1** Turn the “ENGINE START STOP” switch to IGNITION ON mode.

**STEP 2** Push button 1 or 2 to recall the memorized position.

Linking driving position memory with door unlock operation

Record your driving position to button 1 or 2 before performing the following.

Carry only the key to which you want to link the driving position. If 2 or more keys are in the vehicle, the driving position cannot be linked properly.

**Using the wireless remote control**

**STEP 1** Turn the “ENGINE START STOP” switch OFF and close the driver’s door.

**STEP 2** While pressing the desired button (1 or 2), press on the wireless remote control until the signal beeps.

The driving position is recalled when the driver’s door is unlocked using the entry function or wireless remote control and the driver’s door is opened.
Before driving

Open one of the doors.

If a door is not opened within 60 seconds after 🛍️ is pressed, the doors will be locked again and the alarm will automatically be set. In case that the alarm is triggered, immediately stop the alarm. (→P. 81)

► Using the door lock switch

**STEP 1** Close the driver’s door and turn the “ENGINE START STOP” switch OFF.

**STEP 2** While pressing the desired button (1 or 2), press the lock or unlock side on the driver’s door lock switch until the signal beeps.

The driving position is recalled when the driver’s door is unlocked using the entry function or wireless remote control and the driver’s door is opened.
■ Canceling the linked door unlock operation

Carry only the key whose linked operation is to be canceled.

**STEP 1** Turn the “ENGINE START STOP” switch OFF and close the driver’s door.

**STEP 2**
- Using the wireless remote control: While pushing the “SET” button, press on the wireless remote control until the signal beeps.
- Using the door lock switch: While pressing the “SET” button, press the lock or unlock side on the door lock switch until the signal beeps.

■ Operating the driving position memory after turning the “ENGINE START STOP” switch OFF

Memorized positions (except for the steering wheel positions) can be activated up to 180 seconds after the driver’s door is opened and another 60 seconds after it is closed again, even after turning the “ENGINE START STOP” switch OFF.

■ To cancel seat position recall

Perform any of the following operations.

● Push the “SET” button.
● Push button 1 or 2.
● Adjust the seat using the switches (only cancels seat position recall).

■ If the battery is disconnected

The memorized positions are erased when the battery is disconnected.

---

⚠️ CAUTION

■ Seat adjustment caution

Take care during seat adjustment that the seat does not strike the rear passenger or squeeze your body against the steering wheel.
Your preferred front passenger seat position can be memorized and recalled with the touch of a button. Two different seat positions can be entered into memory.

■ Entering a position to memory
  
  **STEP 1** Turn the “ENGINE START STOP” switch to IGNITION ON mode.
  
  **STEP 2** Adjust the front passenger seat to the desired position.

  Push the “SET” button, then within 3 seconds push button 1 or 2 until the signal beeps.

  If the selected button has already been preset, the previously recorded position will be overwritten.

■ Recalling the memorized position
  
  Check that the shift lever is set in P.

  Push button 1 or 2 to recall the memorized position.
- Retained accessory power
  Memorized position can be activated up to 180 seconds after the front passenger door is opened, even after turning the “ENGINE START STOP” switch OFF.

- To cancel seat position recall
  Perform any of the following operations.
  ● Push the “SET” button.
  ● Push button 1 or 2.
  ● Adjust the seat position using the switches.

- If the battery is disconnected
  The memorized positions are erased when the battery is disconnected.

⚠️ CAUTION

- Seat adjustment caution
  Take care during seat adjustment that the seat does not strike the rear passenger.
Head restraints are provided for all seats.

**Removing the head restraints**

Pull the head restraint up while pressing the lock release button.

**Installing the head restraints**

Align the head restraint with the installation holes and push it down to the lock position.

Press and hold the lock release button when lowering the head restraint.
1-3. Adjustable components (seats, mirrors, steering wheel)

■ Adjusting the height of the head restraints

Make sure that the head restraints are adjusted so that the center of the head restraint is closest to the top of your ears.

■ Adjusting the rear seat head restraints

Always raise the head restraint one level from the stowed position when using.

⚠️ CAUTION

■ Head restraint precautions

Observe the following precautions regarding the head restraints. Failure to do so may result in death or serious injury.

- Use the head restraints designed for each respective seat.
- Adjust the head restraints to the correct position at all times.
- After adjusting the head restraints, push down on them and make sure they are locked in position.
- Do not drive with the head restraints removed.
1-3. Adjustable components (seats, mirrors, steering wheel)

Seat belts

Make sure that all occupants are wearing their seat belts before driving the vehicle.

■ Correct use of the seat belts

- Extend the shoulder belt so that it comes fully over the shoulder, but does not come into contact with the neck or slide off the shoulder.
- Position the lap belt as low as possible over the hips.
- Adjust the position of the seatback. Sit up straight and well back in the seat.
- Do not twist the seat belt.

■ Fastening and releasing the seat belt

1 Fastening the belt
   Push the tab into the buckle until a clicking sound is heard.

2 Releasing the belt
   Press the release button.
1-3. Adjustable components (seats, mirrors, steering wheel)

■ Adjusting the height of the belt (front seats)

1. **Down**
2. **Up**

Move the height adjuster up and down as needed until you hear a click.

Seat belt comfort guide (outside rear seats)

If the shoulder belt sits close to a person’s neck, slide the seat belt comfort guide forward.

 Seat belt pretensioners (front and outside rear seats)

The pretensioner helps the seat belt to quickly restrain the occu-  pant by retracting the seat belt when the vehicle is subjected to certain types of severe frontal colli-  sion.

The pretensioner may not activate in the event of a minor frontal impact, a side impact or a rear impact.
Pre-collision seat belts (front seats of vehicles with pre-collision system)

If the pre-collision sensor detects that a collision is unavoidable, the pre-collision system will retract the seat belt using a motor, thus enhancing the effectiveness of the seat belt pretensioner in a crash.

The same will happen if the driver makes an emergency braking or loses control of the vehicle. (→P. 182)

- Emergency locking retractor (ELR)
  The retractor will lock the belt during a sudden stop or on impact. It may also lock if you lean forward too quickly. A slow, easy motion will allow the belt to extend so that you can move around fully.

- Automatic locking retractor (ALR)
  When a passenger’s shoulder belt is completely extended and then retracted even slightly, the belt is locked in that position and cannot be extended. This feature is used to hold the child restraint system (CRS) firmly. To free the belt again, fully retract the belt and then pull the belt out once more. (→P. 106)

- Pregnant women
  Obtain medical advice and wear the seat belt in the proper way. (→P. 57)

  Women who are pregnant should position the lap belt as low as possible over the hips in the same manner as other occupants. Extend the shoulder belt completely over the shoulder and position the belt across the chest. Avoid belt contact over the rounding of the abdominal area.

  If the seat belt is not worn properly, not only a pregnant woman, but also the fetus could suffer death or serious injury as a result of sudden braking or a collision.
■ People suffering illness
Obtain medical advice and wear the seat belt in the proper way.

■ Child seat belt usage
The seat belts of your vehicle were principally designed for persons of adult size.

● Use a child restraint system appropriate for the child, until the child becomes large enough to properly wear the vehicle's seat belt. (→P. 102)

● When the child becomes large enough to properly wear the vehicle's seat belt, follow the instructions on P. 57 regarding seat belt usage.

■ Replacing the belt after the pretensioner has been activated
If the vehicle is involved in multiple collisions, the pretensioner will activate for the first collision, but will not activate for the second or subsequent collisions.

■ Seat belt extender
If your seat belts cannot be fastened securely because they are not long enough, a personalized seat belt extender is available from your Lexus dealer free of charge.

![Seat Belt Extender Image]

CAUTION
Observe the following precautions to reduce the risk of injury in the event of sudden braking, sudden swerving or an accident. Failing to do so may cause death or severe injury.

■ Wearing a seat belt

● Ensure that all passengers wear a seat belt.

● Always wear a seat belt properly.

● Each seat belt should be used by one person only. Do not use a seat belt for more than one person at once, including children.

● Lexus recommends that children be seated in the rear seat and always use a seat belt and/or an appropriate child restraint system.
CAUTION

- Do not recline the seat any more than necessary to achieve a proper seating position. The seat belt is most effective when the occupants are sitting up straight and well back in the seats.
- Do not wear the shoulder belt under your arm.
- Always wear your seat belt low and snug across your hips.

■ Adjustable shoulder anchor

Always make sure the shoulder belt is positioned across the center of your shoulder. The belt should be kept away from your neck, but not falling off your shoulder. Failure to do so could reduce the amount of protection in an accident and cause death or serious injuries in the event of a sudden stop, sudden swerve or accident. (→P. 58)

■ Seat belt pretensioners

- Do not place anything, such as a cushion, on the front passenger’s seat. Doing so will disperse the passenger’s weight, which prevents the sensor from detecting the passenger’s weight properly. As a result, the seat belt pretensioner for the front passenger’s seat may not activate in the event of a collision.
- If the pretensioner has activated, the SRS warning light will come on. In that case, the seat belt cannot be used again and must be replaced at your Lexus dealer.

■ Child restraint lock function belt precaution

Do not allow children to play with the child restraint lock function belt. If the belt becomes twisted around a child’s neck, it will not be possible to pull the belt out leading to choking or other serious injuries that could result in death. If this occurs and the buckle cannot be unfastened, scissors should be used to cut the belt.
1-3. Adjustable components (seats, mirrors, steering wheel)

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ Seat belt damage and wear</td>
</tr>
<tr>
<td>● Do not damage the seat belts by allowing the belt, plate, or buckle to be jammed in the door.</td>
</tr>
<tr>
<td>● Inspect the seat belt system periodically. Check for cuts, fraying, and loose parts. Do not use a damaged seat belt until it is replaced. Damaged seat belts cannot protect an occupant from death or serious injury.</td>
</tr>
<tr>
<td>● Ensure that the belt and tab are locked and the belt is not twisted. If the seat belt does not function correctly, immediately contact your Lexus dealer.</td>
</tr>
<tr>
<td>● Replace the seat assembly, including the belts, if your vehicle has been involved in a serious accident, even if there’s no obvious damage.</td>
</tr>
<tr>
<td>● Do not attempt to install, remove, modify, disassemble or dispose of the seat belts. Have any necessary repairs carried out by your Lexus dealer. Inappropriate handling of the pretensioner may prevent it from operating properly resulting in death or serious injury.</td>
</tr>
</tbody>
</table>

| ■ Using a seat belt extender |
| ● Do not wear the seat belt extender if you can fasten the seat belt without the extender. |
| ● Do not use the seat belt extender when installing a child restraint system because the belt will not securely hold the child restraint system, increasing the risk of death or serious injury in the event of an accident. |
| ● The personalized extender may not be safe on another vehicle, when used by another person, or at a different seating position other than the one originally intended. |

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ When using a seat belt extender</td>
</tr>
<tr>
<td>When releasing the seat belt, press on the buckle release button on the extender, not on the seat belt. This helps prevent damage to the vehicle interior and the extender itself.</td>
</tr>
</tbody>
</table>
The steering wheel can be adjusted to a comfortable position while the “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.

1 Up  
2 Down  
3 Away from the driver  
4 Toward the driver

**Auto tilt away**

When the “ENGINE START STOP” switch is turned OFF, the steering wheel returns to its stowed position by moving up and away to enable easier driver entry and exit.

Turning the “ENGINE START STOP” switch to ACCESSORY or IGNITION ON mode will return the steering wheel to the original position.

**CAUTION**

- **Caution while driving**
  
  Do not adjust the steering wheel while driving. Doing so may cause the driver to mishandle the vehicle and an accident, resulting in death or serious injury.
1-3. Adjustable components (seats, mirrors, steering wheel)

Anti-glare inside rear view mirror

In AUTO mode, sensors are used to detect the headlights of vehicles behind and automatically reduces the reflected light.

1 Turns AUTO mode ON/OFF

The indicator comes on when AUTO mode is turned ON.

The anti-glare mirror default mode is AUTO. The anti-glare mirror is automatically set to AUTO whenever the “ENGINE START STOP” switch is turned on.

Adjusting the height of rear view mirror

Adjust the height of the rear view mirror by moving it up and down.

To prevent sensor error

To ensure that the sensors operate properly, do not touch or cover it.
CAUTION

Caution while driving

Do not adjust the position of the mirror while driving. Doing so may lead to mishandling of the vehicle and an accident, resulting in death or serious injury.
1-3. Adjustable components (seats, mirrors, steering wheel)
Outside rear view mirrors

Mirror angle can be adjusted using the switch when the “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.

1. Select a mirror to adjust (L: left or R: right)
2. Adjust the mirror up, down, in, or out using the switch

When the mirrors are fogged up
Turn on the mirror defoggers to defog the mirrors. (→P. 215)

Folding back the mirrors
Push back in the direction of the vehicle’s rear.

One-touch adjustment of the mirror angle
A desired mirror face angle can be entered to memory and adjusted with the touch of a button. (→P. 49)
■ Linked mirror function when reversing

The outside rear view mirrors will automatically angle downwards when the vehicle is reversing in order to give a better view of the ground. However, this function will not operate when the mirror select switch is in the neutral position (between L and R).

■ Auto anti-glare function

When the anti-glare inside rear view mirror is set to AUTO mode, the outside rear view mirrors will activate in conjunction with the anti-glare inside rear view mirror to reduce reflected light. (→P. 64)

⚠️ CAUTION

■ When driving the vehicle

Observe the following precautions while driving.
Failing to do so may result in loss of control of the vehicle and cause an accident, resulting in death or serious injury.

● Do not adjust the mirrors while driving.
● Do not drive with the mirrors folded back.
● Both the driver and passenger side mirrors must be extended and properly adjusted before driving.

■ When the mirror defoggers are operating

Do not touch the rear view mirror surfaces, as they can become very hot and burn you.
The power windows can be opened and closed using the following switches.

1. Closing
2. One-touch closing*
3. Opening
4. One-touch opening*

*: Pushing the switch in the opposite direction will stop window travel partway.

**Lock switch**

Press the switch down to lock passenger window switches.

Use this switch to prevent children from accidentally opening or closing a passenger window.
The power windows can be operated when
The “ENGINE START STOP” switch is in IGNITION ON mode.

Linked door lock window operation
- The power windows can be opened and closed using the mechanical key. (→ P. 481)
- The power windows can be closed using the entry function. (→ P. 26)

Operating the power windows after turning the “ENGINE START STOP” switch OFF
The power windows can be operated for approximately 45 seconds even after the “ENGINE START STOP” switch is switched to ACCESSORY mode or turned OFF. They cannot, however, be operated once either front door is opened.

Jam protection function
If an object becomes caught between the window and the window frame, window travel is stopped and the window is opened slightly.

When the power window does not close normally
If the jam protection function is operating abnormally and a window cannot be closed, perform the following operations using the power window switch on the relevant door.
- After stopping the vehicle, the window can be closed by holding the power window switch in the one-touch closing position while the “ENGINE START STOP” switch is turned to IGNITION ON mode.
- If the window still cannot be closed even by carrying out the operation explained above, initialize the function by performing the following procedure.

**STEP 1** Hold the power window switch in the one-touch closing position. Continue holding the switch for a further 6 seconds after the window has closed.

**STEP 2** Hold the power window switch in the one-touch opening position. Continue holding the switch for a further 2 seconds after the window has opened completely.

**STEP 3** Hold the power window switch in the one-touch closing position once again. Continue holding the switch for a further 2 seconds after the window has closed.
If you release the switch while the window is moving, start again from the beginning. If the window continues to close but then re-open slightly even after performing the above procedure correctly, have the vehicle inspected by your Lexus dealer.

**Customization that can be configured at Lexus dealer**
Settings (e.g. linked door lock operation) can be changed.
(> Customizable features → P. 517)

---

**CAUTION**

**Closing the windows**
Observe the following precautions. Failing to do so may result in death or serious injury.

- Check to make sure that all passengers do not have any part of their body in a position where it could be caught when a window is being operated.
- Do not allow children to operate the power windows. Closing a power window on someone can cause serious injury, and in some instances, even death.

**Jam protection function**
- Never try jamming any part of your body to activate the jam protection function intentionally.
- The jam protection function may not work if something gets caught just before the window fully closes.
1-4. Opening and closing the windows and moon roof

Moon roof

Use the overhead switches to open, close, and tilt the moon roof up and down.

- Opening and closing
  - Standard type
    1. Open
      The moon roof stops slightly before the fully opened position. Push the switch again to fully open.
    2. Close
      Push the switch in the either direction to stop the moon roof partway.
  - Glass type
    1. Open
    2. Close (push and hold)
      The moon roof stops once. Push and hold the switch again to fully close.
■ Tilting up and down

▶ Standard type

1 Tilt up
2 Tilt down
Push the switch to either side to stop the moon roof partway.

▶ Glass type

1 Tilt up
Push the switch to either side to stop the moon roof partway.
2 Tilt down (push and hold)
The moon roof can be operated when
The “ENGINE START STOP” switch is in IGNITION ON mode.

Linked door lock moon roof operation (standard type)
- The moon roof can be opened and closed using the mechanical key. (→P. 481)
- The moon roof can be closed using the entry function. (→P. 27)

Operating the moon roof after turning the “ENGINE START STOP” switch OFF
The moon roof can be operated for approximately 45 seconds even after the “ENGINE START STOP” switch is switched to ACCESSORY mode or turned OFF. It cannot, however, be operated once either front door is opened.

Jam protection function
If an object is detected between the moon roof and the frame while closing or tilting down, travel is stopped and the moon roof opens slightly.

To reduce moon roof wind noise (standard type)
Drive with the moon roof opened to slightly before the fully open position as driving with the moon roof opened fully will cause wind noise.

Sunshade
The sunshade can be opened and closed manually. However, the sunshade will open automatically when the moon roof is opened.
When the moon roof does not close normally

Perform the following procedure:

- If the moon roof closes but then re-opens slightly

  **STEP 1** Stop the vehicle.

  **STEP 2** Press and hold the “CLOSE” switch.*1
  The moon roof will close, reopen and pause for approximately 10 seconds.*2 Then it will close again, tilt up and pause for approximately 1 second. Finally, it will tilt down, open and close.

  **STEP 3** Check to make sure that the moon roof is completely closed and then release the switch.

- If the moon roof tilts down but then tilts back up

  **STEP 1** Stop the vehicle.

  **STEP 2** Press and hold the “TILT” switch*1 until the moon roof moves into the tilt up position and stops.

  **STEP 3** Release the “TILT” switch once and then press and hold the “TILT” switch again.*1
  The moon roof will pause for approximately 10 seconds in the tilt up position.*2 Then it will adjust slightly and pause for approximately 1 second. Finally, it will tilt down, open and close.

  **STEP 4** Check to make sure that the moon roof is completely closed and then release the switch.

*1: If the switch is released at the incorrect time, the procedure will have to be performed again from the beginning.

*2: If the switch is released after the above mentioned 10 second pause, automatic operation will be disabled. In that case, press and hold the “CLOSE” or “TILT” switch, and the moon roof will tilt up and pause for approximately 1 second. Then it will tilt down, open and close. Check to make sure that the moon roof is completely closed and then release the switch.

If the moon roof does not fully close even after performing the above procedure correctly, have the vehicle inspected by your Lexus dealer.
■ Customization that can be configured at Lexus dealer

Settings (e.g. linked door lock operation) can be changed.
(Customizable features → P. 517)

<table>
<thead>

</tbody>
</table>
Perform the following steps to open the fuel tank cap.

■ Before refueling the vehicle
   Turn the “ENGINE START STOP” switch OFF and ensure that all the doors and windows are closed.

■ Opening the fuel tank cap

   STEP 1
   Open the fuel filler door.

   STEP 2
   Turn the fuel tank cap slowly to open.

   STEP 3
   Hang the fuel tank cap on the back of the fuel filler door.
Closing the fuel tank cap

When replacing the fuel tank cap, turn it until a clicking sound is heard.

After releasing your hand, the cap will turn slightly to the opposite direction.

Fuel types

Use unleaded gasoline. (Octane rating 87 [Research Octane Number 91] or higher)

Fuel tank capacity

Approximately 18.5 gal. (70 L, 15.4 Imp. gal.)

When the fuel filler door opener is inoperable

The lever can be used to open the fuel filler door if the fuel filler door cannot be opened using the inside switch because the battery is discharged or for any other reason.
Refueling the vehicle

Observe the following precautions while refueling the vehicle. Failure to do so, may result in death or serious injury.

- Touch the vehicle or some other metal surface to discharge any static electricity. Sparks resulting from discharging static electricity may cause the fuel vapors to ignite.
- Always hold the grips on the fuel tank cap and turn it slowly to remove it. A whooshing sound may be heard when the fuel tank cap is loosened. Wait until the sound cannot be heard before fully removing the cap. In hot weather, pressurized fuel may spray out the filler neck and cause injury.
- Do not allow anyone that has not discharged static electricity from their bodies to come close to an open fuel tank.
- Do not inhale vaporized fuel. Fuel contains substances that are harmful if inhaled.
- Do not smoke while refueling the vehicle. Doing so may cause the fuel to ignite and cause a fire.
- Do not return to the vehicle or touch any person or object that is statically charged. This may cause static electricity to build up, resulting in a possible ignition hazard.

When replacing the fuel cap

Do not use anything but a genuine Lexus fuel tank cap designed for your vehicle. Failure to do so may cause a fire or other incident which may result in death or serious injury.

Refueling

Do not spill fuel during refueling. Failing to do so may damage the vehicle, such as causing the exhaust systems to operate abnormally or damaging fuel system components or the vehicle’s painted surface.
The vehicle's keys have built-in transponder chips that prevent the engine from starting if the key has not been previously registered in the vehicle's on-board computer.
Never leave the keys inside the vehicle when you leave the vehicle.

The indicator light flashes after the “ENGINE START STOP” switch has been turned OFF to indicate that the system is operating.

The indicator light stops flashing after the “ENGINE START STOP” switch has been turned to ACCESSORY or IGNITION ON mode to indicate that the system has been canceled.
■ System maintenance

The vehicle has a maintenance-free type engine immobilizer system.

■ Conditions that may cause the system to malfunction

● If the grip portion of the key is in contact with a metallic object

● If the key is in close proximity to or touching a key to the security system (key with a built-in transponder chip) of another vehicle

■ Certification for the engine immobilizer system

▶ For vehicles sold in the USA

FCC ID: NI4TMIMB-1

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

▶ For vehicles sold in Canada

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

⚠️ CAUTION

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

⚠️ NOTICE

■ To ensure the system operates correctly

Do not modify or remove the system. If modified or removed, the proper operation of the system cannot be guaranteed.
The system sounds the alarm and flashes lights when forcible entry is detected.

■ Triggering of the alarm
The alarm is triggered in the following situations when the alarm is set:

● A locked door or trunk is unlocked or opened in any way other than using the entry function or wireless remote control. (The doors will lock again automatically.)

● The hood is opened.

■ Setting the alarm system
Close the doors, trunk and hood, and lock all the doors using the entry function or wireless remote control. The system will be set automatically after 30 seconds.

The indicator light changes from being on to flashing when the system is set.

■ Deactivating or stopping the alarm
Do one of the following to deactivate or stop the alarms:

● Unlock the doors or trunk using the entry function or wireless remote control.

● Start the engine. (The alarm will be deactivated or stopped after a few seconds.)
■ System maintenance
The vehicle has a maintenance-free type alarm system.

■ Items to check before locking the vehicle
To prevent unexpected triggering of the alarm and vehicle theft, make sure of the following:
● Nobody is in the vehicle.
● The windows and moon roof are closed before the alarm is set.
● No valuables or other personal items are left in the vehicle.

■ Triggering of the alarm
The alarm may be triggered in the following situations:
(Stopping the alarm deactivates the alarm system.)

● The doors are unlocked using the mechanical key.

● A person inside the vehicle opens a door, the trunk or hood.

● The battery is recharged or replaced when the vehicle is locked.
■ Panic mode

When is pushed for longer than about one second, the headlights/tail lights/emergency flashers will flash, the front and rear interior lights will come on, and an alarm will sound for about 60 seconds to deter any person from trying to break into or damage your vehicle.

To stop the alarm, push any button on the wireless remote control.

■ When the battery is disconnected

Be sure to cancel the alarm system.

If the battery is discharged before canceling the alarm, the system may be triggered when the battery is reconnected.

■ Alarm-operated door lock

● When the alarm is operating, the doors are locked automatically to prevent intruders.

● Do not leave the key inside the vehicle when the alarm is operating, and make sure the key is not inside the vehicle when recharging or replacing the battery.

⚠️ NOTICE

■ To ensure the system operates correctly

Do not modify or remove the system. If modified or removed, the proper operation of the system cannot be guaranteed.
Drive in a good posture as follows:

1. Sit upright and well back in the seat. (→ P. 48)
2. Adjust the position of the seat forward or backward to ensure the pedals can be reached and easily depressed to the extent required. (→ P. 48)
3. Adjust the seatback so that the controls are easily operable. (→ P. 48)
4. Adjust the tilt and telescopic positions of the steering wheel downward so the airbag is facing your chest. (→ P. 63)
5. Lock the head restraint in place with the center of the head restraint closest to the top of your ears. (→ P. 55)
6. Wear the seat belt correctly. (→ P. 57)
### CAUTION

#### While driving

- Do not adjust the position of the driver’s seat while driving. Doing so could cause the driver to lose control of the vehicle.

- Do not place a cushion between the driver or passenger and the seatback. A cushion may prevent correct posture from being achieved, and reduce the effectiveness of the seat belt and head restraint, increasing the risk of death or serious injury to the driver or passenger.

- Do not place anything under the front seats. Objects placed under the front seats may become jammed in the seat tracks and stop the seat from locking in place. This may lead to an accident. The adjustment mechanism may also be damaged.

#### Adjusting the seat position:

- Take care when adjusting the seat position to ensure that other passengers are not injured by the moving seat.

- Do not put your hands under the seat or near the moving parts to avoid injury. Fingers or hands may become jammed in the seat mechanism.
The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.

- **Front airbags**
  - **1 Driver airbag/front passenger airbag**
    Can help protect the head and chest of the driver and front passenger from impact with interior components.
  - **2 Knee airbags**
    Can help provide driver and front passenger protection.

- **Side and curtain shield airbags**
  - **3 Side airbags**
    Can help protect the torso of the front seat occupants and rear seat outside occupants.
  - **4 Curtain shield airbags**
    Can help protect primarily the head of outside occupants.
Airbag system components

1. Front passenger airbag
2. Curtain shield airbags
3. AIR BAG ON and AIR BAG OFF indicator lights
4. Side airbags for the front passengers
5. Side and curtain shield airbag sensors
6. Curtain shield airbag sensors
7. Side airbags for the rear outside passengers
8. SRS warning light
9. Driver airbag
10. Driver’s seat position sensor
11. Knee airbags
12. Driver’s seat belt buckle switch
13. Front passenger’s seat belt buckle switch
14. Airbag sensor assembly
15. Occupant detection system (ECU and sensors)
16. Front airbag sensors

Your vehicle is equipped with ADVANCED AIRBAGS designed based on US motor vehicle safety standards (FMVSS208). The airbag system controls airbag deployment power for the driver and front passenger. The driver airbag system consists of the driver seat’s position sensor etc. The front passenger’s airbag system consists of the front passenger occupant classification sensor etc.
The main SRS airbag system components are shown above. The SRS airbag system is controlled by the airbag sensor assembly. The airbag sensor assembly consists of a safing sensor and an airbag sensor.

In certain types of severe frontal or side impacts, the SRS airbag system triggers the airbag inflators. A chemical reaction in the inflators quickly fills the airbags with non-toxic gas to help restrain the motion of the occupants.

- If the SRS airbags deploy (inflate)
  - Bruising and slight abrasions may result from contact with a deploying (inflating) SRS airbag.
  - A loud noise and white powder will be emitted.
  - Parts of the airbag module (steering wheel hub, airbag cover and inflator) as well as the seats, and parts of the front pillar, rear pillar and roof side rail, may be hot for several minutes. The airbag itself may also be hot.
  - The windshield may crack.
  - For Safety Connect subscribers, if the SRS airbags deploy or in the event of a severe rear-end collision, the system is designed to send an emergency call to the response center, notifying them of the vehicle’s location (without needing to push the “SOS” button) and an agent will attempt to speak with the occupants to ascertain the level of emergency and assistance required. If the occupants are unable to communicate, the agent automatically treats the call as an emergency and helps to dispatch the necessary emergency services. (→P. 353)

- SRS airbag deployment conditions (front airbags)
  - The SRS front airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to an approximately 12 - 18 mph [20 - 30 km/h] frontal collision with a fixed wall that does not move or deform).

    However, this threshold velocity will be considerably higher if the vehicle strikes an object, such as a parked vehicle or sign pole, which can move or deform on impact, or if the vehicle is involved in an underride collision (e.g. a collision in which the front of the vehicle “underrides”, or goes under, the bed of a truck, etc.).

  - It is possible that in some collisions where the forward deceleration of the vehicle is very close to the designed threshold level, the SRS front airbags and the seat belt pretensioners may not activate together.
■ SRS airbag deployment conditions (side and curtain shield airbags)

The SRS side airbags and curtain shield airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to the impact force produced by an approximately 3300 lb. [1500 kg] vehicle colliding with the vehicle cabin from a direction perpendicular to the vehicle orientation at an approximately speed of 12 - 18 mph [20 - 30 km/h]).

■ Conditions under which the SRS airbags may deploy (inflate), other than a collision

The SRS front airbags may also deploy if a serious impact occurs to the underside of your vehicle. Some examples are shown in the illustration.

- Hitting a curb, edge of pavement or hard surface
- Falling into or jumping over a deep hole
- Landing hard or vehicle falling

■ Types of collisions that may not deploy the SRS airbag (front airbags)

The SRS front airbags are generally not designed to inflate if the vehicle is involved in a side or rear collision, if it rolls over, or if it is involved in a low-speed frontal collision. But, whenever a collision of any type causes sufficient forward deceleration of the vehicle, deployment of the SRS front airbags may occur.

- Collision from the rear
- Collision from the side
- Vehicle rollover
Types of collisions that may not deploy the SRS airbag (side and curtain shield airbags)

The SRS side airbag and curtain shield airbag system may not activate if the vehicle is subjected to a collision from the side at certain angles, or a collision to the side of the vehicle body other than the passenger compartment.

- Collision from the side to the vehicle body other than the passenger compartment
- Collision from the side at an angle

The SRS side airbags and curtain shield airbags are not generally designed to inflate if the vehicle is involved in a frontal or rear collision, if it rolls over, or if it is involved in a low-speed side collision.

- Collision from the rear
- Collision from the front
- Vehicle rollover
When to contact your Lexus dealer

In the following cases, contact your Lexus dealer as soon as possible.

- Any of the SRS airbags have been inflated.
  - The front of the vehicle is damaged or deformed, or was involved in an accident that was not severe enough to cause the SRS airbags to inflate.
  - A portion of the doors is damaged or deformed, or the vehicle was involved in an accident that was not severe enough to cause the SRS side airbags and curtain shield airbags to inflate.
  - The pad section of the steering wheel, dashboard near the front passenger airbag or lower portion of the instrument panel is scratched, cracked, or otherwise damaged.
  - The portion of the containing the side airbag is scratched, cracked, or otherwise damaged.
  - The portion of the front pillars, rear pillars or roof side rail garnishes (padding) containing the curtain shield airbags inside is scratched, cracked, or otherwise damaged.
■ SRS airbag precautions

Observe the following precautions regarding the airbags. Failure to do so may cause death or serious injury.

● The driver and all passengers in the vehicle must wear their seat belts properly. The SRS airbags are supplemental devices to be used with the seat belts.

● The SRS driver airbag deploys with considerable force, and can cause death or serious injury especially if the driver is very close to the airbag. The National Highway Traffic Safety Administration ("NHTSA") advises:

Since the risk zone for driver airbag is the first 2 - 3 in. (50 - 75 mm) of inflation, placing yourself 10 in. (250 mm) from your driver airbag provides you with a clear margin of safety. This distance is measured from the center of the steering wheel to your breastbone. If you sit less than 10 in. (250 mm) away now, you can change your driving position in several ways:

• Move your seat to the rear as far as you can while still reaching the pedals comfortably.
• Slightly recline the back of the seat. Although vehicle designs vary, many drivers can achieve the 10 in. (250 mm) distance, even with the driver seat all the way forward, simply by reclining the back of the seat somewhat. If reclining the back of your seat makes it hard to see the road, raise yourself by using a firm, non-slippery cushion, or raise the seat if your vehicle has that feature.
• If your steering wheel is adjustable, tilt it downward. This points the airbag toward your chest instead of your head and neck.

The seat should be adjusted as recommended by NHTSA above, while still maintaining control of the foot pedals, steering wheel, and your view of the instrument panel controls.
Before driving

**CAUTION**

■ SRS airbag precautions

- If the seat belt extender has been connected to the driver’s seat belt buckle but the seat belt extender has not also been fastened to the latch plate of the driver’s seat belt, the SRS driver’s airbag system will judge that the driver is wearing the seat belt even though the seat belt has not been connected. In this case, the driver’s airbag may not activate correctly in a collision, resulting in death or serious injury in the event of collision. Be sure to wear the seat belt with the seat belt extender.

- The SRS front passenger airbag also deploys with considerable force, and can cause death or serious injury especially if the front passenger is very close to the airbag. The front passenger seat should be as far from the airbag as possible with the seatback adjusted, so the front passenger sits upright.

- Improperly seated and/or restrained infants and children can be killed or seriously injured by a deploying airbag. An infant or child who is too small to use a seat belt should be properly secured using a child restraint system. Lexus strongly recommends that all infants and children be placed in the rear seats of the vehicle and properly restrained. The rear seats are the safest for infants and children. (→P.102)
### CAUTION

#### SRS airbag precautions

- **Do not sit on the edge of the seat or lean against the dashboard.**

- **Do not allow a child to stand in front of the SRS front passenger airbag unit or sit on the knees of a front passenger.**

- **Do not drive the vehicle while the driver or passenger have items resting on their knees.**

- **Do not lean against the door, the roof side rail or the front, side and rear pillars.**

- **Do not allow anyone to kneel on the passenger seat toward the door or put their head or hands outside the vehicle.**
CAUTION

SRS airbag precautions

- Do not attach anything to or lean anything against areas such as the dashboard, steering wheel pad or lower portion of the instrument panel. These items can become projectiles when SRS driver, front passenger and knee airbags deploy.

- Do not attach anything to areas such as the door, windshield glass, side door glass, front and rear pillars, roof side rail or assist grip.

- Do not hang coat hangers or other hard objects on the coat hooks. All of these items could become projectiles and seriously injure or kill you, should the SRS curtain shield airbag deploy.

- If the vinyl cover is put on the area where the SRS knee airbag will deploys, be sure to remove it.

- Do not use seat accessories which cover the parts where the SRS side airbags inflate as they may interfere with inflation of the airbags.

- Do not strike or apply significant levels of force to the area of the SRS airbag components shown on P. 87. Doing so can cause the SRS airbags to malfunction.

- Do not touch any of the component parts immediately after the SRS airbags have deployed (inflated) as they may be hot.

- If breathing becomes difficult after the SRS airbag has deployed, open a door or window to allow fresh air in, or leave the vehicle if it is safe to do so. Wash off any residue as soon as possible to prevent skin irritation.

- If the areas where the SRS airbags are stored, such as the steering wheel pad and front pillar garnish, are damaged or cracked, have them replaced by your Lexus dealer.
<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| **Modification and disposal of SRS airbag system components**  
Do not dispose of your vehicle or perform any of the following modifications without consulting your Lexus dealer. The SRS airbag may malfunction or deploy (inflate) accidentally, causing death or serious injury. |
| ● Installation, removal, disassembly and repair of the SRS airbags |
| ● Repairs, modifications, removal or replacement of the steering wheel, instrument panel, dashboard, seats or seat upholstery, front, side and rear pillars or roof side rails |
| ● Repairs or modifications of the front fender, front bumper, or side of the occupant compartment |
| ● Installation of snow plows, winches, etc. to the front grille (bull bars, kangaroo bar etc.) |
| ● Modifications to the vehicle’s suspension system |
| ● Installation of electronic devices such as mobile two-way radios or CD players |
| ● Modifications to your vehicle for a person with a physical disability |
Your vehicle is equipped with a front passenger occupant classification system. This system detects the conditions of the front passenger seat and activates or deactivates the devices for front passenger.

*1: The system judges a person of adult size as an adult. When a smaller adult sits in the front passenger seat, the system may recognize him/her as a child depending on his/her physique and posture.

*2: In the event the front passenger does not wear a seat belt.

*3: When a larger child who has outgrown a child restraint system sits in the front passenger seat, the system may recognize him/her as an adult depending on his/her physique or posture.
*4: Never install a rear-facing child restraint system on the front passenger seat. A forward-facing child restraint system should only be installed on the front passenger seat when it is unavoidable. (→P.102)

*5: In case the indicator is not illuminated, consult this manual as for installing the child restraint system properly. (→P.106)

---

**CAUTION**

**Front passenger occupant classification system precautions**

Observe the following precautions regarding front passenger occupant classification system. Failure to do so may cause death or serious injury.

- Wear the seat belt properly.
- Make sure the front passenger’s seat belt tab has not been left inserted into the buckle before someone sits in the front passenger seat.
- Make sure the “AIR BAG OFF” indicator light is not illuminated when using the seat belt extender for the front passenger seat. If the “AIR BAG OFF” indicator light is illuminated, disconnect the extender tongue from the seat belt buckle, then reconnect the seat belt. Reconnect the seat belt extender after making sure the “AIR BAG ON” indicator light is illuminated. If you use the seat belt extender while the “AIR BAG OFF” indicator light is illuminated, the front passenger airbag, side airbag on the front passenger side and front passenger knee airbag may not activate correctly, which could cause death or serious injury in the event of collision.
- Do not put weight on the front passenger seat by putting your hands or feet on the front passenger seat seatback from the rear passenger seat.
- Do not let a rear passenger lift the front passenger seat with their feet or press on the seatback with their legs.
- Do not put objects under the front passenger seat.
Front passenger occupant classification system precautions

Do not recline the front passenger seatback so far that it touches a rear seat. This may cause the “AIR BAG OFF” indicator light to be illuminated, which indicates that the passenger’s airbags will not deploy in the event of a severe accident. If the seatback touches the rear seat, return the seatback to a position where it does not touch the rear seat. Keep the front passenger seatback as upright as possible when the vehicle is moving. Reclining the seatback excessively may lessen the effectiveness of the seat belt system.

If an adult sits in the front passenger seat, the “AIR BAG ON” indicator light is illuminated. If the “AIR BAG OFF” indicator is illuminated, ask the passenger to sit up straight, well back in the seat, feet on the floor, and with the seat belt worn correctly. If the “AIR BAG OFF” indicator still remain illuminated, either ask the passenger to move to the rear seat, or if that is not possible, move the front passenger seat fully rearward.

When it is unavoidable to install the forward-facing child restraint system on the front passenger seat, install the child restraint system on the front passenger seat in the proper order. (→P. 106)

Do not modify or remove the front seats.

Do not kick the front passenger seat or subject it to severe impact. Otherwise, the SRS warning light may come on to indicate a malfunction of the detection system. In this case, contact your Lexus dealer immediately.

Child restraint systems installed on the rear seat should not contact the front seatbacks.

Do not use a seat accessory, such as a cushion or seat cover, that covers the seat cushion surface.

Do not modify or replace the upholstery of the front seat.
1-7. Safety information
Child restraint systems

A child restraint system for a small child or baby must itself be properly restrained on the seat with the lap portion of the lap/shoulder belt. The laws of the Canada and all 50 states of the USA now require the use of child restraint systems.

Points to remember

Studies have shown that installing a child restraint on a rear seat is much safer than installing one to the front passenger seat.

● Choose a child restraint system that suits your vehicle and is appropriate to the age and size of the child.

● For installation details, follow the instructions provided with the child restraint system.
  General installation instructions are provided in this manual. (→P. 106)

Types of child restraints

Child restraint systems are classified into the following 3 types according to the age and size of the child.

► Rear facing — Infant seat/convertible seat
1-7. Safety information

Before driving

- Forward facing — Convertible seat

- Booster seat

- Selecting an appropriate child restraint system
  
  - Use a child restraint system appropriate for the child until the child becomes large enough to properly wear the vehicle’s seat belt.
  
  - If the child is too large for a child restraint system, sit the child on a rear seat and use the vehicle’s seat belt. (→P. 57)
# CAUTION

<table>
<thead>
<tr>
<th>Child restraint precautions</th>
</tr>
</thead>
<tbody>
<tr>
<td>● For effective protection in automobile accidents and sudden stops, a child must be properly restrained, using a seat belt or child restraint system depending on the age and size of the child. Holding a child in your arms is not a substitute for a child restraint system. In an accident, the child can be crushed against the windshield, or between you and the vehicle’s interior.</td>
</tr>
<tr>
<td>● Lexus strongly urges the use of a proper child restraint system that conforms to the size of the child, installed on the rear seat. According to accident statistics, the child is safer when properly restrained in the rear seat than in the front seat.</td>
</tr>
<tr>
<td>● Never install a rear-facing child restraint system on the front passenger seat even if “AIR BAG OFF” indicator light is illuminated. In the event of an accident, the force of the rapid inflation of the front passenger airbag can cause death or serious injury to the child if the rear-facing child restraint system is installed on the front passenger seat.</td>
</tr>
<tr>
<td>● A forward-facing child restraint system may be allowed to be installed on the front passenger seat only when it is unavoidable. A child restraint system that requires a top tether strap should not be used in the front passenger seat since there is no top tether strap anchor for the front passenger seat. Adjust the seatback as upright as possible and always move the seat as far back as possible even if “AIR BAG OFF” indicator light is illuminated, because the front passenger airbag could inflate with considerable speed and force. Otherwise, the child may be killed or seriously injured.</td>
</tr>
<tr>
<td>● Do not use the seat belt extender when installing a child restraint system on the front or rear passenger seat. If installing a child restraint system with the seat belt extender connected to the seat belt, the seat belt will not securely hold the child restraint system, which could cause death or serious injury to the child or other passengers in the event of a sudden stop, sudden swerve or accident.</td>
</tr>
<tr>
<td>● Do not allow the child to lean his/her head or any part of his/her body against the door or the area of the seat, front pillar or roof side rail from which the side airbags or curtain shield airbags deploy even if the child is seated in the child restraint system. It is dangerous if the side airbags and curtain shield airbags inflate, and the impact could cause death or serious injury to the child.</td>
</tr>
</tbody>
</table>
\section*{CAUTION}

\section*{Child restraint precautions}
- Make sure you have complied with all installation instructions provided by the child restraint manufacturer and that the system is properly secured. If it is not secured properly, it may cause death or serious injury to the child in the event of a sudden stop, sudden swerve or accident.

\section*{Child restraint lock function belt precaution}
Do not allow children to play with the child restraint lock function belt. If the belt becomes twisted around a child’s neck, it will not be possible to pull the belt out leading to choking or other serious injuries that could result in death. If this occurs and the buckle cannot be unfastened, scissors should be used to cut the belt.

\section*{When the child restraint system is not in use}
- Keep the child restraint system properly secured on the seat even if it is not in use. Do not store the restraint unsecured in the passenger compartment.
- If it is necessary to detach the child restraint system, remove it from the vehicle or store it securely in the trunk. This will prevent it from injuring passengers in the event of a sudden stop, sudden swerve or accident.
Follow the child restraint system manufacturer’s instructions. Firmly secure child restraints to the outside rear seats using the LATCH anchors or a seat belt. Attach the top tether strap when installing a child restraint.

The lap/shoulder belt can be used if your child restraint system is not compatible with the LATCH (Lower Anchors and Tethers for Children) system.

**Child restraint LATCH anchors**

LATCH anchors are provided for the outside rear seats. (Buttons displaying the location of the anchors are attached to the seats.)

**Seat belts equipped with a child restraint locking mechanism** (ALR/ELR belts except driver’s seat belt) (→ P. 57)

**Anchor bracket (for top tether strap)**

Anchor brackets are provided for all rear seats.
Installation with LATCH system

Type A

STEP 1  Widen the gap between the seat cushion and seat-back slightly.

STEP 2  Latch the hooks of lower straps onto the LATCH anchorages.

STEP 3  If the child restraint has a top tether strap, the top tether strap should be latched onto the top tether strap anchor.

For owners in Canada:
A symbol on a child restraint system indicates the presence of a lower connector system.
Type B

**STEP 1** Widen the gap between the seat cushion and seat-back slightly.

**STEP 2** Latch the buckles onto the LATCH anchors.

**STEP 3** If the child restraint has a top tether strap, the top tether strap should be latched onto the top tether strap anchor.

For owners in Canada:
A symbol on a child restraint system indicates the presence of a lower connector system.
Installing child restraints using a seat belt (child restraint lock function belt)

**Rear facing — Infant seat/convertible seat**

**STEP 1**
Place the child seat on the rear seat facing the rear of the vehicle.

**STEP 2**
Run the seat belt through the child seat and insert the plate into the buckle. Make sure that the belt is not twisted.

**STEP 3**
Fully extend the shoulder belt and then allow it to retract slightly in order to activate the ALR lock mode.

Lock mode allows the seat belt to retract only.
While pushing the child seat down into the rear seat, allow the shoulder belt to retract until the child seat is securely in place.

After the shoulder belt has retracted to a point where there is no slack in the belt, pull the belt to check that it cannot be extended.

**Forward facing — Convertible seat**

Place the child seat on the seat facing the front of the vehicle.

Run the seat belt through the child seat and insert the plate into the buckle. Make sure that the belt is not twisted.

Fully extend the shoulder belt and then allow it to retract slightly into the ALR lock mode.

Lock mode allows the seat belt to retract only.
While pushing the child seat into the rear seat, allow the shoulder belt to retract until the child seat is securely in place.

After the shoulder belt has retracted to a point where there is no slack in the belt, pull the belt to check that it cannot be extended.

If the child restraint has a top tether strap, the top tether strap should be latched onto the top tether strap anchor.

**Booster seat**

Place the booster seat on the seat facing the front of the vehicle.

Sit the child in the booster seat. Fit the seat belt to the booster seat according to the manufacturer’s instructions and insert the plate into the buckle. Make sure that the belt is not twisted.

Check that the shoulder belt is correctly positioned over the child’s shoulder, and that the lap belt is as low as possible. (➔P. 57)
Removing a child restraint installed with a seat belt

Push the buckle release button and fully retract the seat belt.

Child restraint systems with a top tether strap

Secure the child restraint using a seat belt or a lower anchors, and lock the head restraint in place at the lowest position.

Open the anchor bracket cover, latch the hook onto the anchor bracket and tighten the top tether strap.

Make sure the top tether strap is securely latched.
- **Laws and regulations pertaining to anchorages**
  The LATCH system conforms to FMVSS225 or CMVSS210.2. Child restraint systems conforming to FMVSS213 or CMVSS213 specifications can be used. This vehicle is designed to conform to the SAE J1819.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>When installing a booster seat</strong></td>
</tr>
</tbody>
</table>
  Do not fully extend the shoulder belt to prevent the belt from going to ALR lock mode: (→P. 59)
  ALR mode causes the belt to tighten only which could cause injury or discomfort to the child.
CAUTION

When installing a child restraint system

Follow the directions given in the child restraint system installation manual and fix the child restraint system securely in place. If the child restraint system is not correctly fixed in place, the child or other passengers may be injured or even killed in the event of sudden braking, sudden swerving or an accident.

- If the driver’s seat interferes with the child restraint system and prevents it from being attached correctly, attach the child restraint system to the right-hand rear seat.

- Only put a forward facing or booster child seat on the front seat when unavoidable. When installing a forward facing or booster child seat on the front passenger seat, move the seat as far back as possible even if AIR BAG OFF indicator light is illuminated. Failing to do so may result in death or serious injury if the airbags deploy (inflate).

- When a booster seat is installed, always ensure that the shoulder belt is positioned across the center of the child’s shoulder. The belt should be kept away from the child’s neck, but not so that it could fall off the child’s shoulder. Failing to do so may result in death or serious injury in the event of sudden braking, sudden swerving or an accident.

- Ensure that the belt and tab are securely locked and the seat belt is not twisted.

- Push and pull the child seat from side to side and forward to be sure it is secure.

- After securing a child restraint system, never adjust the seat.

- Follow all installation instructions provided by the child restraint system manufacturer.
1-7. Safety information

Before driving

CAUTION

■ Do not use a seat belt extender

If a seat belt extender is used when installing a child restraint system, the seat belt will not securely hold the child restraint system, which could cause death or serious injury to the child or other passengers in the event of sudden braking, sudden swerving or an accident.

■ To correctly attach a child restraint system to the anchors

When using the LATCH anchors, be sure that there are no foreign objects around the anchors and that the seat belt is not caught behind the child restraint. Make sure the child restraint system is securely attached, or it may cause death or serious injury to the child or other passengers in the event of a sudden stop, sudden swerve or accident.

2-1. Driving procedures
Driving the vehicle

The following procedures should be observed to ensure safe driving.

■ Starting the engine (→P. 126)

■ Driving

STEP 1 With the brake pedal depressed, shift the shift lever to D.  
(→P. 130)

STEP 2 Release the parking brake.  
(→P. 134)

STEP 3 Gradually release the brake pedal and gently depress the accelerator pedal to accelerate the vehicle.

■ Stopping

STEP 1 With the shift lever in D, depress the brake pedal.

STEP 2 If necessary, set the parking brake.

When the vehicle is stopped for an extended period of time, shift the shift lever to P or N.  
(→P. 130)

■ Parking the vehicle

STEP 1 With the shift lever in D, depress the brake pedal.

STEP 2 Set the parking brake.  
(→P. 134)

STEP 3 Shift the shift lever to P.  
(→P. 130)

STEP 4 Press the “ENGINE START STOP” switch and stop the engine.

STEP 5 Lock the door, making sure that you have the electronic key on your person.

Starting on a steep uphill

STEP 1 Firmly set the parking brake and shift the shift lever to D.

STEP 2 Gently depress the accelerator pedal.

STEP 3 Release the parking brake.
Driving in the rain

- Drive carefully when it is raining, because visibility will be reduced, the windows may become fogged-up, and the road will be slippery.
- Drive carefully when it starts to rain, because the road surface will be especially slippery.
- Refrain from high speeds when driving on an expressway in the rain, because there may be a layer of water between the tires and the road surface, preventing the steering and brakes from operating properly.

Breaking in your new Lexus

To extend the life of the vehicle, the following precautions are recommended to observe:

- For the first 200 miles (300 km):
  - Avoid sudden stops.

- For the first 600 miles (1000 km):
  - Do not drive at extremely high speeds.
  - Avoid sudden acceleration.
  - Do not drive continuously in the low gears.
  - Do not drive at a constant speed for extended periods.

Drum-in-disc type parking brake system

Your vehicle has a drum-in-disc type parking brake system. This type of brake system needs bedding-down of the brake shoes periodically or whenever the parking brake shoes and/or drum are replaced. Have your Lexus dealer perform the bedding down.

Operating your vehicle in a foreign country

Comply with the relevant vehicle registration laws and confirm the availability of the correct fuel. (→P. 494)
CAUTION

When starting the vehicle
Always keep your foot on the brake pedal while stopped with the engine running. This prevents the vehicle from creeping.

When driving the vehicle
- Do not drive if you are unfamiliar with the location of the brake and accelerator pedals to avoid depressing the wrong pedal.
  - Accidentally depressing the accelerator pedal instead of the brake pedal will result in sudden acceleration that may lead to an accident that could result in death or serious injury.
  - When backing up, you may twist your body around, leading to a difficulty in operating the pedals. Make sure to operate the pedals properly.
  - Make sure to keep a correct driving posture even when moving the vehicle only slightly, allowing you to depress the brake and accelerator pedals properly.
  - Depress the brake pedal using your right foot. Depressing the brake pedal using your left foot may delay response in an emergency, resulting in an accident.
- Do not drive the vehicle over or stop the vehicle near flammable materials.
- Do not let the vehicle roll backwards while the shift lever is in a driving position, or roll forward while the shift lever is in R. Doing so may cause the engine to stall or lead to poor brake and steering performance, resulting in an accident or damage to the vehicle.
- If the smell of exhaust is noticed inside the vehicle, open the windows and check that the trunk is closed. Large amounts of exhaust in the vehicle can cause driver drowsiness and an accident, resulting in death or a serious health hazard. Have the vehicle inspected by your Lexus dealer immediately.
- Do not under any circumstances shift the shift lever to P, R or N while the vehicle is moving. Doing so can cause significant damage to the transmission system and may result in a loss of vehicle control.
- Do not shift the shift lever to N while the vehicle is moving. Doing so may cause the engine brake to not operate properly and lead to an accident.
2-1. Driving procedures

\section*{CAUTION}

- Do not turn the engine off while driving.
  The power steering and brake booster systems will not operate properly if the engine is not running.

- Use engine braking (downshift) to maintain a safe speed when driving down a steep hill.
  Using the brakes continuously may cause the brakes to overheat and lose effectiveness. (→P.130)

- When stopped on an inclined surface, use the brake pedal and parking brake to prevent the vehicle from rolling backward or forward and causing an accident.

- Do not adjust the position of the steering wheel, the seat, or the inside or outside rear view mirrors while driving.
  Doing so may result in a loss of vehicle control that can cause accidents that may result in death or serious injury.

- Always check that all passengers’ arms, heads or other parts of their bodies are not outside the vehicle, as this may result in death or serious injury.

- Do not drive in excess of the speed limit. Even if the legal speed limit permits it, do not drive over 85 mph (140 km/h) unless your vehicle has high-speed capability tires. Driving over 85 mph (140 km/h) may result in tire failure, loss of control and possible injury. Be sure to consult a tire dealer to determine whether the tires on your vehicle are high-speed capability tires or not before driving at such speeds.

\section*{When driving on slippery road surfaces}

- Sudden braking, acceleration and steering may cause tire slippage and reduce your ability to control the vehicle, resulting in an accident.

- Sudden changes in engine speed, such as engine braking caused by up-shifting or down-shifting, may cause the vehicle to skid, resulting in an accident.

- After driving through a puddle, lightly depress the brake pedal to make sure that the brakes are functioning properly. Wet brake pads may prevent the brakes from functioning properly. If the brakes on only one side are wet and not functioning properly, steering control may be affected, resulting in an accident.

\section*{When shifting the shift lever}

Be careful not to shift the shift lever with the accelerator pedal depressed. This may lead to unexpected rapid acceleration of the vehicle that may cause an accident and result in death or serious injury.
CAUTION

■ When the vehicle is stopped
  ● Do not race the engine.
    If the vehicle is in any gear other than P or N the vehicle may accelerate suddenly and unexpectedly, and may cause an accident.
  ● Do not leave the vehicle with the engine running for a long time.
    If such a situation cannot be avoided, park the vehicle in an open space and check that exhaust fumes do not enter the vehicle interior.
  ● In order to prevent accidents due to the vehicle rolling away, always keep depressing the brake pedal while the engine is running, and apply the parking brake as necessary.
  ● If the vehicle is stopped on an incline, in order to prevent accidents caused by the vehicle rolling forward or backward, always depress the brake pedal and securely apply the parking brake as needed.
  ● Avoid revving or racing the engine.
    Running the engine at high speed while the vehicle is stopped may cause the exhaust system to overheat, which could result in a fire if combustible material is nearby.

■ When the vehicle is parked
  ● Do not leave glasses, cigarette lighters, spray cans, or soft drink cans in the vehicle when it is in the sun.
    Failure to do so may result in the following.
    • Gas may leak from a cigarette lighter or spray can, and may lead to a fire.
    • The temperature inside the vehicle may cause the plastic lenses and plastic material of eye glasses to deform or crack.
    • Soft drink cans may fracture, causing the contents to spray over the interior of the vehicle, and may also cause a short circuit in the vehicle’s electrical components.
Driving procedures

CAUTION

- Always apply the parking brake, shift the shift lever to P, stop the engine and lock the vehicle.
  Do not leave the vehicle unattended while the engine is running.
- Do not touch the exhaust pipe while the engine is running or immediately after turning the engine off.
  Doing so may cause burns.
- Do not leave the engine running in an area with snow build-up, or where it is snowing. If snowbanks build up around the vehicle while the engine is running, exhaust gases may collect and enter the vehicle. This may lead to death or a serious health hazard.

Exhaust gases

Exhaust gases include harmful carbon monoxide (CO) that is colorless and odorless. Inhaling exhaust gases may lead to death or a serious health hazard.

- If the vehicle is in a poorly ventilated area, stop the engine. In a closed area, such as a garage, exhaust gases may collect and enter the vehicle. This may lead to death or a serious health hazard.
- The exhaust should be checked occasionally. If there is a hole or crack caused by corrosion, damage to a joint or abnormal exhaust noise, be sure to have the vehicle inspected and repaired by your Lexus dealer. Failure to do so may allow exhaust gases to enter the vehicle, resulting in death or a serious health hazard.

When taking a nap in the vehicle

Always turn the engine off. Otherwise, you may accidentally move the shift lever or depress the accelerator pedal, which could cause an accident or fire due to engine overheating. Additionally, if the vehicle is parked in a poorly ventilated area, exhaust gases may collect and enter the vehicle, leading to death or a serious health hazard.

When braking the vehicle

- When the brakes are wet, drive more cautiously.
  Braking distance increases when the brakes are wet, and may cause one side of the vehicle to brake differently than the other side. Also the parking brake may not securely hold the vehicle.
### CAUTION

- If the power brake assist function does not operate, do not follow other vehicles closely and avoid downhill or sharp turns that require braking.
  
  In this case, braking is still possible, but it will require more force on the pedal than usual. Braking distance may also increase.

- Do not pump the brake pedal if the engine stalls.
  
  Each push on the brake pedal uses up the reserve for the power-assisted brakes.

- The brake system consists of 2 individual hydraulic systems: if one of the systems fails, the other will still operate. In this case, the brake pedal should be depressed more firmly than usual and braking distance becomes longer.
  
  Do not drive your vehicle with only a single brake system. Have your brakes fixed immediately.

### NOTICE

- **While driving the vehicle**
  
  - Do not depress the accelerator and brake pedals at the same time during driving.
    
    If the brake pedal is depressed while driving with the accelerator pedal depressed, driving torque may be restrained.

  - Do not use the accelerator pedal or depress the accelerator and brake pedals at the same time to hold the vehicle on a hill.

- **When parking the vehicle**
  
  Always put the shift lever in P. Failure to do so may cause the vehicle to move or the vehicle may accelerate suddenly if the accelerator pedal is accidentally depressed.

- **Avoiding damage to vehicle parts**
  
  - Do not turn the steering wheel fully in either direction and hold it there for a long time.
    
    Doing so may damage the power steering pump.

  - When driving over bumps in the road, drive as slowly as possible to avoid damaging the wheels, underside of the vehicle, etc.
### NOTICE

**If you hear a squealing or scraping noise (brake pad wear limit indicators)**

Have your Lexus dealer check and replace the brake pads as soon as possible. The rotor damage can result if the pads are not replaced when needed. It is dangerous to drive the vehicle when the wear limits of the brake pads and/or that of the brake discs are exceeded.

**If you get a flat tire while driving**

A flat or damaged tire may cause the following situations. Hold the steering wheel firmly and gradually press the brake pedal to slow down the vehicle.

- It may be difficult to control your vehicle.
- The vehicle will make abnormal sounds.
- The vehicle will behave abnormally.

Information on what to do in case of a flat tire. (→P. 470)

**When encountering flooded roads**

Do not drive on a road that has flooded after heavy rain etc. Doing so may cause the following serious damage to the vehicle.

- Engine stalling
- Short in electrical components
- Engine damage caused by water immersion

In the event that you drive on a flooded road and the vehicle is flooded, be sure to have your Lexus dealer check the following.

- Brake function
- Changes in quantity and quality of engine oil, transaxle fluid, etc.
- Lubricant condition for the bearings and suspension joints (where possible) and the function of all joints, bearings, etc.
Performing the following operations when carrying the electronic key on your person starts the engine or changes “ENGINE START STOP” switch modes.

**Starting the engine**

- **STEP 1** Check that the parking brake is set.
- **STEP 2** Check that the shift lever is set in P.
- **STEP 3** Sit in the driver’s seat and firmly depress the brake pedal. The “ENGINE START STOP” switch indicator turns green.

Press the “ENGINE START STOP” switch.

The engine can be started from any mode.
■ Changing “ENGINE START STOP” switch mode

Modes can be changed by pressing the “ENGINE START STOP” switch with the brake pedal released. (The mode changes each time the switch is pressed.)

1. OFF*
   Emergency flashers can be used.

2. ACCESSORY mode
   Some electrical components such as the audio system can be used.
   The “ENGINE START STOP” switch indicator turns amber.

3. IGNITION ON mode
   All electrical components can be used.
   The “ENGINE START STOP” switch indicator turns amber.

*: If the shift lever is in a position other than P when turning off the engine, the “ENGINE START STOP” switch will be turned to ACCESSORY mode, not to OFF.

■ If the engine does not start

The engine immobilizer system may not have been deactivated. (→P. 79)

■ When the “ENGINE START STOP” switch indicator flashes

The system may be malfunctioning. Have the vehicle inspected by your Lexus dealer immediately.
Auto power OFF function
If the vehicle is left in ACCESSORY mode for more than an hour with the shift lever in P, the “ENGINE START STOP” switch will automatically turn off.

Electronic key battery depletion
→ P. 32

When the electronic key battery is discharged
→ P. 411

Conditions affecting operation
→ P. 30

Note for the entry function
→ P. 33

CAUTION

When starting the engine
Always start the engine while sitting in the driver’s seat. Do not press the accelerator pedal while starting the engine under any circumstances. Doing so may cause an accident resulting in death or serious injury.

Stopping the engine in an emergency
If you want to stop the engine in an emergency while driving the vehicle, push and hold the “ENGINE START STOP” switch for more than 3 seconds or press it briefly for 3 times or more in succession. However, do not touch the “ENGINE START STOP” switch while driving except in an emergency. If the engine stops while the vehicle is being driven, this could lead to an unexpected accident.
<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| ■ To prevent battery discharge  
Do not leave the “ENGINE START STOP” switch in ACCESSORY or IGNITION ON mode for long periods without the engine running. |
| ■ When starting the engine  
● Do not race a cold engine.  
● If the engine becomes difficult to start or stalls frequently, have the engine checked immediately. |
Select a shift position appropriate for the driving conditions.

- **Shifting the shift lever**

While the “ENGINE START STOP” switch is in IGNITION ON mode, depress the brake pedal and move the shift lever.

- **Shift position uses**

2-1. Driving procedures

When driving

Changing shift ranges in S mode

Shift the shift lever to the S mode driving position and operate the shift lever.

1 Upshifting
2 Downshifting

The initial shift range in S mode is automatically set to 5 or 4 according to vehicle speed. However, the initial shift range may be set to 3 if AI-SHIFT has operated while the shift lever was in the D position. (→P.132)

Shift ranges and their functions

● Automatically selecting gears between 1 and 6 according to vehicle speed and driving conditions. However, the gear is limited according to selected shift range.

● You can choose from 6 levels of engine braking force.

● A lower shift range will provide greater engine braking force than a higher shift range, and the engine speed will also increase.

*1: Shifting to the D position allows the system to select a gear suitable for the driving conditions. Setting the shift lever to the D position is recommended for normal driving.

*2: Selecting shift ranges using S mode restricts the upper limit of the possible gear ranges, controls engine braking forces, and prevents unnecessary upshifting.
■ Downshifting restrictions warning buzzer (in the S mode)
  To help ensure safety and driving performance, downshifting operation may sometimes be restricted. In some circumstances, downshifting may not be possible even when the shift lever is operated. (The warning buzzer will sound twice.)

■ When driving with the cruise control system or dynamic radar cruise control system
  The engine brake will not operate in the S mode, even when downshifting to 5 or 4. (→P. 155, 158)

■ If the shift lever cannot be shifted from P
  →P. 479

■ If the S indicator does not come on even after shifting the shift lever to S mode driving position
  This may indicate a malfunction in the automatic transmission system. Have the vehicle inspected by your Lexus dealer immediately. (In this situation, the transmission will operate in the same as manner as when the shift lever is in D.)

■ S mode
  ● When the shift range is 5 or lower, holding the shift lever toward “+” sets the shift range to 6.
  ● To prevent excessive engine speed, a function was adopted that automatically selects a higher shift range before engine speed becomes too high.
  ● To protect the automatic transmission, a function is adopted that automatically selects a higher shift range when the fluid temperature is high.

■ AI-SHIFT
  AI-SHIFT automatically selects the suitable gear according to driver performance and driving conditions.
  AI-SHIFT automatically operates when the shift lever is in the D position. (Shifting the shift lever to the S mode driving position cancels the function.)
2-1. Driving procedures

Turn signal lever

1. Right turn
2. Left turn
3. Move and hold the lever part-way to signal a lane change
   The right hand signal will flash until you release the lever.
4. Move and hold the lever part-way to signal a lane change
   The left hand signal will flash until you release the lever.

- Turn signals can be operated when
  The “ENGINE START STOP” switch is in IGNITION ON mode.
- If the indicators flash faster than usual
  Check that a light bulb in the front or rear turn signal lights has not burned out.
2-1. Driving procedures
Parking brake

Sets the parking brake*
(Depressing the pedal again releases the parking brake.)
*: Fully depress the parking brake pedal with your left foot while depressing the brake pedal with your right foot.

- Usage in winter time
  See “Winter driving tips” for parking brake usage in winter time. (→P. 191)

- NOTICE

- Before driving
  Fully release the parking brake.
  Driving the vehicle with the parking brake set will lead to brake components overheating, which may affect braking performance and increase brake wear.
2-1. Driving procedures

Horn

To sound the horn, press on or close to the mark.
The units used on the speedometer and the tachometer gauge display may differ depending on the model/type.

The following gauges, meters and display illuminate when the “ENGINE START STOP” switch is in IGNITION ON mode.

1 Tachometer
   Displays the engine speed in revolutions per minute.

2 Multi-information display
   →P.142

3 Speedometer
   Displays the vehicle speed.

4 Odometer/trip meter and trip meter reset button
   Switches between odometer and trip meter displays. Pushing and holding the button will reset the trip meter when the trip meter is being displayed.

5 Fuel gauge
   Displays the quantity of fuel remaining in the tank.
When driving

**Instrument panel light control**

The brightness of the instrument panel lights can be adjusted.

1. Brighter
2. Darker

When the headlight switch is turned to ON, the brightness will be reduced slightly unless the control dial is turned fully up.

---

**NOTICE**

- **To prevent damage to the engine and its components**
  - Do not let the indicator needle of the tachometer enter the red zone, which indicates the maximum engine speed.
  - The engine may be overheating if the temperature gauge is in the red zone (H). In this case, immediately stop the vehicle in a safe place, and check the engine after it has cooled completely. (→P. 486)
The indicator and warning lights on the instrument cluster and center panel inform the driver of the status of the vehicle’s various systems.

- Instrument cluster

The units used on the speedometer and the tachometer gauge display may differ depending on the model/type.
Center panel (without navigation system)

Center panel (with navigation system)
## Indicators
The indicators inform the driver of the operating state of the vehicle’s various systems.

- **Turn signal indicator** (→P. 133)
- **Headlight high beam indicator** (→P. 148)
- **Headlight indicator** (→P. 147)
- **Tail light indicator** (→P. 147)
- **Front fog light indicator** (→P. 151)
- **Eco Driving Indicator Light** (→P. 146)
- **Cruise control indicator** (→P. 155, 158)
- **Cruise control “SET” indicator** (→P. 155, 158)
- **Radar cruise control indicator** (→P. 158)
- **AFS OFF indicator light** (if equipped) (→P. 148)
- **Slip indicator** (→P. 177)
- **VSC off indicator** (→P. 178)
- **SRS airbag on-off indicator** (without navigation system) (→P. 97)
- **SRS airbag on-off indicator** (with navigation system) (→P. 97)
- **Shift position and shift range indicators** (→P. 130)
Warning lights inform the driver of malfunctions or suspected problem in any of the vehicle's systems. (→P.445)

*: These lights turn on when the “ENGINE START STOP” switch is turned to IGNITION ON mode to indicate that a system check is being performed. They will turn off after the engine is started, or after a few seconds. There may be a malfunction in a system if a light does not come on, or if the lights do not turn off. Have the vehicle inspected by your Lexus dealer.

CAUTION

If a safety system warning light does not come on

Should a safety system light such as the ABS and SRS airbag warning lights not come on when you start the engine, this could mean that these systems are not available to help protect you in an accident, which could result in death or serious injury. Have the vehicle inspected by your Lexus dealer immediately if this occurs.
The multi-information display presents the driver with a variety of driving-related data, including the current outside air temperature.

- **Trip information**  (→P. 143)
  Displays driving range, fuel consumption and other cruising related information.

- **Intuitive parking assist display (if equipped)**  (→P. 171)
  Automatically displayed when using intuitive parking assist.

- **Dynamic radar cruise control display (if equipped)**  (→P. 158)
  Automatically displayed when using dynamic radar cruise control.

- **Warning messages**  (→P. 455)
  Automatically displayed when a malfunction occurs in one of the vehicle’s systems.
Trip information

- **Type A**
  Display items can be switched by pushing the “DISP” switch.

- **Type B**
  Display items can be switched by pushing the “DISP” switch.

- **Type C**
  Display items can be switched by pushing the “DISP” switch.
2-2. Instrument cluster

- **Outside temperature**
  Displays the outside air temperature.

  The temperature range that can be displayed in the following range.
  - USA: from -40 to 122 °F
  - Canada: from -40 to 50 °C

- **Driving range**
  Displays the estimated maximum distance that can be driven with the quantity of fuel remaining.

  - This distance is computed based on your average fuel consumption. As a result, the actual distance that can be driven may differ from that displayed.
  - When only a small amount of fuel is added to the tank, the display may not be updated.

- **Average fuel consumption**
  Displays the average fuel consumption since the function was reset.

  The function can be reset by pushing the “DISP” switch for longer than one second when the average fuel consumption is displayed.

- **Average fuel consumption after refueling**
  Displays the average fuel consumption since the vehicle was last refueled.

- **Current fuel consumption**
  Displays the current rate of fuel consumption.
■ Eco Driving Indicator Zone Display
→ P. 146

■ Eco Driving Indicator Light customization

Eco Driving Indicator Light can be deactivated. This customization can only be performed when the vehicle is stopped.

Eco Driving Indicator Light can be activated or deactivated by pressing the “DISP” switch for longer than 1 second when Eco Driving Indicator Light customization screen is displayed.

■ Average vehicle speed

Displays the average vehicle speed since the engine was started or the function was reset.

■ Elapsed time

Displays the elapsed time since the engine was started.

■ System check display

After switching the “ENGINE START STOP” switch to IGNITION ON mode, CHECK is displayed while system operation is checked. When the system check is complete, COMPLETED is displayed before returning to the normal screen.
■ Eco Driving Indicator

1 Eco Driving Indicator Light
   During Eco-friendly acceleration (Eco driving), Eco Driving Indicator Light will turn on.

2 Eco Driving Indicator Zone Display
   Suggests Zone of Eco driving with current Eco driving ratio based on acceleration.

3 Zone of Eco driving

4 Eco driving ratio based on acceleration
   Vehicle to exceed Zone of Eco driving, the right of Eco Driving Indicator Zone Display will blink and Eco Driving Indicator Light will turn off.

Eco Driving Indicator will operate when the vehicle is being driven with the shift lever in D.

■ Outside temperature display

In the following situations, the correct outside temperature may not be displayed, or the display may take longer than normal to change.

● When stopped, or driving at low speeds (less than 12 mph [20 km/h])
● When the outside temperature has changed suddenly (at the entrance/exit of a garage, tunnel, etc.)

■ NOTICE

■ The multi-information display at low temperatures

Allow the interior of the vehicle to warm up before using the liquid crystal information display. At extremely low temperatures, the information display monitor may respond slowly, and display changes may be delayed.
The headlights can be operated manually or automatically.

- **Daytime running lights turn on.**
- The side marker, parking, tail, license plate, daytime running lights and instrument panel lights turn on.
- **Headlights and all lights listed above (except daytime running lights) turn on.**
- **Headlights, parking lights and daytime running lights turn on and off automatically.**
  
  (When the “ENGINE START STOP” switch is in IGNITION ON mode)
## Turning on the high beam headlights

1. With the headlights on, push the lever forward to turn on the high beams.
2. Pull the lever back to the center position to turn the high beams off.
3. Pull the lever toward you to turn on the high beams.
   - Release to turn them off. You can flash the high beams with the headlights on or off.

### AFS (vehicles with discharge headlights)

AFS (Adaptive Front lighting System) improves visibility at intersections and on curves by automatically adjusting the direction of light axis of the headlights according to vehicle speed and the degree of the tire angle that are controlled by steering input.

Operates at speeds of 6 mph (10 km/h) or higher.

#### Deactivating AFS

Turn the switch OFF to deactivate AFS.
1. OFF
2. ON
2-3. Operating the lights and windshield wipers

■ Daytime running light system

- To make your vehicle more visible to other drivers, the headlights turn on automatically (at a reduced intensity) whenever the engine is started and the parking brake is released. Daytime running lights are not designed for use at night.
- Compared to turning on the headlights, the daytime running light system offers greater durability and consumes less electricity, so it can help improve fuel economy.

■ Headlight control sensor

The sensor may not function properly if an object is placed on the sensor, or anything that blocks the sensor is affixed to the windshield. Doing so interferes with the sensor detecting the level of ambient light and may cause the automatic headlight control system to malfunction.

■ Automatic light off system

- When the headlights come on: The headlights and tail lights turn off 30 seconds after all doors are closed with the “ENGINE START STOP” switch switched to ACCESSORY mode or turned OFF. (The light turns off immediately if the button on the key is pressed after all doors are locked.)
- When only the tail lights come on: The tail lights turn off automatically if the “ENGINE START STOP” switch is switched to ACCESSORY mode or turned OFF and driver’s door is opened.

To turn the lights on again, switch to IGNITION ON mode, or turn the light switch OFF once and then back to the or position.

■ Automatic headlight leveling system (vehicles with discharge headlights)

The level of the headlights is automatically adjusted according to the number of passengers and the loading condition of the vehicle to ensure that the headlights do not interfere with other road users.

■ If the indicator flashes... (vehicles with discharge headlights)

It may indicate a malfunction in the system. Contact your Lexus dealer.
2-3. Operating the lights and windshield wipers

■ Customization that can be configured at Lexus dealer
Settings (e.g. light sensor sensitivity) can be changed.  
(Customizable features → P. 517)

---

⚠️ NOTICE

■ To prevent battery discharge
Do not leave the lights on longer than necessary when the engine is not running.
The fog lights improve visibility in difficult driving conditions, such as in rain or fog. They can be turned on only when the headlights are on low beam.

1. To turn the front fog lights off
2. To turn the front fog lights on
With “AUTO” selected, the wipers will operate automatically when the sensor detects falling rain. The system automatically adjusts wiper timing in accordance with rain volume and vehicle speed.

1. Rain-sensing windshield wiper operation
2. Low speed windshield wiper operation
3. High speed windshield wiper operation
4. Temporary operation
5. Sensor sensitivity (high)
6. Sensor sensitivity (low)
2-3. Operating the lights and windshield wipers

■ The windshield wiper and washer can be operated when
The “ENGINE START STOP” switch is in IGNITION ON mode.

■ Raindrop sensor

• The sensor judges the amount of raindrops.

• If the temperature of the raindrop sensor is 194°F (90°C) or higher, or 5°F (-15°C) or lower, automatic operation may not occur. In this case, operate the wipers in any mode other than “AUTO”.

■ AUTO mode
If the wiper switch is turned to AUTO position while the “ENGINE START STOP” switch is in IGNITION ON mode, the wiper will operate once to show that AUTO mode is activated.

■ If no windshield washer fluid sprays
Check that the washer nozzles are not blocked if there is washer fluid in the windshield washer fluid reservoir.

7 Wash/wipe operation
Wipers operate automatically. (With “AUTO” selected, after operating several times, the wipers operate one more time after a short delay to prevent dripping.)
2-3. Operating the lights and windshield wipers

**CAUTION**

- **Caution regarding the use of windshield wipers in AUTO mode**
  The windshield wipers may operate unexpectedly if the sensor is touched or the windshield is subjected to vibration in AUTO mode. Take care that your fingers or anything else do not become caught in the windshield wipers.

**NOTICE**

- **When the windshield is dry**
  Do not use the wipers, as they may damage the windshield.

- **When there is no washer fluid spray from the nozzle**
  Damage to the washer fluid pump may be caused if the lever is pulled toward you and held continually.

- **When a nozzle becomes blocked**
  In this case, contact your Lexus dealer. Do not try to clear it with a pin or other object. The nozzle will be damaged.
Use the cruise control to maintain a set speed without using the accelerator.

**Set the vehicle speed**

1. **Turn the “ON-OFF” button ON.**
   
   Push the button once more to deactivate the cruise control.

2. **Accelerate or decelerate to the desired speed and press the lever down to set the cruise control speed.**

**Adjusting the speed setting**

1. **Increase speed**
2. **Decrease speed**

   Hold the lever until the desired speed setting is obtained.

*: If equipped
2-4. Using other driving systems

■ Fine adjustment of the set speed

Fine adjustment of the set speed (approximately 1.0 mph [1.6 km/h]) can be made by lightly pressing the lever up or down and releasing it.

■ Cruise control can be set when

- The shift lever is in the D or 4, 5, or 6 range of S.
- Vehicle speed is above approximately 25 mph (40 km/h).

■ Accelerating

The vehicle can be accelerated normally. After acceleration, the set speed resumes.

■ Automatic cruise control cancellation

The set speed is automatically cancelled in any of the following situations.

- Actual vehicle speed falls more than approximately 10 mph (16 km/h) below the preset vehicle speed. At this time, the memorized set speed is not retained.
- Actual vehicle speed is below approximately 25 mph (40 km/h).
- VSC is activated.

Canceling and resuming regular acceleration

1 Cancel

Pull the lever towards you to cancel cruise control. The speed setting is also canceled when the brakes are applied.

2 Resume

To resume cruise control and return to the set speed, push the lever up.
If the cruise control indicator light flashes

Turn the ON-OFF button off once, and then reactivate the system. If the cruise control speed cannot be set or if the cruise control cancels immediately after being activated, there may be a malfunction in the cruise control system. Have the vehicle inspected by your Lexus dealer.

### CAUTION

- **To avoid inadvertent cruise control activation**
  Keep the ON-OFF button off when not in use.

- **Situations unsuitable for cruise control**
  Do not use cruise control in any of the following situations. Doing so may result in control of the vehicle being lost and could cause an accident resulting in death or serious injury.
  - In heavy traffic
  - On roads with sharp bends
  - On winding roads
  - On slippery roads, such as those covered with rain, ice or snow
  - On steep hills
  - When towing a trailer or emergency towing
Dynamic radar cruise control supplements conventional cruise control with a vehicle-to-vehicle distance control. In vehicle-to-vehicle distance control mode, the vehicle automatically accelerates or decelerates in order to maintain a set following distance from vehicles ahead.

1. Indicators
2. Display
3. Set speed
4. Vehicle-to-vehicle distance button
5. Cruise control switch

■ Setting the vehicle speed (vehicle-to-vehicle distance control mode)

Press the “ON-OFF” button to activate the cruise control.

Press the button again to deactivate the cruise control.
Accelerate or decelerate the vehicle to the desired speed, and push the lever down to set the speed.

“SET” indicator will come on.

■ Adjusting the set speed

To change the set speed, operate the lever until the desired set speed is displayed.

1 Increases the speed
2 Decreases the speed

Fine adjustment: Momentarily move the lever in the desired direction.

Large adjustment: Hold the lever in the desired direction.

In the vehicle-to-vehicle distance control mode, the set speed will be increased or decreased as follows:

► When the set speed is shown in “MPH”

Fine adjustment: By approximately 5 mph (8 km/h) each time the lever is operated

Large adjustment: By approximately 5 mph (8 km/h) for each 0.75 seconds the lever is held

► When the set speed is shown in “km/h”

Fine adjustment: By approximately 3.1 mph (5 km/h) each time the lever is operated

Large adjustment: By approximately 3.1 mph (5 km/h) for each 0.75 seconds the lever is held
In the constant speed control mode (→P. 164), the set speed will be increased or decreased as follows:

Fine adjustment: By approximately 1 mph (1.6 km/h) each time the lever is operated

Large adjustment: The set speed can be increased or decreased continuously until the lever is released.

■ Changing the vehicle-to-vehicle distance

Pressing the button changes the vehicle-to-vehicle distance as follows:

1. Long
2. Medium
3. Short

The vehicle-to-vehicle distance is set automatically to long mode when the “ENGINE START STOP” switch is turned to IGNITION ON mode.

If a vehicle is running ahead of you, the preceding vehicle mark will also be displayed.
■ Canceling and resuming the speed control

1 Pulling the lever toward you cancels the cruise control.

   The speed setting is also canceled when the brakes are applied.

2 Pushing the lever up resumes the cruise control and returns vehicle speed to the set speed.

   Resuming is available when the vehicle speed is more than approximately 25 mph (40 km/h).
Driving in vehicle-to-vehicle distance control mode

This mode employs a sensor to detect the presence of vehicles up to approximately 400 ft. (120 m) ahead and to judge the distance between your vehicle and those the vehicle ahead of you.

Note that vehicle-to-vehicle distance will close in when traveling on long downhill slopes.

Example of constant speed cruising
When there are no vehicles ahead

The vehicle travels at the speed set by the driver. The desired vehicle-to-vehicle distance can also be set by operating the vehicle-to-vehicle distance control.

Example of deceleration cruising
When the vehicle ahead is driving slower than the set speed

When a vehicle is detected running ahead of you, the system automatically decelerates your vehicle. When a greater reduction in vehicle speed is necessary, the system applies the brakes. A warning tone warns you when the system cannot decelerate sufficiently to prevent your vehicle from closing in on the vehicle ahead.
Example of follow-up cruising
When following a vehicle driving slower than the set speed
The system continues follow-up cruising while adjusting for changes in the speed of the vehicle ahead in order to maintain the vehicle-to-vehicle distance set by the driver.

Example of acceleration
When there are no longer any vehicles ahead driving slower than the set speed
The system accelerates until the set speed is reached. The system then returns to constant speed cruising.

Approach warning
When your vehicle is too close to a vehicle ahead, and sufficient automatic deceleration via the cruise control is not possible, the display will flash and the buzzer will sound to alert the driver. An example of this would be if another driver cuts in front of you while you are following a vehicle. Apply the brakes to ensure an appropriate vehicle-to-vehicle distance.
Selecting conventional constant speed control mode

Dynamic radar cruise control can be used as conventional cruise control if you select constant speed control mode.

1. Press the “ON-OFF” button to activate the cruise control.
   Press the button again to deactivate the cruise control.

2. Vehicle-to-vehicle distance control mode is always reset when the “ENGINE START STOP” switch is turned to IGNITION ON mode.

Switch to constant speed control mode.
(Push the lever forward and hold for approximately one second.)

Constant speed control mode indicator will come on.

Adjusting the speed setting: → P. 159

Canceling and resuming the speed setting: → P. 161
■ **Dynamic radar cruise control can be set when**
  - The shift lever is in the D or range 4 or higher of S has been selected.
  - Vehicle speed is above approximately 30 mph (50 km/h).

■ **Switching modes**

  The mode cannot be switched to constant speed control mode if vehicle-to-vehicle distance control mode has been used. The mode also cannot be switched from constant speed control to vehicle-to-vehicle distance control mode. Turn the system off by pressing the “ON-OFF” button, and turn it on again.

■ **Accelerating**

  The vehicle can accelerate normally. After acceleration, the set speed resumes. However, during vehicle-to-vehicle distance control mode, the vehicle speed may decrease below the set speed in order to maintain the distance to the vehicle ahead.

■ **Automatic cancelation of vehicle-to-vehicle distance control**

  Vehicle-to-vehicle distance control driving is automatically canceled in the following situations:
  - Actual vehicle speed falls below approximately 25 mph (40 km/h).
  - VSC is activated.
  - The sensor cannot operate correctly because it is covered in some way.
  - The windshield wipers are operating at high speed.

  If vehicle-to-vehicle distance control driving is automatically canceled for any other reason, there may be a malfunction in the system. Contact your Lexus dealer.

■ **Automatic cancelation of constant speed control**

  The cruise control will stop maintaining the vehicle speed in the following situations:
  - Actual vehicle speed is more than approximately 10 mph (16 km/h) below the set vehicle speed.
    At this time, the memorized set speed is not retained.
  - Vehicle speed falls below approximately 25 mph (40 km/h).
  - VSC is activated.
Vehicle-to-vehicle distance settings

Select a distance from the table below. Note that the distances shown correspond to a vehicle speed of 50 mph (80 km/h). Vehicle-to-vehicle distance increases/decreases in accordance with vehicle speed.

<table>
<thead>
<tr>
<th>Distance options</th>
<th>Vehicle-to-vehicle distance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Long</td>
<td>Approximately 160 ft. (50 m)</td>
</tr>
<tr>
<td>Medium</td>
<td>Approximately 130 ft. (40 m)</td>
</tr>
<tr>
<td>Short</td>
<td>Approximately 100 ft. (30 m)</td>
</tr>
</tbody>
</table>

Radar sensor and grille cover

Always keep the sensor and grille cover clean to ensure that the vehicle-to-vehicle distance control operates properly. (Some obstructions, such as snow, ice and plastic objects, cannot be detected by the obstruction sensor.) Dynamic radar cruise control is canceled if an obstruction is detected.

1. Grille cover
2. Radar sensor
Warning lights, messages and buzzers for dynamic radar cruise control

Warning lights, messages and buzzers are used to indicate a system malfunction or to inform the driver of the need for caution while driving. (→P. 455)

Approach warning

In the following instances, there is a possibility that the warnings will not occur:

- When the speed of the vehicle ahead matches or exceeds your vehicle speed
- When the vehicle ahead is traveling at an extremely slow speed
- Immediately after the cruise control speed was set
- At the instant the accelerator is applied

Certification

For vehicles sold in U.S.A.

FCC ID: HYQDNMWR005

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions;

(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radio frequency radiation exposure Information:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter

For vehicles sold in Canada

Operation is subject to the following two conditions;

(1) This device may not cause interference, and
(2) This device must accept any interference, including interference that may cause undesired operation of the device.
CAUTION

■ Before using dynamic radar cruise control
Do not overly rely on vehicle-to-vehicle distance control. Be aware of the set speed. If automatic deceleration/acceleration is not appropriate, adjust the vehicle speed, as well as the distance between your vehicle and vehicles ahead by applying the brakes etc.

■ Cautions regarding the driving assist systems
Observe the following precautions. Failure to do so may cause an accident resulting in death or serious injury.

● Assisting the driver to measure following distance
The dynamic radar cruise control is only intended to help the driver in determining the following distance between the driver’s own vehicle and a designated vehicle traveling ahead. It is not a mechanism that allows careless or inattentive driving, and it is not a system that can assist the driver in low-visibility conditions. It is still necessary for driver to pay close attention to the vehicle’s surroundings.

● Assisting the driver to judge proper following distance
The dynamic radar cruise control determines whether the following distance between the driver’s own vehicle and a designated vehicle traveling ahead is appropriate or not. It is not capable of making any other type of judgement. Therefore, it is absolutely necessary for the driver to remain vigilant and to determine whether or not there is a possibility of danger in any given situation.

● Assisting the driver to operate the vehicle
The dynamic radar cruise control has no capability to prevent or avoid a collision with a vehicle traveling ahead. Therefore, if there is ever any danger, the driver must take immediate and direct control of the vehicle and act appropriately in order to ensure the safety of all involved.

■ To avoid inadvertent cruise control activation
Switch the cruise control off using the “ON-OFF” button when not in use.
CAUTION

- **Situations unsuitable for dynamic radar cruise control**
  Do not use dynamic radar cruise control in any of the following situations. Doing so may result in inappropriate speed control and could cause an accident resulting in death or serious injury.
  - In heavy traffic
  - On roads with sharp bends
  - On winding roads
  - On slippery roads, such as those covered with rain, ice and snow
  - On steep downhills, or where there are sudden changes between sharp up and down gradients
    - Vehicle speed may exceed the set speed when driving down a steep hill.
  - At entrances to expressways
  - When weather conditions are bad enough that they may prevent the sensors from functioning correctly (fog, snow, sandstorm, heavy rain, etc.)
  - When an approach warning buzzer is heard often
  - When your vehicle is towing a trailer or during emergency towing

- **When the sensor may not be correctly detecting the vehicle ahead**
  Apply the brakes as necessary when any of the following types of vehicles are in front of you.
  As the sensor may not be able to correctly detect these types of vehicles, the approach warning (→P. 163) will not be activated, and a fatal or serious accident may result.
  - Vehicles that cut in suddenly
  - Vehicles traveling at low speeds
  - Vehicles that are not moving
  - Vehicles with small rear ends (trailers with no load on board etc.)
  - Motorcycles traveling in the same lane
2-4. Using other driving systems

CAUTION

Conditions under which the vehicle-to-vehicle distance control may not function correctly

Apply the brakes as necessary in the following conditions as the radar sensor may not be able to correctly detect vehicles ahead, and a fatal or serious accident may result:

- When water or snow thrown up by the surrounding vehicles hinders the functioning of the sensor
- When your vehicle is pointing upwards (caused by a heavy load in the trunk etc.)
- When the road curves or when the lanes are narrow
- When steering wheel operation or your position in the lane is unstable
- When the vehicle ahead of you decelerates suddenly

Handling the radar sensor

Observe the following to ensure the cruise control system can function effectively. Otherwise, the system may not function correctly and could result in an accident.

- Keep the sensor and front grille cover clean at all times. Clean the sensor and front grille cover with a soft cloth so you do not mark or damage them.
- Do not subject the sensor or surrounding area to a strong impact. If the sensor moves even slightly off position, the system may malfunction. If the sensor or surrounding area is subject to a strong impact, always have the area inspected and adjusted by a Lexus dealer.
- Do not disassemble the sensor.
- Do not attach accessories or stickers to the sensor, grille cover or surrounding area.
- Do not modify or paint the sensor and grille cover.
- Do not replace them with non-genuine parts.
The distance to obstacles measured by the sensors is communicated via the multi-information display and a buzzer when parallel parking or maneuvering into a garage. Always check the surrounding area when using this system.

For vehicles equipped with a navigation system, refer to the separate “Navigation System Owner’s Manual” for further details.

- **Types of sensors**
  1. Front corner sensors
  2. Rear corner sensors
  3. Back sensors

- **Multi-information display (→ P. 142)**
  1. Front corner sensor operation
  2. Rear corner sensor operation
  3. Back sensor operation

*: If equipped
2-4. Using other driving systems

- Intuitive parking assist switch

  1. **ON/OFF**
     When ON, an indicator on the switch comes on to inform the driver that the function is operational.

- The display and buzzer system

  **Corner sensor operation display and distance to an obstacle**
  The system operates when the vehicle approaches within approximately 1.6 ft. (50 cm) of an obstacle.

  1. **Approximately 1.6 ft. (50 cm) to 1.2 ft. (37.5 cm) from the obstacle**
  2. **Approximately 1.2 ft. (37.5 cm) to 0.8 ft. (25 cm) from the obstacle**
  3. **Flashing: Within 0.8 ft. (25 cm) of the obstacle**
■ Back sensor operation display and distance to an obstacle
The system operates when the vehicle approaches within approximately 4.9 ft. (150 cm) of an obstacle.

1. Approximately 4.9 ft. (150 cm) to 2.0 ft. (60 cm) from the obstacle
2. Approximately 2.0 ft. (60 cm) to 1.5 ft. (45 cm) from the obstacle
3. Approximately 1.5 ft. (45 cm) to 1.2 ft. (35 cm) from the obstacle
4. Flashing: Within 1.2 ft. (35 cm) of the obstacle

■ Buzzer operation and distance to the obstacle
A buzzer sounds when the corner sensors and back sensor are operating.

● The buzzer beeps faster as the vehicle approaches an obstacle. When the vehicle comes within the following distance of the obstacle, the buzzer sounds continuously.
  • Corner sensors: Approximately 0.8 ft. (25 cm)
  • Back sensors: Approximately 1.2 ft. (35 cm)

● When two or more obstacles are detected simultaneously, the buzzer system responds to the nearest obstacle.

● If multiple obstacles are detected within 0.8 ft. (25 cm) in front and behind the vehicle at the same time, the warning buzzer will change in the following manner:
  • If a continuous beep is sounding, and a new obstacle is detected near a different area of the vehicle, the warning buzzer will sound 6 beeps then one continuous beep.
  • If a continuous beep is sounding, and a new obstacle is detected within 0.8 ft. (25 cm) of a different area of the vehicle, the warning buzzer will sound 2 beeps then one continuous beep.
Detection range of the sensors

1. Approximately 1.6 ft. (50 cm)
2. Approximately 4.9 ft. (150 cm)
3. Approximately 1.6 ft. (50 cm)

The diagram shows the detection range of the sensors. Note that the sensors cannot detect obstacles that are extremely close to the vehicle.

The range of the sensors may change depending on the shape of the object etc.
Sensor detection information

- Certain vehicle conditions and the surrounding environment may affect the ability of the sensor to correctly detect obstacles. Particular instances where this may occur are listed below.
  - There is dirt, snow or ice on the sensor.
  - The sensor is frozen.
  - The sensor is covered in any way.
  - The vehicle is leaning considerably to one side.
  - On an extremely bumpy road, on an incline, on gravel, or on grass
  - The vicinity of the vehicle is noisy due to vehicle horns, motorcycle engines, air brakes of large vehicles, or other loud noises producing ultrasonic waves.
  - There is another vehicle equipped with parking assist sensors in the vicinity.
  - The sensor is coated with a sheet of spray or heavy rain
  - The vehicle is equipped with a fender pole or wireless antenna.
  - Towing eyelets are installed.
  - The bumper or sensor receives a strong impact.
  - The vehicle is approaching a tall or curved curb.
  - In harsh sunlight or intense cold weather

In addition to the examples above, there are instances in which, because of their shapes, signs and other objects may be judged by the sensor to be closer than they are.

- The shape of the obstacle may prevent the sensor from detecting it. Pay particular attention to the following obstacles.
  - Wires, fences, ropes etc.
  - Cotton, snow and other materials that absorb radio waves
  - Sharply-angled objects
  - Low obstacles
  - Tall obstacles with upper sections projecting outwards in the direction of your vehicle
■ When the display flashes and a message is displayed
  → P. 455

■ Certification
  ▶ For vehicles sold in U.S.A.
  This device complies with Part 15 of the FCC Rules.
  Operation is subject to the following two conditions: (1) This device may not cause
  harmful interference, and (2) this device must accept any interference received,
  including interference that may cause undesired operation.
  ▶ For vehicles sold in Canada
  This ISM device complies with Canadian ICES-001.
  Cet appareil ISM est conforme à la norme NMB-001 du Canada.

■ Customization that can be configured at Lexus dealer
  Settings (e.g. buzzer volume) can be changed. (Customizable features → P. 517)

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| ■ Caution when using the intuitive parking assist
  Observe the following precautions.
  Failing to do so may result in the vehicle being unable to be driven safely and possibly cause an accident.
  ● Do not use the sensor at speeds in excess of 6 mph (10 km/h).
  ● Do not attach any accessories within the sensor range. |

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| ■ Notes when washing the vehicle
  Do not apply intensive bursts of water or steam to the sensor area.
  Doing so may result in the sensor malfunctioning. |
To help enhance driving safety and performance, the following systems operate automatically in response to various driving situations. Be aware, however, that these systems are supplementary and should not be relied upon too heavily when operating the vehicle.

■ ABS (Anti-lock Brake System)
  Helps to prevent wheel lock when the brakes are applied suddenly, or if the brakes are applied while driving on a slippery road surface.

■ Brake assist
  Generates an increased level of braking force after the brake pedal is depressed, when the system detects a panic stop situation.

■ VSC (Vehicle Stability Control)
  Helps the driver to control skidding when swerving suddenly or turning on slippery road surfaces.

■ TRAC (Traction Control)
  Maintains drive power and prevents the front wheels from spinning when starting the vehicle or accelerating on slippery roads.

■ PCS (Pre-Collision System) (if equipped)
  →P. 182

When the VSC/TRAC systems are operating

If the vehicle is in danger of slipping, or if the front wheels spin, the slip indicator light flashes to indicate that the VSC/TRAC systems have been engaged.
### Disabling the TRAC/VSC systems

If the vehicle gets stuck in fresh snow or mud, the TRAC/VSC systems may reduce power from the engine to the wheels. You may need to turn the system off to enable you to rock the vehicle in order to free it.

■ **Turning off the TRAC system only**

To turn the TRAC system off, quickly press and release the button.

A message will be shown on the multi-information display.

Press the button again to turn the system back on.

■ **Turning off both TRAC and VSC systems**

To turn the TRAC and VSC systems off, press and hold the button for more than 3 seconds while the vehicle is stopped.

A message will be shown on the multi-information display and VSC off indicator light will come on.

Press the button again to turn the systems back on.
Sounds and vibrations caused by the ABS, brake assist, VSC and TRAC systems

- A sound may be heard from the engine compartment when the engine is started or just after the vehicle begins to move. This sound does not indicate that a malfunction has occurred in any of these systems.

- Any of the following conditions may occur when the above systems are operating. None of these indicates that a malfunction has occurred.
  - Vibrations may be felt through the vehicle body and steering.
  - A motor sound may be heard after the vehicle comes to a stop.
  - The brake pedal may pulsate slightly after the ABS is activated.
  - The brake pedal may move down slightly after the ABS is activated.

Reactivation of the TRAC/VSC systems after turning off the engine

Turning off the engine after turning off the TRAC/VSC systems will automatically reactivate them.

Reactivation of the TRAC system linked to vehicle speed

When only the TRAC system is turned off, the TRAC system will turn on when vehicle speed increases. However, when both TRAC and VSC systems are turned off, the systems will not turn on even when vehicle speed increases.

If the slip indicator comes on

It may indicate a malfunction in the VSC and TRAC function. Contact your Lexus dealer.
**CAUTION**

Any of the following conditions may result in an accident which could cause death or serious injury:

- **The ABS does not operate effectively when**
  - The limits of tire gripping performance have been exceeded.
  - The vehicle hydroplanes while driving at high speed on the wet or slick road.

- **Stopping distance when the ABS is operating will exceed that of normal conditions**
  The ABS is not designed to shorten the vehicle’s stopping distance. Always maintain a safe distance from the vehicle in front of you in the following situations.
  - When driving on dirt, gravel or snow-covered roads
  - When driving with tire chains
  - When driving over bumps in the road
  - When driving over roads with potholes or roads with uneven roads

- **TRAC may not operate effectively when**
  Directional control and power may not be achievable while driving on slippery road surfaces, even if the TRAC system is operating.
  Do not drive the vehicle in conditions where stability and power may be lost.
### CAUTION

- **When the slip indicator flashes**
  
  This situation occurs immediately while VSC is activated. Always drive carefully. Reckless driving may cause an accident. Exercise particular care when the indicator light flashes.

- **When the TRAC/VSC systems are turned off**
  
  Be especially careful and drive at a speed appropriate to the road conditions. As these are the systems to help enhance vehicle stability and driving force, do not turn the TRAC/VSC systems off unless necessary.

- **Replacing tires**
  
  Make sure that all tires are of the same size, brand, tread pattern and total load capacity. In addition, make sure that the tires are inflated to the recommended tire pressure level.

  The ABS and VSC systems will not function correctly if different tires are fitted on the vehicle.

  Contact your Lexus dealer for further information when replacing tires or wheels.
2-4. Using other driving systems

PCS (Pre-Collision System)*

When the radar sensor detects possibility of a frontal collision, the pre-collision system such as the brake assist and seat belts are automatically engaged to lessen impact and injuries to occupants as well as vehicle damage.

- **Pre-collision seat belts**
  If the pre-collision sensor detects that a collision is unavoidable, the pre-collision system will retract the seat belt before the collision occurs. The same will happen if the driver makes an emergency braking or loses control of the vehicle. (→ P. 58)
  However, when the VSC systems are disabled, the system will not operate in the event of skidding.

- **Pre-collision brake assist**
  When there is a high possibility of a frontal collision, the system applies greater braking force in relation to how strongly the brake pedal is depressed.

---

**Radar sensor**

Detects vehicles or other obstacles on or near the road ahead and determines whether a collision is imminent based on the position, speed, and heading of the obstacles.

1. Grille cover
2. Radar sensor

*: If equipped
■ Obstacles not detected

The sensor cannot detect plastic obstacles such as pylons. There may also be occasions when the sensor cannot detect pedestrians, animals, bicycles, motorcycles, trees, or snowdrifts.

■ The pre-collision system is operational when

● Pre-collision seat belt (type A)
  • Vehicle speed is above 4 mph (5 km/h).
  • The speed at which your vehicle is approaching the obstacle or oncoming vehicle exceeds 19 mph (30 km/h).
  • The front occupants are wearing a seat belt.

● Pre-collision seat belts (type B)
  • Vehicle speed is above 19 mph (30 km/h).
  • The system detects sudden braking or skidding.
  • The front occupants are wearing a seat belt.

● Pre-collision brake assist
  • Vehicle speed is above 19 mph (30 km/h).
  • The speed at which your vehicle is approaching the obstacle or the vehicle is greater than about 19 mph (30 km/h).
  • The brake pedal is depressed.

■ Conditions that may trigger the system even if there is no possibility of collision

● When there is an object by the roadside at the entrance to a curve

● When passing an oncoming vehicle on a curve

● When driving over a narrow iron bridge

● When there is a metal object on the road surface

● When there is a metal plate in the road in front of the vehicle on a downhill slope

● When there is a metal object such as a sign board in front of the vehicle on an uphill slope

● When driving on an uneven road surface

● When passing an oncoming vehicle on a left-turn

● When your vehicle rapidly closes on the vehicle in front

● When a grade separation/interchange, sign, billboard, or other structure appears to be directly in the vehicle’s line of travel.
- When climbing a steep hill causes an overhead billboard or other metallic structure to appear directly in the vehicle’s line of travel.
- When an extreme change in vehicle height occurs
- When the axis of the radar is out of adjustment
- When passing through certain toll gates

When the system is activated in the situations described above there is also a possibility that the seat belts will retract quickly and the brakes will be applied with a force greater than normal. When the seat belt is locked in the retracted position, stop the vehicle in a safe place, release the seat belt and refasten.

■ Situations in which the pre-collision system does not function properly

The system may not function effectively in situations such as the following:
- On roads with sharp bends or uneven surfaces
- On slippery roads such as those covered with ice or snow
- If a vehicle suddenly moves in front of your vehicle, such as at an intersection
- If a vehicle suddenly cuts in front of your vehicle, such as when overtaking
- In inclement weather such as heavy rain, fog, snow or sand storms

■ Automatic cancelation of the pre-collision system

When a malfunction occurs due to sensor contamination, etc. that results in the sensors being unable to detect obstacles, the pre-collision system will be automatically disabled. In this case, the system will not activate even if there is a collision possibility.

■ When there is a malfunction in the system

Warning lights and/or warning messages will turn on or flash. (→ P. 445, 455)
Certification

For vehicles sold in U.S.A.

FCC ID: HYQDNMWR005

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions;

(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radio frequency radiation exposure Information:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter

For vehicles sold in Canada

Operation is subject to the following two conditions;

(1) This device may not cause interference, and
(2) This device must accept any interference, including interference that may cause undesired operation of the device.
CAUTION

- Handling the radar sensor
  Observe the following to ensure the pre-collision system can function effectively.
  - Keep the sensor and front grille clean at all times.
    Clean the sensor and front grille with a soft cloth so you do not mark or damage them.
  - Do not subject the sensor or surrounding area to a strong impact.
    If the sensor moves even slightly off position, the system may malfunction. If the sensor or surrounding area are subject to a strong impact, always have the area inspected and adjusted by a Lexus dealer.
  - Do not disassemble the sensor.
  - Do not attach accessories or stickers to the sensor, grille guard or surrounding area.
  - Do not modify or paint the sensor and grille cover.

- Limitations of the pre-collision system
  Do not rely on the pre-collision system. Always drive safely, taking care to observe your surroundings and checking for any obstacles or other road hazards.
Take notice of the following information about storage precautions, cargo capacity and load.

- Stow cargo and luggage in the trunk whenever possible. Be sure all items are secured in place.
- Be careful to keep the vehicle level. Placing the weight as far forward as possible helps maintain vehicle balance.
- For better fuel economy, do not carry unnecessary weight.

## Capacity and distribution

Cargo capacity depends on the total weight of the occupants.

\[
\text{(Cargo capacity)} = (\text{Total load capacity}) - (\text{Total weight of occupants})
\]

### Steps for Determining Correct Load Limit

1. Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs.” on your vehicle's placard.
2. Determine the combined weight of the driver and passengers that will be riding in your vehicle.
3. Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.
4. The resulting figure equals the available amount of cargo and luggage load capacity.
   
   For example, if the “XXX” amount equals 1400 lbs. and there will be five 150 lb passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs. \((1400 - 750 (5 \times 150) = 650 \text{ lbs.})\)
5. Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in Step 4.
(6) If your vehicle will be towing a trailer, load from your trailer will be transferred to your vehicle. Consult this manual to determine how this reduces the available cargo and luggage load capacity of your vehicle.

(→P. 197)

**Example on your vehicle**

![Diagram showing cargo capacity and total load capacity]

1. Cargo capacity
2. Total load capacity

When 2 people with the combined weight of 366 lb. (166 kg) are riding in your vehicle, which has a total load capacity of 900 lb. (410 kg), the available amount of cargo and luggage load capacity will be as follows:

900 lb. – 366 lb. = 534 lb. (410 kg – 166 kg = 244 kg)

In this condition, if 3 more passengers with the combined weight of 388 lb. (176 kg) get on, the available cargo and luggage load will be reduced as follows:

534 lb. – 388 lb. = 146 lb. (244 kg – 176 kg = 68 kg)

As shown in the above example, if the number of occupants increases, the cargo and luggage load equaling the combined weight of the occupants who got on later, by an amount. In other words, if an increase in the number of occupants causes an excess of the total load capacity (combined weight of occupants plus cargo and luggage load), you must reduce the cargo and luggage on your vehicle. (→P. 190)
CAUTION

Storage precautions

Observe the following precautions. Failing to do so may result in death or serious injury.

- Do not place cargo or luggage in or on the following locations as the item may get under the brake or accelerator pedal and prevent the pedals from being depressed properly, block the driver’s vision, or hit the driver or passengers, causing an accident.
  - Driver’s feet
  - Front passenger or rear seats (when stacking items)
  - Package tray
  - Instrument panel
  - Dashboard

- Secure all items in the occupant compartment, as they may shift and injure someone during sudden braking, sudden swerving or an accident.

Capacity and distribution

- Do not exceed the maximum axle weight rating or the total vehicle weight rating.
- Even if the total load of occupant’s weight and the cargo load is less than the total load capacity, do not apply the load unevenly. Improper loading may cause deterioration of steering or braking control which may cause death or serious injury.
Vehicle load limits include total load capacity, seating capacity, towing capacity and cargo capacity.

- **Total load capacity:** 900 lb. (410 kg)
  Total load capacity means the combined weight of occupants, cargo and luggage.

- **Seating capacity:** 5 occupants (Front 2, Rear 3)
  Seating capacity means the maximum number of occupants whose estimated average weight is 150 lb. (68 kg) per person.

- **Towing capacity:** 1000 lb. (450 kg)

- **Cargo capacity**
  Cargo capacity may increase or decrease depending on the weight and the number of occupants.

---

**Total load capacity and seating capacity**

These details are also described on the tire and loading information label. (→P. 403)

---

⚠️ **CAUTION**

- **Overloading the vehicle**
  Do not overload the vehicle.
  It may not only cause damage to the tires, but also degrade steering and braking ability, resulting in an accident.
Winter driving tips

Carry out the necessary preparations and inspections before driving the vehicle in winter. Always drive the vehicle in a manner appropriate to the prevailing weather conditions.

**Pre-winter preparations**

- Use fluids that are appropriate to the prevailing outside temperatures.
  - Engine oil
  - Engine coolant
  - Washer fluid

- Have a service technician inspect the level and specific gravity of battery electrolyte.

- Have the vehicle fitted with four snow tires or purchase a set of tire chains for the front tires.
  
  Ensure that all tires are the same size and brand, and that chains match the size of the tires.

- Tire inflation pressure falls in winter as the outside temperature falls. Add 2.9 to 4.3 psi (20 to 30 kPa, 0.2 to 0.3 kgf/cm² or bar) to the standard tire inflation pressure.
Before driving the vehicle
Perform the following according to the driving conditions.

- Do not try to forcibly open a window or move a wiper that is frozen. Pour warm water over the frozen area to melt the ice. Wipe away the water immediately to prevent it from freezing.

- To ensure proper operation of the climate control system fan, remove any snow that has accumulated on the air inlet vents in front of the windshield.

- Remove any ice that has accumulated on the vehicle chassis.

- Periodically check for and remove any excess ice or snow that may have accumulated in the wheel well or on the brakes.

When driving the vehicle
Accelerate the vehicle slowly and drive at a reduced speed suitable to road conditions.

When parking the vehicle
Park the vehicle and move the shift lever to P without setting the parking brake. The parking brake may freeze up, preventing it from being released. If necessary, block the wheels to prevent inadvertent sliding or creeping.
Selecting snow chains

Use the correct snow chain size when mounting the snow chains. Chain size is regulated for each tire sizes.

Side chain
1. 0.12 in. [3 mm] in diameter
2. 1.18 in. [30 mm] in length
3. 0.39 in. [10 mm] in width

Cross chain
4. 0.16 in. [4 mm] in diameter
5. 0.98 in. [25 mm] in length
6. 0.55 in. [14 mm] in width

Regulations on the use of snow chains

- Regulations regarding the use of tire chains vary according to location and type of road. Always check local regulations before installing chains.
- Install the chains on the front tires.
- Retighten the chains after driving 1/4 - 1/2 mile (0.5 - 1.0 km).
**Shifting the windshield wiper position**

You can shift the wipers to the rest position manually. (In heavy snow or icy condition etc.)

Grip the hook section of the wiper arm firmly when shifting the wiper position.

► **To rest position**

Raise the wiper in line with the windshield.

You can stand the wipers up for the rest position.

*: More than 3.9 in. (10 cm)

► **To retract position**

Lower the wipers by pressing on the upper part of the hook section.
Snow chain installation

Observe the following precautions when installing and removing chains.

- Install and remove tire chains in a safe location.
- Install tire chains on the front tires only. Do not install tire chains on rear tires.
- Install the tire chains on front tires as tightly as possible. Retighten chains after driving 1/4 - 1/2 mile (0.5 - 1.0 km).
- Install tire chains following the instructions provided in the accompanying instructions.

Driving with snow tires

Observe the following precautions to reduce the risk of accidents. Failing to do so may result in a loss of vehicle control and cause death or serious injury.

- Use tires of the size specified for your vehicle.
- Maintain the recommended level of air pressure.
- Do not drive in excess of 75 mph (120 km/h), regardless of the type of snow tires being used.
- Use snow tires on all, not just some wheels.

Driving with snow chains

Observe the following precautions to reduce the risk of accidents. Failing to do so may result in the vehicle being unable to be driven safely, and may cause death or serious injury.

- Do not drive in excess of the speed limit specified for the tire chains being used, or 30 mph (50 km/h), whichever is lower.
- Avoid driving on bumpy road surfaces or over potholes.
- Avoid sudden turns and braking, as use of chains may adversely affect vehicle handling.
- Slow down sufficiently before entering a curve to ensure that vehicle control is maintained.
<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| ■ Repairing or replacing snow tires  
Request repairs of and obtain replacement snow tires from Lexus dealers or legitimate tire retailers.  
This is because the removal and attachment of snow tires affects the operation of the tire pressure warning valves and transmitters. |
| ■ Fitting tire chains  
The tire pressure warning valves and transmitters may not function correctly when tire chains are fitted. |
Your vehicle is designed primarily as a passenger-carrying vehicle, thus towing a trailer will have an adverse effect on handling, performance, braking, durability, and fuel consumption. For your safety and the safety of others, do not overload the vehicle or trailer.

Lexus warranties do not apply to damage or malfunction caused by towing a trailer for commercial purposes

- **Weight limits**
  Confirm the total trailer weight, gross vehicle weight, gross axle weight and trailer tongue load are all within the limits.

- **Gross vehicle weight**
  The gross vehicle weight must not exceed the Gross Vehicle Weight Rating (GVWR) indicated on the Certification Label. The gross vehicle weight is the sum weight of the unloaded vehicle, driver, passengers, luggage, hitch and trailer tongue load. Also included is the weight of any special equipment installed on your vehicle.

- **Gross axle weight**
  The load on either the front or rear axle resulting from distribution of the gross vehicle weight on both axles must not exceed the Gross Axle Weight Rating (GAWR) listed on the Certification Label.
■ Trailer tongue load

The trailer cargo load should be distributed so that the tongue load is 9 to 11% of the total trailer weight, not exceeding the maximum 100 lb. (45 kg). (Tongue load / Total trailer weight x 100 = 9 to 11%)

The total trailer weight and tongue load can be measured with platform scales found at a highway weighing stations, building supply company, trucking company, junk yards, etc.

1. Total trailer weight
2. Tongue load

Towing a trailer

Consult your Lexus dealer for further information on additional requirements such as a towing kit, etc.
Before towing

- Ensure that your vehicle’s tires are properly inflated. (→ P. 403)
- Trailer tires should be inflated according to the trailer manufacturer’s recommendation.
- All trailer lights work to be legal.
- Confirm all lights work each time you connect them.
- Check that your vehicle remains level when a loaded or unloaded trailer is hitched. Do not drive if the vehicle is not level, and check for improper tongue load, overloading, worn suspension, or other possible causes.
- Make sure the trailer cargo is securely loaded.
- Check that your rear view mirrors conform to any federal, state/provincial or local regulations. If they do not, install rear view mirrors appropriate for towing purposes.

Break-in schedule

Lexus recommends that you do not use a new vehicle or a vehicle with any new power train components (engine, transmission, differential, wheel bearings, etc.) to tow a trailer for the first 500 miles (800 km) of driving.

Maintenance

- If you tow a trailer, your vehicle will require more frequent maintenance due to the additional load. (See “Warranty and Services Guide/Owner’s Manual Supplement/ Scheduled Maintenance”.)
- Retighten the fixing bolts of the towing ball and bracket after approximately 600 miles (1000 km) of trailer towing.

CAUTION

To avoid accident or injury

- The total trailer weight (trailer weight plus the weight of cargo) must not exceed 1000 lb. (450 kg).
- Do not exceed the trailer hitch assembly weight, gross vehicle weight, gross axle weight and trailer tongue load capacities.
- Never load more weight in the back than in the front of the trailer. About 60% of the load should be in the front half of the trailer, and the remaining 40% in the rear.
CAUTION

■ Hitches

Trailer hitch assemblies have different weight capacities established by the hitch manufacturer. Even though the vehicle may be physically capable of towing a higher weight, the operator must never exceed the maximum weight rating specified for the trailer hitch.

● If you wish to install a trailer hitch, your Lexus dealer should be consulted.
● Use only a hitch that conforms to the total trailer weight requirement.
● Follow the directions supplied by the hitch manufacturer.
● Lubricate the hitch ball with a light coat of grease.
● Remove the trailer hitch whenever you are not towing a trailer. After removing the hitch, seal any mounting holes in the vehicle body to prevent entry of any substances into the vehicle.

■ When towing a trailer

● Never tap into your vehicle’s hydraulic system, as this will lower the vehicle’s braking effectiveness.
● Never tow a trailer without using a safety chain securely attached to both the trailer and the vehicle. If damage occurs to the coupling unit or hitch ball, there is danger of the trailer wandering into another lane.
● Do not use cruise control/dynamic radar cruise control. Doing so may result in inappropriate control of speed and could cause serious or fatal accident.

NOTICE

■ When installing a trailer hitch

● Use only the position recommended by your Lexus dealer. Do not install the trailer hitch on the bumper; this may cause body damage.
● Do not use axle-mounted hitches, as they can cause damage to the axle housing, wheel bearings, wheels or tires.

■ Brakes

Lexus recommends trailers with brakes that conform to any applicable federal and state/provincial regulations.
When driving

2-5. Driving information

NOTICE

■ Safety chain
A safety chain must always be used between the towing vehicle and the trailer. Leave sufficient slack in the chain for turns. The chain should cross under the trailer tongue to prevent the tongue from dropping to the ground in the case that it becomes damaged or separated. For the correct safety chain installation procedure, ask your Lexus dealer.

■ Do not directly splice trailer lights
Directly splicing may damage your vehicle’s electrical system and cause a malfunction.

Trailer towing tips

Your vehicle will handle differently when towing a trailer. In order to avoid accident, death or serious injury, keep the following in mind when towing:

● Before starting out, check the trailer’s lights and the vehicle-trailer connections. Recheck after driving a short distance.

● Practice turning, stopping and reversing with the trailer attached in an area away from traffic until you become accustomed to the feel of the vehicle.

● Reversing with a trailer attached is difficult and requires practice. Grip the bottom of the steering wheel and move your hand to the left to move the trailer to the left. Move your hand to the right to move the trailer to the right. (This is generally opposite to reversing without a trailer attached.) Avoid sharp or prolonged turning. Have someone guide you when reversing to reduce the risk of an accident.

● As stopping distance is increased when towing a trailer, vehicle-to-vehicle distance should be increased. For each 10 mph (16 km/h) of speed, allow at least one vehicle and trailer length.
Avoid sudden braking as you may skid, resulting in jackknifing and loss of control. This is especially true on wet or slippery surfaces.

Avoid jerky starts or sudden acceleration.

Avoid jerky steering and sharp turns, and slow down before making a turn.

Note that when making a turn, the trailer wheels will be closer than the vehicle wheels to the inside of the turn. Compensate by making a larger than normal turning radius.

Crosswinds and rough roads will adversely affect handling of your vehicle and trailer, causing sway. Periodically check the rear to prepare for being passed by large trucks or buses, which may cause your vehicle and trailer to sway. If swaying occurs, firmly grip the steering wheel, reduce speed immediately but gradually, and steer straight ahead. Never increase speed. If you make no extreme correction with the steering or brakes, your vehicle and trailer will stabilize.

Take care when passing other vehicles. Passing requires considerable distance. After passing a vehicle, do not forget the length of your trailer, and be sure you have plenty of room before changing lanes.

In order to maintain efficient engine braking and electrical charging performance, do not use overdrive. Transmission shift range position must be in 4, in the S mode.

Due to the added load of the trailer, your vehicle’s engine may overheat on hot days (at temperatures over 85°F [30°C]) when driving up a long or steep grade. If the engine coolant temperature gauge indicates overheating, immediately turn off the air conditioning (if in use), pull your vehicle off the road and stop in a safe spot. See “If you vehicle overheats” (→ P. 486)
● Always place wheel blocks under both the vehicle and the trailer wheels when parking. Apply the parking brake firmly, and put the transmission in P. Avoid parking on a slope, but if unavoidable, do so only after performing the following:

**STEP 1** Apply the brakes and keep them applied.
**STEP 2** Have someone place wheel blocks under both the vehicle and trailer wheels.
**STEP 3** When the wheel blocks are in place, release the brakes slowly until the blocks absorb the load.
**STEP 4** Apply the parking brake firmly.
**STEP 5** Shift into P and turn off the engine.

● When restarting after parking on a slope:

**STEP 1** With the transmission in the P position, start the engine. Be sure to keep the brake pedal pressed.
**STEP 2** Shift into 3, 2, 1, or the R position (if reversing).
**STEP 3** Release the parking brake and brake pedal, and slowly pull or back away from the wheel blocks. Stop and apply the brakes.
**STEP 4** Have someone retrieve the blocks.

⚠ CAUTION

■ To avoid an accident

● Do not exceed 45 mph (72 km/h) or posted towing speed limit, whichever is lower. As instability (swaying) of the towing vehicle-trailer combination increases as speed increases, exceeding 45 mph (72 km/h) may cause loss of control.

● Slow down and downshift before descending steep or long downhill grades. Do not make sudden downshifts.

● Avoid holding the brake pedal down too long or too frequently. This could cause the brakes to overheat and result in reduced braking efficiency.
Your vehicle is not designed to be dinghy towed (with 4 wheels on the ground) behind a motor home.

⚠️ NOTICE

- To avoid serious damage to your vehicle
  Do not tow your vehicle with four wheels on the ground.
When driving

3-1. Using the air conditioning system and defogger

Automatic air conditioning system

Airflow and outlets are automatically adjusted according to the temperature setting.

➡ With navigation system

Owners of models equipped with a navigation system should refer to the “Navigation System Owner’s Manual”.

➡ Without navigation system

![Diagram of air conditioning system controls]

**Using the automatic mode**

**STEP 1** Press \[\text{AUTO} \]

➡ The air conditioning system will begin to operate. Air outlets and fan speed are automatically adjusted according to the temperature setting.

**STEP 2** Press \[\text{AUTO} \] to switch to automatic mode.

➡ Automatically switches between outside air and recirculated air modes.
STEP 3  Press “∧” to increase the temperature and “∨” to decrease the temperature on the TEMP.

The temperature for the driver and passenger seats can be set separately.

Adjusting the settings

■ Adjusting the temperature setting
Press “∧” to increase the temperature and “∨” to decrease the temperature on the TEMP.

Press “∧” (increase) or “∨” (decrease) on the TEMP to separately adjust the temperature for the passenger and driver sides (dual mode). Press DUAL to return the driver and passenger side temperatures to the same setting (simultaneous mode).

The air conditioning system switches between individual and simultaneous modes each time DUAL is pressed.

■ Adjusting the fan speed
Press “∧” (increase) or “∨” (decrease) on .

Press OFF to turn the fan off.
3-1. Using the air conditioning system and defogger

■ Changing the air outlets

Press “∧” or “∨” on the .

The air outlets switch each time the switch is pressed.

1. Air flows to the upper body.
2. Air flows to the upper body and feet.
3. Air flows to the feet.
4. Air flows to the feet and the windshield defogger operates.

■ Switching between outside air and recirculated air modes

Press .

The mode switches between (recycles air inside the vehicle), AUTO and (introduces air from outside the vehicle) modes each time the switch is pressed.

When the system is switched to automatic mode, the air conditioning system operates automatically.
**Defogging the windshield**

1. **Defogging**
   - The air conditioning system operates automatically.
   - Recirculated air mode will automatically switch to outside air mode. It is not possible to return to recirculated air mode when the switch is on.

**Adjusting the sensitivity of the air intake control in automatic mode**

Press \[ \text{AUTO} \] for 2 or more seconds.

Press \( \wedge \) (increase) or \( \vee \) (decrease) on the \[ \text{TEMP} \].

From \(-3\) (low) to \(3\) (high) can be set.
Adjusting the position of and opening and closing the air outlets

► Center outlets

1. Direct air flow to the left or right, up or down

► Front outlets (right and left side)

1. Direct air flow to the left or right, up or down
2. Turn the knob right to open the vent and left to close the vent

► Rear outlets

1. Direct air flow to the left or right, up or down
2. Turn the knob up to open the vent and down to close the vent
3-1. Using the air conditioning system and defogger

■ Using the automatic mode

Fan speed is adjusted automatically in accordance with the temperature setting and ambient conditions. As a result, the following may occur.

● Immediately after the switch is pressed, the fan may stop for a while until warm or cool air is ready to flow.
● Cool air may flow to the area around the upper body when the heater is on.

■ Using the system in recirculated air mode

The windows will fog up more easily if the recirculated air mode is used for an extended period.

■ Switching between outside air and recirculated air modes

Recirculated air mode or outside air mode may be automatically switched to in accordance with the temperature setting and the inside temperature.

■ Window defogger feature

Recirculated air mode may automatically switch to (outside air) mode in situations where the windows need to be defogged.

■ Outside air temperature approaches 32°F (0°C).

The air conditioning system may not operate even when is pressed.

■ When the indicator light on flashes

Press and turn off the air conditioning system before turning it on once more. There may be a problem in the air conditioning system if the indicator light continues to flash. Turn the air conditioning system off and have it inspected by your Lexus dealer.

■ Automatic mode for air intake control

In automatic mode, the system detects exhaust gas and other pollutants and automatically switches between outside air and recirculated air modes.
■ Air conditioning odors

During use, various odors from inside and outside the vehicle may enter into and accumulate in the air conditioning system. This may then cause odor to be emitted from the vents.

To reduce potential odors from occurring:

- It is recommended that the air conditioning system be set to outside air mode prior to turning the vehicle off.
- The start timing of the blower may be delayed for a short period of time immediately after the air conditioning system is started in automatic mode.

⚠️ CAUTION

■ To prevent the windshield from fogging up

Do not use the air conditioning system during cool air operation in extremely humid weather. The difference between the temperature of the outside air and that of the windshield can cause the outer surface of the windshield to fog up, blocking your vision.

⚠️ NOTICE

■ To prevent battery discharge

Do not leave the automatic air conditioning system on longer than necessary when the engine is stopped.
These features are used to defog the rear window, and to remove raindrops, dew and frost from the outside rear view mirrors.

► Without navigation system

ON/OFF

The defoggers will automatically turn off after 15 to 60 minutes. The operation time changes according to the ambient temperature and vehicle speed.

► With navigation system

ON/OFF

The defoggers will automatically turn off after 15 to 60 minutes. The operation time changes according to the ambient temperature and vehicle speed.

⚠️ CAUTION

■ When the outside rear view mirror defoggers are on

Do not touch the outside surface of the rear view mirror, as it can become very hot and burn you.
3-2. Using the audio system
Audio system type

- With navigation system
  Owners of models equipped with a navigation system should refer to the “Navigation System Owner’s Manual”.

- Without navigation system (type A)
  CD player with changer and AM/FM radio

- Without navigation system (type B)
  CD player with changer and AM/FM radio
### Using mobile phones

Interference may be heard through the audio system’s speakers if a mobile phone is being used inside or close to the vehicle while the audio system is operating.

3-2. Using the audio system

**CAUTION**

- **For vehicles sold in USA and Canada**
  - Part 15 of the FCC Rules
    - **FCC Warning:**
      Any unauthorized changes or modifications to this equipment will void the user’s authority to operate this device.
  - Laser products
    - Do not take this unit apart or attempt to make any changes yourself.
      This is an intricate unit that uses a laser pickup to retrieve information from the surface of compact discs. The laser is carefully shielded so that its rays remain inside the cabinet. Therefore, never try to disassemble the player or alter any of its parts since you may be exposed to laser rays and dangerous voltages.
    - This product utilizes a laser.
      Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

**NOTICE**

- **To prevent battery discharge**
  Do not leave the audio system on longer than necessary with the engine off.
- **To avoid damaging the audio system**
  Take care not to spill drinks or other fluids over the audio system.
Setting station presets (excluding XM® Satellite Radio)

**STEP 1** Search for desired stations by turning or pressing “∧” or “∨” on.

**STEP 2** Press and hold the button (from 1 to 6) the station is to be set to until you hear a beep.

Scanning radio stations (excluding XM® Satellite Radio)

- **Scanning the preset radio stations**

  **STEP 1** Press and hold until you hear a beep.

  Preset stations will be played for 5 seconds each.

  **STEP 2** When the desired station is reached, press the button once again.
3-2. Using the audio system

- **Scanning all radio stations within range**
  
  **STEP 1** Press \[\text{SCAN}\].

  All stations with reception will be played for 5 seconds each.

  **STEP 2** When the desired station is reached, press the button once again.

- **RDS (Radio Data System)**

  This feature allows your radio to receive station identification information and program information (classical, jazz, etc.) from radio stations which broadcast this information.

- **Receiving RDS broadcasts**
  
  **STEP 1** Press \[\text{\small \text{\textasciitilde}}}\] or \[\text{\small \text{\textasciitilde}}}\] on \[\text{\small \text{\textasciitilde}}}\] during FM reception.

  The type of program changes each time the button is pressed.

  - “ROCK”
  - “EASY LIS” (Easy listening)
  - “CLS/JAZZ” (Classical music and Jazz)
  - “R & B” (Rhythm and Blues)
  - “INFORM” (Information)
  - “RELIGION”
  - “MISC” (Miscellaneous)
  - “ALERT” (Emergency messages)

  If the system receives no RDS stations, “NO PTY” appears on the display.

  **STEP 2** Press \[\text{SCAN}\], or \[\text{\small \text{\textasciitilde}}}\] or \[\text{\small \text{\textasciitilde}}}\] on \[\text{\small \text{\textasciitilde}}}\].

  The radio seeks or scans the station by the relevant program type.

- **Displaying radio station names**
  
  Press \[\text{TEXT}\].
Displaying radio text messages
Press TEXT twice.

A text message is displayed when “MSG” is shown on the screen.

If the text continues past the end of the display, “►” is displayed. Press and hold TEXT until you hear a beep.

XM® Satellite Radio (If equipped)

Receiving XM® Satellite Radio

STEP 1 Press SAT.

The display changes as follows each time the button is pressed: “SAT1” → “SAT2” → “SAT3”

STEP 2 Turn SEEK/TRACK to select the desired channel in the all categories or press “▲” or “▼” on SEEK/TRACK to select the desired channel in the current category.

Setting XM® Satellite Radio channel presets
Select the desired channel. Press and hold the button (from 1 to 6) the channel is to be set to until you hear a beep.

Changing the channel category

Press “▲” or “▼” on SEEK/TRACK.

Scanning XM® Satellite Radio channels

● Scanning the channels in the current category

STEP 1 Press SCAN.

STEP 2 When the desired channel is reached, press the button again.
3-2. Using the audio system

- Scanning the preset channels
  
  **STEP 1** Press and hold \[ \text{SCAN} \] until you hear a beep.
  
  **STEP 2** When the desired channel is reached, press the button again.

- Displaying text information
  
  Press \[ \text{TEXT} \].

  The display will show up to 10 characters.

  The display changes as follows each time the button is pressed.

  - “CH NAME”
  - “TITLE” (SONG/PROGRAM TITLE)
  - “NAME” (ARTIST NAME/FEATURE)
  - “CH NUMBER”
■ When the battery is disconnected

All preset stations are erased.

■ Reception sensitivity

- It is difficult to maintain perfect radio reception at all times due to the continually changing position of the antenna, differences in signal strength and surrounding objects, such as trains and transmitters.

- The radio antenna is mounted inside the rear window. To maintain clear radio reception, do not attach metallic window tinting or other metallic objects to the antenna wire mounted inside the rear window.

■ Receiving XM® Satellite Radio

An XM® Satellite Radio is a tuner designed exclusively to receive broadcasts provided under a separate subscription. Availability is limited to the 48 contiguous states and 10 Canadian provinces.

- XM® subscriptions
  
  For detailed information about XM® Satellite Radio or to subscribe:
  
  U.S.A. —
  Visit on the web at www.xmradio.com or call 1-877-515-3987.
  Canada —
  Visit on the web at www.xmradio.ca or call 1-877-515-3987.

- Radio ID

  You will need the radio ID when activating XM® service or reporting a problem. Select “CH000” using , and the receiver’s 8-character ID number will appear.

- Satellite tuner

  The tuner supports only Audio Services (Music and Talk) and the accompanying Text Information of XM® Satellite Radio.
If the satellite radio does not operate normally

If a problem occurs with the XM® tuner, a message will appear on the display. Refer to the table below to identify the problem, and take the suggested corrective action.

<table>
<thead>
<tr>
<th>“ANTENNA”</th>
<th>The XM® antenna is not connected. Check whether the XM® antenna cable is attached securely.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>

Contact the XM® Listener Care Center at 1-877-515-3987.

- Certifications for the radio tuner

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by trying one or more of the following:

- Reorienting or relocating the receiving antenna.
- Increasing the separation between the equipment and receiver.
- Connecting the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consulting the dealer or an experienced radio/TV technician for help.

The channel you selected is no longer available. Wait for about 2 seconds until the radio returns to the previous channel or “CH001”. If it does not change automatically, select another channel.
#### Loading CDs

##### Loading a CD

**STEP 1** Press \[ \text{LOAD} \].

“WAIT” is shown on the display.

**STEP 2** When the indicator on the slot turns from amber to green, insert a CD.

The display changes from “WAIT” to “LOAD”.

##### Loading multiple CDs

**STEP 1** Press and hold \[ \text{LOAD} \] until you hear a beep.

“WAIT” is shown on the display.

**STEP 2** When the indicator on the slot turns from amber to green, insert a CD.

The display changes from “WAIT” to “LOAD”.

The indicator on the slot turns to amber when the CD is being inserted.
When the indicator on the slot turns from amber to green, insert the next CD. Repeat the procedure for the remaining CDs.

To cancel the operation, press \textbf{LOAD}. If you do not insert a disc within 15 seconds, loading will be canceled automatically.

**Ejecting CDs**

- **Ejecting a CD**
  
  To select the CD to be ejected, press “\textasciitilde” or “\textasciiner” on \textbf{TYPE-DISC}. The selected disc number is shown on the display.

  \textbf{STEP 1} Press \textbf{EJECT} and remove the CD.

- **Ejecting all the CDs**
  
  Press and hold \textbf{EJECT} until you hear a beep, and then remove the CDs.

**Selecting, fast-forwarding, rewinding, and scanning tracks**

- **Selecting a track**
  
  Press “\textasciitilde” to move up and “\textasciiner” to move down using \textbf{SEEK-TRACK} until the desired track number is displayed.

- **Fast-forwarding and reversing tracks**
  
  To fast-forward or reverse, press and hold “\textasciitilde” or “\textasciiner” on \textbf{SEEK-TRACK} until you hear a beep.
Scanning tracks

**STEP 1** Press \[\text{SCAN}\].

To cancel, press \[\text{SCAN}\] again.

**STEP 2** Press the button again when the desired track is reached.

Selecting a CD

To select a CD to play

To select the desired CD, press “<” or “>” on \[\text{TYPE-DISC}<\] or \[\text{TYPE-DISC}>\].

Scanning loaded CDs

**STEP 1** Press and hold \[\text{SCAN}\] until you hear a beep.

The first ten seconds of the first track on each CD will be played.

To cancel, press \[\text{SCAN}\] again.

**STEP 2** Press the button again when the desired CD is reached.

Playing and pausing tracks

To play or pause a track, press \[3\] (\[\text{►} \text{Ì} \text{Ì}\]).
Random playback

- **Current CD**
  Press \(1\) (RAND).
  Tracks are played in random order.
  To cancel, press \(1\) (RAND) again.

- **All CDs**
  Press and hold \(1\) (RAND) until you hear a beep.
  Tracks on all loaded CDs are played in random order.
  To cancel, press \(1\) (RAND) again.

Repeat play

- **To repeat a track**
  Press \(2\) (RPT).
  To cancel, press \(2\) (RPT) again.

- **To repeat all of the tracks on a CD**
  Press and hold \(2\) (RPT) until you hear a beep.
  To cancel, press \(2\) (RPT) again.

Switching the display

Press \(\text{TEXT}\).

Each time the button is pressed, the display changes in the following order:
Elapsed time → CD title → Track title
3-2. Using the audio system

- **CD player protection feature**
  To protect the internal components, playback is automatically stopped when a problem is detected.

- **Display**
  Up to 12 characters can be displayed at a time.
  If there are 13 or more characters, pressing and holding the TEXT button until you hear a beep enables to display the remaining characters.
  A maximum of 24 characters can be displayed.
  If TEXT is pressed until you hear a beep again or has not been operated for more than 6 seconds, the display will return to the first 12 characters.
  Depending on the contents recorded, the characters may not be displayed properly or may not be displayed at all.

- **When “ERROR” or “WAIT” is shown on the display**
  “ERROR”: This indicates a trouble either in the CD or inside the player. The CD may be dirty, damaged, or inserted up-side down.
  “WAIT”: Operation is stopped due to a high temperature inside the player. Wait for a while and then press CD-AUX. Contact your Lexus dealer if the CD still cannot be played back.

- **Discs that can be used**
  Discs with the marks shown below can be used.
  Playback may not be possible depending on recording format or disc features, or due to scratches, dirt or deterioration.

- **Lens cleaners**
  Do not use lens cleaners. Doing so may damage the CD player.

- **If discs are left inside the CD player or in the ejected position for extended periods**
  CDs may be damaged and may not play properly.
3-2. Using the audio system

Interior features

⚠️ NOTICE

■ CDs and adapters that cannot be used

Do not use the following types of CDs, 3 in. (8 cm) CD adapters or Dual Disc. Doing so may damage the CD player and/or the CD insert/eject function.

- CDs that have a diameter that is not 4.7 in. (12 cm)
- Low-quality and deformed CDs
- CDs with a transparent or translucent recording area
- CDs that have had tape, stickers or CD-R labels attached to them, or that have had the label peeled off
3-2. Using the audio system

⚠️ NOTICE

■ CD player precautions

Failure to follow the precautions below may result in serious damage to the CDs or the player itself.

● Do not insert anything other than CDs into the CD slot.
● Do not apply oil to the CD player.
● Store CDs away from direct sunlight.
● Never try to disassemble any part of the CD player.

● Do not insert more than one CD at a time.
3-2. Using the audio system
Playing back MP3 and WMA discs

Loading and ejecting MP3 and WMA discs

→ P. 226, 227

Selecting MP3 and WMA discs

3-2. Using the audio system

Selecting and scanning a folder

■ Selecting folders one at a time
  Press \( \uparrow \) or \( \downarrow \) to select the desired folder.

■ Returning to the first folder
  Press and hold \( \downarrow \) until you hear a beep.

■ Scanning the first file of all the folders
  \( \text{STEP 1} \) Press and hold \( \text{SCAN} \) until you hear a beep.
  The first ten seconds of the first file in each folder will be played.
  \( \text{STEP 2} \) When the desired folder is reached, press \( \text{SCAN} \) again.

Fast-forwarding and reversing files

To fast-forward or reverse, press and hold \( \uparrow \) or \( \downarrow \) on \( \text{SEEK TRACK} \) until you hear a beep.

Selecting and scanning files

■ Selecting a file
  Turn \( \text{TUNECtrl} \) or press \( \uparrow \) or \( \downarrow \) on \( \text{SEEK TRACK} \) to select the desired file.

■ Scanning the files in a folder
  Press \( \text{SCAN} \).
  The first ten seconds of each file will be played.
  To cancel, press \( \text{SCAN} \) again.
  When the desired file is reached, press \( \text{SCAN} \) again.
3-2. Using the audio system

MP3 and WMA files

MP3 (MPEG Audio LAYER 3) is a standard audio compression format. Files can be compressed to approximately 1/10 of their original size by using MP3 compression.

WMA (Windows Media Audio) is a Microsoft audio compression format. This format compresses audio data to a size smaller than that of the MP3 format. There is a limit to the MP3 and WMA file standards and to the media/formats recorded by them that can be used.

MP3 file compatibility

- Compatible standards
  - MP3 (MPEG1 LAYER3, MPEG2 LSF LAYER3)
- Compatible sampling frequencies
  - MPEG1 LAYER3: 32, 44.1, 48 (kHz)
  - MPEG2 LSF LAYER3: 16, 22.05, 24 (kHz)
- Compatible bit rates
  - MPEG1 LAYER3: 64, 80, 96, 112, 128, 160, 192, 224, 256, 320 (kbps)
  - MPEG2 LSF LAYER3: 64, 80, 96, 112, 128, 144, 160 (kbps)
  * Compatible with VBR
- Compatible channel modes: stereo, joint stereo, dual channel and monaural

WMA file compatibility

- Compatible standards
  - WMA Ver. 7, 8, 9
- Compatible sampling frequencies
  - 32, 44.1, 48 (kHz)
- Compatible bit rates
  - Ver. 7, 8: CBR 48, 64, 80, 96, 128, 160, 192 (kbps)
  - Ver. 9: CBR 48, 64, 80, 96, 128, 160, 192, 256, 320 (kbps)
  * Only compatible with 2-channel playback

Compatible media

Media that can be used for MP3 and WMA playback are CD-Rs and CD-RWs. Playback in some instances may not be possible, depending on the status of the CD-R or CD-RW. Playback may not be possible or the audio may jump if the disc is scratched or marked with fingerprints.
3-2. Using the audio system

- Compatible disc formats
  The following disc formats can be used.
  - Disc formats: CD-ROM Mode 1 and Mode 2
    CD-ROM XA Mode 2, Form 1 and Form 2
  - File formats: ISO9660 Level 1, Level 2, (Romeo, Joliet)
  MP3 and WMA files written in any format other than those listed above may not play correctly, and their file names and folder names may not be displayed correctly.
  Items related to standards and limitations are as follows.
  - Maximum directory hierarchy: 8 levels
  - Maximum length of folder names/file names: 32 characters
  - Maximum number of folders: 192 (including the root)
  - Maximum number of files per disc: 255

- File names
  The only files that can be recognized as MP3/WMA and played are those with the extension .mp3 or .wma.

- Multi-sessions
  As the audio system is compatible with multi-sessions, it is possible to play discs that contain MP3 and WMA files. However, only the first session can be played.

- ID3 and WMA tags
  ID3 tags can be added to MP3 files, making it possible to record the track title and artist name, etc.
  The system is compatible with ID3 Ver. 1.0, 1.1, and Ver. 2.2, 2.3 ID3 tags. (The number of characters is based on ID3 Ver. 1.0 and 1.1.)
  WMA tags can be added to WMA files, making it possible to record the track title and artist name in the same way as with ID3 tags.
3-2. Using the audio system

● MP3 and WMA playback

When a disc containing MP3 or WMA files is inserted, all files on the disc are first checked. Once the file check is finished, the first MP3 or WMA file is played. To make the file check finish more quickly, we recommend you do not write in any files other than MP3 or WMA files or create any unnecessary folders.

Discs that contain a mixture of music data and MP3 or WMA format data cannot be played.

● Extensions

If the file extensions .mp3 and .wma are used for files other than MP3 and WMA files, they will be mistakenly recognized and played as MP3 and WMA files. This may result in large amounts of interference and damage to the speakers.

● Playback

• To play MP3 file with steady sound quality, we recommend a fixed bit rate of 128 kbps and a sampling frequency of 44.1 kHz.
• CD-R or CD-RW playback may not be possible in some instances, depending on the characteristics of the disc.
• There is a wide variety of freeware and other encoding software for MP3 and WMA files on the market, and depending on the status of the encoding and the file format, poor sound quality or noise at the start of playback may result. In some cases, playback may not be possible at all.
• When files other than MP3 or WMA files are recorded on a disc, it may take more time to recognize the disc and in some cases, playback may not be possible at all.
• Microsoft, Windows, and Windows Media are the registered trademarks of Microsoft Corporation in the USA and other countries.

### Selecting a list

**STEP 1** Turn to display the first selection list.

**STEP 2** Press to select the desired item.

Pressing the knob changes to the second selection list.

**STEP 3** Repeat the same procedure to select the desired item.

To return to the previous selection list, select “GO BACK” or press ( ).
Selecting songs

Turn or press “∧” or “∨” on to select the desired song.

Playing and pausing songs

To play or pause a song, press ( ).

Fast-forwarding and rewinding songs

To fast-forward or rewind, press and hold “∧” or “∨” on until you hear a beep.

Shuffle playback

- Playing songs from one playlist or album in random order
  Press (RAND).
  To cancel, press (RAND) again.

- Playing songs from all the playlists or albums in random order
  Press and hold (RAND) until you hear a beep.
  To cancel, press (RAND) again.

Repeat play

Press (RPT).
To cancel, press (RPT) again.

Switching the display

Press .
Each time the button is pressed, the display changes in the following order: Elapsed time → Album title → Track title → Artist name
3-2. Using the audio system

Adjusting sound quality and volume balance

**STEP 1** Press to enter iPod menu mode.

**STEP 2** Pressing changes sound modes. (→P. 256)

---

■ About iPod

- Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.
- iPod is a trademark of Apple Inc., registered in the U.S. and other countries.

■ iPod functions

- When an iPod is connected and the audio source is changed to iPod mode, the iPod will resume play from the same point in which it was last used.
- Depending on the iPod that is connected to the system, certain functions may not be available. If a function is unavailable due to a malfunction (as opposed to a system specification), disconnecting the device and reconnecting it once again may resolve the problem.
- While connected to the system, the iPod cannot be operated with its own controls. It is necessary to use the controls of the vehicle’s audio system instead.

■ iPod problems

To resolve most problems encountered when using your iPod, disconnect your iPod from the vehicle iPod connection and reset it. For instructions on how to reset your iPod, refer to your iPod Owner’s Manual.

■ Display

→P. 230
■ Error messages

“ERROR”: This indicates a problem in the iPod or its connection.
“NO MUSIC”: This indicates that there is no music data in the iPod.
“EMPTY”: This indicates that some available songs are not found in a selected playlist.
“UPDATE”: This indicates that the version of the iPod is not compatible. Upgrade your iPod software to the latest version.

■ Compatible models

<table>
<thead>
<tr>
<th>Model</th>
<th>Generation</th>
<th>Software version</th>

<tr>
<td>iPod classic</td>
<td>1st generation</td>
<td>Ver. 1.0.0 or higher</td>
</tr>
</tbody>
</table>

Depending on differences between models or software version etc., some models listed above might be incompatible with this system.

iPod 4th generation and earlier models are not compatible with this system.
iPhone, iPod mini, iPod shuffle and iPod photo are not compatible with this system.

Items related to standards and limitations are as follows:

- Maximum number of lists in device: 9999
- Maximum number of songs in device: 65535
- Maximum number of songs per list: 65535
### CAUTION

- **Caution while driving**
  
  Do not connect iPod or operate the controls.

### NOTICE

- **To prevent damage to iPod**
  
  - Do not leave iPod in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the player.
  
  - Do not push down on or apply unnecessary pressure to the iPod while it is connected as this may damage the iPod or its terminal.
  
  - Do not insert foreign objects into the port as this may damage the iPod or its terminal.
Connecting a USB memory enables you to enjoy music from the vehicle speakers.

## Connecting a USB memory

**STEP 1**
Open the cover and connect a USB memory.
*Turn on the power of USB memory if it is not turned on.*

**STEP 2**
Press **CD·AUX**.
Control panel

- Random playback button
- Repeat play button
- Playback/Pause button
- Folder selector buttons
- Text button
- Search playback button
- File selector knob
- "PWR-VOL" knob
- Power Volume
- Playback button
- File selector button
Selecting and scanning a folder

- Selecting folders one at a time
  Press  (↑) or  (↓) to select the desired folder.

- Returning to the first folder
  Press and hold  (↑) until you hear a beep.

- Scanning the first file of all the folders
  Step 1: Press and hold  until you hear a beep.
  The first ten seconds of the first file in each folder will be played.
  Step 2: When the desired folder is reached, press  again.

Selecting and scanning files

- Selecting a file
  Turn  or press “↑” or “↓” on  to select the desired file.

- Scanning the files in a folder
  Press  .
  The first ten seconds of each file will be played.
  To cancel, press  again.
  When the desired file is reached, press  again.

Playing and pausing files

To play or pause a file, press  ( ).
3-2. Using the audio system

**Fast-forwarding and rewinding files**

To fast-forward or rewind, press and hold “<” or “>” on until you hear a beep.

**Random playback**

- **Playing files from a folder in random order**
  Press (RAND).
  To cancel, press (RAND) again.

- **Playing all the files from a USB memory in random order**
  Press and hold (RAND) until you hear a beep.
  To cancel, press (RAND) again.

**Repeat play**

- **Repeating a file**
  Press (RPT).
  To cancel, press (RPT) again.

- **Repeating all the files in a folder**
  Press and hold (RPT) until you hear a beep.
  To cancel, press (RPT) again.

**Switching the display**

Press TEXT.

Each time the button is pressed, the display changes in the following order:
Elapsed time → Folder name → File name → Album title (MP3 only) → Track title → Artist name
USB memory functions

- Depending on the USB memory that is connected to the system, the device itself may not be operable and certain functions may not be available. If the device is inoperable or a function is unavailable due to a malfunction (as opposed to a system specification), disconnecting the device and reconnecting it once again may resolve the problem.

- If the USB memory still does not begin operation after being disconnected and reconnected, format the memory.

Display

→ P. 230

Error messages

“ERROR”: This indicates a problem in the USB memory or its connection.

“NO MUSIC”: This indicates that no MP3/WMA files are included in the USB memory.
USB memory

- Compatible devices
  USB memory that can be used for MP3 and WMA playback

- Compatible device formats
  The following device formats can be used:
  - USB communication formats: USB2.0 FS (12mbps)
  - File formats: FAT16/32 (Windows)
  - Correspondence class: Mass storage class
  MP3 and WMA files written in any format other than those listed above may not play correctly, and their file names and folder names may not be displayed correctly.

  Items related to standards and limitations are as follows:
  - Maximum directory hierarchy: 8 levels
  - Maximum number of folders in a device: 999 (including the root)
  - Maximum number of files in a device: 65025
  - Maximum number of files per folder: 255

- MP3 and WMA files
  MP3 (MPEG Audio LAYER 3) is a standard audio compression format.
  Files can be compressed to approximately 1/10 of their original size using MP3 compression.
  WMA (Windows Media Audio) is a Microsoft audio compression format.
  This format compresses audio data to a size smaller than that of the MP3 format.
  There is a limit to the MP3 and WMA file standards that can be used and to the media/formats on which the files are recorded.
3-2. Using the audio system

- **MP3 file compatibility**
  - Compatible standards
    - MP3 (MPEG1 AUDIO LAYERII, III, MPEG2 AUDIO LAYERII, III, MPEG2.5)
  - Compatible sampling frequencies
    - MPEG1 AUDIO LAYERII, III: 32, 44.1, 48 (kHz)
    - MPEG2 AUDIO LAYERII, III: 16, 22.05, 24 (kHz)
    - MPEG2.5: 8, 11.025, 12 (kHz)
  - Compatible bit rates (compatible with VBR)
    - MPEG1 AUDIO LAYERII, III: 32-320 (kbps)
    - MPEG2 AUDIO LAYERII, III: 32-160 (kbps)
    - MPEG2.5: 32-160 (kbps)
  - Compatible channel modes: stereo, joint stereo, dual channel and monaural

- **WMA file compatibility**
  - Compatible standards
    - WMA Ver. 9
  - Compatible sampling frequencies
    - HIGH PROFILE 32, 44.1, 48 (kHz)
  - Compatible bit rates
    - HIGH PROFILE 32-320 (kbps, VBR)

- **File names**
  The only files that can be recognized as MP3/WMA and played are those with the extension .mp3 or .wma.

- **ID3 and WMA tags**
  ID3 tags can be added to MP3 files, making it possible to record the track title, artist name, etc.
  The system is compatible with ID3 Ver. 1.0, 1.1, and Ver. 2.2, 2.3, 2.4 ID3 tags.
  (The number of characters is based on ID3 Ver. 1.0 and 1.1.)

  WMA tags can be added to WMA files, making it possible to record the track title and artist name in the same way as with ID3 tags.
- MP3 and WMA playback
  - When a USB memory containing MP3 or WMA files is connected, all files in the USB memory are checked. Once the file check is finished, the first MP3 or WMA file is played. To make the file check finish more quickly, we recommend that you do not include any files other than MP3 or WMA files or create any unnecessary folders.
  - When the USB memory is connected and the audio source is changed to USB memory mode, the USB memory will start playing the first file in the first folder. If the same USB memory is removed and reinserted (and the contents have not been changed), the USB memory will resume play from the same point in which it was last used.

- Extensions
  If the file extensions .mp3 and .wma are used for files other than MP3 and WMA files, they will be skipped (not played).

- Playback
  - To play MP3 files with steady sound quality, we recommend a fixed bit rate of at least 128 kbps and a sampling frequency of 44.1 kHz.
  - There is a wide variety of freeware and other encoding software for MP3 and WMA files on the market, and depending on the status of the encoding and the file format, poor sound quality or noise at the start of playback may result. In some cases, playback may not be possible at all.
  - Microsoft, Windows, and Windows Media are registered trademarks of Microsoft Corporation in the U.S.A. and other countries.

---

**CAUTION**

**Caution while driving**

Do not connect USB memory or operate the controls.

## NOTICE

**To prevent damage to USB memory**

- Do not leave USB memory in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the player.
- Do not push down on or apply unnecessary pressure to the USB memory while it is connected as this may damage the USB memory or its terminal.
- Do not insert foreign objects into the port as this may damage the USB memory or its terminal.
3-2. Using the audio system

Optimal use of the audio system

Adjusting sound quality and volume balance

■ Changing sound quality modes

Press \[ \text{TUNE-FILE} \].

Pressing the button changes sound modes in the following order:

“BAS” → “MID” → “TRE” → “FAD” → “BAL” → “ASL”
## Adjusting sound quality

Turning adjusts the level.

<table>
<thead>
<tr>
<th>Mode displayed</th>
<th>Sound quality mode</th>
<th>Level</th>
<th>Turn to the left</th>
<th>Turn to the right</th>
</tr>
</thead>
<tbody>
<tr>
<td>“BAS”</td>
<td>Bass*</td>
<td>-5 to 5</td>
<td></td>
<td></td>
</tr>
<tr>
<td>“MID”</td>
<td>Mid-range*</td>
<td>-5 to 5</td>
<td>Low</td>
<td>High</td>
</tr>
<tr>
<td>“TRE”</td>
<td>Treble*</td>
<td>-5 to 5</td>
<td></td>
<td></td>
</tr>
<tr>
<td>“FAD”</td>
<td>Front/rear volume balance</td>
<td>F7 to R7</td>
<td>Shifts to rear</td>
<td>Shifts to front</td>
</tr>
<tr>
<td>“BAL”</td>
<td>Left/right volume balance</td>
<td>L7 to R7</td>
<td>Shifts to left</td>
<td>Shifts to right</td>
</tr>
</tbody>
</table>

*: The sound quality level is adjusted individually in each audio mode.

### Turning the Automatic Sound Levelizer (ASL) on/off

Turning clockwise turns on the ASL, and turning counterclockwise turns off the ASL.

ASL automatically adjusts the volume and tone quality according to the noise level as you drive your vehicle.
3-2. Using the audio system

Using the AUX port

This port can be used to connect a portable audio device and listen to it through the vehicle’s speakers.

**STEP 1** Connect the portable audio device.

**STEP 2** Press CD-AUX.

- **Operating portable audio devices connected to the audio system**
  The volume can be adjusted using the vehicle’s audio controls. All other adjustments must be made on the portable audio device itself.

- **When using a portable audio device connected to the power outlet**
  Noise may occur during playback. Use the power source of the portable audio device.
Some audio features can be controlled using the switches on the steering wheel.

1. Turns the power on, selects an audio source
2. Increases/decreases volume
3. Radio mode: Selects a radio station
   CD mode: Selects a track, file (MP3 and WMA) and disc
   Bluetooth® audio mode:
   Selects a track and album
   iPod mode (if equipped):
   Selects a song
   USB memory mode (if equipped):
   Selects a file and folder

### Turning the power on

Press the MODE button when the audio system is turned OFF.

The audio system can be turned off by holding the button down until you hear a beep.
Changing the audio source

Press \( \text{MODE} \) when the audio system is turned ON. The audio source changes as follows each time the switch is pressed. If no discs are inserted in the player, or if the external device is not connected, that mode will be skipped.

\[
\text{FM1} \rightarrow \text{FM2} \rightarrow \text{SAT1*} \rightarrow \text{SAT2*} \rightarrow \text{SAT3*} \rightarrow \text{CD player} \rightarrow \\
\text{Bluetooth}^\circledast \text{ audio} \rightarrow \text{AUX} \rightarrow \text{iPod* or} \\
\text{USB memory*} \rightarrow \text{AM} \rightarrow \text{FM1}
\]

*: If equipped

Adjusting the volume

Press “+” on \( \text{ Vol.} \) to increase the volume and “-” to decrease the volume.

Hold down the switch to continue increasing or decreasing the volume.

Selecting a radio station

\[\text{STEP 1} \quad \text{Press } \text{MODE} \text{ to select the radio mode.}\]

\[\text{STEP 2} \quad \text{Press “^” or “▼” on } \rightarrow \text{ to select a radio station.}\]

To scan for receivable stations, press and hold “^” or “▼” on the switch until you hear a beep.

Selecting a track/file or song

\[\text{STEP 1} \quad \text{Press } \text{MODE} \text{ to select CD, Bluetooth}^\circledast \text{ audio, iPod (if equipped) or} \\
\text{USB memory (if equipped) mode.}\]

\[\text{STEP 2} \quad \text{Press “^” or “▼” on } \rightarrow \text{ to select the desired track/file or song.}\]
Selecting an album

**STEP 1** Press to select Bluetooth® audio mode.
**STEP 2** Press and hold “∧” or “∨” on until you hear a beep.

Selecting a folder (if equipped)

**STEP 1** Press to select USB memory mode.
**STEP 2** Press and hold “∧” or “∨” on until you hear a beep.

Selecting a disc in the CD player

**STEP 1** Press to select the CD mode.
**STEP 2** Press and hold “∧” or “∨” on until you hear a beep.

Canceling automatic selection of a radio station

Press again.

**CAUTION**

To reduce the risk of an accident

Exercise care when operating the audio switches on the steering wheel.
The Bluetooth® audio system enables you to enjoy music played on a portable digital audio player (portable player) from the vehicle speakers via wireless communication.

This audio system supports Bluetooth®, a wireless data system capable of playing portable audio music without cables. If your portable player does not support Bluetooth®, the Bluetooth® audio system will not function.

■ Conditions under which the system will not operate
- If using a portable player that does not support Bluetooth®
- If the portable player is switched off
- If the portable player is not connected
- If the portable player’s battery is low
- If the portable player is behind the seat or in the glove box or console box
- If metal is covering or touching the portable player
When transferring ownership of the vehicle

Be sure to initialize the system to prevent personal data from being improperly accessed. (→P. 306)

About Bluetooth®

Bluetooth is a registered trademark of Bluetooth SIG, Inc.

Compatible models

● Bluetooth® specifications:
  - Ver. 1.1, or higher (Recommended: Ver. 1.2 or higher)

● Following Profiles:
  - A2DP (Advanced Audio Distribution Profile) Ver. 1.0, or higher (Conformed: Ver. 1.2)
  - AVRCP (Audio/Video Remote Control Profile) Ver. 1.0 or higher (Conformed: Ver. 1.3)

Portable players must correspond to the above specifications in order to be connected to the Bluetooth® audio system. However, please note that some functions may be limited depending on the type of portable player.

Certification for the Bluetooth® audio system

FCC ID: AJDK018
IC ID: 775E-K018
MADE IN JAPAN

This device complies with Part 15 of the FCC Rules and RSS-Gen and RSS-210 of IC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.
**CAUTION**

- **FCC WARNING**
  Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
  Radio Frequency Radiation Exposure. This equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65. This equipment has very low levels of RF energy that it deemed to comply without maximum permissive exposure evaluation (MPE). But it is desirable that it should be installed and operated with at least 7.9 in. (20 cm) and more between the radiator and person’s body (excluding extremities: hands, wrists, feet and ankles).
  This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

- **Caution while driving**
  Do not connect portable players or operate the controls.

**NOTICE**

- **To prevent damage to portable players**
  Do not leave portable players in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the player.
3-3. Using the Bluetooth® audio system

Using the Bluetooth® audio system

■ Audio unit

1 Display
A message, name, number, etc. is displayed.

   Lower-case characters and special characters cannot be displayed.

2 Displays information that is too long to be displayed at one time on the display (press and hold)

3 Selects items such as menu and number
   Turn: Selects an item
   Press: Inputs the selected item

4 Bluetooth® connection condition
   If “BT” is not displayed, the Bluetooth® audio system cannot be used.
Operating the system using voice commands

By following voice guidance instructions output from the speaker, voice commands enable to the operation of the Bluetooth® audio system without the need to check the display or operate .

■ Operation procedure when using voice commands
  Press the talk switch and follow voice guidance instructions.

■ Auxiliary commands when using voice commands
  The following auxiliary commands can be used when operating the system using a voice command:
  “Cancel”: Exits the Bluetooth® audio system
  “Repeat”: Repeats the previous voice guidance instruction
  “Go back”: Returns to the previous procedure
  “Help”: Reads aloud the function summary if a help comment is registered for the selected function
Before using the Bluetooth® audio system, it is necessary to register a Bluetooth® enabled portable player in the system. Follow the procedure below to register (pair) a portable player:

**STEP 1** Press and select “BT•A MENU” using .

**STEP 2** Press the talk switch or select “BT•A Setup” using .

The introductory guidance and portable player name registration instructions are heard.

**STEP 3** Select “Pair Audio Player (Pair Audio)” using a voice command or .

**STEP 4** Register a portable player name by either of the following methods:

a. Select “Record Name” using , and say the name to be registered.

b. Press the talk switch and say the name to be registered.

A voice guidance instruction to confirm the input is heard.

**STEP 5** Select “Confirm” using a voice command or .

A passkey is displayed and heard, and a voice guidance instruction for inputting the passkey into the portable player is heard.

**STEP 6** Input the passkey into the portable player.

Refer to the manual that comes with the portable player for the operation of the portable player.
Guidance for registration completion is heard.

If the portable player has a Bluetooth® phone, the phone can be registered at the same time. A voice guidance instruction to register a Bluetooth® phone is heard.

**STEP 7** Select “Yes” or “No” using a voice command or .

(Bluetooth® phone → P. 283)

When using a voice command

For numbers, say a combination of single digits from zero to nine.
Say the command correctly and clearly.

Situations that the system may not recognize your voice

- When driving on rough roads
- When driving at high speeds
- When air is blowing out of the vents onto the microphone
- When the air conditioning fan emits a loud noise

Operations that cannot be performed while driving

- Operating the system with
- Registering a portable player to the system

Changing the passkey

→ P. 278
3-3. Using the Bluetooth® audio system

Operating a Bluetooth® enabled portable player

**Selecting an album**

To select the desired album, press (5) (▼) or (6) (▲).

**Selecting tracks**

Press “▼” or “▲” on SEEKTRACK to select the desired track.

**Playing and pausing tracks**

To play or pause a track, press (3) (▶ ||).
Fast-forwarding and rewinding tracks

To fast-forward or rewind, press and hold “∧” or “∨” on \( \text{SEEK\-TRACK} \ ∧ \) until you hear a beep.

Random playback

Press 1 (RAND).

To cancel, press 1 (RAND) again.

Repeat play

Press 2 (RPT).

To cancel, press 2 (RPT) again.

Scanning tracks

Press \( \text{SCAN} \).

To cancel, press \( \text{SCAN} \) again.

Switching the display

Press \( \text{TEXT} \).

Each time the button is pressed, the display changes in the following order: Elapsed time → Album title → Track title → Artist name

Using the steering wheel audio switches

→ P. 259
3-3. Using the Bluetooth® audio system

- **Bluetooth® audio system functions**
  Depending on the portable player that is connected to the system, certain functions may not be available.

- **Display**
  → P. 230

- **Error message**
  “Memory Error”: This indicates a problem in the system.
3-3. Using the Bluetooth® audio system

Setting up a Bluetooth® enabled portable player

Registering a portable player in the Bluetooth® audio system allows the system to function. The following functions can be used for registered portable players:

Functions and operation procedures

Pattern A

To enter the menu for each function, follow the steps below using a voice command or:

- Registering a portable player

- Selecting a portable player to be used

- Changing the registered name of a portable player

- Listing the registered portable players

- Changing the passkey

- Deleting a registered portable player
3-3. Using the Bluetooth® audio system

Pattern B

**STEP 1** Press to select “BT•A MENU”.

**STEP 2** Press the talk switch or select “BT•A Setup” using .

**STEP 3** Select one of the following functions using a voice command or .

- Registering a portable player “Pair Audio Player (Pair Audio)”
- Selecting a portable player to be used “Connect Audio Player (Connect)”
- Changing the registered name “Change Name”
- Listing the registered portable players “List Audio Players (List Audios)”
- Changing the passkey “Set Passkey”
- Deleting a registered portable player “Delete Audio Player (Delete Audio)”
### Registering a portable player

Select “Pair Audio Player (Pair Audio)” using a voice command or , and perform the procedure for registering a portable player. (→P. 267)

### Selecting a portable player to be used

**STEP 1** Select “Connect Audio Player (Connect)” using a voice command or .

► Pattern A

**STEP 2** Select the portable player to be used by either of the following methods, and select “Confirm” by using a voice command or :

a. Press the talk switch and say the name of the desired portable player.

b. Press the talk switch and say “List Audio Players”. When the name of the desired portable player is read aloud, press the talk switch.

► Pattern B

**STEP 2** Select the portable player to be used using .
Pattern A

**STEP 3** Press the talk switch and say “From Car” or “From Audio player”, and select “Confirm” by using a voice command or .

Pattern B

**STEP 3** Select “From Car” or “From Audio”, using . If “From Car” is selected, the portable player will be automatically connected whenever the “ENGINE START STOP” switch is in either ACCESSORY or IGNITION ON mode.

## Changing the registered name of a portable player

**STEP 1** Select “Change Name” using a voice command or .

Pattern A

**STEP 2** Select the name of the portable player to be changed by either of the following methods, and select “Confirm” using a voice command or :

a. Press the talk switch and say the name of desired portable player.

b. Press the talk switch and say “List Audio Players”. When the name of the desired portable player is read aloud, press the talk switch.
Pattern B

**STEP 2** Select the desired portable player name to be changed using 

**STEP 3** Press the talk switch or select “Record Name” using , and say the new name.

**STEP 4** Select “Confirm” using a voice command or .

**Listing the registered portable players**

Select “List Audio Players (List Audios)” using a voice command or . The list of registered portable players will be read aloud. When listing is complete, the system returns to “BT•A Setup”.

Pressing the talk switch while the name of a portable player is being read aloud selects the portable player, and the following functions will become available:

- Selecting a portable player: “Connect Audio Player (Connect)”
- Changing a registered name: “Change Name”
- Deleting a portable player: “Delete Audio Player (Delete Audio)”
Changing the passkey

**STEP 1** Select “Set Passkey” using a voice command or .

Pattern A

**STEP 2** Press the talk switch, say a 4 to 8-digit number, and select “Confirm” using a voice command or .

Pattern B

**STEP 2** Select a 4 to 8-digit number using .

The number should be input 1 digit at a time.

**STEP 3** When the entire number to be registered as a passkey has been input, press again.

If the number to be registered has 8 digits, pressing of the knob is not necessary.
Deleting a registered portable player

**STEP 1** Select “Delete Audio Player (Delete Audio)” using a voice command or .

Pattern A

**STEP 2** Select the portable player to be deleted by either of the following methods and select “Confirm” using a voice command or :

a. Press the talk switch and say the name of the desired portable player.

b. Press the talk switch and say “List Audio Players”. When the name of the desired portable player is read aloud, press the talk switch.

Pattern B

**STEP 2** Select the desired portable player to be deleted using .

If the portable player to be deleted is paired as a Bluetooth® phone, the registration of the mobile phone can be deleted at the same time. A voice guidance instruction to delete a mobile phone is heard.

**STEP 3** Select “Yes” or “No” using a voice command or .

(Bluetooth® phone →P. 283)

---

The number of portable players that can be registered

Up to 2 portable players can be registered in the system.
3-3. Using the Bluetooth® audio system
Bluetooth® audio system setup

- System setup items and operation procedures
  - Pattern A
    To enter the menu for each function, follow the steps below using a voice command or :
    (→P. 303)
  - Pattern B

  **STEP 1** Press to select “BT•A MENU”.

  **STEP 2** Select “System Setup” using .

  **STEP 3** Select one of the following items using :
  ● Setting voice guidance volume “Guidance Vol” (→P. 305)
  ● Displaying the Bluetooth® device address and name “Device Name” (→P. 305)
  ● Initializing the system “Initialize” (→P. 306)
The hands-free system is a function that allows you to use your mobile phone without touching it.

This system supports Bluetooth® mobile phones. Bluetooth® is a wireless data system that allows the mobile phone to wirelessly connect to the hands-free system and make/receive calls.

▶ Vehicles with a navigation system
Owners of models equipped with a navigation system should refer to the “Navigation System Owner's Manual”.

▶ Vehicles without a navigation system

## Conditions under which the system will not operate

- If using a mobile phone that does not support Bluetooth®
- If the mobile phone is switched off
- If you are outside service range
- If the mobile phone is not connected
- If the mobile phone’s battery is low
- If the mobile phone is behind the seat or in the glove box or console box
- If metal is covering or touching the phone

## When using the hands-free system

- The audio system and voice guidance are muted when making a call.
- If both parties speak at the same time, it may be difficult to hear.
- If the incoming call volume is overly loud, an echo may be heard.
- Try to face toward the microphone as much as possible when speaking.
- In the following circumstances, it may be difficult to hear the other party:
  - When driving on unpaved roads
  - When driving at high speeds
  - When a window is open
  - When the air conditioning is blowing directly on the microphone
  - When the air conditioning is set to high

## When transferring ownership of the vehicle

Be sure to initialize the system to prevent the personal data from being improperly accessed. (→P. 306)

## About Bluetooth®

Bluetooth is a registered trademark of Bluetooth SIG, Inc.
■ Compatible models

Compatible with HFP (Hands Free Profile) Ver. 1.0 or higher (Conformed: Ver. 1.5) and OPP (Object Push Profile) Ver. 1.1.

If your mobile phone does not support HFP, you cannot enter the Bluetooth® phone. If your mobile phone supports OPP alone, you cannot use the Bluetooth® phone.

■ Certification for the hands-free system

FCC ID: AJDK018
IC ID: 775E-K018
MADE IN JAPAN

This device complies with Part 15 of the FCC Rules and RSS-Gen and RSS-210 of IC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

⚠️ CAUTION

■ FCC WARNING

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Radio Frequency Radiation Exposure. This equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65. This equipment has very low levels of RF energy that it deemed to comply without maximum permissive exposure evaluation (MPE). But it is desirable that it should be installed and operated with at least 7.9 in. (20 cm) and more between the radiator and person’s body (excluding extremities: hands, wrists, feet and ankles).

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

■ Caution while driving

Do not use a mobile phone or connect the Bluetooth® phone.

3-4. Using the hands-free system (for mobile phone)

Operating the system using voice commands

By following voice guidance instructions output from the speaker, voice commands enable the operation of the hands-free system without the need to check the display or operate.

- Operation procedure when using voice commands
  Press the talk switch and follow voice guidance instructions.

- Auxiliary commands when using voice commands
  The following auxiliary commands can be used when operating the system using a voice command:

  - “Cancel”: Exits the hands-free system
  - “Repeat”: Repeats the previous voice guidance instruction
  - “Go back”: Returns to the previous procedure
  - “Help”: Reads aloud the function summary if a help comment is registered for the selected function
Using the hands-free system for the first time

Before using the hands-free system, it is necessary to register a mobile phone in the system. The system will enter phone registration mode automatically when starting the system with no mobile phone registered. Follow the procedure below to register (pair) a mobile phone:

**STEP 1** Press the off-hook switch or the talk switch.

The introductory guidance and phone name registration instructions are heard.

**STEP 2** Select “Pair Phone” using a voice command or .

**STEP 3** Register a phone name by either of the following methods.

a. Select “Record Name” by using , and say a name to be registered.

b. Press the talk switch and say a name to be registered.

A voice guidance instruction to confirm the input is heard.

**STEP 4** Select “Confirm” by using a voice command or .

A passkey is displayed and heard, and voice guidance instruction for inputting the passkey into the mobile phone is heard.

**STEP 5** Input the passkey into the mobile phone.

Refer to the manual that comes with the mobile phone for the operation of the phone.

Guidance for registration completion is heard.

If the mobile phone has a Bluetooth® audio player, the audio player can be registered at the same time. A voice guidance instruction to register a Bluetooth® audio player is heard.

3-4. Using the hands-free system (for mobile phone)

Making a phone call

- Making a phone call
  - Dialing by inputting a number
    “Dial by number”
  - Dialing by inputting a name
    “Dial by name”
  - Speed dialing
  - Dialing a number stored in the outgoing history memory
    “Redial”
  - Dialing a number stored in the incoming history memory
    “Call back”

- Receiving a phone call
  - Answering a phone call
  - Refusing a phone call

- Transferring a phone call

- Call waiting

- Using the call history memory
  - Dialing
  - Storing data in the phone book
  - Deleting

Dialing by inputting a number

**STEP 1** Press the talk switch and say “Dial by number”.

**STEP 2** Press the talk switch and say the phone number.
3-4. Using the hands-free system (for mobile phone)

**STEP 3** Dial by one of the following methods:
   a. Press the off-hook switch.
   b. Press the talk switch and say “Dial”.
   c. Select “Dial” by using .

**Dialing by inputting a name**

**STEP 1** Press the talk switch and say “Dial by name”.

**STEP 2** Select a registered name to be input by either of the following methods:
   a. Press the talk switch and say a registered name.
   b. Press the talk switch and say “List Names”. Press the talk switch when the desired name is read aloud.

**STEP 3** Dial by one of the following methods:
   a. Press the off-hook switch.
   b. Press the talk switch and say “Dial”.
   c. Select “Dial” by using .

**Speed dialing**

**STEP 1** Press the off-hook switch.

**STEP 2** Press the preset button in which the desired number is registered.

**STEP 3** Press the off-hook switch.
3-4. Using the hands-free system (for mobile phone)

### When receiving a phone call

- **Answering a phone call**
  
  Press the off-hook switch.

- **Refusing a phone call**
  
  Press the on-hook switch.

### Transferring a phone call

A call can be transferred between the mobile phone and system while dialing, receiving a call, or during a call. Use one of the following methods:

a. Operate the mobile phone.
   
   Refer to the manual that comes with the mobile phone for the operation of the phone.

b. Press the off-hook switch *1.

c. Press the talk switch and say “Call Transfer”*2.

*1: This operation can be performed only when transferring a call from the mobile phone to the system during a call.

*2: While the vehicle is in motion, a call cannot be transferred from the system to the mobile phone.

### Call waiting

When a call is interrupted by an incoming call from a third party, the following options will become available:

- **Answer the incoming call:** Press the off-hook switch. (Press the off-hook switch again as necessary to switch back and forth between calls.)

- **Refuse the incoming call:** Press the on-hook switch.
Using a call history memory

Follow the procedure below to use number stored in the call history memory:

**STEP 1** Press the talk switch and say “Redial” (when using a number stored in the outgoing history memory) or “Call back” (when using a number stored in the incoming history memory).

**STEP 2** Select the number by either of the following methods:
   a. Say “Previous” or “Go back” until the desired number is displayed.
   b. Select the desired number by using .

**STEP 3** The following operations can be performed:
   Dialing: Press the off-hook switch or select “Dial” by using a voice command or .
   Storing the number in the phone book: Select “Store” by using a voice command or
   Deleting: Select “Delete” by using a voice command or
■ Call waiting
● If your phone does not support HFP Ver. 1.5, this function cannot be used.
● Call waiting operation may differ depending on your mobile phone and service provider.

■ Call history
Up to 5 numbers can be stored in each of the outgoing and incoming history memories.

■ When talking on the phone
● Do not talk at the same time as with the other party.
● Keep the volume of the incoming voice down. Otherwise, voice echo will increase.
Registering a mobile phone in the hands-free phone system allows the system to function. The following function can be used for registered mobile phones:

## Functions and operation procedures

To enter menu for each function, follow the steps below by using a voice command or [ ]:

- **Registering a mobile phone**
  1. “Setup” → 2. “Phone Setup” → 3. “Pair Phone”

- **Selecting a mobile phone to be used**
  1. “Setup” → 2. “Phone Setup” → 3. “Connect Phone (Connect)"

- **Changing a registered name**
  1. “Setup” → 2. “Phone Setup” → 3. “Change Name”

- **Listing the registered mobile phones**

- **Changing the passkey**

- **Deleting a mobile phone**

### Registering a mobile phone

Select “Pair Phone” by using a voice command or [ ], and do the procedure for registering a mobile phone. (→P. 288)
Selecting a mobile phone to be used

**STEP 1** Select “Connect Phone (Connect)” using a voice command or .

- **Pattern A**

**STEP 2** Select a mobile phone to be used by either of the following methods, and select “Confirm” by using a voice command or .

  a. Press the talk switch and say the name of the desired mobile phone.
  b. Press the talk switch and say “List Names”. When the name of the desired mobile phone is read aloud, press the talk switch.

- **Pattern B**

**STEP 2** Select a mobile phone to be used by using .
Changing a registered name

**STEP 1** Select “Change Name” by using a voice command or .

**Pattern A**

**STEP 2** Select the name of the mobile phone to be changed by either of the following methods, and select “Confirm” using a voice command or :

a. Press the talk switch and say the name of the desired mobile phone.
b. Press the talk switch and say “List Names”. When the name of the desired mobile phone is read aloud, press the talk switch.

**Pattern B**

**STEP 2** Select the desired mobile phone name to be changed using .

**STEP 3** Press the talk switch or select “Record Name” using , and say the new name.

**STEP 4** Select “Confirm” using a voice command or .
3-4. Using the hands-free system (for mobile phone)

**Listing the registered mobile phones**

Selecting “List Names” by using a voice command or begins reading aloud the list of the registered mobile phones. When listing is complete, the system returns to “Phone Setup”.

Pressing the talk switch while the name of a mobile phone is being read aloud selects the mobile phone, and the following functions will become available:

- Selecting a mobile phone: “Connect Phone (Connect)”
- Changing a registered name: “Change Name”
- Deleting a mobile phone: “Delete Phone”

**Changing the passkey**

**STEP 1** Select “Set Passkey” by using a voice command or .

▶ Pattern A

**STEP 2** Press the talk switch, say a 4 to 8-digit number, and select “Confirm” using a voice command or .

▶ Pattern B

**STEP 2** Select a 4 to 8-digit number by using .

The number should be input 1 digit at a time.

**STEP 3** When the entire number to be registered as a passkey has been input, press once again.

If the number to be registered has 8 digits, pressing of the knob is not necessary.
### Deleting a registered mobile phone

**STEP 1** Select “Delete” by using a voice command or .

#### Pattern A

**STEP 2** Select a mobile phone to be deleted by either of the following methods and select “Confirm” using a voice command or :

a. Press the talk switch and say the name of the desired mobile phone.

b. Press the talk switch and say “List Names”. While the name of the desired mobile phone is being read aloud, press the talk switch.

#### Pattern B

**STEP 2** Select a desired mobile phone to be deleted using .

If the mobile phone to be deleted is paired as a Bluetooth® audio player, the registration of the audio player can be deleted at the same time. A voice guidance instruction to delete a Bluetooth® audio player is heard.

**STEP 3** Select “Yes” or “No” using a voice command or .

(Bluetooth® audio player → P. 263)

---

**The number of mobile phone that can be registered**

Up to 6 mobile phones can be registered in the system.
3-4. Using the hands-free system (for mobile phone)

Security and system setup

■ Security setting items and operation procedures
To enter the menu for each function, follow the steps below using a voice command or:

● Setting or changing the PIN (Personal Identification Number)

● Locking the phone book

● Unlocking the phone book

■ System setup items and operation procedure
To enter the menu for each function, follow the steps below using:

● Setting voice guidance volume

● Displaying the Bluetooth® device address and name

● Initializing the system
3-4. Using the hands-free system (for mobile phone)

Setting or changing the PIN

Setting a PIN

**STEP 1** Select “Set PIN” by using a voice command or .

**STEP 2** Enter a PIN by using a voice command or .

When using , input the code 1 digit at a time.

Changing the PIN

**STEP 1** Select “Set PIN” by using a voice command or .

**STEP 2** Enter the registered PIN using a voice command or .

**STEP 3** Enter a new PIN by using a voice command or .

When using , input the code 1 digit at a time.

Locking or unlocking the phone book

**STEP 1** Select “Phonebook lock (Phbk Lock)” or “Phonebook unlock (Phbk Unlock)” by using a voice command or .

**STEP 2** Input the PIN and select “Confirm” by using a voice command or .
Setting voice guidance volume

**STEP 1** Select “Guidance Vol” using 

**STEP 2** Change the voice guidance volume.

To decrease the volume: Turn 

To increase the volume: Turn 

Displaying the Bluetooth® device address and name

**STEP 1** Select “Device Name” using 

**STEP 2** Turn 

to display the Bluetooth® device address and name.

**STEP 3** Select “Go Back” using 
to return to “System Setup”.

3-4. Using the hands-free system (for mobile phone)
3-4. Using the hands-free system (for mobile phone)

Initializing the system

STEP 1] Select “Initialize” and then “Confirm” using .

STEP 2] Select “Confirm” by using again.

Initialization

■ The following data in the system can be initialized:
  • Phone book
  • Outgoing and incoming call history
  • Speed dials
  • Registered mobile phone data
  • Security code
  • Registered Bluetooth® enabled portable player data
  • Passkey for the mobile phones
  • Passkey for the Bluetooth® audio players
  • Guidance volume
  • Receiver volume
  • Ring tone volume

■ Once the initialization has been completed, the data cannot be restored to its original state.

■ When the phone book is locked

The following functions cannot be used:

■ Dialing by inputting a name
■ Speed dialing
■ Dialing a number stored in the call history memory
■ Using the phone book
3-4. Using the hands-free system (for mobile phone)

Using the phone book

To enter the menu for each function, follow the steps below using a voice command or .

- Adding a new phone number
  1. “Phonebook” → 2. “Add Entry”

- Changing the registered name in the phone book
  1. “Phonebook” → 2. “Change Name”

- Listing the registered data

- Setting speed dials
  1. “Phonebook” → 2. “Set Speed Dial (Speed Dial)”

- Deleting the registered data

- Deleting speed dials
  1. “Phonebook” → 2. “Delete Speed Dial (Del Spd Dial)”

### Adding a new phone number

The following methods can be used to add a new phone number:

- Inputting a phone number by using a voice command
- Transferring data from the mobile phone
- Inputting a phone number using
- Selecting a phone number from outgoing or incoming history

**Adding procedure**

**STEP 1** Select “Add Entry” by using a voice command or .
Use one of the following methods to input a telephone number:

**Inputting a telephone number using a voice command**

**STEP2-1** Select “By Voice” using a voice command or .

**STEP2-2** Press the talk switch, say the desired number, and select “Confirm” using a voice command.

**Transferring data from the mobile phone**

**STEP2-1** Select “By Phone” and then “Confirm” by using a voice command or .

**STEP2-2** Transfer the data from the mobile phone.
Refer to the manual that comes with the mobile phone for the details of transferring data.

**STEP2-3** Select the data to be registered by either of the following methods:

a. Say “Previous” or “Next” until the desired data is displayed, and select “Confirm” using a voice command.

b. Select the desired data using .

**Inputting a phone number using**

**STEP2-1** Select “Manual Input” using .

**STEP2-2** Input a phone number using , and press again.
Input the phone number 1 digit at a time.
Selecting a phone number from the outgoing or incoming call history:

**STEP 2-1** Select “Call History” using a voice command or .

**STEP 2-2** Select “Outgoing” or “Incoming” using a voice command or .

**STEP 2-3** Select the data to be registered by either of the following methods:

a. Say “Previous” or “Go back” until the desired data is displayed, and select “Confirm” using a voice command.

b. Select the desired data using .

**STEP 3** Select the name to be registered by either of the following methods, and select “Confirm” using a voice command or :

a. Press the talk switch and say the desired name.

b. Select “Record Name” using , and say the desired name.

**STEP 4** Select “Confirm” using a voice command or again.

In **STEP 4**, selecting “Set Speed Dial (Speed Dial)” instead of “Confirm” registers the newly added phone number as speed dial.
Changing a registered name in the phone book

**STEP 1** Select “Change Name” using a voice command or  .

- **Pattern A**

**STEP 2** Select the name to be changed by either of the following methods, and select “Confirm” using a voice command or :

  a. Press the talk switch, say the desired name.
  b. Press the talk switch, and say “List Names”. When the desired name is read aloud, press the talk switch.

- **Pattern B**

**STEP 2** Select the desired name to be changed using .

**STEP 3** Press the talk switch or select “Record Name” using , and say the new name.

**STEP 4** Select “Confirm” using a voice command or .
3-4. Using the hands-free system (for mobile phone)

**Listing the registered data**

Select “List Names” using a voice command or . The list of the registered data will be read aloud.

When listing is complete, the system returns to “Phonebook”. Pressing the talk switch while a data is being read aloud selects the data, and the following function will be available.

- Dialing: “Dial”
- Changing a registered name: “Change Name”
- Deleting an entry: “Delete Entry”
- Setting speed dial: “Set Speed Dial (Speed Dial)”

**Setting speed dial**

**STEP 1** Select “Set Speed Dial (Speed Dial)” using a voice command or .

**Pattern A**

**STEP 2** Select the data to be registered as a speed dial by either of the following methods, and select “Confirm” using a voice command or :

a. Press the talk switch, say the desired name.
b. Press the talk switch, and say “List Names”. When the desired name is read aloud, press the talk switch.
Pattern B

**STEP 2** Select the desired data using .

**STEP 3** Select the desired preset button, and register the data into speed dial by either of the following methods:

a. Press the desired preset button and select “Confirm” by using a voice command or .

b. Press and hold the desired preset button.

**Deleting registered data**

**STEP 1** Select “Delete Entry” using a voice command or .

Pattern A

**STEP 2** Select data to be deleted by either of the following methods, and select “Confirm” using a voice command or :

a. Press the talk switch, and say the name of the desired phone number to be deleted.

b. Press the talk switch, say “List Names”. While the name of the desired phone number is being read aloud, press the talk switch.

Pattern B

**STEP 2** Select the desired data to be deleted using .
3-4. Using the hands-free system (for mobile phone)

### Deleting speed dial

**STEP 1** Select “Delete Speed Dial (Del Spd Dial)” using a voice command or .

**STEP 2** Press the preset button in which the desired speed dial is registered, and select “Confirm” using a voice command or .

### Limitation of number of digits

A phone number that exceeds 24 digits cannot be registered.
Your Lexus is equipped with the illuminated entry system to assist in entering the vehicle. Owing to the function of the system, the lights shown in the following illustration automatically turn on/off according to the presence of the electronic key, whether the doors are locked/unlocked, whether the doors are opened/closed, and the “ENGINE START STOP” switch mode.

1. Front personal lights (→ P. 316)
2. Front interior lights (→ P. 316)
3. Shift lever lighting
   This light turns on or off depending on the darkness of the surroundings when the “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.
4. Rear personal lights (→ P. 316)
5. Rear interior light (→ P. 316)
6. Door courtesy lights
7. Front foot well lighting
8. Outer foot lights
To prevent the battery from being discharged

If the following lights remain ON when the door is not fully closed and the door position is ON, the lights will go off automatically after 20 minutes.

- Interior lights
- Front personal lights
- Front foot well lighting
- Rear door courtesy lights

Customization that can be configured at Lexus dealer

Settings (e.g. The time elapsed before lights turn off) can be changed. (Customizable features → P. 517)
3-5. Using the interior lights

**Interior lights**

1. Front and rear interior lights ON/OFF
2. Door position ON/OFF
   The illuminated entry system is activated when the switch is in the locked position (the door position is on).

**Personal lights**

- **Front**
  1. ON/OFF

- **Rear**
  1. ON/OFF
3-6. Using the storage features

List of storage features

CAUTION

Items that should not be left in the storage spaces

Do not leave glasses, lighters or spray cans in the storage spaces, as this may cause the following when cabin temperature becomes high:

- Glasses may be deformed by heat or cracked if they come into contact with other stored items.
- Lighters or spray cans may explode. If they come into contact with other stored items, the lighter may catch fire or the spray can may release gas, causing a fire hazard.

1. Glove box
2. Overhead console
3. Cup holders
4. Console box
5. Auxiliary box
3-6. Using the storage features

Glove box

1. Open (push button)
2. Lock with the mechanical key
3. Unlock with the mechanical key

■ Glove box light
The glove box light turns on when the tail lights are turned on.

■ Trunk opener main switch
The trunk opener main switch is located in the glove box. (→ P. 44)

⚠️ CAUTION

■ Caution while driving
Keep the glove box closed.
Injuries may result in the event of an accident or sudden braking.
3-6. Using the storage features

Console box

Slide the armrest while pulling up the lever, and lift the armrest.

- Tray in the console box
  The tray slides forward/backward and can be removed.

- Console box light
  The console box light turns on when the tail lights are turned on.

⚠️ CAUTION

- Caution while driving
  Keep the console box closed.
  Injuries may result in the event of an accident or sudden braking.
The overhead console is useful for temporarily storing sunglasses and similar small items.

**CAUTION**

- **Caution while driving**
  
  Do not leave the overhead console open while driving. Items may fall out and cause injury.
Cup holders

► Front
To open, press down and release the front of the cup holder lid.

► Rear
3-6. Using the storage features

Cup holders

- Using the cup holder (front) to store small items
  Remove the holder.

- The cup holder (front) can be adjustable to the size of the cups or drink-cans
  Change the holder position.

⚠️ CAUTION

- **Items unsuitable for the cup holder**
  Do not place anything other than cups or aluminum cans in the cup holders. Other items may be thrown out of the holders in the event of an accident or sudden braking and cause injury. If possible, cover hot drinks to prevent burns.

- **When not in use**
  Keep the cup holders closed. Injuries may result in the event of an accident or sudden braking.
Auxiliary box

To open, press down the knob.

⚠️ CAUTION

Caution while driving

Keep the auxiliary box closed. In the event of sudden braking, personal injury may result from contact due to movement of the open auxiliary box or items that may come out of the auxiliary box.
3-7. Other interior features

Sun visors

1. Forward position:
   Flip down.

2. Side position:
   Flip down, unhook, and swing to the side.

3. Side extender:
   Place in side position, then slide backwards.
3-7. Other interior features

Vanity mirror

The light turns on when the cover is opened.
3-7. Other interior features

Clock

Without navigation system

1 Adjusts the hour.
2 Adjusts the minutes.
3 Rounds to the nearest hour.*
   *: e.g. 1:00 to 1:29 → 1:00
      1:30 to 1:59 → 2:00

With navigation system

1 Adjusts the hour.
2 Adjusts the minutes.
3 Rounds to the nearest hour.*
   *: e.g. 1:00 to 1:29 → 1:00
      1:30 to 1:59 → 2:00

---

The clock is displayed when

The “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.
Push the back part of the lid to open.
To remove, pull the ashtray upwards.

---

**CAUTION**

**When not in use**
Keep the ashtray closed.
Injuries may result in the event of sudden braking, sudden swerving or an accident.

**To prevent fire**
- Fully extinguish matches and cigarettes before putting them in the ashtray, then make sure the ashtray is fully closed.
- Do not place paper or any other type of flammable object in the ashtray.
The cigarette lighter can be used when
The “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.

CAUTION

To avoid burns or fires
- Do not touch the metal parts of the cigarette lighter.
- Do not hold the cigarette lighter down. It could overheat and cause a fire.
- Do not insert anything other than the cigarette lighter into the outlet.
3-7. Other interior features

Power outlet

The power outlet can be used for 12 V accessories that run on less than 10 A.

- The power outlet can be used when
  The “ENGINE START STOP” switch is in ACCESSORY or IGNITION ON mode.

⚠️ NOTICE

- To avoid damaging the power outlet
  Close the power outlet lid when the power outlet is not in use.
  Foreign objects or liquids that enter the power outlet may cause a short circuit.

- To prevent the fuse from being blown
  Do not use an accessory that uses more than 12 V 10 A.

- To prevent the battery from being discharged
  Do not use the power outlet longer than necessary when the engine is not running.
The seat heaters and ventilators can be used when
The “ENGINE START STOP” switch is in IGNITION ON mode.

When not in use
Set the dial to 0. The indicator light turns off.

⚠️ CAUTION

Burns

- Use caution when seating the following persons in a seat with the seat heater on to avoid the possibility of burns:
  - Babies, small children, the elderly, the sick and the disabled
  - Persons with sensitive skin
  - Persons who are fatigued
  - Persons who have taken alcohol or drugs that induce sleep (sleeping drugs, cold remedies, etc.)

- Do not cover the seat with anything when using the seat heater. Using the seat heater with a blanket or cushion increases the temperature of the seat and may lead to overheating.

*: If equipped
NOTICE

■ To prevent seat heater damage
   Do not put unevenly weighted objects on the seat and do not stick sharp objects (needles, nails, etc.) into the seat.

■ To prevent battery discharge
   Set the dial to 0 when the engine is not running.
The seat heaters and ventilators heat the seats and maintain good airflow by blowing air from the seats.

- **Heats the seats**
  The indicator light (orange) comes on. The higher the number, the warmer the seats become.

- **Blows air from the seats**
  The indicator light (green) comes on. The higher the number, the stronger the airflow becomes.

---

- **The seat heaters and ventilators can be used when**
  The “ENGINE START STOP” switch is in IGNITION ON mode.

- **When not in use**
  Set the dial to 0. The indicator light turns off.
### CAUTION

**Burns**
- Use caution when seating the following persons in a seat with the seat heater on to avoid the possibility of burns:
  - Babies, small children, the elderly, the sick and the disabled
  - Persons with sensitive skin
  - Persons who are fatigued
  - Persons who have taken alcohol or drugs that induce sleep (sleeping drugs, cold remedies, etc.)
- Do not cover the seat with anything when using the seat heater. Using the seat heater with a blanket or cushion increases the temperature of the seat and may lead to overheating.

### NOTICE

**To prevent seat heater damage**
- Do not put unevenly weighted objects on the seat and do not stick sharp objects (needles, nails, etc.) into the seat.

**To prevent battery discharge**
- Set the dial to 0 when the engine is not running.
3-7. Other interior features

Armrest

Pull the armrest down for use.

⚠️ NOTICE

- To prevent damage to the armrest
  Do not place too much strain on the armrest.
3-7. Other interior features

Rear sunshade*

The rear sunshade can be raised and lowered by operating the switch shown below.

► Type A

![Image of Type A switch](image1)

1 Raise/lower

► Type B

![Image of Type B switch](image2)

1 Raise/lower

*: If equipped
The rear sunshade can be used when
The “ENGINE START STOP” switch is in IGNITION ON mode.

Reverse operation feature
The rear sunshade automatically lowers when the shift lever is shifted into R. The rear sunshade rises when the shift lever is shifted out of R and vehicle speed reaches 9 mph (15 km/h).

When the reverse operation feature does not operate
The rear sunshade may not lower or rise automatically. In this case, press the switch to lower or raise the rear sunshade.

CAUTION

When the rear sunshade is being raised or lowered
Do not place fingers or other objects in the fastener section or in the opening. They may get caught, causing injury.

NOTICE

To prevent the battery from being discharged
Do not operate the rear sunshade when the engine is not running.

To ensure normal operation of the sunshade
Observe the following precautions.
● Do not place excessive load on the motor or other components.
● Do not place objects where they may hinder opening and closing operations.
● Do not attach items to the rear sunshade.
● Keep the opening clean and clear of obstructions.
● Do not operate the rear sunshade continuously over long periods of time.
Long objects can be loaded in the vehicle by utilizing the trunk space and rear seat area.

**STEP 1**
Pull down the armrest.

**STEP 2**
Open the armrest door.
The armrest door can be locked and unlocked using the mechanical key.

1. Unlock
2. Lock

**CAUTION**

- **When not in use**
  Ensure that the armrest door is closed.
  In the event of sudden braking, items stored in the trunk may be thrown forward into the cabin, resulting in injury.
3-7. Other interior features
Coat hooks

Pull out the hooks to hang coats or other soft items.

⚠️ CAUTION

- Items that must not be hung on the hook
  Do not hang a coat hanger or other hard or sharp object on the hook. If the SRS curtain shield airbags deploy, these items may become projectiles that cause death or serious injury.
3-7. Other interior features
Floor mat

Use only floor mats designed specifically for vehicles of the same model and model year as your vehicle. Fix them securely in place onto the carpet.

Fix the floor mat in place using the retaining hooks (clips) provided.

For details, refer to the floor mat retention clip installation instructions supplied with the clips.

⚠️ CAUTION

Observe the following precautions. Failure to do so may cause the driver’s floor mat to slip, possibly interfering with the pedals while driving. An unexpectedly high speed may result or it may become difficult to stop the vehicle, leading to a serious accident.

■ When installing the driver’s floor mat
  ● Do not use floor mats designed for other models or different model year vehicles, even if they are Lexus Genuine floor mats.
  ● Only use floor mats designed for the driver’s seat.
  ● Always install the floor mat securely using the retaining hooks (clips) provided.
  ● Do not use two or more floor mats on top of each other.
  ● Do not place the floor mat bottom-side up or upside-down.
CAUTION

Before driving

• Check that the floor mat is securely fixed in the right place with all the provided retaining hooks (clips). Be especially careful to perform this check after cleaning the floor.

• With the engine stopped and the shift lever in P, fully depress each pedal to the floor to make sure it does not interfere with the floor mat.
3-7. Other interior features

Trunk features

■ Cargo hooks

Cargo hooks are provided for securing loose items.

■ Grocery bag hooks

■ Luggage mat

Pull the lever upwards when lifting the luggage mat up.
3-7. Other interior features

The lever can be hooked on the edge of the trunk.

The garage door opener can be programmed to operate garage doors, gates, entry doors, door locks, home lighting systems, and security systems, and other devices.

The garage door opener (HomeLink® Universal Transceiver) is manufactured under license from HomeLink®.

**Programming the HomeLink®**

The HomeLink® compatible transceiver in your vehicle has 3 buttons which can be programmed to operate 3 different devices. Refer to the programming method below appropriate for the device.

1. **Buttons**
2. **Indicator**

### Programming the HomeLink® (for U.S.A. owners)

**STEP 1**

Point the remote control transmitter for the device 1 to 3 in. (25 to 75 mm) from the HomeLink® buttons.

Keep the HomeLink® indicator light in view while programming.
Press and hold one of the HomeLink® buttons and the transmitter button. When the HomeLink® indicator light changes from a slow to a rapid flash, you can release both buttons.

If the HomeLink® indicator light comes on but does not flash, flashes rapidly for 2 seconds and remains lit, the HomeLink® button is already programmed. Use the other buttons or follow the “Reprogramming a HomeLink® button” instructions. (→P. 346)

Test the HomeLink® operation by pressing the newly programmed button.

If a HomeLink® button has been programmed for a garage door, check to see if the garage door opens and closes. If the garage door does not operate, see if your remote control transmitter is of the rolling code type. Press and hold the programmed HomeLink® button. The remote control transmitter is of the rolling code type if the HomeLink® indicator light flashes rapidly for 2 seconds and then remains lit. If your transmitter is of the rolling code type, proceed to the heading “Programming a rolling code system”.

Repeat the steps above to program another device for each of the remaining HomeLink® buttons.
Programming a Rolling Code system (for U.S.A. owners)

If your device is Rolling Code equipped, follow the steps under the heading “Programming the HomeLink®” before proceeding with the steps listed below.

**STEP 1** Locate the learn button on the ceiling mounted garage door opener motor. The exact location and color of the button may vary by brand of garage door opener motor.

Refer to the operation manual supplied with the garage door opener motor for the location of the learn button.

**STEP 2** Press the learn button.

Following this step, you have 30 seconds in which to initiate step 3 below.

**STEP 3** Press and hold the vehicle’s programmed HomeLink® button for 2 seconds and release it. Repeat this step once again. The garage door may open.

If the garage door opens, the programming process is complete. If the door does not open, press and release the button a third time. This third press and release will complete the programming process by opening the garage door.

The ceiling mounted garage door opener motor should now recognize the HomeLink® transceiver and operate the garage door.

**STEP 4** Repeat the steps above to program another rolling code system for any of the remaining HomeLink® buttons.

Programming an entry gate (for U.S.A. owners)/Programming all devices in the Canadian market

**STEP 1** Place your transmitter 1 to 3 in. (25 to 75 mm) away from the surface of the HomeLink®.

Keep the HomeLink® indicator light in view while programming.

**STEP 2** Press and hold the selected HomeLink® button.

**STEP 3** Repeatedly press and release (cycle) the device’s remote control button for two seconds each until step 4 is complete.

**STEP 4** When the indicator light on the HomeLink® compatible transceiver start to flashing rapidly, release the buttons.
Test the operation of the HomeLink® by pressing the newly programmed button. Check to see if the gate/device operates correctly.

Repeat the steps above to program another device for each of the remaining HomeLink® buttons.

■ Programming other devices
To program other devices such as home security systems, home door locks or lighting, contact your authorized Lexus dealer for assistance.

■ Reprogramming a button
The individual HomeLink® buttons cannot be erased but can be reprogrammed. To reprogram a button, follow the “Reprogramming a HomeLink® button” instructions.

Operating the HomeLink®
Press the appropriate HomeLink® button. The HomeLink® indicator light should come on.

The HomeLink® compatible transceiver in your vehicle continues to send a signal for up to 20 seconds as long as the button is pressed.

Reprogramming a HomeLink® button
Press and hold the desired HomeLink® button. After 20 seconds, the HomeLink® indicator light will start flashing slowly. Next, while still pressing and holding the HomeLink® button, press and hold the button on the transmitter until the HomeLink® indicator light changes from a slow to a rapid flash.
### Erasing the entire HomeLink® memory (all three programs)

Press and hold the 2 outside buttons for 10 seconds until the indicator light flashes.

If you sell your vehicle, be sure to erase the programs stored in the HomeLink® memory.

### Before programming

- Install a new battery in the remote control transmitter.
- The battery side of the remote control transmitter must be pointed away from the HomeLink® button.

### Certification for the garage door opener

For vehicles sold in the U.S.A.

FCC ID: CB2070AHL4

**NOTE:**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**FCC WARNING:**

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

For vehicles sold in Canada

**NOTE:**

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

### When support is necessary

Visit on the web at [www.homelink.com](http://www.homelink.com) or call 1-800-355-3515.
CAUTION

■ When programming a garage door or other remote control device
The garage door on other devices may operate, so ensure people and objects are out of danger to prevent potential harm.

■ Conforming to federal safety standards
Do not use the HomeLink® Compatible Transceiver with any garage door opener or device that lacks safety stop and reverse features as required by federal safety standards. This includes any garage door that cannot detect an obstruction object. A door or device without these features increases the risk of death or serious injury.
3-7. Other interior features

Compass *

The compass on the inside rear view mirror indicates the direction in which the vehicle is heading.

**Operation**

To turn the compass on or off, push and hold “AUTO” for 3 seconds.

**Displays and directions**

<table>
<thead>
<tr>
<th>Display</th>
<th>Direction</th>
</tr>
</thead>
<tbody>
<tr>
<td>N</td>
<td>North</td>
</tr>
<tr>
<td>NE</td>
<td>Northeast</td>
</tr>
<tr>
<td>E</td>
<td>East</td>
</tr>
<tr>
<td>SE</td>
<td>Southeast</td>
</tr>
<tr>
<td>S</td>
<td>South</td>

</tr>
<tr>
<td>NW</td>
<td>Northwest</td>
</tr>
</tbody>
</table>

*: If equipped
The direction display deviates from the true direction determined by the earth’s magnetic field. The amount of deviation varies according to the geographic position of the vehicle.

If you cross over a map boundary shown in illustration, the compass will deviate.
To obtain higher precision or perfect calibration, refer to the following.

**Deviation calibration**

**STEP 1** Stop the vehicle where it is safe to drive in a circle.

**STEP 2** Push and hold “AUTO” for 6 seconds.

A number (1 to 15) appears on the compass display.
3-7. Other interior features

Press “AUTO”, and referring to the map above, select the number of the zone where you are.

If the direction is displayed several seconds after adjustment, the calibration is complete.

■ Circling calibration

STEP 1 Stop the vehicle where it is safe to drive in a circle.

Push and hold “AUTO” for 9 seconds.

C appears on the compass display.

STEP 2

Drive the vehicle at 5 mph (8 km/h) or less in a circle until a direction is displayed.

If there is not enough space to drive in a circle, drive around the block until the direction is displayed.
### Conditions unfavorable to correct operation

The compass may not show the correct direction in the following conditions:

- The vehicle is stopped immediately after turning.
- The vehicle is on an inclined surface.
- The vehicle is in a place where the earth’s magnetic field is subject to interference by artificial magnetic fields (underground car park/parking lot, under a steel tower, between buildings, roof car park/parking lot, near an intersection, near a large vehicle, etc.).
- The vehicle has become magnetized. (There is a magnet or metal object near the inside rear view mirror.)
- The battery has been disconnected.
- A door is open.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| **While driving the vehicle**  
Do not adjust the display. Be sure to adjust the display only when the vehicle is stopped. |
| **When doing the circling calibration**  
Be sure to secure a wide space, and watch out for people and vehicles in the neighborhood. Do not violate any local traffic rules while performing circling calibration. |

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| **To avoid compass malfunctions**  
Do not place magnets or any metal objects near the inside rear view mirror. Doing this may cause a malfunction of the compass sensor. |
| **To ensure normal operation of the compass**  
- Do not perform circling calibration of the compass in a place where the earth’s magnetic field is subject to interference by artificial magnetic fields.  
- During calibration, do not operate electric systems (moon roof, power windows, etc.) as they may interfere with the calibration. |
Safety Connect is a subscription-based telematics service that uses Global Positioning System (GPS) data and embedded cellular technology to provide safety and security features to subscribers. Safety Connect is supported by Lexus’ designated response center, which operates 24 hours per day, 7 days per week.

Safety Connect service is available by subscription on select, telematics hardware-equipped vehicles.

By using the Safety Connect service, you are agreeing to be bound by the Telematics Subscription Service Agreement and its Terms and Conditions, as in effect and amended from time to time, a current copy of which is available at Lexus.com. All use of the Safety Connect service is subject to such then-applicable Terms and Conditions.

- **System components**

  1. “SOS” button
  2. Microphone
  3. LED light indicators
## Services

Subscribers have the following Safety Connect services available:

- **Automatic Collision Notification***
  Helps drivers receive necessary response from emergency service providers. (→P. 356)
  

- **Stolen Vehicle Location**
  Helps drivers in the event of vehicle theft. (→P. 357)

- **Emergency Assistance Button (SOS)**
  Connects drivers to response-center support. (→P. 357)

- **Enhanced Roadside Assistance**
  Provides drivers various on-road assistance. (→P. 357)

## Subscription

After you have signed the Telematics Subscription Service Agreement and are enrolled, you can begin receiving services.

A variety of subscription terms is available for purchase. Contact your Lexus dealer, call 1-800-25-LEXUS (1-800-255-3987) or push the “SOS” button in your vehicle for further subscription details.
■ Safety Connect Services Information

● Phone calls using the vehicle’s Bluetooth® technology will not be possible during Safety Connect.

● Safety Connect is available beginning Fall 2009 on select Lexus models. Contact with the Safety Connect response center is dependent upon the telematics device being in operative condition, cellular connection availability, and GPS satellite signal reception, which can limit the ability to reach the response center or receive emergency service support. Enrollment and Telematics Subscription Service Agreement required. A variety of subscription terms is available; charges vary by subscription term selected.

● Safety Connect services will function in the United States, including Hawaii and Alaska, and in Canada. The services will not function outside of the United States in countries other than Canada. For details about the service, contact your Lexus dealer.

● Safety Connect services are not subject to section 255 of the Telecommunications Act and the device is not TTY compatible.

■ Languages

The Safety Connect response center will offer support in multiple languages. The Safety Connect system will offer voice prompts in English and Spanish. Please indicate your language of choice when enrolling.

■ When contacting the response center

You may be unable to contact the response center if the network is busy.
### Safety Connect LED light Indicators

When the “ENGINE START STOP” switch is turned to IGNITION ON mode, the red indicator light comes on for 2 seconds then turns off. Afterward, the green indicator light comes on, indicating that the service is active.

The following indicator light patterns indicate specific system usage conditions:

- Green indicator light on = Active service
- Green indicator light flashing = Safety Connect call in process
- Red indicator light (except at vehicle start-up) = System malfunction (contact your Lexus dealer)
- No indicator light (off) = Safety Connect service not active

### Safety Connect services

- **Automatic Collision Notification**

  In case of either airbag deployment or severe rear-end collision, the system is designed to automatically call the response center. The responding agent receives the vehicle’s location and attempts to speak with the vehicle occupants to assess the level of emergency. If the occupants are unable to communicate, the agent automatically treats the call as an emergency, contacts the nearest emergency services provider to describe the situation, and requests that assistance be sent to the location.
Stolen Vehicle Location

If your vehicle is stolen, Safety Connect can work with local authorities to assist them in locating and recovering the vehicle. After filing a police report, call the Safety Connect response center at 1-800-25-LEXUS (1-800-255-3987) and follow the prompts for Safety Connect to initiate this service.

In addition to assisting law enforcement with recovery of a stolen vehicle, Safety-Connect-equipped vehicle location data may, under certain circumstances, be shared with third parties to locate your vehicle. Further information is available at Lexus.com.

Emergency Assistance Button (“SOS”)

In the event of an emergency on the road, push the “SOS” button to reach the Safety Connect response center. The answering agent will determine your vehicle's location, assess the emergency, and dispatch the necessary assistance required.

If you accidentally press the “SOS” button, tell the response-center agent that you are not experiencing an emergency.

Enhanced Roadside Assistance

Enhanced Roadside Assistance adds GPS data to the already included warranty-based Lexus roadside service.

Subscribers can press the “SOS” button to reach a Safety Connect response-center agent, who can help with a wide range of needs, such as: towing, flat tire, fuel delivery, etc. For a description of the Enhanced Roadside Assistance services and their limitations, please see the Safety Connect Terms and Conditions, which are available at Lexus.com.
Important! Read this information before using Safety Connect.

**Exposure to radio frequency signals**

The Safety Connect system installed in your vehicle is a low-power radio transmitter and receiver. It receives and also sends out radio frequency (RF) signals.

In August 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for mobile wireless phones. Those guidelines are consistent with the safety standards previously set by the following U.S. and international standards bodies.

- ICNIRP (International Commission on Non-Ionizing Radiation Protection) [1996]

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. Over 120 scientists, engineers, and physicians from universities, and government health agencies and industries reviewed the available body of research to develop the ANSI Standard (C95.1).

The design of Safety Connect complies with the FCC guidelines in addition to those standards.

Cleaning and protecting the vehicle exterior

Perform the following to protect the vehicle and maintain it in prime condition.

- Working from top to bottom, liberally apply water to the vehicle body, wheel wells and underside of the vehicle to remove any dirt and dust.
  Wash the vehicle body using a sponge or soft cloth, such as a chamois.

- For hard-to-remove marks, use car wash soap and rinse thoroughly with water.

- Wipe away any water.

- Wax the vehicle when the waterproof coating deteriorates.
  If water does not bead on a clean surface, apply wax when the vehicle body is cool.

- **Automatic car washes**
  - Fold the mirrors back before washing the vehicle.
  - Brushes used in automatic car washes may scratch the vehicle surface and harm your vehicle’s paint.

- **High pressure car washes**
  - Do not allow the nozzles of the car wash to come within close proximity of the windows.
  - Before car wash, check that the fuel filler door on your vehicle is closed properly.

- **Touch-up paint (if equipped)**
  Touch-up paint may be used to cover small chips or scratches.
  Apply the paint soon after the damage occurs or corrosion may set in. To apply the touch-up paint so it is hardly noticeable the trick is to apply it only to the bare spots. Apply only the smallest amount possible and do not paint the surface around the scratch or chip.
- **Aluminum wheels**
  - Remove any dirt immediately by using a neutral detergent. Do not use hard brushes or abrasive cleaners. Do not use strong or harsh chemical cleaners. Use the same mild detergent and wax as used on the paint.
  - Do not use detergent on the wheels when they are hot, for example after driving for long distance in the hot weather.
  - Wash detergent from the wheels immediately after use.

- **Bumpers and side moldings**
  Do not scrub with abrasive cleaners.

---

⚠ **CAUTION**

- **Caution about the exhaust pipe**
  Exhaust gasses cause the exhaust pipe to become quite hot.
  When washing the vehicle, be careful not to touch the pipe until it has cooled sufficiently, as touching a hot exhaust pipe can cause burns.
**NOTICE**

- To prevent paint deterioration and corrosion on the body and components (aluminum wheels etc.)
  - Wash the vehicle immediately in the following cases:
    - After driving near the sea coast
    - After driving on salted roads
    - If coal tar or tree sap is present on the paint surface
    - If dead insects, insect droppings or bird droppings are present on the paint surface
    - After driving in an area contaminated with soot, oily smoke, mine dust, iron powder or chemical substances
    - If the vehicle becomes heavily soiled with dust or mud
    - If liquids such as benzene and gasoline are spilled on the paint surface
  - If the paint is chipped or scratched, have it repaired immediately.
  - To prevent the wheels from corroding, remove any dirt and store in a place with low humidity when storing the wheels.

- Cleaning the exterior lights
  - Wash carefully. Do not use organic substances or scrub with a hard brush. This may damage the surfaces of the lights.
  - Do not apply wax on the surfaces of the lights. Wax may cause damage to the lenses.

- When using an automatic car wash
  
  Set the wiper switch to the off position. If the wiper switch is in “AUTO”, the wipers may operate and the wiper blades may be damaged.
Cleaning and protecting the vehicle interior

The following procedures will help protect your vehicle's interior and keep it in top condition:

■ Protecting the vehicle interior
  Remove dirt and dust using a vacuum cleaner. Wipe dirty surfaces with a cloth dampened with lukewarm water.

■ Cleaning the leather areas
  ● Remove dirt and dust using a vacuum cleaner.
  ● Wipe any excess dirt and dust with a soft cloth dampened with diluted detergent.
    Use a diluted water solution of approximately 5% neutral wool detergent.
  ● Wring out any excess water from the cloth and thoroughly wipe off all remaining traces of detergent.
  ● Wipe the surface with a dry, soft cloth to remove any remaining moisture. Allow the leather to dry in shaded and ventilated area.

■ Synthetic leather areas
  ● Remove loose dirt using a vacuum cleaner.
  ● Apply a mild soap solution to the synthetic leather using a sponge or soft cloth.
  ● Allow the solution to soak in for a few minutes. Remove the dirt and wipe off the solution with a clean, damp cloth.
■ Caring for leather areas

Lexus recommends cleaning the interior of the vehicle at least twice a year to maintain the quality of the vehicle’s interior.

■ Shampooing the carpets

There are several commercial foaming-type cleaners available. Use a sponge or brush to apply the foam. Rub in overlapping circles. Do not apply water. The excellent results are obtained by keeping the carpet as dry as possible.

■ Seat belts

Clean with mild soap and lukewarm water using a cloth or sponge. Also check the belts periodically for excessive wear, fraying or cuts.

⚠️ CAUTION

■ Water in the vehicle

● Do not splash or spill liquid in the vehicle. Doing so may cause electrical components etc. to malfunction or catch fire.

● Do not get any of the SRS components or wiring in the vehicle interior wet. (→P. 86) Electrical malfunction may cause the airbags to deploy or not function properly, resulting in death or severe injury.

■ Cleaning the interior (especially instrument panel)

Do not use polish wax or polish cleaner. The instrument panel may reflect off the windshield, obstructing the driver’s view and leading to an accident, resulting in death or serious injury.
## NOTICE

### Cleaning detergents
- Do not use the following types of detergent, as they may discolor the vehicle interior or cause streaks or damage to painted surfaces.
  - Non-seat portions: Organic substances such as benzene or gasoline, alkaline or acidic solutions, dye, or bleach.
  - Seats: Acidic solutions, such as thinner, benzene, or alcohol.
- Do not use polish wax or polish cleaner. The instrument panel’s or other interior part’s painted surface may be damaged.

### Preventing damage to leather surfaces
Observe the following precautions to avoid damage to and deterioration of leather surfaces.
- Remove any dust or dirt on leather surfaces immediately.
- Do not expose the vehicle to direct sunlight for extended periods of time. Park the vehicle in the shade, especially during summer.
- Do not place items made of vinyl, plastic, or that contain wax on the upholstery, as they may stick to the leather surface if the vehicle interior heats up significantly.

### Water on the floor
Do not wash the vehicle floor with water. Vehicle systems such as the audio system may be damaged if water comes into contact with electrical components under the floor of the vehicle, and may also cause the body to rust.

### Cleaning the inside of the rear window
- Do not use glass cleaner to clean the rear window, as this may cause damage to the rear window defogger heater wires. Use a cloth dampened with lukewarm water to gently wipe the window clean. Wipe the window in strokes running parallel to the heater wires or antenna.
- Be careful not to scratch or damage the heater wires or antenna.
To ensure safe and economical driving, day-to-day care and regular maintenance is essential. It is the owner’s responsibility to perform regular checks. Lexus recommends the following maintenance.

■ **General maintenance**

  Should be performed on a daily basis. This can be done by yourself or by a Lexus dealer.

■ **Scheduled maintenance**

  Should be performed at specified intervals according to the maintenance schedule.

  For details about maintenance items and schedules, refer to the “Warranty and Services Guide/Owner’s Manual Supplement/Scheduled Maintenance”.

■ **Do-it-yourself maintenance**

  You can perform some maintenance procedures yourself. Please be aware that do-it-yourself maintenance may affect warranty coverage.

  The use of Lexus Repair Manuals is recommended.

  For details about warranty coverage, see the separate “Owner’s Guide”, “Warranty and Services Guide”, “Owner’s Manual Supplement” or “Warranty Booklet”.

■ **Repair and replacement**

  It is recommended that genuine Lexus parts be used for repair to ensure performance of each system. If non-Lexus parts are used in replacement or if a repair shop other than a Lexus dealer performs repairs, confirm the warranty coverage.
Allow inspection and repairs to be performed by a Lexus dealer

- Lexus technicians are well-trained specialists and are kept up to date with the latest service information. They are well informed about the operations of all systems on your vehicle.
- Keep a copy of the repair order. It proves that the maintenance that has been performed is under warranty coverage. If any problem should arise while your vehicle is under warranty, your Lexus dealer will promptly take care of it.

**CAUTION**

Warning in handling of battery

- Engine exhaust, some of its constituents, and a wide variety of automobile components contain or emit chemicals known to the State of California to cause cancer and birth defects and other reproductive harm. Work in a well ventilated area.
- Oils, fuels and fluids contained in vehicles as well as waste produced by component wear contain or emit chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Avoid exposure and wash any affected area immediately.
- Battery posts, terminals and related accessories contain lead and lead compounds which are known to cause brain damage. Wash your hands after handling. (→P. 391)

| Tire          | • Inflation pressure is correct?  
          | • Tire surfaces not worn or damaged?  
          | • Tires rotated according to the maintenance schedule?  
          | • Wheel nuts are not loose?        |

⚠️ **CAUTION**

**If the engine is running**

Turn the engine off and ensure that there is adequate ventilation before performing maintenance checks.
Some states have vehicle emission inspection programs which include OBD (On Board Diagnostics) checks. The OBD system monitors the operation of the emission control system.

- **If the malfunction indicator lamp comes on**
  The OBD system determines that a problem exists somewhere in the emission control system. Your vehicle may not pass the I/M test and may need to be repaired. Contact your Lexus dealer to service the vehicle.

- **Your vehicle may not pass the I/M test:**
  - When the battery is disconnected or discharged
    Readiness codes that are set during ordinary driving are erased. Also, depending on your driving habits, the readiness codes may not be completely set.
  - When the fuel tank cap is loose
    The malfunction indicator lamp comes on as a temporary malfunction and your vehicle may not pass the I/M test.

- **When the malfunction indicator lamp goes off after several driving trips**
  The error code in the OBD system will not be cleared unless the vehicle is driven 40 or more times.

- **If your vehicle does not pass the I/M test**
  Contact your Lexus dealer to prepare the vehicle for re-testing.
If you perform maintenance yourself, be sure to follow the correct procedure given in these sections.

CAUTION

The engine compartment contains many mechanisms and fluids that may move suddenly, become hot, or become electrically energized. To avoid death or serious injury.

■ When working on the engine compartment:
  ● Keep hands, clothing, and tools away from the moving fan and engine drive belt.
  ● Be careful not to touch the engine, radiator, exhaust manifold, etc. right after driving as they may be hot. Oil and other fluids may also be hot.
  ● Do not leave anything that may burn easily, such as paper or rags, in the engine compartment.
  ● Do not smoke, cause sparks or expose an open flame to fuel or the battery. Fuel and battery fumes are flammable.
  ● Be extremely cautious when working on the battery. It contains poisonous and corrosive sulfuric acid.
  ● Take care because brake fluid can harm your hands or eyes and damage painted surfaces.
    If fluid gets on your hands or in your eyes, flush the affected area with clean water immediately.
    If you still experience discomfort, see a doctor.

■ When working near the electric cooling fan or radiator grille:
  Be sure the “ENGINE START STOP” switch is OFF.
  With the “ENGINE START STOP” switch in IGNITION ON mode, the electric cooling fan may automatically start to run if the air conditioning is on and/or the coolant temperature is high. (→P. 388)

■ Safety glasses
  Wear safety glasses to prevent flying or falling material, fluid spray, etc. from getting in the eyes.
### NOTICE

- **If you remove the air cleaner:**
  
  Driving with the air filter removed may cause excessive engine wear due to dirt in the air. Also a backfire could cause a fire in the engine compartment.
  
- **If the fluid level is low or high**
  
  It is normal for the brake fluid level to go down slightly as the brake pads wear or when the fluid level in the accumulator is high. If the reservoir needs frequent refilling, it may indicate a serious problem.
Release the lock from the inside of the vehicle to open the hood.

Pull the hood release lever.

The hood will pop up slightly.

Lift the hood catch and lift the hood.

**CAUTION**

■ Pre-driving check

Check that the hood is fully closed and locked.
If the hood is not locked properly it may open while the vehicle is in motion and cause an accident, which may result in death or serious injury.
When raising your vehicle with a floor jack, position the jack correctly. Improper placement may damage your vehicle or cause injury.

- **Front**

- **Rear**
4-3. Do-it-yourself maintenance

**CAUTION**

- **When raising your vehicle:**
  Make sure to observe the following to reduce the possibility of death or serious injury.

  - Lift up the vehicle using a floor jack such as the one shown in the illustration.

  - When using a floor jack, follow the instructions of the manual provided with the jack.
  - Do not use the jack that was supplied with your vehicle.
  - Do not put any part of your body or get underneath the vehicle supported only by the floor jack.
  - Always use floor jack and/or automotive jack stands on a solid, flat, level surface.
  - Do not start the engine while the vehicle is supported by the floor jack.
  - Stop the vehicle on level firm ground, firmly set the parking brake and put the shift lever in P.
  - Make sure to set the floor jack properly at the jack point.
    Raising the vehicle with an improperly positioned floor jack will damage the vehicle and may cause the vehicle to fall off the floor jack.
  - Do not raise the vehicle while someone is in the vehicle.
  - When raising the vehicle, do not place any objects on top of or underneath the floor jack.
4-3. Do-it-yourself maintenance

Engine compartment cover

■ Removing the engine compartment cover
  ► Front

► Right-hand side

When installing the cover, make sure that the engine coolant reservoir hose positioned as shown in the illustration.

► Left-hand side
### Installing the clips

1. Press the tip of the clip against a hard surface, such as a desk, to allow the center part of the clip to be pushed up.
2. Insert
3. Press

### Engine oil

With the engine at operating temperature and turned off, check the oil level on the dipstick.

#### Checking the engine oil

1. **STEP 1** Park the vehicle on level ground. After turning off the engine, wait more than five minutes for the oil to drain back into the bottom of the engine.

2. **STEP 2** Hold a rag under the end and pull the dipstick out.

3. **STEP 3** Wipe the dipstick clean.

4. **STEP 4** Reinsert the dipstick fully.

5. **STEP 5** Holding a rag under the end, pull the dipstick out and check the oil level.
STEP 6  Wipe the dipstick and reinsert it fully.

1 Low
2 Full

Adding engine oil

If the oil level is below or near the low level mark, add engine oil of the same type as already in the engine.

Make sure to check the oil type and prepare the items needed before adding oil.

<table>
<thead>
<tr>
<th>Engine oil selection</th>
<th>→ P. 495</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oil quantity (Low → Full)</td>
<td>1.6 qt. (1.5 L, 1.3 Imp. qt.)</td>
</tr>
<tr>
<td>Items</td>
<td>Clean funnel</td>
</tr>
</tbody>
</table>

STEP 1 Remove the oil filler cap.
STEP 2 Add engine oil slowly, checking the dipstick.
STEP 3 Install the filler cap, turning it clockwise.
- **Engine oil consumption**
  - The amount of engine oil consumed depends on the oil viscosity, the quality of the oil and the way the vehicle is driven.
  - More oil is consumed under driving conditions such as high speeds and frequent acceleration and deceleration.
  - A new engine consumes more oil.
  - When judging the amount of oil consumption, keep in mind that the oil may have become diluted, making it difficult to judge the true level accurately.
  - Oil consumption: Max. 1.1 qt./600 miles, 0.9 lmp. qt./600 miles (1.0 L per 1000 km)
  - If you consume more than 1.1 qt. (1.0 L, 0.9 lmp. qt.) every 600 miles (1000 km), contact your Lexus dealer.

- **Changing the engine oil (USA only)**
  To reset the oil change system, follow the procedure below:
  
  **STEP 1** Turn the “ENGINE START STOP” switch OFF with the trip meter A reading shown. (→P. 136)
  
  **STEP 2** While pressing the trip meter reset button, set the “ENGINE START STOP” switch to the IGNITION ON mode. Continue to press and hold the button until the trip meter displays “000000”.

---

**CAUTION**

- **Used engine oil**
  - Used engine oil contains potentially harmful contaminants which may cause skin disorders such as inflammation or skin cancer, so care should be taken to avoid prolonged and repeated contact. To remove used engine oil from your skin, wash thoroughly with soap and water.
  - Dispose of used oil and filters only in a safe and acceptable manner. Do not dispose of used oil and filters in household trash, in sewers or onto the ground. Call your Lexus dealer, service station or auto parts store for information concerning recycling or disposal.
  - Do not leave used engine oil within the reach of children.
**NOTICE**

- **To prevent serious engine damage**
  Check the oil level on regular basis.

- **When replacing the engine oil**
  - Be careful not to spill engine oil on the vehicle components.
  - Avoid overfilling, or the engine could be damaged.
  - Check the oil level on the dipstick every time you refill the vehicle.
  - Be sure the engine oil filler cap is properly retightened.

### Engine coolant

The coolant level is satisfactory if it is between the F and L lines on the reservoir when the engine is cold.

1. **Full**
2. **Low**

   If the level is on or below the L line, add coolant up to the F line.

---

- **When adding the engine coolant**

   When installing the reservoir cap, make sure that the engine coolant reservoir hose positioned as shown in the illustration.
If the coolant level drops within a short time after replenishing
Visually check the radiator, hoses, engine coolant filler cap, radiator cap, drain cock and water pump.
If you cannot find a leak, have your Lexus dealer pressure test the cap and check for leaks in the cooling system.

Coolant selection
Only use “Toyota Super Long Life Coolant” or similar high quality ethylene glycol based non-silicate, non-amine, non-nitrite, and non-borate coolant with long-life hybrid organic acid technology.

USA: “Toyota Super Long Life Coolant” is a mixture of 50% coolant and 50% deionized water. (Enabled: -31°F [-35°C])
Canada: “Toyota Super Long Life Coolant” is a mixture of 55% coolant and 45% deionized water. (Enabled: -44°F [-42°C])
For more details about engine coolant, contact your Lexus dealer.

⚠️ CAUTION

- When the engine is hot
Do not remove the radiator cap.
The cooling system may be under pressure and may spray hot coolant if the cap is removed, causing burns or other injuries.

⚠️ NOTICE

- When adding engine coolant
Coolant is neither plain water not straight antifreeze. The correct mixture of water and anti freeze must be used to provide proper lubrication, corrosion protection and cooling. Be sure to read the antifreeze or coolant label.

- If you spill coolant
Be sure to wash it off with water to prevent damage to parts or paint.
Radiator and condenser

Check the radiator and condenser and clear any foreign objects. If either of the above parts are extremely dirty or you are not sure of their condition, have your vehicle checked by your Lexus dealer.

**CAUTION**

- **When the engine is hot**
  Do not touch the radiator or condenser, as they may be hot and you may be burned.

Brake fluid

- **Checking fluid level**
  The brake fluid level should be between the “MAX” and “MIN” lines on the tank.

  Make sure to check the fluid type and prepare the necessary items.

- **Adding fluid**
<table>
<thead>
<tr>
<th>Fluid type</th>
<th>FMVSS No.116 DOT 3 or SAE J1703 brake fluid</th>
</tr>
</thead>
<tbody>
<tr>
<td>Items</td>
<td>Clean funnel</td>
</tr>
</tbody>
</table>

- **Brake fluid can absorb moisture from the air**
  Excess moisture in the fluid can cause a dangerous loss of braking efficiency. Use only newly opened brake fluid.
4-3. Do-it-yourself maintenance

**Power steering fluid**

**Fluid level**

The fluid level should be within the appropriate range.

1. Full (when cold)
2. Add fluid (when cold)
3. Full (when hot)
4. Add fluid (when hot)

Hot: Vehicle has been driven around 50 mph (80 km/h) for 20 minutes, or slightly longer in frigid temperatures. (Fluid temperature, 140°F - 175°F [60°C - 80°C])

Cold: Engine has not been run for about 5 hours. (Room temperature, 50°F - 85°F [10°C - 30°C])
■ Checking the fluid level
Make sure to check the fluid type and prepare the necessary items.

<table>
<thead>
<tr>
<th>Fluid type</th>
<th>Automatic transmission fluid DEXRON® II or III</th>
</tr>
</thead>
<tbody>
<tr>
<td>Items</td>
<td>Rag or paper towel and funnel (only for adding fluid)</td>
</tr>
</tbody>
</table>

**STEP 1** Clean all dirt off the reservoir.
**STEP 2** Remove the reservoir cap by turning it counterclockwise and wipe the dipstick clean.
**STEP 3** Reinstall the reservoir cap.
**STEP 4** Remove the reservoir cap again and look at the fluid level.

⚠️ **CAUTION**

■ Checking the fluid level
Take care, as the reservoir may be hot.

⚠️ **NOTICE**

■ When adding fluid
Avoid overfilling, or the power steering may be damaged.
■ After replacing the reservoir cap
Check the steering box case, vane pump and hose connections for leaks or damage.
Check the battery as follows.

**Battery exterior**
Make sure that the battery terminals are not corroded and that there are no loose connections, cracks, or loose clamps.

![Battery terminals and hold-down clamp]

**Before recharging**
When recharging, the battery produces hydrogen gas which is flammable and explosive. Therefore, before recharging:

- If recharging with the battery installed on the vehicle, be sure to disconnect the ground cable.
- Make sure the power switch on the charger is off when connecting and disconnecting the charger cables to the battery.

**After recharging the battery**
The engine may not start. Follow the procedure below to initialize the system.

**STEP 1** Shift the shift lever to P.
**STEP 2** Open and close any of the doors.
**STEP 3** Restart the engine.
CAUTION

Chemicals in the battery
A battery contains poisonous and corrosive sulfuric acid and may produce hydrogen gas which is flammable and explosive. To reduce the risk of death or serious injury, take the following precautions while working on or near battery:

- Do not cause sparks by touching the battery terminals with tools.
- Do not smoke or light a match near the battery.
- Avoid contact with eyes, skin and clothes.
- Never inhale or swallow electrolyte.
- Wear protective safety glasses when working near the battery.
- Keep children away from the battery.

Where to safely charge the battery
Always charge the battery in an open area. Do not charge the battery in a garage or closed room where there is not sufficient ventilation.

How to recharge the battery
Only perform a slow charge (5 A or less). The battery may explode if charged at a quicker rate.

Emergency measures regarding electrolyte

- If electrolyte gets in your eyes
  Flush your eyes with clean water for at least 15 minutes and get immediate medical attention. If possible, continue to apply water with a sponge or cloth while traveling to the nearest medical facility.

- If electrolyte gets on your skin
  Wash the affected area thoroughly. If you feel pain or burning, get medical attention immediately.

- If electrolyte gets on your clothes
  It can soak through clothing on to your skin. Immediately take off the clothing and follow the procedure above if necessary.

- If you accidentally swallow electrolyte
  Drink a large quantity of water or milk. Get emergency medical attention immediately.
**NOTICE**

- **When recharging the battery**
  Never recharge the battery while the engine is running. Also, be sure all accessories are turned off.

---

**Washer fluid**

If any washer does not work or the warning message appears on the multi-information display, the washer tank may be empty. Add washer fluid.

---

**CAUTION**

- **When refilling the washer fluid**
  Do not refill the washer fluid when the engine is hot or running, as the washer fluid contains alcohol and may catch fire if spilled on the engine etc.

---

**NOTICE**

- **Do not use any fluid other than washer fluid**
  Do not use soapy water or engine antifreeze instead of washer fluid. Doing so may cause streaking on the vehicle's painted surfaces.

- **Diluting washer fluid**
  Dilute washer fluid with water as necessary.
  Refer to the freezing temperatures listed on the washer fluid tank.
Replace or rotate tires in accordance with maintenance schedules and treadwear.

**Checking tires**

1. New tread
2. Treadwear indicator
3. Worn tread

The location of treadwear indicators is shown by the “TWI” or “Δ” marks, etc., molded on the sidewall of each tire.

Check spare tire condition and pressure if not rotated.

**Tire rotation**

If equipped with full-size spare tire

Rotate the tires in the order shown.

To equalize tire wear and extend tire life, Lexus recommends that tire rotation is carried out at the same interval as tire inspection.
Installing tire pressure warning valves and transmitters

When replacing tires or wheels, tire pressure warning valves and transmitters must also be installed.

When new tire pressure warning valves and transmitters are installed, new tire pressure warning valve and transmitter ID codes must be registered in the tire pressure warning computer and tire pressure warning system must be initialized. Have tire pressure warning valve and transmitter ID codes registered by your Lexus dealer. (→P. 397)
Initializing the tire pressure warning system

- The tire pressure warning system must be initialized in the following circumstances:
  - When changing the tire inflation pressure by changing traveling speed or load weight, etc.

When the tire pressure warning system is initialized, the current tire inflation pressure is set as the pressure benchmark.

- How to initialize the tire pressure warning system

  **STEP 1** Park the vehicle in a safe place and turn the “ENGINE START STOP” switch OFF.
  While the vehicle is moving, initialization is not performed.

  **STEP 2** Adjust the tire inflation pressure to the specified cold tire inflation pressure level. (→P. 499)
  Make sure to adjust the tire pressure to the specified cold tire inflation pressure level. The tire pressure warning system will operate based on this pressure level.

  **STEP 3** Turn the “ENGINE START STOP” switch to IGNITION ON mode.

  **STEP 4** Push and hold the tire pressure warning reset switch until the tire pressure warning light blinks slowly 3 times.

  **STEP 5** Wait for a few minutes with the IGNITION ON mode, and then turn the “ENGINE START STOP” switch OFF.
Registering and selecting ID codes

■ Registering ID codes

2 sets of tire pressure warning valve and transmitter ID codes can be registered. Once a second set of tires is registered at “2nd”, you can switch between tire set settings simply by pressing the tire pressure warning select switch.

There are 2 settings:

“MAIN” position: The ID code of the tire pressure warning valve and transmitter on the tires originally installed on the vehicle is registered.

“2nd” position: The ID code is not registered. When you replace a new set of tires, purchase tire pressure warning valves and transmitters from your Lexus dealer and have the new ID code registered by your Lexus dealer.

■ Selecting ID codes

When replacing tires, make sure to select the ID code set that matches the new tire set. If the tire pressure warning select switch is set to the wrong tire setting, the tire pressure warning system will not operate properly. After driving for about 20 minutes, the tire pressure warning light comes on after blinking for 1 minute to indicate a system malfunction.

1 “MAIN”
2 “2nd”
■ When to replace your vehicle’s tires

Tires should be replaced if:

● You have tire damage such as cuts, splits, cracks deep enough to expose the fabric or bulges indicating internal damage

● A tire goes flat repeatedly or cannot be properly repaired due to the size or location of a cut or other damage

If you are not sure, consult with your Lexus dealer.

■ Replacing tires and wheels

If the ID code of the tire pressure warning valve and transmitter is not registered, the tire pressure warning system will not work properly. After driving for about 20 minutes, the tire pressure warning light comes on after blinking for 1 minute to indicate a system malfunction.

■ Tire life

Any tire over 6 years old must be checked by a qualified technician even if they have seldom or never been used or damage is not obvious.

■ If the tread wears down below 0.16 in. (4 mm) on snow tires

The effectiveness of snow tires is lost.

■ Maximum load of tire

Check that the maximum load of the replacement tire is greater than 1/2 of the Gross Axle Weight Ratings (GAWR) of either the front axle or the rear axle, whichever is greater.

For the GAWR, see the Certification Label. For the maximum load of the tire, see the load limit at maximum cold tire inflation pressure mentioned on the sidewall of the tire. (→P. 505).
■ Tire types

1 Summer tires

Summer tires are high-speed performance tires best suited to highway driving under dry conditions. Since summer tires do not have the same traction performance as snow tires, summer tires are inadequate for driving on snow-covered or icy roads. For driving on snow-covered roads or icy roads, the use of snow tires is recommended. When installing snow tires, be sure to replace all four tires.

2 All season tires

All season tires are designed to provide better traction in snow and to be adequate for driving in most winter conditions, as well as for use year round. All season tires, however, do not have adequate traction performance compared with snow tires in heavy or loose snow. Also, all season tires fall short in acceleration and handling performance compared with summer tires in highway driving.

3 Snow tires

For driving on snow-covered roads or icy roads, we recommend using snow tires. If you need snow tires, select tires of the same size, construction and load capacity as the originally installed tires. Since your vehicle has radial tires as original equipment, make sure your snow tires also have radial construction. Do not install studded tires without first checking local regulations for possible restriction. Snow tires should be installed on all wheels. (→P.191)

■ Initializing the tire pressure warning system

Initialize the tire pressure warning system with the tire inflation pressure adjusted to the specified level.

■ If you push the tire pressure reset switch accidentally

If initialization is performed, adjust the tire inflation pressure to the specified level and initialize the tire pressure warning system again.

■ When the initialization of the tire pressure warning system has failed

Initialization can be completed in a few minutes. However, in the following cases, the settings have not been recorded and the system will not operate properly. If repeated attempts to record tire inflation pressure settings are unsuccessful, have the vehicle inspected by your Lexus dealer.

- When operating the tire pressure warning reset switch, the tire pressure warning light does not flash 3 times.
- After carrying out the initialization procedure, the tire pressure warning light blinks for 1 minute then stays on after driving for about 20 minutes.
### Routine tire inflation pressure checks

The tire pressure warning system does not replace routine tire inflation pressure checks. Make sure to check tire inflation pressure as part of your routine of daily vehicle checks.

### Tire pressure warning system certification

- **FCC ID:** PAXPMV107J
- **IC ID:** 3729A-PMV107J
- **FCC ID:** HYQ13BCX
- **IC ID:** 1551A-13BCX

- For vehicles sold in the USA

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**FCC WARNING:**
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

- For vehicles sold in Canada

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

When inspecting or replacing tires

Observe the following precautions to prevent accidents. Failure to do so may cause damage to parts of the drive train, as well as dangerous handling characteristics, which may lead to an accident resulting in death or serious injury.

- Do not mix tires of different makes, models or tread patterns. Also, do not mix tires of remarkably different treadwear.
- Do not use tire sizes other than those recommended by Lexus.
- Do not mix differently constructed tires (radial, bias-belted or bias-ply tires).
- Do not mix summer, all season and winter tires.
- Do not tow the vehicle with the compact spare tire installed.

When initializing the tire pressure warning system

Do not push the tire pressure warning reset switch without first adjusting the tire inflation pressure to the specified level. Otherwise, the tire pressure warning light may not come on even if the tire inflation pressure is low, or it may come on when the tire inflation pressure is actually normal.
<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| ■ Repairing or replacing tires, wheels, tire pressure warning valves, transmitters and tire valve caps  
  ● When removing or fitting the wheels, tires or the tire pressure warning valve and transmitter, contact your Lexus dealer as the tire pressure warning valve and transmitter may be damaged if not handled correctly.  
  ● When replacing tire valve caps, do not use tire valve caps other than those specified. The cap may become stuck. |
| ■ To avoid damaging the tire pressure warning valves and transmitters  
  Do not use liquid sealants on flat tires. |
| ■ Driving on rough roads  
  Take particular care when driving on roads with loose surfaces or potholes. These conditions may cause losses in tire inflation pressure, reducing the cushioning ability of the tires. In addition driving on rough roads may cause damage to the tires themselves, as well as the vehicle’s wheels and body. |
| ■ If tire inflation pressures become low while driving  
  Do not continue driving, or your tires and/or wheels may be ruined. |
4-3. Do-it-yourself maintenance
Tire inflation pressure

- Tire inflation pressure

The recommended cold tire inflation pressure and tire size is displayed on the tire and loading information label. (→P. 499)
■ Inspection and adjustment procedure

1. Remove the tire valve cap.
2. Press the tip of the tire pressure gauge onto the tire valve.
3. Read the pressure using the graduations of the gauge.
4. If the tire inflation pressure is not within the recommended levels, adjust inflate the tire.
   If you add too much air, press the center of the valve to lower.
5. After completing the tire inflation pressure measurement and adjustment, apply soapy water to the valve and check for leakage.
6. Reinstall the tire valve cap.

■ Tire inflation pressure check interval

You should check tire inflation pressure every two weeks, or at least once a month. Do not forget to check the spare.
Effects of incorrect tire inflation pressure

Driving with incorrect tire inflation pressure may result in the following:

● Reduced fuel efficiency
● Reduced driving comfort and tire life
● Reduced safety
● Damage to the drive train

If a tire needs frequent refilling, have it checked by your Lexus dealer.

Instructions for checking tire inflation pressure

When checking tire inflation pressure, observe the following:

● Check only when the tires are cold.
  If your vehicle has been parked for at least 3 hours and has not been driven for more than 1 mile or 1.5 km, you will get an accurate cold tire inflation pressure reading.

● Always use a tire pressure gauge.
  The appearance of the tire can be misleading. In addition, tire inflation pressures that are even just a few pounds off can degrade ride and handling.

● Do not bleed or reduce tire inflation pressure after driving. It is normal for the tire inflation pressure to be higher after driving.

● Never exceed the vehicle capacity weight.
  Passengers and luggage weight should be placed so that the vehicle is balanced.
CAUTION

Proper inflation is critical to save tire performance

Keep your tires properly inflated. Otherwise, the following conditions may occur and result in an accident causing death or serious injury.

- Excessive wear
- Uneven wear
- Poor handling
- Possibility of blowouts resulting from overheated tires
- Poor sealing of the tire bead
- Wheel deformation and/or tire separation
- A greater possibility of tire damage from road hazards

NOTICE

When inspecting and adjusting tire inflation pressure

Be sure to reinstall the tire valve caps. Without the valve caps, dirt or moisture could get into the valve and cause air leakage, which could result in an accident. If the caps have been lost, replace them as soon as possible.
4-3. Do-it-yourself maintenance

Wheels

If a wheel is bent, cracked or heavily corroded, it should be replaced. Otherwise, the tire may separate from the wheel or cause loss of handling control.

■ Wheel selection

When replacing wheels, care should be taken to ensure that they are equivalent to those removed in load capacity, diameter, rim width, and inset*.

Replacement wheels are available at your Lexus dealer.

*: Conventionally referred to as “offset”.

Lexus does not recommend using:

- Wheels of different sizes or types
- Used wheels
- Bent wheels that have been straightened

■ Aluminum wheel precautions

- Use only Lexus wheel nuts and wrenches designed for use with your aluminum wheels.
- When rotating, repairing or changing your tires, check that the wheel nuts are still tight after driving 1000 miles (1600 km).
- Be careful not to damage the aluminum wheels when using tire chains.
- Use only Lexus genuine balance weights or equivalent and a plastic or rubber hammer when balancing your wheels.

■ When replacing wheels

The wheels of your Lexus are equipped with tire pressure warning valves and transmitters that allow the tire pressure warning system to provide advanced warning in the event of a loss in tire inflation pressure. Whenever wheels are replaced, the tire pressure warning valves and transmitters must be installed. (→P. 396)
**CAUTION**

**When replacing wheels**
- Do not use wheels that are a different size from those recommended in the Owner’s Manual, as this may result in loss of handling control.
- Never use an inner tube in a leaking wheel which is designed for a tubeless tire. Doing so may result in an accident, causing death or serious injury.

**NOTICE**

**Replacing tire pressure warning valves and transmitters**
- Because tire repair or replacement may affect the tire pressure warning valves and transmitters, make sure to have tires serviced by your Lexus dealer or other qualified service shop. In addition, make sure to purchase your tire pressure warning valves and transmitters at your Lexus dealer.
- Ensure that only genuine Lexus wheels are used on your vehicle. Tire pressure warning valves and transmitters may not work properly with non-genuine wheels.
The air conditioning filter must be cleaned or changed regularly to maintain air conditioning efficiency.

**Replacement method**

**STEP 1** Turn the “ENGINE START STOP” switch OFF.

Open the glove box. Remove the glove box cover.

**STEP 2**

Remove the filter cover.

**STEP 3**

Remove the filter.

Be sure that the correct side of the filter faces up when installing it.
4-3. Do-it-yourself maintenance

■ Cleaning method

If the filter is dirty, clean by blowing compressed air through the filter from the downward side.

Hold the air gun 2 in. (5 cm) from the filter and blow for approximately 2 minutes at 72 psi (500 kPa, 5.0 kgf/cm\(^2\) or bar).

If it is not available, have the filter cleaned by your Lexus dealer.

■ Checking interval

Inspect, clean and replace the air conditioning filter according to the maintenance schedule. In dusty areas or areas with heavy traffic flow, more frequent cleaning or early replacement may be required. (For scheduled maintenance information, please refer to the “Warranty and Services Guide/Owner’s Manual Supplement/Scheduled Maintenance”.)

■ If air flow from the vents decreases dramatically

The filter may be clogged. Check the filter and replace if necessary.

\[\text{NOTICE}\]

■ To prevent damage to the system

- When using the air conditioning system, make sure that a filter is always installed.
- When cleaning the filter, do not clean the filter with water.
Replace the battery with a new one if it is discharged.

- You will need the following items:
  - Flathead screwdriver
  - Small Phillips-head screwdriver
  - Lithium battery (CR1632)

- Replacing the battery

  **STEP 1**
  Take out the mechanical key.

  **STEP 2**
  Remove the cover.

  **STEP 3**
  Remove the depleted battery.
  Insert a new battery with the + terminal facing up.
- **If the electronic key battery is discharged**
  The following symptoms may occur.
  - The smart access system with push-button start and wireless remote control will not function properly.
  - The operational range is reduced.

- **Use a CR1632 lithium battery**
  - Batteries can be purchased at your Lexus dealer, jewelers, or camera stores.
  - Replace only with the same or equivalent type recommended by a Lexus dealer.
  - Dispose of used batteries according to the local laws.

---

**CAUTION**

- **Removed battery and other parts**
  Keep away from children. These parts are small and if swallowed by a child, they can cause choking. Failure to do so could result in death or serious injury.

---

**NOTICE**

- **For normal operation after replacing the battery**
  Observe the following precautions to prevent accidents.
  - Always work with dry hands. Moisture may cause the battery to rust.
  - Do not touch or move any other components inside the remote control.
  - Do not bend either of the battery terminals.
If any of the electrical components do not operate, a fuse may have blown. If this happens, check and replace the fuses as necessary.

**STEP 1** Turn the “ENGINE START STOP” switch OFF.
**STEP 2** Remove the engine compartment cover. (→P. 382)
**STEP 3** Open the fuse box cover.

- **Engine compartment**
  
  Push the tabs in and lift the lid off.

- **Driver’s side instrument panel**
  
  Remove the lid.

**STEP 4** After a system failure, see “Fuse layout and amperage ratings” (→P. 416) for details about which fuse to check.
4-3. Do-it-yourself maintenance

**STEP 5**
Remove the fuse with the pull-out tool.

**STEP 6**
Check if the fuse has blown.

- **Type A**
  1. Normal fuse
  2. Blown fuse

Replace it with one of an appropriate amperage rating. The amperage rating can be found on the fuse box lid.

- **Type B**
  1. Normal fuse
  2. Blown fuse

Replace it with one of an appropriate amperage rating.
4-3. Do-it-yourself maintenance

Maintenance and care

Type C

1 Normal fuse
2 Blown fuse
Contact your Lexus dealer.

</table>
After a fuse is replaced

- If the lights do not turn on even after the fuse has been replaced, a bulb may need replacement. (→ P. 424)
- If the replaced fuse blows again, have the vehicle inspected by your Lexus dealer.

If there is an overload in the circuits

The fuses are designed to blow before the entire wiring harness is damaged.

### CAUTION

#### To prevent system breakdowns and vehicle fire

Observe the following precautions. Failing to do so may cause damage, and possibly a fire or injury.

- Never use a fuse of a higher amperage rating than indicated, or use any other object in place of a fuse.
- Always use a genuine Lexus fuse or equivalent. Never replace a fuse with a wire, even as a temporary fix. This can cause extensive damage or even fire.
- Do not modify fuses or the fuse box.

### NOTICE

#### Before replacing fuses

Have the cause of electrical overload determined and repaired by your Lexus dealer.

4-3. Do-it-yourself maintenance
Headlight aim (vehicles with discharge headlights)

■ Vertical movement adjusting bolts

1 Adjustment bolt A
2 Adjustment bolt B

■ Before checking the headlight aim

**STEP 1** Make sure the vehicle has a full tank of gas and the area around the headlight is not deformed.
**STEP 2** Park the vehicle on level ground.
**STEP 3** Sit in the driver’s seat.
**STEP 4** Bounce the vehicle several times.

■ Adjusting the headlight aim

**STEP 1** Remove the engine compartment cover. (→ P. 382)
**STEP 2** Turn bolt A in either direction using a Phillips-head screwdriver.

Remember the turning direction and the number of turns in mind.
Turn bolt B the same number of turns and in the same direction as step 1 using a Phillips-head screwdriver.

If the error is over the value specified above, take the vehicle to your Lexus dealer to adjust the headlight aim.
You may replace the following bulbs yourself. For more information about replacing other light bulbs, contact your Lexus dealer.

■ Prepare a replacement light bulb.
  Check the wattage of the light bulb being replaced. (→P. 501)

■ Front bulb locations

- Headlight high beam and daytime running light
- Headlight low beam (halogen bulb)
- Front side marker light
- Front turn signal light

■ Rear bulb locations

- Rear side marker light
- Stop/tail light
- Back-up light
- Tail light
- Rear turn signal light
Replacing light bulbs

- Headlight low beams (for vehicles with halogen bulbs), headlight high beams and daytime running lights

**STEP 1** Remove the engine compartment cover. (→P. 382)

**STEP 2** Turn the bulb base counterclockwise.

**STEP 3** Unplug the connector while depressing the lock release.
Front side marker lights and front turn signal lights

Remove the access hole cover.

Front side marker light
Front turn signal light
Turn the bulb base counterclockwise.

Remove the light bulb.
Front turn signal light

Remove the light bulb.
**Back-up lights and tail lights**

**STEP 1**
Open the trunk lid and remove the trunk panel cover clips.

**STEP 2**
Partly remove the trunk panel cover and turn the bulb bases counterclockwise.
1. Tail light
2. Back-up light

**STEP 3**
Remove the light bulb.
1. Tail light
2. Back-up light
Stop/tail, rear turn signal and rear side marker lights

Open the trunk lid and remove the access hole cover.

STEP 1

Step 2

1 Stop/tail light
2 Rear turn signal light
3 Rear side marker light

Turn the bulb base counterclockwise.

STEP 3

Stop/tail light

Remove the light bulb.
4-3. Do-it-yourself maintenance

➤ Rear turn signal light

STEP 3

Remove the light bulb.

➤ Rear side marker light

STEP 3

Remove the light bulb.
■ Bulbs other than the above
If any of the bulbs listed below has burnt out, have your Lexus dealer replace it.

- Headlight low beams (discharge bulbs)
- Parking lights
- Front fog lights
- Side turn signal lights
- High mounted stoplight
- License plate lights

■ Condensation build-up on the inside of the lens
Contact your Lexus dealer for more information in the following situations. Temporary condensation build-up on the inside of the headlight lens does not indicate a malfunction.

- Large drops of water are built up on the inside of the lens.
- Water has built up inside the headlight.

■ Discharge headlights
If voltage to the discharge bulbs is insufficient, the bulbs may not come on, or may go out temporarily. The discharge bulbs will come on when normal power is restored.

■ LED light bulbs
The parking lights, side turn signal lights, high mounted stoplight and license plate lights consist of a number of LEDs. If any of the LEDs burn out, take your vehicle to your Lexus dealer to have the light replaced.

**CAUTION**

- **Replacing light bulbs**
  - Turn off the headlights. Do not attempt to replace the bulb immediately after turning off the headlights. The bulbs become very hot and may cause burns.
  - Do not touch the glass portion of the light bulb with bare hands. Hold the bulb by the plastic or metal portion. If the bulb is scratched or dropped it may blow out or crack.
  - Fully install light bulbs and any parts used to secure them. Failing to do so may result in heat damage, fire, or water entering the headlight unit. This may damage the headlights or cause condensation to build up on the lens.
  - Do not attempt to take apart or repair the low beam headlight bulbs, connectors, power supply circuits, or related components. Doing so could result in electric shock and serious injury or death.

- **Discharge headlights**
  - Contact your Lexus dealer before replacing discharge headlights (including light bulbs).
  - Do not touch the high-intensity discharge headlight’s high voltage socket when the headlights are turned on. An extremely high voltage of 20000 V will be discharged and could result in serious injury or death by electric shock.

- **To prevent damage or fire**
  - Make sure bulbs are fully seated and locked.
5-1. Essential information

- Emergency flashers ................. 434
- If your vehicle needs to be towed ........................................ 435
- If you think something is wrong ........................................ 441
- Fuel pump shut off system .... 442
- Event data recorder ............... 443

5-2. Steps to take in an emergency

- If a warning light turns on or a warning buzzer sounds... ......................... 445
- If a warning message is displayed ........................................ 455
- If you have a flat tire ............... 467
- If the engine will not start ..... 477

- If the vehicle becomes stuck .................................................. 489
- If your vehicle has to be stopped in an emergency ......................... 490
Use the emergency flashers if the vehicle malfunctions or is involved in an accident.

**Without navigation system**
Press the switch to flash all the turn signal lights. To turn them off, press the switch once again.

**With navigation system**
Press the switch to flash all the turn signal lights. To turn them off, press the switch once again.

⚠️ **NOTICE**

- **To prevent battery discharge**
  Do not leave the emergency flashers on longer than necessary when the engine is not running.
If towing is necessary, we recommend having your vehicle towed by your Lexus dealer or a commercial towing service, using a lift-type truck or a flat bed truck.
Use a safety chain system for all towing, and abide by all state/provincial and local laws.
If towing from the front, the vehicle’s rear wheels and axles must be in good condition. (→P. 439)
If they are damaged, use a towing dolly or flat bed truck.

Before towing

The following may indicate a problem with your transmission. Contact your Lexus dealer before towing.

- The engine is running, but the vehicle will not move.
- The vehicle makes an abnormal sound.

Emergency towing

If a tow truck is not available, in an emergency your vehicle may be temporarily towed using a cable or chain secured to the emergency towing eyelet. This should only attempted on hard, surfaced roads for short distances at low speeds.
A driver must be in the vehicle to steer and operate the brakes. The vehicle’s wheels, drive train, axles, steering and brakes must be in good condition.

1 Towing eyelet
■ Emergency towing procedure

STEP 1 Release the parking brake.
STEP 2 Shift the shift lever to N.
STEP 3 Turn the “ENGINE START STOP” switch to ACCESSORY (engine off) or IGNITION ON mode (engine running).

⚠️ CAUTION

■ Caution while towing

● Use extreme caution when towing the vehicle. Avoid sudden starts or erratic driving maneuvers which place excessive stress on the emergency towing eyelets and the cables or chains. Always use caution for the surroundings and other vehicles while towing.

● If the engine is not running, the power assist for the brakes and steering will not function, making steering and braking more difficult.

⚠️ NOTICE

■ To prevent causing serious damage to the transmission

Never tow this vehicle from the rear with front wheels on the ground. This may cause serious damage to the transmission.

Installing towing eyelet

Remove the eyelet cover using a flathead screwdriver.

To protect the bodywork, place a rag between the screwdriver and the vehicle body, as shown in the illustration.
When trouble arises

Insert the towing eyelet into the hole and tighten partially by hand.

Tighten down the towing eyelet securely using a wheel nut wrench.

■ Location of the emergency towing eyelet
   → P. 467

⚠️ CAUTION

■ Installing towing eyelet to the vehicle
   Make sure that towing eyelet are installed securely.
   If not securely installed, towing eyelet may come loose during towing. This may lead to accidents that cause serious injury or even death.
Towing with a sling-type truck

⚠️ NOTICE

- To prevent body damage
  
  Do not tow with a sling type truck, either from the front or rear.
Towing with a wheel lift-type truck

► From the front

Release the parking brake.

NOTICE

To prevent damaging the vehicle

When raising the vehicle, ensure adequate ground clearance for towing at the opposite end of the raised vehicle. Without adequate clearance, the vehicle could be damaged while being towed.

► From the rear

Use a towing dolly under the front wheel.

NOTICE

To prevent causing serious damage to the transmission

Never tow this vehicle from the rear with the front wheels on the ground.
Using a flat bed truck

If your Lexus is transported by a flat bed truck, it should be tied down at the locations shown in the illustration.

If you use chains or cables to tie down your vehicle, the angles shaded in black must be 45°. Do not overly tighten the tie downs or the vehicle may be damaged.

⚠️ NOTICE

■ To avoid serious damage to your vehicle

Do not use the rear transport eyelets. They are used for shipping purposes only.
If you notice any of the following symptoms, your vehicle probably needs adjustment or repair. Contact your Lexus dealer as soon as possible.

- **Visible symptoms**
  - Fluid leaks under the vehicle
    (Water dripping from the air conditioning after use is normal.)
  - Flat-looking tires or uneven tire wear
  - Engine coolant temperature gauge needle continually points higher than normal

- **Audible symptoms**
  - Changes in exhaust sound
  - Excessive tire squeal when cornering
  - Strange noises related to the suspension system
  - Pinging or other noises related to the engine

- **Operational symptoms**
  - Engine missing, stumbling or running rough
  - Appreciable loss of power
  - Vehicle pulls heavily to one side when braking
  - Vehicle pulls heavily to one side when driving on a level road
  - Loss of brake effectiveness, spongy feeling, pedal almost touches the floor
To minimize the risk of fuel leakage when the engine stalls or an airbag inflates upon collision, the fuel pump shut off system stops supplying fuel to the engine.

Follow the procedure below to restart the engine after the system is activated.

**STEP 1** Turn the “ENGINE START STOP” switch to ACCESSORY mode or OFF.

**STEP 2** Restart the engine.

⚠️ NOTICE

**Before starting the engine**

Inspect the ground under the vehicle. If you find that fuel has leaked on to the ground, the fuel system has been damaged and is in need of repair. Do not restart the engine.
5-1. Essential information
Event data recorder

Your vehicle has computers that monitor and control certain aspects of your vehicle. These computers assist in driving and maintaining optimal vehicle performance.

Besides storing data useful for troubleshooting, there is a system to that record data in a crash or a near car crash event.

In a crash or a near car crash event

The SRS airbag sensor assembly contains the EDR. In a crash or a near car crash event, this device may record some or all of the following information:

- Engine speed
- Whether the brake pedal was applied or not
- Vehicle speed
- To what extent the accelerator pedal was depressed
- Position of the transmission shift lever
- Whether the driver and front passenger wore seat belts or not
- Driver's seat position
- SRS airbag deployment data
- SRS airbag system diagnostic data
- Front passenger's occupant classification

The information above is intended to be used for the purpose of improving vehicle safety performance. Unlike general data recorders, the EDR does not record sound data such as conversation between passengers.
Disclosure of the data

Lexus will not disclose the data recorded in an EDR to a third party except when:

● An agreement from the vehicle’s owner (or the leasing company for a leased vehicle) is obtained
● Officially requested by the police or other authorities
● Used as a defense for Lexus in a law suit
● Ordered by a court law

However, if necessary Lexus will:

● Use the data for research on Lexus vehicle safety performance
● Disclose the data to a third party for research purposes without disclosing details of the vehicle owner, and only when it is deemed necessary
● Disclose summarized data cleared of vehicle identification information to a non-Lexus organization for research purposes
5-2. Steps to take in an emergency

If a warning light turns on or a warning buzzer sounds...

Calmly perform the following actions if any of the warning lights turn on or flash. If a light turns on or flashes, but then turns off, this does not necessarily indicate a malfunction in the system.

Stop the vehicle immediately. Continuing to drive the vehicle may be dangerous.

The following warning indicates a possible problem in the brake system. Immediately stop the vehicle in a safe place and contact your Lexus dealer.

<table>

| ![Master warning](image4) | **Master warning light**  
A buzzer sounds and the warning light comes on and flashes to indicate that the master warning system has detected a malfunction. | →P. 455 |

*1: **Open door warning buzzer:**  
→P. 458

*2: **Driver’s and front passenger’s seat belt reminders:**  
The driver’s and front passenger’s seat belt reminder sounds to alert the driver and front passenger that his or her seat belt is not fastened. The buzzer sounds intermittently for 10 seconds after the vehicle has reached a speed of at least 12 mph (20 km/h). Then, if the seat belt is still unfastened, the buzzer will sound in a different tone for 20 more seconds.
First check when the malfunction indicator lamp comes on while driving

Check the following:

● Is the fuel tank empty?
  If it is, fill the fuel tank immediately.

● Is the fuel tank cap loose?
  If it is, tighten it securely.

The lamp will go off after taking several driving trips.
If the lamp does not go off even after several trips, contact your Lexus dealer as soon as possible.

SRS warning light

This warning light system monitors the following:

• The airbag sensor assembly
• The front airbag sensors
• The side and curtain shield airbag sensor assemblies
• The curtain shield airbag sensor assemblies
• The driver’s seat position sensor
• The driver’s seat belt buckle switch
• Occupant detection system (ECU and sensors)
• “AIR BAG ON” and “AIR BAG OFF” indicator lights
• Front passenger’s seat belt buckle switch
• The seat belt pretensioner assemblies
• The inflators
• The interconnecting wiring and power sources

Front passenger detection sensor and passenger seat belt reminder

If luggage or other load is placed on the front passenger seat, depending on its weight, the reminder light may flash and buzzer may sound.

When the tire pressure warning light comes on

Check the tire inflation pressure and adjust to the appropriate level. Pushing the tire pressure warning reset switch does not turn off the tire pressure warning light.

The tire pressure warning light may turn on due to natural causes

The tire pressure warning light may turn on due to natural causes such as natural air leaks or tire inflation pressure changes caused by temperature. In this case, adjusting the tire inflation pressure will turn off the warning light (after a few minutes).
When a tire is replaced with a spare tire

- Full-size spare tire
The spare tire is also equipped with the tire pressure warning valve and transmitter. The tire pressure warning light will turn on if the tire inflation pressure of the spare tire is low. If a tire goes flat, even though the flat tire is replaced with the spare tire, the tire pressure warning light does not turn off. Replace the spare tire with the repaired tire and adjust the proper tire inflation pressure. The tire pressure warning light will turn off after a few minutes.

- Compact spare tire
The compact spare tire is not equipped with the tire pressure warning valve and transmitter. If a tire goes flat, the tire pressure warning light will not turn off even though the flat tire is replaced with the spare tire. Replace the spare tire with the repaired tire and adjust the proper tire inflation pressure. The tire pressure warning light will turn off after a few minutes.
If the tire pressure warning system is inoperative

The tire pressure warning system will be disabled in the following conditions: (When the condition becomes normal, the system will work properly.)

- If tires not equipped with tire pressure warning valves and transmitters are used.
- If the ID code on the tire pressure warning valves and transmitters is not registered in the tire pressure warning computer.
- If the tire pressure warning select switch is set to a different tire setting.
- If the tire inflation pressure is 73 psi (500 kPa, 5.1 kgf/cm² or bar) or higher.

The tire pressure warning system may be disabled in the following conditions: (When the condition becomes normal, the system will work properly.)

- If electronic devices or facilities using similar radio wave frequencies are nearby.
- If a radio set at similar frequencies is in use in the vehicle.
- If a window tint that affects the radio wave signals is installed (vehicles with full-size spare tire).
- If there is a lot of snow or ice on the vehicle, in particular around the wheels or wheel housings.
- If non-genuine Lexus wheels are used. (Even if you use Lexus wheels, the tire pressure warning system may not work properly with some types of tires.)
- If tire chains are used.
- If the full-size spare tire is in a location subject to poor radio wave signal reception.
- If a large metallic object which can interfere with signal reception is put in the trunk (vehicles with full-size spare tire).
If the tire pressure warning light comes on after blinking for 1 minute frequently

If the tire pressure warning light comes on after blinking for 1 minute frequently when the “ENGINE START STOP” switch is turned to IGNITION ON mode, have it checked by your Lexus dealer.

Customization that can be configured at Lexus dealer

The vehicle speed linked seat belt reminder buzzer can be disabled.

(Customizable features → P. 517)

---

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>If the tire pressure warning light comes on</strong></td>
</tr>
</tbody>
</table>

Be sure to observe the following precautions. Failure to do so could cause loss of vehicle control and result in death or serious injury.

- Stop your vehicle in a safe place as soon as possible. Adjust the tire inflation pressure immediately.
- If the tire pressure warning light comes on even after tire inflation pressure adjustment, it is probable that you have a flat tire. Check the tires. If the tire is flat, change to the spare tire and have the flat tire repaired by the nearest Lexus dealer.
- Avoid abrupt maneuvering and braking. If the vehicle tires deteriorate, you could lose control of the steering wheel or the brakes.

**If a blowout or sudden air leakage should occur**

The tire pressure warning system may not activate immediately.
When trouble arises

**CAUTION**

**Maintenance of the tires**

Each tire, including the spare (if provided), should be checked monthly when cold and inflated to the inflation pressure recommended by the vehicle manufacturer on the vehicle placard or tire inflation pressure label (tire and load information label). (If your vehicle has tires of a different size than the size indicated on the vehicle placard or tire inflation pressure label [tire and load information label], you should determine the proper tire inflation pressure for those tires.)

As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS-tire pressure warning system) that illuminates a low tire pressure telltale (tire pressure warning light) when one or more of your tires is significantly under-inflated. Accordingly, when the low tire pressure telltale (tire pressure warning light) illuminates, you should stop and check your tires as soon as possible, and inflate them to the proper pressure. Driving on a significantly under-inflated tire causes the tire to overheat and can lead to tire failure. Under-inflation also reduces fuel efficiency and tire tread life, and may affect the vehicle’s handling and stopping ability.

Please note that the TPMS (tire pressure warning system) is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger illumination of the TPMS low tire pressure telltale (tire pressure warning light).

Your vehicle has also been equipped with a TPMS (tire pressure warning system) malfunction indicator to indicate when the system is not operating properly. The TPMS (tire pressure warning system) malfunction indicator is combined with the low tire pressure telltale (tire pressure warning light). When the system detects a malfunction, the telltale will flash for approximately one minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists. When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended.

TPMS (tire pressure warning system) malfunctions may occur for a variety of reasons, including the installation of replacement or alternate tires or wheels on the vehicle that prevent the TPMS (tire pressure warning system) from functioning properly. Always check the TPMS (tire pressure warning system) malfunction telltale after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels allow the TPMS (tire pressure warning system) to continue to function properly.
### NOTICE

**Precaution when installing a different tire**

When a tire of a different specification or maker is installed, the tire pressure warning system may not operate properly.
5-2. Steps to take in an emergency

If a warning message is displayed

If a warning is shown on the multi-information display, stay calm and perform the following actions:

1 Master warning light

The master warning light also comes on or flashes in order to indicate that a message is currently being displayed on the multi-information display.

2 Multi-information display

If any of the warning message turns on again after performing the following actions, contact your Lexus dealer.

Stop the vehicle immediately.

The following warnings indicate the possibility of damage to the vehicle that may lead to an accident. Immediately stop the vehicle in a safe place and contact your Lexus dealer.

5-2. Steps to take in an emergency

■ Changing the engine oil (USA only)
  Make sure to reset the oil change system. (→ P. 383)

■ Warning light display in radar cruise mode
  In the following cases, the warning light may not be displayed even if vehicle-to-vehicle distance closes.
  • When your vehicle and the vehicle ahead are traveling at the same speed or the vehicle ahead is traveling more quickly than your vehicle
  • When the vehicle ahead is traveling at a very low speed
  • Immediately after cruise control speed is set
  • At the instant the accelerator pedal is depressed
**Follow the correction procedure for problem in smart access system with push-button start.**

After taking the specified steps to correct the suspected problem, check that the warning message turns off.

*: If the engine does not start when the electronic key is inside the vehicle, the electronic key battery may be depleted or there may be difficulties receiving the signal from the key. (→P. 30)
5-2. Steps to take in an emergency

If you have a flat tire

Remove the flat tire and replace it with the spare provided.

■ Before jacking up the vehicle
  ● Stop the vehicle on a hard, flat surface.
  ● Set the parking brake.
  ● Shift the shift lever to P.
  ● Stop the engine.
  ● Turn on the emergency flashers.

■ Location of the spare tire, jack and tools
5-2. Steps to take in an emergency

**Taking out the jack**

**STEP 1**
Lift up the hook of the panel on the trunk floor.

**STEP 2**
Secure the panel using the hook provided.

**STEP 3**
Remove the hook.
Taking out the spare tire

**STEP 1**
Lift up the hook of the panel on the trunk floor.

**STEP 2**
Secure the panel using the hook provided.

**STEP 3**
Loosen the center fastener that secures the spare tire.
Replacing a flat tire

**STEP 1**
Chock the tires.

<table>
<thead>
<tr>
<th>Flat tire</th>
<th>Wheel chock positions</th>

</tbody>
</table>

**STEP 2**
Slightly loosen the wheel nuts (one turn).

**STEP 3**
Turn the tire jack portion “A” by hand until the notch of the jack is in contact with the jack point.
5-2. Steps to take in an emergency

When trouble arises

STEP 4
Raise the vehicle until the tire is slightly raised off the ground.

STEP 5
Remove all the wheel nuts and the tire.
When resting the tire on the ground, place the tire so that the wheel design faces up to avoid scratching the wheel surface.

Installing the spare tire

STEP 1
Remove any dirt or foreign matter from the wheel contact surface.
If foreign matter is on the wheel contact surface, the wheel nuts may loosen while the vehicle is in motion, and the tire may come off the vehicle.
5-2. Steps to take in an emergency

**Install the spare tire and loosely tighten each nut by hand to approximately the same amount.**

Turn the lug nuts until the washers come into contact with the wheel.

**Lower the vehicle.**

**Firmly tighten each nut two or three times in the order shown in the illustration.**

**Tightening torque:**

10.5 kgf·m (103 N·m, 76 ft·lbf)

**Stow the flat tire, tire jack and all tools.**
5-2. Steps to take in an emergency

■ The compact spare tire

- The compact spare tire is identified by the label “TEMPORARY USE ONLY” on the tire sidewall.
  
  Use the compact spare tire temporarily only in an emergency.

- Make sure to check the tire pressure of the compact spare tire. (→P. 499)

■ When using the compact spare tire

As the compact spare tire is not equipped with the tire pressure warning valve and transmitter, low inflation pressure of the spare tire will not be warned. Also, if you replace the compact spare tire after the tire pressure warning light comes on, the light remains on.

■ If you have a flat front tire on a road covered with snow or ice (vehicles with compact spare tire)

Install the compact spare tire on the rear of the vehicle. Perform the following steps and fit tire chains to the front tires.

  STEP 1 Replace a rear tire with the compact spare tire.

  STEP 2 Replace the flat front tire with the tire removed from the rear of the vehicle.

  STEP 3 Fit tire chains to the front tires.

■ After completing the tire change

The tire pressure warning system must be reset. (→P. 396)
5-2. Steps to take in an emergency

**CAUTION**

**Using the tire jack**

Improper use of the tire jack may lead to death or serious injuries due to the vehicle suddenly falling off the jack.

- Do not use the tire jack for any purpose other than replacing tires or installing and removing tire chains.
- Only use the tire jack that comes with this vehicle for replacing a flat tire. Do not use it on other vehicles, and do not use other tire jacks for replacing tires on this vehicle.
- Always check that the tire jack is securely set to the jack point.
- Do not put any part of your body under the vehicle supported by a jack.
- Do not start or run the engine while your vehicle is supported by the jack.
- Do not raise the vehicle while someone is in it.
- When raising the vehicle, do not put an object on or under the jack.
- Do not raise the vehicle to a height greater than that required to replace the tire.
- Use a jack stand if it is necessary to get under the vehicle.

Take particular care when lowering the vehicle to ensure that no one working on or near the vehicle may be injured.

**Replacing a flat tire**

Observe the following precautions to reduce the risk of death or serious injury.

- Never use oil or grease on the wheel bolts or wheel nuts. Oil and grease may cause the wheel nuts to be excessively tightened, leading to bolt or disc wheel damage. In addition, the oil or grease can cause the wheel nuts to loosen and the wheel may fall off, causing a serious accident. Remove any oil or grease from the wheel bolts or wheel nuts.
- Have the wheel nuts tightened with a torque wrench to 10.5 kgf•m (103 N•m, 76 ft•lbf) as soon as possible after changing wheels. Failure to follow these precautions could cause the nuts to loosen and the wheels may fall off, which could lead to an accident causing death or serious injury.
<table>

</tbody>
</table>
5-2. Steps to take in an emergency

⚠ NOTICE

■ Do not drive the vehicle with a flat tire.
  Do not continue driving with a flat tire.
  Driving even a short distance with a flat tire can damage the tire and the wheel beyond repair.

■ When replacing the tires
  When removing or fitting the wheels, tires or the tire pressure warning valve and transmitter, contact your Lexus dealer as the tire pressure warning valve and transmitter may be damaged if not handled correctly.

■ To avoid damaging the tire pressure warning valves and transmitters
  Do not use liquid sealants on flat tires.

■ Be careful when driving over bumps with the compact spare tire installed on the vehicle.
  The vehicle becomes lower when driving with the compact spare tire compared to when driving with standard tires. Be careful when driving over uneven road surfaces.

■ Driving with tire chains and the compact spare tire
  Do not fit tire chains to the compact spare tire.
  Tire chains may damage the vehicle body and adversely affect driving performance.
5-2. Steps to take in an emergency
If the engine will not start

If the engine will not start, even though correct starting procedures are being followed (→P.126), consider each of the following points.

■ The engine will not start even when the starter motor operates normally.
  One of the following may be the cause of the problem.
  ● There may not be sufficient fuel in the vehicle’s tank.
    Add fuel to the vehicle.
  ● The engine may be flooded.
    Try to restart the engine once more following correct starting procedures. (→P. 126)
  ● There may be a malfunction in the engine immobilizer system. (→P. 79)

■ The starter motor turns over slowly, the interior lights and headlights are dim, or the horn does not sound or sounds at a low volume.
  One of the following may be the cause of the problem.
  ● The battery may be discharged. (→P. 483)
  ● The battery terminal connections may be loose or corroded.

■ The starter motor does not turn over
  One of the following may be the cause of the problem.
  ● The engine starting system may be malfunctioning due to an electrical problem such as an open circuit or a blown fuse. However, an interim measure is available to start the engine. (→P. 478)
5-2. Steps to take in an emergency

The starter motor does not turn over, the interior lights and headlights do not turn on, or the horn does not sound.

One of the following may be the cause of the problem.

- One or both of the battery terminals may be disconnected.
- The battery may be discharged. (→ P. 483)
- There may be a malfunction in the steering lock system.

Contact your Lexus dealer if the problem cannot be repaired, or if repair procedures are unknown.

Emergency start function

When the engine does not start, the following steps can be used as an interim measure to start the engine if the “ENGINE START STOP” switch is functioning normally.

**STEP 1** Set the parking brake.

**STEP 2** Shift the shift lever to P.

**STEP 3** Set the “ENGINE START STOP” switch to the ACCESSORY mode.

**STEP 4** Push and hold the “ENGINE START STOP” switch about 15 seconds while depressing the brake pedal firmly.

Even if the engine can be started using the above steps, the system may be malfunctioning. Have the vehicle checked by your Lexus dealer.
If the shift lever cannot be shifted with your foot on the brake, there may be a problem with the shift lock system (a system to prevent accidental operation of the shift lever). Have the vehicle inspected by your Lexus dealer immediately.

The following steps may be used as an emergency measure to ensure that the shift lever can be shifted.

**STEP 1** Set the parking brake.

**STEP 2** Turn the “ENGINE START STOP” switch to the ACCESSORY mode.

**STEP 3** Depress the brake pedal.

**STEP 4** Pry the cover up with a flathead screwdriver or equivalent.

**STEP 5** Press the shift lock override button.

The shift lever can be shifted while the button is pressed.
New genuine Lexus keys can be made by your Lexus dealer using the other key and the key number stamped on your key number plate.
5-2. Steps to take in an emergency
If the electronic key does not operate properly

If communication between the electronic key and vehicle is interrupted (→P. 30) or the electronic key cannot be used because the battery is depleted, smart access system with push-button start and wireless remote control cannot be used. In such cases, the doors can be opened or the engine can be started by following the procedure below.

Locking and unlocking the doors and key linked functions

Remove the cover on the driver’s door handle using the mechanical key (→P. 24) in order to perform the following operations.

1. Locks all doors
2. Closes the windows/standard moon roof (turn and hold)
3. Unlocks the door
   Turning the key rearward unlocks the driver’s door. Turning the key once again unlocks the other doors.
4. Opens the windows/standard moon roof (turn and hold)

Return the cover to the original position after use.
Changing “ENGINE START STOP” switch modes and starting the engine

**STEP 1** Shift the shift lever to P and apply the brakes.

**STEP 2** Touch the Lexus emblem side of the electronic key to the “ENGINE START STOP” switch.

An alarm will sound to indicate that the start function cannot detect the electronic key that is touched to the “ENGINE START STOP” switch if any of the doors is opened and closed while the key is touched to the switch.

**STEP 3** To change “ENGINE START STOP” switch modes: Within 10 seconds of the buzzer sounding, release the brake pedal and press the “ENGINE START STOP” switch. Modes can be changed each time the switch is pressed. (→P. 126)

To start the engine: Press the “ENGINE START STOP” switch within 10 seconds after the buzzer sounds, keeping the brake pedal depressed.

In the event that the “ENGINE START STOP” switch still cannot be operated, contact your Lexus dealer.

---

**Stopping the engine**

Shift the shift lever to P and press the “ENGINE START STOP” switch as you normally do when stopping the engine.

**Replacing the key battery**

As the above procedure is the temporary measure, it is recommend that the electronic key battery be replaced immediately when the battery depletes. (→P. 411)
5-2. Steps to take in an emergency
If the vehicle battery is discharged

The following procedures may be used to start the engine if the vehicle’s battery is discharged. You can call your Lexus dealer or qualified repair shop.

If you have a set of jumper (or booster) cables and a second vehicle with a 12-volt battery, you can jump start your Lexus following the steps below.

**STEP 1**
Remove the cover.

**STEP 2**
Connecting the jumper cables.

1. Positive (+) battery terminal on your vehicle
2. Positive (+) battery terminal on the second vehicle
3. Negative (-) battery terminal on the second vehicle
4. Connect the jumper cable to ground on your vehicle as shown in the illustration.
### Starting the engine when the battery is discharged

The engine cannot be started by push-starting.

### Avoiding a discharged battery

- Turn off the headlights and the audio system while the engine is turned off.
- Turn off any unnecessary electrical components when the vehicle is running at a low speed for an extended period, such as in heavy traffic, etc.

---

**STEP 3** Start the engine of the second vehicle. Increase the engine speed slightly and maintain at that level for approximately 5 minutes to recharge the battery of your vehicle.

**STEP 4** Open and close any of the doors with the “ENGINE START STOP” switch OFF.

**STEP 5** Maintain the engine speed on the second vehicle and turn the “ENGINE START STOP” switch to the IGNITION ON mode, then start the vehicle’s engine.

**STEP 6** Once the vehicle’s engine has started, remove the jumper cables in the exact reverse order in which they were connected.

Once the engine starts, have the vehicle checked at your Lexus dealer as soon as possible.
When trouble arises

5-2. Steps to take in an emergency

⚠️ CAUTION

■ Avoiding battery fires or explosions

Observe the following precautions to prevent accidentally igniting the flammable gas that may be emitted from the battery.

● Make sure the jumper cable is connected to the correct terminal and that it is not unintentionally in contact with any part other than the intended terminal.

● Do not allow the jumper cables to come into contact with the “+” and “−” terminals.

● Do not allow open flame or use matches, cigarette lighters or smoke near the battery.

■ Battery precautions

The battery contains poisonous and corrosive acidic electrolyte, while related parts contain lead and lead compounds. Observe the following precautions when handling the battery.

● When working with the battery, always wear safety glasses and take care not to allow any battery fluids (acid) to come into contact with skin, clothing or the vehicle body.

● Do not lean over the battery.

● In the event that battery fluid comes into contact with the skin or eyes, immediately wash the affected area with water and seek medical attention. Place a wet sponge or cloth over the affected area until medical attention can be received.

● Always wash your hands after handling the battery support, terminals, and other battery-related parts.

● Do not allow children near the battery.

⚠️ NOTICE

■ When handling jumper cables

Be careful that the jumper cables do not become tangled in the cooling fan or any of the belts when connecting or disconnecting them.
5-2. Steps to take in an emergency
If your vehicle overheats

If your engine overheats:

**STEP 1** Stop the vehicle in a safe place and turn off the automatic air conditioning system.

**STEP 2** Check to see if steam is coming out from under the hood.
   - If you see steam:
     - Stop the engine. Carefully lift the hood after the steam subsides and then restart the engine.
   - If you do not see steam:
     - Leave the engine running and carefully lift the hood.

**STEP 3** Remove the engine compartment cover. (→P. 382)

**STEP 4** Check to see if the cooling fan is operating.
   - If the fan is operating:
     - Wait until the temperature of the engine (shown on the instrument cluster) begins to fall and then stop the engine.
   - If the fan is not operating:
     - Stop the engine immediately and call your local Lexus dealer.

**STEP 5**

After the engine has cooled down sufficiently, check the engine coolant level and inspect the radiator core (radiator) for any leaks.
When trouble arises

### Overheating

If you observe the following, your vehicle may be overheating.

- The engine coolant temperature gauge enters the red zone or a loss of power is experienced.
- Steam is coming from under the hood.

**Add engine coolant if necessary.**

Water can be used in an emergency measure if engine coolant is unavailable. (→P. 496)

**Install the reservoir cap.**

Make sure that the engine coolant reservoir hose is positioned as shown in the illustration.

Have the vehicle checked at your nearest Lexus dealer as soon as possible.
**CAUTION**

- To prevent an accident or injury when inspecting under the hood of your vehicle
  - If steam is seen coming from under the hood, do not open the hood until the steam has subsided. The engine compartment may be very hot, causing serious injury such as burns.
  - Keep hands and clothing away from the fan and other belts while the engine is running.
  - Do not loosen the radiator cap while the engine and radiator are hot. Serious injury, such as burns, may result from hot coolant and steam released under pressure.

**NOTICE**

- When adding engine coolant
  
  Wait until the engine has cooled down before adding engine coolant. When adding coolant, do so slowly. Adding cool coolant to a hot engine too quickly can cause damage to the engine.
5-2. Steps to take in an emergency
If the vehicle becomes stuck

Carry out the following procedures if the tires spin or the vehicle becomes stuck in mud, dirt, or snow.

- Stop the engine. Set the parking brake and put the shift lever in P.
- Remove the mud, snow, or sand from around the stuck tire.
- Place wood, stones or some other material to help provide traction under the tires.
- Restart the engine.
- Carefully apply the accelerator to free the vehicle.

⚠ CAUTION

- **When attempting to free a stuck vehicle**
  If you choose to rock the vehicle back and forth to free it, make sure the surrounding area is clear, to avoid striking other vehicles, objects or persons. The vehicle may also lunge forward or lunge back suddenly as it becomes free. Use extreme caution.

- **When shifting the shift lever**
  Be careful not to shift the shift lever with the accelerator pedal depressed. This may lead to unexpected rapid acceleration of the vehicle that may cause an accident and result in death or serious injury.

⚠ NOTICE

- **To avoid damaging the transmission and other components**
  - Avoid spinning the wheels and do not rev the engine.
  - If the vehicle remains stuck after trying these procedures, the vehicle may require towing to be freed.
5-2. Steps to take in an emergency
If your vehicle has to be stopped in an emergency

Only in an emergency, such as if it becomes impossible to stop the vehicle in the normal way, stop the vehicle using the following procedure:

**STEP 1** Steadily step on the brake pedal with both feet and firmly depress it.
Do not pump the brake pedal repeatedly as this will increase the effort required to slow the vehicle.

**STEP 2** Shift the shift lever to N.

- If the shift lever is shifted to N
  **STEP 3** After slowing down, stop the vehicle in a safe place by the road.
  **STEP 4** Stop the engine.

- If the shift lever cannot be shifted to N
  **STEP 3** Keep depressing the brake pedal with both feet to reduce vehicle speed as much as possible.

**STEP 4**
To stop the engine, press and hold the “ENGINE START STOP” switch for 3 consecutive seconds or more, or press it briefly for 3 times or more in succession.

**STEP 5** Stop the vehicle in a safe place by the road.

---

⚠️ **CAUTION**

- **If the engine has to be turned off while driving**
  Power assist for the brakes and steering wheel will be lost, making the brake pedal harder to depress and the steering wheel heavier to turn. Decelerate as much as possible before turning off the engine.

Vehicle identification

Vehicle identification
The vehicle identification number (VIN) is the legal identifier for your vehicle. This is the primary identification number for your Lexus. It is used in registering the ownership of your vehicle.

This number is stamped on the top left of the instrument panel.

Engine number

The engine number is stamped on the engine block as shown.

Engine oil selection

“Toyota Genuine Motor Oil” is used in your Lexus vehicle. Use Lexus approved “Toyota Genuine Motor Oil” or equivalent to satisfy the following grade and viscosity.

Oil grade: ILSAC multigrade engine oil

Recommended viscosity: SAE 5W-30

SAE 5W-30 is the best choice for good fuel economy and good starting in cold weather.

If SAE 5W-30 is not available, SAE 10W-30 oil may be used. However, it should be replaced with SAE 5W-30 at the next oil change.

The 5W portion of the oil viscosity rating indicates a characteristic of the oil which allows cold startability. Oils with a lower value before the W allow for easier starting of the engine in cold weather.

The 30 in 5W-30 indicates the oil viscosity when the oil is at its operating temperature. An oil with a higher viscosity may be better suited if the vehicle is operated at high speeds, or under extreme load conditions.
How to read oil container label:
The ILSAC (International Lubricant Standardization and Approval Committee) Certification Mark is added to some oil containers to help you select the oil you should use.

### Cooling system

| Capacity       | 9.5 qt.  
<table>
<thead>
<tr>

*: If equipped

A: D4R discharge bulbs
B: H11 halogen bulbs
C: HB3 halogen bulbs
D: HB4 halogen bulbs
E: Wedge base bulbs (amber)
F: Wedge base bulbs (clear)
G: Double end bulbs
You must only use unleaded gasoline in your vehicle. Select octane rating 87 (Research Octane Number 91) or higher. Use of unleaded gasoline with an octane rating lower than 87 may result in engine knocking. Persistent knocking can lead to engine damage.

At minimum, the gasoline you use should meet the specifications of ASTM D4814 in the U.S.A. and CGSB3.5-M93 in Canada.

**Fuel tank opening for unleaded gasoline**
To help prevent incorrect fueling, your Lexus has a fuel tank opening that only accommodates the special nozzle on unleaded fuel pumps.

**If your engine knocks**
- Consult your Lexus dealer.
- You may occasionally notice light knocking for a short time while accelerating or driving uphill. This is normal and there is no need for concern.

**Gasoline quality**
In very few cases, driveability problems may be caused by the brand of gasoline you are using. If driveability problems persist, try changing the brand of gasoline. If this does not correct the problem, consult your Lexus dealer.
Gasoline quality standards

- Automotive manufacturers in the US, Europe and Japan have developed a specification for fuel quality called World-Wide Fuel Charter (WWFC) that is expected to be applied worldwide.
- The WWFC consists of four categories that are based on required emission levels. In the US, category 4 has been adopted.
- The WWFC improves air quality by lowering emissions in vehicle fleets, and customer satisfaction through better performance.

Lexus recommends the use of gasoline containing detergent additives

- Lexus recommends the use of gasoline that contains detergent additives to avoid build-up of engine deposits.
- All gasoline sold in the US contains detergent additives to clean and/or keep clean intake systems.

Lexus recommends the use of cleaner burning gasoline

Cleaner burning gasoline, including reformulated gasoline that contains oxygenates such as ethanol or MTBE (Methyl Tertiary Butyl Ether) is available in many areas.

Lexus recommends the use of cleaner burning gasoline and appropriately blended reformulated gasoline. These types of gasoline provide excellent vehicle performance, reduce vehicle emissions and improve air quality.

Lexus does not recommend blended gasoline

- Lexus allows the use of oxygenate blended gasoline where the oxygenate content is up to 10% ethanol or 15% MTBE.
- If you use gasohol in your Lexus, be sure that it has an octane rating no lower than 87.
- Lexus DOES NOT recommend the use of gasoline containing methanol.

Lexus does not recommend gasoline containing MMT

Some gasoline contains octane enhancing additive called MMT (Methylcyclopentadienyl Manganese Tricarbonyl).

Lexus DOES NOT recommend the use of gasoline that contains MMT. If fuel containing MMT is used, your emission control system may be adversely affected.

The malfunction indicator lamp on the instrument cluster may come on. If this happens, contact your Lexus dealer for service.
**NOTICE**

**Notice on fuel quality**
- Do not use improper fuels. If improper fuels are used the engine will be damaged.
- Do not use leaded gasoline. Lead gasoline can cause damage to your vehicle’s three-way catalytic converters causing the emission control system to malfunction.
- Do not use gasohol other than that stated here. Other gasohol may cause fuel system damage or vehicle performance problems.
- Use of unleaded gasoline with an octane rating lower than 87 may result in engine knocking. Persistent knocking can lead to engine damage and should be corrected by refueling with higher octane unleaded gasoline.

**Fuel-related poor driveability**
If after using a different type of fuel, poor driveability is encountered (poor hot starting, vaporization, engine knocking, etc.), discontinue the use of that type of fuel.

**When refueling with gasohol**
Take care not to spill gasohol. It can damage your vehicle’s paint.
6-1. Specifications

Vehicle specifications

Tire information

Typical tire symbols

- Standard tire

- Compact spare tire
| 1. | Tire size | (→P. 507) |
| 2. | DOT and Tire Identification Number (TIN) | (→P. 507) |
| 3. | Location of treadwear indicators | (→P. 394) |
| 4. | Tire ply composition and materials |
|   | Plies are layers of rubber-coated parallel cords. Cords are the strands which form the plies in a tire. |
| 5. | Radial tires or bias-ply tires |
|   | A radial tire has “RADIAL” on the sidewall. A tire not marked “RADIAL” is a bias-ply tire. |
| 6. | “TUBELESS” or “TUBE TYPE” |
|   | A tubeless tire does not have a tube and air is directly filled in the tire. A tube type tire has a tube inside the tire and the tube maintains the air pressure. |
| 7. | Load limit at maximum cold tire inflation pressure | (→P. 398) |
| 8. | Maximum cold tire inflation pressure | (→P. 499) |
|   | This means the pressure to which a tire may be inflated. |
| 9. | Uniform tire quality grading |
|   | For details, see “Uniform tire quality grading” that follows. |
| 10. | Summer tire or all season tire | (→P. 399) |
|   | An all season tire has “M+S” on the sidewall. A tire not marked “M+S” is a summer tire. |
| 11. | “TEMPORARY USE ONLY” | (→P. 473) |
|   | A compact spare tire is identified by the phrase “TEMPORARY USE ONLY” molded into its sidewall. This tire is designed for temporary emergency use only. |
### Typical DOT and tire identification number (TIN)

- **1** DOT symbol*
- **2** Tire Identification Number (TIN)
- **3** Tire manufacturer's identification mark
- **4** Tire size code
- **5** Manufacturer's optional tire type code (3 or 4 letters)
- **6** Manufacturing week
- **7** Manufacturing year

*The DOT symbol certifies that the tire conforms to applicable Federal Motor Vehicle Safety Standards.

### Tire size

- **Typical tire size information**

The illustration indicates typical tire size.

- **1** Tire use
  - (P = Passenger car, T = Temporary use)
- **2** Section width (millimeters)
- **3** Aspect ratio
  - (tire height to section width)
- **4** Tire construction code
  - (R = Radial, D = Diagonal)
- **5** Wheel diameter (inches)
- **6** Load index (2 or 3 digits)
- **7** Speed symbol
  - (alphabet with one letter)
6-1. Specifications

**Tire dimensions**

1. Section width
2. Tire height
3. Wheel diameter

**Tire section names**

1. Bead
2. Sidewall
3. Shoulder
4. Tread
5. Belt
6. Inner liner
7. Reinforcing rubber
8. Carcass
9. Rim lines
10. Bead wires
11. Chafer

**Uniform Tire Quality Grading**

This information has been prepared in accordance with regulations issued by the National Highway Traffic Safety Administration of the U.S.A. Department of Transportation.

It provides the purchasers and/or prospective purchasers of Lexus vehicles with information on uniform tire quality grading.

Your Lexus dealer will help answer any questions you may have as you read this information.
■ DOT quality grades
All passenger vehicle tires must conform to Federal Safety Requirements in addition to these grades. Quality grades can be found where applicable on the tire sidewall between tread shoulder and maximum section width.

For example: Treadwear 200 Traction AA Temperature A

■ Treadwear
The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course.

For example, a tire graded 150 would wear one and a half (1 - 1/2) times as well on the government course as a tire graded 100.
The relative performance of tires depends upon the actual conditions of their use, however, and may depart significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate.

■ Traction AA, A, B, C
The traction grades, from highest to lowest, are AA, A, B and C, and they represent the tire’s ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete.

A tire marked C may have poor traction performance.

Warning: The traction grade assigned to this tire is based on braking (straight ahead) traction tests and does not include cornering (turning) traction.
■ Temperature A, B, C

The temperature grades are A (the highest), B, and C, representing the tire's resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel.

Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure.

The grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109.

Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.

Warning: The temperature grades for this tire are established for a tire that is properly inflated and not overloaded. Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure.

### Glossary of tire terminology

<table>
<thead>
<tr>
<th>Tire related term</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cold tire inflation pressure</td>
<td>Tire pressure when the vehicle has been parked for three hours or more, or has not been driven more than 1 mile or 1.5 km under that condition</td>
</tr>
<tr>
<td>Maximum inflation pressure</td>
<td>The maximum cold inflated pressure to which a tire may be inflated, shown on the sidewall of the tire</td>
</tr>
<tr>
<td>Recommended inflation pressure</td>
<td>Cold tire inflation pressure recommended by a manufacturer</td>
</tr>
<tr>
<td>Accessory weight</td>
<td>The combined weight (in excess of those standard items which may be replaced) of automatic transmission, power steering, power brakes, power windows, power seats, radio and heater, to the extent that these items are available as factory-installed equipment (whether installed or not)</td>
</tr>
</tbody>
</table>
### Vehicle specifications

<table>
<thead>
<tr>
<th>Tire related term</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Curb weight</td>
<td>The weight of a motor vehicle with standard equipment, including the maximum capacity of fuel, oil and coolant, and if so equipped, air conditioning and additional weight optional engine</td>
</tr>
<tr>
<td>Maximum loaded vehicle weight</td>
<td>The sum of: (a) Curb weight (b) Accessory weight (c) Vehicle capacity weight (d) Production options weight</td>

<tr>
<td>Pneumatic tire</td>
<td>A mechanical device made of rubber, chemicals, fabric and steel or other materials, that, when mounted on an automotive wheel, provides the traction and contains the gas or fluid that sustains the load</td>
</tr>
<tr>
<td>Radial ply tire</td>
<td>A pneumatic tire in which the ply cords that extend to the beads are laid at substantially 90 degrees to the centerline of the tread</td>
</tr>
<tr>
<td>Reinforced tire</td>
<td>A tire designed to operate at higher loads and at higher inflation pressures than the corresponding standard tire</td>
</tr>
<tr>
<td>Section width</td>
<td>The linear distance between the exteriors of the sidewalls of an inflated tire, excluding elevations due to labeling, decoration, or protective bands</td>
</tr>
<tr>
<td>Sidewall</td>
<td>That portion of a tire between the tread and bead</td>
</tr>
<tr>
<td>Tire related term</td>
<td>Meaning</td>
</tr>
<tr>
<td>--------------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Sidewall separation</td>
<td>The parting of the rubber compound from the cord material in the sidewall</td>
</tr>
<tr>
<td>Snow tire</td>
<td>A tire that attains a traction index equal to or greater than 110, compared to the ASTM E-1136 Standard Reference Test Tire, when using the snow traction test as described in ASTM F-1805-00, Standard Test Method for Single Wheel Driving Traction in a Straight Line on Snow-and Ice-Covered Surfaces, and which is marked with an Alpine Symbol ( ) on at least one sidewall</td>
</tr>
<tr>
<td>Test rim</td>
<td>The rim on which a tire is fitted for testing, and may be any rim listed as appropriate for use with that tire</td>
</tr>
<tr>
<td>Tread</td>
<td>That portion of a tire that comes into contact with the road</td>
</tr>
<tr>
<td>Tread rib</td>
<td>A tread section running circumferentially around a tire</td>
</tr>
<tr>
<td>Tread separation</td>
<td>Pulling away of the tread from the tire carcass</td>
</tr>
<tr>
<td>Treadwear indicators (TWI)</td>
<td>The projections within the principal grooves designed to give a visual indication of the degrees of wear of the tread</td>
</tr>
<tr>
<td>Wheel-holding fixture</td>
<td>The fixture used to hold the wheel and tire assembly securely during testing</td>
</tr>

6-2. Customization

Customizable features

Your vehicle includes a variety of electronic features that can be personalized to your preferences. Programming these preferences requires specialized equipment and may be performed by an authorized Lexus dealership.

It is also possible to customize certain vehicle features yourself using the navigation screen.

Some function settings are changed simultaneously with other functions being customized. Contact your Lexus dealer for further details.

**Settings that can be customized at a dealer**

The following table includes some settings that can be customized using the navigation system display. (→P. 522)

6-3. Initialization
For owners

Reporting safety defects for U.S. owners 528
Seat belt instructions for Canadian owners (in French) 529
SRS airbag instructions for Canadian owners (in French) 531
If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying the Lexus Division of Toyota Motor Sales, U.S.A., Inc. (Toll-free: 1-800-25-LEXUS).

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or Lexus Division of Toyota Motor Sales, U.S.A., Inc.

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at 1-888-327-4236 (TTY: 1-800-424-9153); go to http://www.safercar.gov; or write to: Administrator, NHTSA, 1200 New Jersey Ave, S.E., Washington, DC 20590. You can also obtain other information about motor vehicle safety from http://www.safercar.gov.
The following is a French explanation of seat belt instructions extracted from the seat belt section in this manual.

See the seat belt section for more detailed seat belt instructions in English.

**Utilisation correcte des ceintures de sécurité**

- Déroulez la sangle diagonale de telle sorte qu'elle passe bien sur l'épaule, sans pour autant être en contact avec votre cou ou glisser de votre épaule.
- Placez la sangle abdominale le plus bas possible sur les hanches.
- Réglez la position du dossier de siège. Asseyez-vous le dos le plus droit possible et calez-vous bien dans le siège.
- Ne vrillez pas la ceinture de sécurité.

**Guide de confort de ceinture de sécurité (sièges arrière extérieurs)**

Si la sangle diagonale est proche du cou de la personne, faites couliser le guide de confort de ceinture de sécurité vers l'avant.
Entretien et soin

■ Ceintures de sécurité
Nettoyez avec un chiffon ou une éponge humectée d’eau savonneuse tiède. Profitez de l’occasion pour vérifier régulièrement que les ceintures ne sont pas effilochées, entaillées, ou ne paraissent pas exagérément usées.

ATTENTION

■ Détérioration et usure des ceintures de sécurité
Inspectez les ceintures de sécurité périodiquement. Contrôlez qu’elles ne sont pas entaillées, effilochées, et que leurs ancrages ne sont pas desserrés. N’utilisez pas une ceinture de sécurité défectueuse avant qu’elle ne soit remplacée. Une ceinture de sécurité défectueuse n’apporte aucune garantie de protection de l’occupant en cas d’accident.
The following is a French explanation of SRS airbag instructions extracted from the SRS airbag section in this manual.

See the SRS airbag section for more detailed SRS airbag instructions in English.

► Sacs de sécurité gonflables frontaux

1 Sac de sécurité gonflable conducteur/sac de sécurité gonflable passager avant
   Participent à la protection de la tête et du thorax du conducteur et du passager avant contre les chocs avec les éléments de l’habitacle.

2 Sacs de sécurité gonflables de genoux
   Participent à la protection du conducteur et du passager avant.
Sacs de sécurité gonflables latéraux et rideau

3 Sacs de sécurité gonflables latéraux
Participent à la protection du haut du corps des occupants des sièges avant et arrière extérieures.

4 Sacs de sécurité gonflables rideau
Participent principalement à la protection de la tête des occupants assis aux places extérieures.
Composition du système de sacs de sécurité gonflables

1 Sac de sécurité gonflable passager avant
2 Sacs de sécurité gonflables rideau
3 Témoin indicateurs AIR BAG ON et AIR BAG OFF
4 Sacs de sécurité gonflables latéraux passagers avant
5 Capteurs de sacs de sécurité gonflables latéraux et rideau
6 Capteurs de sacs de sécurité gonflables rideau
7 Sacs de sécurité gonflables latéraux passagers arrière extérieurs
8 Voyant SRS
9 Sac de sécurité gonflable conducteur
10 Capteur de position du siège conducteur
11 Sacs de sécurité gonflables de genoux
12 Contacteur de boucle de ceinture de sécurité conducteur
13 Contacteur de boucle de ceinture de sécurité passager avant
14 Boîtier électronique de sacs de sécurité gonflables
15 Système de détection du passager (calculateur électronique et capteurs)
16 Capteurs de sacs de sécurité gonflables frontaux
Votre véhicule est équipé de SACS DE SECURITE GONFLABLES INTELLIGENTS (ADVANCED AIRBAGS) conçus selon les normes de sécurité américaines applicables aux véhicules à moteur (FMVSS208). Le système de sacs de sécurité gonflables régule la puissance de déploiement des sacs de sécurité gonflables conducteur et passager avant. Le système de sac de sécurité gonflable conducteur comprend le capteur de position du siège conducteur, etc. Le système de sac de sécurité gonflable passager avant comprend le capteur de classification des occupants du siège passager avant, etc.

Les principaux éléments du système de sacs de sécurité gonflables SRS sont illustrés ci-dessus. Le système des sacs de sécurité gonflables SRS est commandé par un boîtier électronique. Ce boîtier intègre un capteur de sécurité et un capteur de sac de sécurité gonflable.

Lorsque la violence du choc frontal ou latéral l’exige, le système de sacs de sécurité gonflables SRS déclenche les dispositifs pyrotechniques de gonflage (générateurs de gaz). Le déploiement rapide des sacs de sécurité gonflables est obtenu au moyen d’une réaction chimique dans les dispositifs pyrotechniques, qui produit un gaz inoffensif permettant d’amortir le mouvement des occupants.
ATTENTION

Précautions avec les sacs de sécurité gonflables SRS

Respectez les précautions suivantes avec les sacs de sécurité gonflables. À défaut, des blessures graves, voire mortelles, pourraient s'ensuivre.

● Le conducteur et tous les passagers à bord du véhicule doivent porter leur ceinture de sécurité correctement.
Les sacs de sécurité gonflables SRS sont des dispositifs de protection complémentaires aux ceintures de sécurité.

● Le sac de sécurité gonflable SRS conducteur se déploie avec une violence considérable, qui peut être très dangereuse voire mortelle si le conducteur se trouve très près du sac de sécurité gonflable. L'autorité fédérale chargée de la sécurité routière aux États-Unis, la NHTSA (National Highway Traffic Safety Administration) conseille:

La zone à risque du sac de sécurité gonflable conducteur se situant dans les premiers 2 à 3 in. (50 à 75 mm) de déploiement, vous disposez d’une confortable marge de sécurité en vous plaçant à 10 in. (250 mm) de votre sac de sécurité gonflable conducteur. Cette distance est à mesurer entre le moyeu du volant de direction et le sternum. Si vous êtes actuellement assis à moins de 10 in. (250 mm), vous pouvez changer votre position de conduite de différentes façons:

• Reculez votre siège au maximum tout en atteignant confortablement les pédales.
• Inclinez légèrement le dossier du siège. Bien que la conception des véhicules soit variable, la plupart des conducteurs peuvent s’asseoir à une distance de 10 in. (250 mm), même avec le siège conducteur complètement avancé, en inclinant simplement un peu le dossier du siège. Si vous avez des difficultés à voir la route après avoir incliné votre siège, utilisez un coussin ferme et antidérapant pour vous rehausser, ou si votre véhicule est équipé du réglage en hauteur du siège, remontez-le.
• Si votre volant de direction est réglable, inclinez-le vers le bas. Cela a pour effet d’orienter le sac de sécurité gonflable en direction de votre poitrine plutôt que de votre tête et de votre cou.
Réglez votre siège selon les recommandations de la NHTSA, tout en conservant le contrôle des pédales, du volant de direction et la vue des commandes du tableau de bord.
ATTENTION

Précautions avec les sacs de sécurité gonflables SRS

- Si vous attachez une rallonge de ceinture de sécurité à la boucle du siège conducteur, mais pas à la ceinture de sécurité proprement dite, le système de sac de sécurité gonflable SRS conducteur pense que vous avez attaché votre ceinture de sécurité, alors qu’en fait c’est faux. Dans ce cas, il se peut que le sac de sécurité gonflable conducteur ne se déploie pas correctement en cas d’accident, et vous risquez d’être tué ou grièvement blessé. Veillez donc à porter la ceinture de sécurité avec la rallonge de ceinture de sécurité.

- Le sac de sécurité gonflable SRS du passager avant se déploie également avec une violence considérable, qui peut être très dangereuse voire mortelle si le passager se trouve très près du sac de sécurité gonflable. Éloignez le siège passager au maximum du sac de sécurité gonflable, et réglez le dossier de siège de telle sorte que le passager avant soit assis bien droit dans son siège.

- Les nourrissons et les enfants qui ne sont pas correctement assis et/ou protégés peuvent être grièvement blessés ou tués par le déploiement d’un sac de sécurité gonflable. Installez les enfants trop jeunes pour pouvoir utiliser la ceinture de sécurité dans un siège de sécurité enfant. Lexus recommande vivement d’installer tous les nourrissons et enfants aux places arrière du véhicule et de prévoir pour eux des systèmes de retenue adaptés. C’est à l’arrière que les nourrissons et les enfants sont les mieux protégés.

- N’installez jamais un siège de sécurité enfant type dos à la route sur le siège passager avant, même si le témoin “AIR BAG OFF” est allumé. En cas d’accident, par la violence et la vitesse de son déploiement, le sac de sécurité gonflable passager avant peut blesser grièvement, voire tuer l’enfant si vous l’avez installé à la place du passager avant dans un siège de sécurité enfant type dos à la route.
ATTENTION

Précautions avec les sacs de sécurité gonflables SRS

● Ne vous asseyez pas sur le bord du siège et ne vous appuyez pas contre la planche de bord.

● Ne laissez pas un enfant rester debout devant le sac de sécurité gonflable SRS passager avant ou bien s’asseoir sur les genoux du passager avant.

● Ne conduisez pas le véhicule avec quelque chose sur les genoux, et n’autorisez pas non plus le passager à voyager avec quelque chose sur les genoux.

● Ne vous appuyez pas contre la porte, contre le rail latéral de toit ou contre les montants avant, latéraux et arrière.

● Ne laissez personne s’agenouiller sur le siège passager et se pencher vers la porte, ou mettre sa tête ou ses mains à l’extérieur du véhicule.
**ATTENTION**

**Précautions avec les sacs de sécurité gonflables SRS**

- Ne fixez ni ne posez aucun objet sur le tableau de bord, la garniture centrale du moyeu de volant de direction ou la partie inférieure du tableau de bord. Au déploiement des sacs de sécurité gonflables SRS conducteur, passager avant et genoux, tout objet risque de se transformer en projectile.

- Ne fixez aucun objet sur les portes, la vitre de pare-brise, les vitres latérales, les montants avant et arrière, le rail latéral de toit et la poignée de maintien.

- Ne suspendez aux crochets à vêtements aucun cintre nu ni aucun objet dur. En cas de déploiement du sac de sécurité gonflable SRS rideau, ces objets peuvent se transformer en projectiles capables de vous blesser grièvement, voire de vous tuer.

- Si la zone de déploiement du sac de sécurité gonflable SRS genoux est recouverte par une protection en vinyle, retirez celle-ci.

- N’utilisez aucun accessoire de siège venant recouvrir les zones de déploiement des sacs de sécurité gonflables SRS latéraux, car il risquerait d’en gêner le déploiement.

- Évitez de faire subir des chocs ou des pressions excessives aux parties renfermant les composants des sacs de sécurité gonflables SRS, illustrées P. 533. En effet, cela pourrait entraîner un fonctionnement anormal des sacs de sécurité gonflables SRS.

- Ne touchez aucun composant du système immédiatement après le déclenchement (déploiement) des sacs de sécurité gonflables SRS, car ils sont alors encore très chauds.
## ATTENTION

### Précautions avec les sacs de sécurité gonflables SRS

- Si vous avez des difficultés à respirer après le déploiement d’un sac de sécurité gonflable SRS, ouvrez une porte ou une vitre pour faire entrer de l’air frais, ou bien descendez du véhicule si cela ne présente pas de danger. Essuyez tout résidu dès que possible afin d’éviter d’éventuelles irritations de la peau.

- Si les parties renfermant les sacs de sécurité gonflables SRS, telles que la garniture du moyeu de volant et la garniture de montant avant, apparaissent abîmées ou craquelées, faites-les remplacer par votre concessionnaire Lexus.

### Modification et mise au rebut des éléments du système de sacs de sécurité gonflables SRS

Consultez impérativement votre concessionnaire Lexus si vous avez besoin d’intervenir sur votre véhicule ou de procéder à l’une des modifications suivantes. Le sac de sécurité gonflable SRS risque de ne pas fonctionner correctement ou de se déclencher (déployer) accidentellement, ce qui pourrait risquer de vous tuer ou blesser grièvement.

- Installation, dépose, démontage et réparations des sacs de sécurité gonflables SRS

- Réparations, modifications, dépose ou remplacement du volant, du combiné d’instruments, de la planche de bord, des sièges ou de leur garnissage, des montants avant, latéraux et arrière ou des rails latéraux de toit

- Réparation ou modification des ailes avant, du bouclier avant, ou des flancs de l’habitatcule

- Installation d’un chasse-neige, d’un treuil, etc. sur la calandre (pare-buffle, pare-kangourou, etc.)

- Modification des suspensions du véhicule

- Installation d’appareils électroniques, tels qu’un radioémetteur/récepteur ou d’un lecteur CD

- Aménagements du véhicule visant à permettre sa conduite par une personne atteinte d’un handicap physique
For details of equipment related to the navigation system, such as the audio system and the air conditioning systems, refer to the “Navigation System Owner’s Manual”.
