For vehicles with a navigation system, refer to the “Navigation System Owner’s Manual” for information regarding the equipment listed below.

- Navigation system
- Air conditioning
- Windshield wiper de-icer
- Rear view monitor system
- Audio/video system
- Rear window and outside rear view mirror defoggers
- Climate control

3-6. Using the storage features

List of storage features ............. 448
• Glove box ......................... 449
• Console box ....................... 450
• Cup holders ...................... 451
• Bottle holders ................. 452
• Auxiliary boxes ................. 453

3-7. Other interior features

Sun visors .............................. 457
Vanity mirrors ..................... 458
Clock .................................. 459
Power outlet ........................ 460
Heated steering wheel .......... 463
Seat heaters ....................... 465
Floor mat .......................... 467
Luggage compartment features .... 469
Garage door opener ............ 474
Compass .......................... 482
Safety Connect .................. 492

4 Maintenance and care

4-1. Maintenance and care
Cleaning and protecting the vehicle exterior .......... 500
Cleaning and protecting the vehicle interior .......... 505

4-2. Maintenance
Maintenance requirements .... 508
General maintenance ........ 511
Emission inspection and maintenance (I/M) programs .................. 515

4-3. Do-it-yourself maintenance
Do-it-yourself service precautions ....................... 516
Hood ................................ 521
Positioning a floor jack .......... 523
Engine compartment .......... 525
12-volt battery ................... 539
Tires ................................ 546
Tire inflation pressure ........ 558
Wheels ................................ 562
Air conditioning filter ........ 565
Electronic key battery .......... 567
Checking and replacing fuses .................................. 570
Light bulbs ........................ 582
# When trouble arises

## 5-1. Essential information
- Emergency flashers.............. 598
- If your vehicle needs to be towed.............. 599
- If you think something is wrong............... 606

## 5-2. Steps to take in an emergency
- If a warning light turns on or a warning buzzer sounds....... 607
- If a warning message is displayed............................... 620
- If you have a flat tire................. 640
- If the hybrid system will not start...................... 652
- If you lose your keys.............. 654
- If the electronic key does not operate properly .......... 655
- If the 12-volt battery is discharged............... 658
- If your vehicle overheats............. 664
- If the vehicle becomes stuck............... 669
- If your vehicle has to be stopped in an emergency...... 671

# Vehicle specifications

## 6-1. Specifications
- Maintenance data (fuel, oil level, etc.).................. 674
- Fuel information.................................... 689
- Tire information................................. 693

## 6-2. Customization
- Customizable features.................. 709

## 6-3. Initialization
- Items to initialize...................... 730

# For owners

- Reporting safety defects for U.S. owners .................. 732
- Seat belt instructions for Canadian owners (in French) .. 733
- SRS airbag instructions for Canadian owners (in French) .. 735

For your information

Main Owner’s Manual

Please note that this manual applies to all models and explains all equipment, including options. Therefore, you may find some explanations for equipment not installed on your vehicle.

All specifications provided in this manual are current at the time of printing. However, because of the Lexus policy of continual product improvement, we reserve the right to make changes at any time without notice.

Depending on specifications, the vehicle shown in the illustrations may differ from your vehicle in terms of color and equipment.

The manuals for this vehicle can be stored in the auxiliary box beneath the luggage compartment. (→P. 473)

Noise from under vehicle after turning off the hybrid system

Approximately five hours after the hybrid system is turned off, you may hear sound coming from under the vehicle for several minutes. This is the sound of a fuel evaporation leakage check and, it does not indicate a malfunction.

Accessories, spare parts and modification of your Lexus

A wide variety of non-genuine spare parts and accessories for Lexus vehicles are currently available in the market. You should know that Toyota does not warrant these products and is not responsible for their performance, repair, or replacement, or for any damage they may cause to, or adverse effect they may have on, your Lexus vehicle.

This vehicle should not be modified with non-genuine Lexus products. Modification with non-genuine Lexus products could affect its performance, safety or durability, and may even violate governmental regulations. In addition, damage or performance problems resulting from the modification may not be covered under warranty.
Installation of a mobile two-way radio system

The installation of a mobile two-way radio system in your vehicle could affect electronic systems such as:

- Multiport fuel injection system/sequential multiport fuel injection system
- Cruise control system
- Dynamic radar cruise control system
- Anti-lock brake system
- SRS airbag system
- Seat belt pretensioner system

Be sure to check with your Lexus dealer for precautionary measures or special instructions regarding installation of a mobile two-way radio system.

High voltage parts and cables on the hybrid vehicles emit approximately the same amount of electromagnetic waves as the conventional gasoline powered vehicles or home electronic appliances despite of their electromagnetic shielding.

Unwanted noise may occur in the reception of the mobile two-way radio.
Vehicle data recordings

Your Lexus is equipped with several sophisticated computers that will record certain data, such as:

- Engine speed
- Electric motor speed (traction motor speed)
- Accelerator status
- Brake status
- Vehicle speed
- Shift position
- Hybrid battery (traction battery) status

The recorded data varies according to the vehicle grade level and options with which it is equipped. Furthermore, these computers do not record conversations, sounds or pictures.

● Data usage

Lexus may use the data recorded in these computers to diagnose malfunctions, conduct research and development, and improve quality.

Lexus will not disclose the recorded data to a third party except:

- With the consent of the vehicle owner or with the consent of the lessee if the vehicle is leased
- In response to an official request by the police, a court of law or a government agency
- For use by Lexus in a lawsuit
- For research purposes where the data is not tied to a specific vehicle or vehicle owner

● Usage of data collected through Safety Connect/Lexus Enform (U.S.mainland only)

If your Lexus has Safety Connect or Lexus Enform and if you have subscribed to those services, please refer to the Safety Connect/Lexus Enform Telematics Subscription Service Agreement for information on data collected and its usage.
Event data recorder

This vehicle is equipped with an event data recorder (EDR). The main purpose of an EDR is to record, in certain crash or near crash-like situations, such as an air bag deployment or hitting a road obstacle, data that will assist in understanding how a vehicle’s systems performed. The EDR is designed to record data related to vehicle dynamics and safety systems for a short period of time, typically 30 seconds or less. The EDR in this vehicle is designed to record such data as:

- How various systems in your vehicle were operating;
- Whether or not the driver and passenger safety belts were buckled/fastened;
- How far (if at all) the driver was depressing the accelerator and/or brake pedal; and,
- How fast the vehicle was traveling.

These data can help provide a better understanding of the circumstances in which crashes and injuries occur.

NOTE: EDR data are recorded by your vehicle only if a nontrivial crash situation occurs; no data are recorded by the EDR under normal driving conditions and no personal data (e.g., name, gender, age, and crash location) are recorded. However, other parties, such as law enforcement, could combine the EDR data with the type of personally identifying data routinely acquired during a crash investigation.

To read data recorded by an EDR, special equipment is required, and access to the vehicle or the EDR is needed. In addition to the vehicle manufacturer, other parties, such as law enforcement, that have the special equipment, can read the information if they have access to the vehicle or the EDR.
Disclosure of the EDR data

Lexus will not disclose the data recorded in an EDR to a third party except when:

- An agreement from the vehicle’s owner (or the lessee for a leased vehicle) is obtained
- In response to an official request by the police, a court of law or a government agency
- For use by Lexus in a lawsuit

However, if necessary, Lexus may:

- Use the data for research on vehicle safety performance
- Disclose the data to a third party for research purposes without disclosing information about the specific vehicle or vehicle owner

Scrapping of your Lexus

The SRS airbag and seat belt pretensioner devices in your Lexus contain explosive chemicals. If the vehicle is scrapped with the airbags and seat belt pretensioners left as they are, this may cause an accident such as fire. Be sure to have the systems of the SRS airbag and seat belt pretensioner removed and disposed of by a qualified service shop or by your Lexus dealer before you scrap your vehicle.

Perchlorate Material

Special handling may apply, See www.dtsc.ca.gov/hazardouswaste/perchlorate.

Your vehicle has components that may contain perchlorate. These components may include airbag, seat belt pretensioners, and wireless remote control batteries.
CAUTION

■ General precautions while driving
  Driving under the influence: Never drive your vehicle when under the influence of alcohol or drugs that have impaired your ability to operate your vehicle. Alcohol and certain drugs delay reaction time, impair judgment and reduce coordination, which could lead to an accident that could result in death or serious injury.
  Defensive driving: Always drive defensively. Anticipate mistakes that other drivers or pedestrians might make and be ready to avoid accidents.
  Driver distraction: Always give your full attention to driving. Anything that distracts the driver, such as adjusting controls, talking on a cellular phone or reading can result in a collision with resulting death or serious injury to you, your occupants or others.

■ General precaution regarding children’s safety
  Never leave children unattended in the vehicle, and never allow children to have or use the key.
  Children may be able to start the vehicle or shift the vehicle into neutral. There is also a danger that children may injure themselves by playing with the windows or other features of the vehicle. In addition, heat build-up or extremely cold temperatures inside the vehicle can be fatal to children.
<table>
<thead>
<tr>
<th><strong>CAUTION</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Hybrid battery (traction battery)</strong></td>
</tr>
<tr>
<td>Never resell, hand over or modify the hybrid battery. To prevent accidents, hybrid batteries that have been removed from a disposed vehicle are collected through your Lexus dealer. Do not dispose of the battery yourself. Unless the battery is properly collected, the following may occur, resulting in death or serious injury:</td>
</tr>
<tr>
<td>● The hybrid battery may be illegally disposed of or dumped, and someone may touch a high voltage part, resulting in an electric shock.</td>
</tr>
<tr>
<td>● The hybrid battery is intended to be used exclusively with your hybrid vehicle. If the hybrid battery is used outside of your vehicle or modified in any way, accidents such as electric shock, heat generation, smoke generation, an explosion and electrolyte leakage may occur.</td>
</tr>
<tr>
<td>When reselling or handing over your vehicle, the possibility of an accident is extremely high because the person receiving the vehicle may not be aware of these dangers.</td>
</tr>
<tr>
<td><strong>Disposal of the hybrid battery (traction battery)</strong></td>
</tr>
<tr>
<td>If your vehicle is disposed of without the hybrid battery having been removed, there is a danger of serious electric shock if high voltage parts, cables and their connectors are touched. In the event that your vehicle must be disposed of, the hybrid battery must be disposed of by your Lexus dealer or a qualified service shop. If the hybrid battery is not disposed of properly, it may cause electric shock that can result in death or serious injury.</td>
</tr>
</tbody>
</table>
Symbols used throughout this manual

**Cautions & Notices**

**CAUTION**

This is a warning against something which, if ignored, may cause death or serious injury to people. You are informed about what you must or must not do in order to reduce the risk of death or serious injury to yourself and others.

**NOTICE**

This is a warning against something which, if ignored, may cause damage to the vehicle or its equipment. You are informed about what you must or must not do in order to avoid or reduce the risk of damage to your Lexus and its equipment.

**Symbols used in illustrations**

**Safety symbol**

The symbol of a circle with a slash through it means “Do not”, “Do not do this”, or “Do not let this happen”.

**Arrows indicating operations**

- Indicates the action (pushing, turning, etc.) used to operate switches and other devices.
- Indicates the outcome of an operation (e.g. a lid opens).

Your vehicle is a hybrid vehicle. It has characteristics different from conventional vehicles. Be sure you are closely familiar with the characteristics of your vehicle, and operate with care.

The hybrid system combines the use of a gasoline engine and an electric motor (traction motor) according to driving conditions, improving fuel efficiency and reducing exhaust emissions.

1 Gasoline engine
2 Electric motor (traction motor)
When stopped/during start off
The gasoline engine stops* when the vehicle is stopped. During start off, the electric motor (traction motor) drives the vehicle. At slow speeds or when traveling down a gentle slope, the engine is stopped* and the electric motor (traction motor) is used.

When shift position is in N, the hybrid battery (traction battery) will not be charged. Thus, shift to P when the vehicle is stopped. In addition, when driving in heavy traffic, use D or B.

*: However, when the hybrid battery (traction battery) need to be charged or while the engine is being warmed up, the gasoline engine may not stop automatically.

During normal driving
The gasoline engine is predominantly used. The electric motor (traction motor) charges the hybrid battery (traction battery) as necessary.

When accelerating sharply
When the accelerator pedal is depressed heavily, the power of the hybrid battery (traction battery) is added to that of the gasoline engine via the electric motor (traction motor).

When braking (regenerative braking)
The electric motor (traction motor) charges the hybrid battery (traction battery).
Vehicle proximity notification system

When driving with the gasoline engine stopped, a sound, which changes in accordance with the driving speed, will be played in order to warn people nearby of the vehicle’s approach. The sound will stop when the vehicle speed exceeds approximately 15 mph (25 km/h).

■ Regenerative braking

In the following situations, kinetic energy is converted to electric energy and deceleration force can be obtained in conjunction with the recharging of the hybrid battery (traction battery).

● The accelerator pedal is released while driving with the shift position in D or B.
● The brake pedal is depressed while driving with the shift position in D or B.

■ EV indicator

The EV indicator comes on when driving the vehicle using only the electric motor (traction motor).
■ Conditions in which the gasoline engine may not stop

The gasoline engine starts and stops automatically. However, it may not stop automatically in the following conditions:

● During gasoline engine warm-up
● During hybrid battery (traction battery) charging
● When the temperature of the hybrid battery (traction battery) is high or low
● When the heater is switched on

■ Charging the hybrid battery (traction battery)

● As the gasoline engine charges the hybrid battery (traction battery), the battery does not need to be charged from an outside source. However, if the vehicle is left parked for a long time the hybrid battery will slowly discharge. For this reason, be sure to drive the vehicle at least once every few months for at least 30 minutes or 10 miles (16 km). If the hybrid battery becomes fully discharged and you are unable to jump-start the vehicle with the 12-volt battery, contact your Lexus dealer.

● If the shift position is in N, the hybrid battery (traction battery) will not be charged. Always shift the shift position in P when the vehicle is stopped. When driving in heavy traffic, operate the vehicle with the shift position in D or B to avoid discharging the hybrid battery (traction battery).

■ Charging the 12-volt battery

→ P. 661

■ After the 12-volt battery has discharged or has been changed or removed

The gasoline engine may not stop even if the vehicle is running on the hybrid battery (traction battery). If this continues for a few days, contact your Lexus dealer.
- **Sounds and vibrations specific to a hybrid vehicle**

  There may be no engine sounds or vibration even though the vehicle is able to move. For safety, apply the parking brake and make sure to shift the shift position to P when parked.

  The following sounds or vibrations may occur when the hybrid system is operating and are not a malfunction:

  - Motor sounds may be heard from the engine compartment.
  - Sounds may be heard from the hybrid battery (traction battery) behind the rear seats when the hybrid system starts or stops.
  - Sounds may be heard from the transmission when the gasoline engine starts or stops, when driving at low speeds, or during idling.
  - Engine sounds may be heard when accelerating sharply.
  - Sounds may be heard due to regenerative braking when the brake pedal is depressed and accelerator is loosened.
  - Other sounds, such as motors and mechanical noises, may be heard from the brake system when the brake pedal is depressed.
  - Vibration may be felt when the gasoline engine starts or stops.
  - Cooling fan sounds may be heard from the air intake vent on the side of rear right seatback.
Vehicle proximity notification system

In the following cases, the vehicle proximity notification system may be difficult for surrounding people to hear.

- In very noisy areas
- In the wind or the rain

Also, as the vehicle proximity notification system is installed on the front of the vehicle, it may be more difficult to hear from the rear of the vehicle compared to the front.

Maintenance, repair, recycling, and disposal

Contact your Lexus dealer regarding maintenance, repair, recycling and disposal. Do not dispose of the vehicle yourself.

Customization

Settings (e.g. on/off operation of the EV indicator) can be changed. (Customizable features → P. 709)
Take care when handling the hybrid system, as it contains a high voltage system (about 650V at maximum) as well as parts that become extremely hot when the hybrid system is operating. Obey the caution labels attached to the vehicle.

Air conditioning compressor
Power control unit
Hybrid battery (traction battery)
Service plug
High voltage cables (orange)
Electric motor (traction motor)
Caution label
Hybrid battery air vent

There is an air intake vent on the side of the rear right seatback for the purpose of cooling the hybrid battery (traction battery). If the vent become blocked, the hybrid battery may overheat, leading to a reduction in hybrid battery output.

Emergency shut off system

When a certain level of impact is detected by the impact sensor, the emergency shut off system blocks off the high voltage current and stops the fuel pump to minimize the risk of electrocution and fuel leakage. If the emergency shut off system activates, your vehicle will not restart. To restart the hybrid system, contact your Lexus dealer.
Hybrid warning message

A message is automatically displayed when a malfunction occurs in the hybrid system or an improper operation is attempted.

If a warning message is shown on the multi-information display, read the message and follow the instructions. (→ P. 620)

■ If a warning light comes on, a warning message is displayed, or the 12-volt battery is disconnected

The hybrid system may not start. In that case, try to start the system again. If the “READY” indicator does not come on, contact your Lexus dealer.

■ Running out of fuel

When the vehicle has run out of fuel and the hybrid system cannot be started, refuel the vehicle with at least enough gasoline to make the low fuel level warning light (→ P. 611) go off. If there is only a small amount of fuel, the hybrid system may not be able to start. (The minimum amount of fuel to add to make the low fuel level warning light go out is about 3.1 gal. [11.8 L, 2.6 Imp.gal.], when the vehicle is on a level surface. This value may vary when the vehicle is on a slope.)
Electromagnetic waves
- High voltage parts and cables on the hybrid vehicles incorporate electromagnetic shielding, and therefore emit approximately the same amount of electromagnetic waves as conventional gasoline powered vehicles or home electronic appliances.
- Your vehicle may cause sound interference in some third party-produced radio parts.

Hybrid battery (traction battery)
The hybrid battery (traction battery) has a limited service life. The lifespan of the hybrid battery (traction battery) can change in accordance with driving style and driving conditions.

CAUTION
High voltage precautions
The vehicle has high voltage DC and AC systems as well as a 12-volt system. DC and AC high voltage is very dangerous and can cause severe burns and electric shock that may result in death or serious injury.
- Never touch, disassemble, remove or replace the high voltage parts, cables or their connectors.
- The hybrid system will become hot after starting as the system uses high voltage. Be careful of both the high voltage and the high temperature, and always obey the caution labels attached to the vehicle.
- Never try to open the service plug access hole located in the luggage compartment. The service plug is used only when the vehicle is serviced and is subject to high voltage.
### CAUTION

#### Road accident cautions

If your vehicle is involved in an accident, observe the following precautions to reduce the risk of death or serious injury:

- **Stop the vehicle in a safe place to prevent subsequent accidents.**
  While depressing the brake pedal, apply the parking brake and shift the shift position to P to stop the hybrid system. Then, slowly release the brake pedal.

- **Do not touch the high voltage parts, cables and connectors.**

- **If electric wires are exposed inside or outside your vehicle, an electric shock may occur. Never touch exposed electric wires.**

- **If a fluid leak occurs, do not touch the fluid as it may be strong alkaline electrolyte from the hybrid battery (traction battery). If it comes into contact with your skin or eyes, wash it off immediately with a large amount of water or, if possible, boric acid solution. Seek immediate medical attention.**

- **If a fire occurs in the hybrid vehicle, leave the vehicle as soon as possible. Never use a fire extinguisher that is not meant for electric fires. Using even a small amount of water may be dangerous.**

- **If your vehicle needs to be towed, do so with front wheels raised. If the wheels connected to the electric motor (traction motor) are on the ground when towing, the motor may continue to generate electricity. This may cause an electricity leakage leading to a fire. (→ P. 599)**

- **Carefully inspect the ground under the vehicle. If you find that liquid has leaked onto the ground, the fuel system may have been damaged. Leave the vehicle as soon as possible.**

#### Hybrid battery (traction battery)

Your vehicle contains a sealed nickel-metal hydride battery. If disposed of improperly, it is hazardous to the environment and there is a risk of severe burns and electrical shock that may result in death or serious injury.

1. Hybrid system

**NOTICE**

- **Hybrid battery air vent**
  - Do not put foreign objects near the air vent. The hybrid battery (traction battery) may overheat and be damaged.
  - Clean the air vent regularly to prevent the hybrid battery (traction battery) from overheating.
  - Do not wet or allow foreign substances to enter the air vent as this may cause a short circuit and damage the hybrid battery (traction battery).
  - Do not carry large amounts of water such as water cooler bottles in the vehicle. If water spills onto the hybrid battery (traction battery), the battery may be damaged. Have the vehicle inspected by your Lexus dealer.
1-1. Hybrid system

Energy monitor/consumption screen

You can view the status of your hybrid system on the multi-information display and the navigation system screen.

1. Navigation system screen (if equipped)
2. Multi-information display

Remote Touch*
1. “MENU” button
2. Remote Touch knob
3. “ENTER” button

*: For use of the Remote Touch, refer to “Navigation System Owner’s Manual”.

Energy monitor

Navigation system screen (if equipped)

Press the “MENU” button on the Remote Touch.
Before driving

1. Hybrid system

Select “Info/Apps” on the “Menu” screen.

For vehicles sold in Canada, “Info” is used instead of “Info/Apps”.

Select “Fuel Consumption” on the “Information” screen.

If the “Energy Monitor” screen is not displayed, select “Energy”.

Multi-information display

Press the “DISP” switch on the steering wheel several times to select the energy monitor display.
### 1-1. Hybrid system

<table>
<thead>
<tr>

1.1. Hybrid system

<table>
<thead>
<tr>
<th>Hybrid battery (traction battery) status</th>
<th>Navigation system screen</th>
<th>Multi-information display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low</td>
<td>Full</td>
<td>Low</td>
</tr>
</tbody>
</table>

These images are examples only, and may vary slightly from actual conditions.

**Consumption (vehicles with a navigation system)**

**STEP 1** Press the “MENU” button on the Remote Touch and select “Info/Apps” (“Info”) on the “Menu” screen.

**STEP 2** Select “Fuel Consumption” on the “Information” screen.

If the “Consumption” screen does not appear, select “Fuel Consumption” on the “Energy Monitor” screen or “Consumption” on the “Past Record” screen.

1. Fuel consumption per minute
2. Regenerated energy per minute
   - One symbol indicates 50 Wh.
3. Cruising range

The image is example only, and may vary slightly from actual conditions.
Past record (vehicles with a navigation system)

**STEP 1** Press the “MENU” button on the Remote Touch and select “Info/Apps” (“Info”) on the “Menu” screen.

**STEP 2** Select “Fuel Consumption” on the “Information” screen.

If the “Past Record” screen does not appear, select “Fuel Consumption” on the “Energy Monitor” screen or “Past Record” on the “Consumption” screen.

1. Best past fuel consumption
2. Average fuel consumption

Use the displayed average fuel consumption as a reference.

The image is example only, and may vary slightly from actual conditions.

- **Resetting the data**
  Selecting “Clear” on the “Consumption” screen will reset the fuel consumption per minute and regenerated energy per minute.
  Selecting “Clear” on the “Past Record” screen will reset the best past fuel consumption and average fuel consumption.

- **Cruising range**
  Displays the estimated maximum distance that can be driven with the quantity of fuel remaining.
  This distance is computed based on your average fuel consumption.
  As a result, the actual distance that can be driven may differ from that displayed.
Hybrid vehicle driving tips

For economical and ecological driving, pay attention to the following points:

■ Using Eco drive mode
  When using Eco drive mode, the torque corresponding to the accelerator pedal depression amount can be generated more smoothly than it is in normal conditions. In addition, the operation of the air conditioning system (heating/cooling) will be minimized, improving the fuel economy. (→P. 186)

■ Use of Hybrid System Indicator
  The Eco-friendly driving is possible by keeping the indicate of Hybrid System Indicator within Eco area. (→P. 199)

■ When braking the vehicle
  Make sure to operate the brakes gently and in good time. A greater amount of electrical energy can be retained when slowing down.

■ Delays
  Repeated acceleration and deceleration, as well as long waits at traffic lights, will lead to bad fuel consumption. Check traffic reports before leaving and avoid delays as much as possible. When encountering a delay, gently release the brake pedal to allow the vehicle to move forward slightly while avoiding overuse of the accelerator pedal. Doing so can help control excessive gasoline consumption.

■ Highway driving
  Control your speed and keep at a constant speed. Also, before stopping at a toll booth or similar, allow plenty of time to release the accelerator and gently apply the brakes. A greater amount of electrical energy can be retained when slowing down.
Air conditioning
Use the air conditioning only when necessary. Doing so can help control excessive gasoline consumption.
In summer: In high temperatures, use the recirculated air mode. Doing so will help to reduce the burden on the air conditioner and reduce fuel consumption as well.
In winter: Because the gasoline engine will not automatically cut out until the gasoline engine and the interior of the vehicle are warm, it will consume fuel. Also, fuel consumption can be improved by avoiding overuse of the heater.

Checking tire inflation pressure
Make sure to check the tire inflation pressure frequently. Improper tire inflation pressure can cause poor fuel consumption.
Also, as snow tires can cause large amounts of friction, their use on dry roads can lead to poor fuel consumption. Use a tire that is appropriate for the season.

Luggage
Carrying heavy luggage can lead to poor fuel consumption. Avoid carrying unnecessary luggage. Installing a large roof rack can also cause poor fuel consumption.

Warming up before driving
Since the gasoline engine starts up and cuts out automatically when cold, warming up the engine is unnecessary. Moreover, frequently driving short distances will cause the engine to repeatedly warm up, which can lead to poor fuel consumption.
1-2. Key information

Keys

The following keys are provided with the vehicle.

1 Electronic keys
   • Operating the smart access system with push-button start (→ P. 55)
   • Operating the wireless remote control function (→ P. 68)

2 Mechanical keys

3 Key number plate

4 Card key (electronic key) (if equipped)
   Operating the smart access system with push-button start (→ P. 55)
Using the mechanical key

To take out the mechanical key:

Electronic keys: Slide the release lever and take the key out.

Card key: Press the lock release button and take the key out.

The mechanical key can only be inserted in one direction, as the key only has grooves on one side. If the key cannot be inserted in a lock cylinder, turn it over and re-attempt to insert it.

After using the mechanical key, store it in the electronic key. Carry the mechanical key together with the electronic key. If the electronic key battery is depleted or the entry function does not operate properly, you will need the mechanical key.

(→ P. 655)
1-2. Key information

■ Card key

- The mechanical key that is stored inside the card key should be used only if a problem arises, such as when the card key does not operate properly.
- If it is difficult to take out the mechanical key, push down the lock release button using a pen tip etc. If it is still difficult to pull it out, use a coin etc.

- To store the mechanical key in the card key, insert it while pressing the lock release button.

- If the battery cover is not installed and the battery falls out or if the battery was removed because the key got wet, reinstall the battery with the positive terminal facing the Lexus emblem.

- The card key is not waterproof.
1-2. Key information

- **When required to leave the vehicle’s key with a parking attendant**
  
  Lock the glove box as circumstances demand. (→P.449)
  Remove the mechanical key for your own use and provide the attendant with the electronic key only.

- **Key number plate**
  
  Keep the plate in a safe place such as your wallet, not in the vehicle. In the event that a mechanical key is lost, a new key can be made at your Lexus dealer using the key number plate. (→P.654)

- **When riding in an aircraft**
  
  When bringing an electronic key onto an aircraft, make sure you do not press any buttons on the electronic key while inside the aircraft cabin. If you are carrying an electronic key in your bag etc., ensure that the buttons are not likely to be pressed accidentally. Pressing a button may cause the electronic key to emit radio waves that could interfere with the operation of the aircraft.
To prevent key damage
Observe the following:
- Do not drop the keys, subject them to strong shocks or bend them.
- Do not expose the keys to high temperatures for long periods of time.
- Do not get the keys wet or wash them in an ultrasonic washer etc.
- Do not attach metallic or magnetic materials to the keys or place the keys close to such materials.
- Do not disassemble the keys.
- Do not attach a sticker or anything else to the surface of the electronic key.
- Do not place the keys near objects that produce magnetic fields, such as TVs, audio systems and induction cookers, or medical electrical equipment, such as low-frequency therapy equipment.

Carrying the electronic key on your person
Carry the electronic key 3.9 in. (10 cm) or more away from electric appliances that are turned on. Radio waves emitted from electric appliances within 3.9 in. (10 cm) of the electronic key may interfere with the key, causing the key to not function properly.

In case of a smart access system with push-button start malfunction or other key-related problems
Take your vehicle with all the electronic keys provided with your vehicle, including the card key, to your Lexus dealer.

When a vehicle key is lost
If the key remains lost, the risk of vehicle theft increases significantly. Visit your Lexus dealer immediately with all remaining electronic keys and the card key that was provided with your vehicle.
1-2. Key information

NOTICE

- Precautions for handling the card key
  - Do not apply excess force when inserting the mechanical key into the card key. Doing so may damage the card key.
  - If the battery or card key terminals get wet, the battery may corrode and the card key may stop working.
    If the key is dropped into water, or if drinking water etc. is spilled on the key, immediately remove the battery cover and wipe the battery and terminals. (To remove the battery cover, lightly grasp and pull it.) If the battery is corroded, have your Lexus dealer replace the battery.
  - Do not crush the battery cover or use a screwdriver to remove the battery cover. Forcibly removing the battery cover may bend or damage the key.
  - If the battery cover is frequently removed, the battery cover may become loose.
  - When installing the battery, make sure to check the direction of the battery. Installing the battery in the wrong direction may cause the battery to deplete rapidly.
  - The surface of the card key may be damaged, or its coating may peel off in the following situations:
    - The card key is carried together with hard objects, such as coins and keys.
    - The card key is scraped with a sharp object, such as the tip of a mechanical pencil.
    - The surface of the card key is wiped with thinner or benzene.
1-3. Opening, closing and locking the doors

Smart access system with push-button start

The following operations can be performed simply by carrying the electronic key (including the card key) on your person, for example in your pocket.
(The driver should always carry the electronic key.)

1. Locks and unlocks the doors (→P. 56)
2. Starts and stops the hybrid system (→P. 175)
Unlocking and locking the doors

Front door handles

Grip the driver’s door handle to unlock the door. Grip the passenger’s door handle to unlock all the doors.*

Make sure to touch the sensor on the back of the handle.

The doors cannot be unlocked for 3 seconds after the doors are locked.

*: The door unlock settings can be changed. (→ P. 709)

Touch the lock sensor (the indentation on the upper part of the door handle) to lock the doors.
1-3. Opening, closing and locking the doors

Back door

Press the back door opener switch to unlock all the doors.

The doors cannot be unlocked for 3 seconds after the doors are locked.

Press the lock button to lock all the doors.
1-3. Opening, closing and locking the doors

**Antenna location and effective range**

**Antenna location**

1. Antennas outside the cabin
2. Antennas inside the cabin
3. Antenna inside the luggage compartment
4. Antenna outside the luggage compartment
1-3. Opening, closing and locking the doors

■ Effective range (areas within which the electronic key is detected)

- When locking or unlocking the doors
  The system can be operated when the electronic key is within about 2.3 ft. (0.7 m) of either of the outside front and back door handles. (Only the doors detecting the key can be operated.)

- When starting the hybrid system or changing “POWER” switch modes
  The system can be operated when the electronic key is inside the vehicle.

■ Operation signals

A buzzer sounds and the emergency flashers flash to indicate that the doors have been locked/unlocked. (Locked: Once; Unlocked: Twice)
### 1-3. Opening, closing and locking the doors

- **When the door cannot be locked by the lock sensor on the upper part of the door handle**

  If the door will not lock even when the topside sensor area is touched, try touching both the topside and underside sensor areas at the same time.

- **Alarms and warning messages**

  A combination of exterior and interior alarms as well as warning messages shown on the multi-information display are used to prevent theft of the vehicle and accidents resulting from erroneous operation. Take appropriate measures in response to any warning message on the multi-information display. (→P. 620)

  The following table describes circumstances and correction procedures when only alarms are sounded.

<table>
<thead>
<tr>
<th>Alarm</th>
<th>Situation</th>
<th>Correction procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exterior alarm sounds once for 10 seconds</td>
<td>An attempt was made to lock the vehicle while a door was open.</td>
<td>Close all of the doors and lock the doors again.</td>
</tr>
<tr>
<td>Interior alarm pings repeatedly</td>
<td>The “POWER” switch was turned to ACCESSORY mode while the driver’s door was open (The driver’s door was opened when the “POWER” switch was in ACCESSORY mode).</td>
<td>Turn the “POWER” switch off and close the driver’s door.</td>
</tr>
</tbody>
</table>
1-3. Opening, closing and locking the doors

- **Security feature**
  → P. 69

- **Battery-saving function**
  The battery-saving function will be activated in order to prevent the electronic key battery and the 12-volt battery from being discharged while the vehicle is not in operation for a long time.

  - In the following situations, the smart access system with push-button start may take some time to unlock the doors.
    - The electronic key has been left in an area of approximately 6 ft. (2 m) of the outside of the vehicle for 10 minutes or longer.
    - The smart access system with push-button start has not been used for 5 days or longer.

  - If the smart access system with push-button start has not been used for 14 days or longer, the doors cannot be unlocked at any doors except the driver’s door. In this case, take hold of the driver’s door handle, or use the wireless remote control or the mechanical key, to unlock the doors.

- **Conditions affecting operation**
  → P. 70
Note for the entry function

- Even when the electronic key is within the effective range (detection areas), the system may not operate properly in the following cases:
  - The electronic key is too close to the window or outside door handle, near the ground, or in a high place when the doors are locked or unlocked.
  - The electronic key is on the instrument panel, luggage room, floor, or in the door pockets or glove box when the hybrid system is started or "POWER" switch modes are changed.

- Do not leave the electronic key on top of the instrument panel or near the door pockets when exiting the vehicle. Depending on the radio wave reception conditions, it may be detected by the antenna outside the cabin and the door will become lockable from the outside, possibly trapping the electronic key inside the vehicle.

- As long as the electronic key is within the effective range, the doors may be locked or unlocked by anyone.

- Even if the electronic key is not inside the vehicle, it may be possible to start the hybrid system if the electronic key is near the window.

- The doors may unlock if a large amount of water splashes on the door handle, such as in the rain or in a car wash when the electronic key is within the effective range. (The door will automatically be locked after approximately 60 seconds if the doors are not opened and closed.)

- If the wireless remote control is used to lock the doors when the electronic key is near the vehicle, there is a possibility that the door may not be unlocked by the entry function. (Use the wireless remote control to unlock the doors.)
Note for locking the doors

- Touching the door lock sensor while wearing gloves may delay or prevent lock operation. Remove the gloves and touch the lock sensor again.

- When the lock operation is performed using the lock sensor, recognition signals will be shown up to two consecutive times. After this, no recognition signals will be given.

- If the door handle becomes wet while the electronic key is within the effective range, the door may lock and unlock repeatedly. Place the key in a position 6 ft. (2 m) or more separate from the vehicle while the vehicle is being washed. (Take care to ensure that the key is not stolen.)

- If the electronic key is inside the vehicle and a door handle becomes wet during a car wash, a message may be shown on the multi-information display and a buzzer will sound outside the vehicle. To turn off the alarm, lock all the doors.

- The lock sensor may not work properly if it comes into contact with ice, snow, mud, etc. Clean the lock sensor and attempt to operate it again, or use the lock sensor on the lower part of the door handle.

- Fingernails may scrape against the door during operation of the door handle. Be careful not to injure fingernails or damage the surface of the door.
1-3. Opening, closing and locking the doors

- **Note for the unlocking function**
  - A sudden approach to the effective range or door handle may prevent the doors from being unlocked. In this case, return the door handle to the original position and check that the doors unlock before pulling the door handle again.
  - Gripping the door handle when wearing a glove may not unlock the door. Remove the gloves and touch the sensor on the back of the handle again.
  - If the door handle becomes wet while the electronic key is within the effective range, the door may lock and unlock repeatedly. Place the key in a position 6 ft. (2 m) or more separate from the vehicle while the vehicle is being washed. (Take care to ensure that the key is not stolen.)
  - If there is another electronic key in the detection area, it may take slightly longer to unlock the doors after the door handle is gripped.
  - Fingernails may scrape against the door during operation of the door handle. Be careful not to injure fingernails or damage the surface of the door.

- **When the vehicle is not driven for extended periods**
  - To prevent theft of the vehicle, do not leave the electronic key within 6 ft. (2 m) of the vehicle.
  - The smart access system with push-button start can be deactivated in advance. (→P. 709)

- **Alarm (if equipped)**
  Using the smart access system with push-button start to lock the doors will set the alarm system. (→P. 121)
1-3. Opening, closing and locking the doors

■ To operate the system properly

Make sure to carry the electronic key when operating the system. Do not get the electronic key too close to the vehicle when operating the system from the outside of the vehicle.

Depending on the position and holding condition of the electronic key, the key may not be detected correctly and the system may not operate properly. (The alarm may go off accidentally, or the door lock prevention may not operate.)

■ If the smart access system with push-button start does not operate properly

● Locking and unlocking the doors: Use the mechanical key. (→P. 655)
● Starting the hybrid system: →P. 656

■ Electronic key battery depletion

→P. 71

■ When the electronic key battery is fully depleted

→P. 567

■ Customization

Settings (e.g. smart access system with push-button start) can be changed. (Customizable features →P. 709)
1-3. Opening, closing and locking the doors

- Certification for the smart access system with push-button start
  
  For vehicles sold in the U.S.A.
  
  FCC ID: HYQ13CZD  FCC ID: HYQ13CZE*
  FCC ID: HYQ14ACX  FCC ID: HYQ14ADF*
  FCC ID: HYQ14AEB  FCC ID: HYQ14AEF*
  
  FCC ID: NI4TMLF8-24
  
  *: For U.S. mainland only

  NOTE:
  
  This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

  FCC WARNING:
  
  Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

  For vehicles sold in Canada

  NOTE:
  
  Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
CAUTION

■ Caution regarding interference with electronic devices

● People with implanted pacemakers or cardiac defibrillators should keep away from the smart access system antennas. (⇒ P. 58)
The radio waves may affect the operation of such devices. If necessary, the entry function can be disabled. Ask your Lexus dealer for details, such as the frequency of radio waves and timing of emitting the radio waves. Then, consult your doctor to see if you should disable the entry function.

● Users of any electrical medical device other than implanted pacemakers and implanted cardiac defibrillators should consult the manufacturer of the device for information about its operation under the influence of radio waves.
Radio waves could have unexpected effects on the operation of such medical devices.

Ask your Lexus dealer for details on disabling the entry function.
1-3. Opening, closing and locking the doors

**Wireless remote control**

The wireless remote control can be used to lock and unlock the vehicle.

1. Locks all the doors
2. Unlocks all the doors
   - Pressing the button unlocks the driver's door. Pressing the button again within 3 seconds unlocks the other doors.
3. Opens the windows (press and hold)*
4. Sounds the alarm (press and hold) (→ P. 69)

*: This setting must be customized at your Lexus dealer.
1-3. Opening, closing and locking the doors

■ Operation signals

Doors: A buzzer sounds and the emergency flashers flash to indicate that the doors have been locked/unlocked. (Locked: Once; Unlocked: Twice)

Windows: A buzzer sounds to indicate that the windows are opening.

■ Door lock buzzer

If an attempt to lock the doors is made when a door is not fully closed, a buzzer sounds continuously for 10 seconds. Fully close the door to stop the buzzer, and lock the vehicle once more.

■ Panic mode

When (Panic) is pressed for longer than about one second, an alarm will sound intermittently and the vehicle lights will flash to deter any person from trying to break into or damage your vehicle.

To stop the alarm, press any button on the electronic key.

■ Security feature

If a door is not opened within approximately 60 seconds after the vehicle is unlocked, the security feature automatically locks the vehicle again.

■ Alarm (if equipped)

Using the wireless remote control to lock the doors will set the alarm system.

(→ P. 121)
1. Opening, closing and locking the doors

■ Conditions affecting operation

The smart access system with push-button start, wireless remote control and immobilizer system use weak radio waves. In the following situations, the communication between the electronic key and the vehicle may be affected, preventing the smart access system with push-button start, wireless remote control and immobilizer system from operating properly.

(Ways of coping: → P. 655)

● When the electronic key battery is depleted

● Near a TV tower, electric power plant, gas station, radio station, large display, airport or other facility that generates strong radio waves or electrical noise

● When carrying a portable radio, cellular phone, cordless phone or other wireless communication devices

● When the electronic key is in contact with, or is covered by the following metallic objects
  ▪ Cards to which aluminum foil is attached
  ▪ Cigarette boxes that have aluminum foil inside
  ▪ Metallic wallets or bags
  ▪ Coins
  ▪ Hand warmers made of metal
  ▪ Media such as CDs and DVDs

● When other wireless key (that emit radio waves) is being used nearby

● When carrying the electronic key together with the following devices that emit radio waves
  ▪ Another vehicle’s electronic key or a wireless key that emits radio waves
  ▪ Personal computers or personal digital assistants (PDAs)
  ▪ Digital audio players
  ▪ Portable game systems

● If window tint with a metallic content or metallic objects are attached to the rear window

■ If the wireless remote control does not operate properly

Locking and unlocking the doors: Use the mechanical key. (→ P. 655)
■ Electronic key battery depletion
  ● The standard battery life is 1 to 2 years. (The card key battery life is about a year and a half.)
  ● If the battery becomes low, an alarm will sound in the cabin when the hybrid system stops. (→P. 631)
  ● As the electronic key always receives radio waves, the battery will become depleted even if the electronic key is not used. The following symptoms indicate that the electronic key battery may be depleted. Replace the battery when necessary. (→P. 567)
    • The smart access system with push-button start or the wireless remote control does not operate.
    • The detection area becomes smaller.
    • The LED indicator on the key surface does not turn on.
  ● To avoid serious deterioration, do not leave the electronic key within 3 ft. (1 m) of the following electrical appliances that produce a magnetic field:
    • TVs
    • Personal computers
    • Cellular phones, cordless phones and battery chargers
    • Recharging cellular phones or cordless phones
    • Induction cookers
    • Table lamps

■ When the electronic key battery is fully depleted
  →P. 567

■ Customization
  Settings (e.g. door unlocking function) can be changed.
  (Customizable features →P. 709)
1-3. Opening, closing and locking the doors

Certification for wireless remote control

For vehicles sold in the U.S.A.
FCC ID: HYQ13CZD  FCC ID: HYQ13CZE*
FCC ID: HYQ14ACX  FCC ID: HYQ14ADF*
FCC ID: HYQ14AEB  FCC ID: HYQ14AEF*
FCC ID: NI4TMLF8-24
*: For U.S. mainland only

NOTE:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING:
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

For vehicles sold in Canada

NOTE:
Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
1-3. Opening, closing and locking the doors
Side doors

The vehicle can be locked and unlocked using the entry function, wireless remote control or door lock switch.

- **Entry function**
  → P. 55

- **Wireless remote control**
  → P. 68

- **Door lock switch**

  1. Locks all the doors
  2. Unlocks all the doors

- **Inside lock buttons**

  1. Locks the door
  2. Unlocks the door

  The front doors can be opened by pulling the inside handle even if the lock buttons are in the lock position.
1-3. Opening, closing and locking the doors

**Locking the front doors from the outside without a key**

**STEP 1** Move the inside lock button to the lock position.

**STEP 2** Close the door.

The door cannot be locked if the “POWER” switch is in ACCESSORY or ON mode, or the electronic key is left inside the vehicle.

The key may not be detected correctly and the door may be locked.

**Rear door child-protector lock**

The door cannot be opened from inside the vehicle when the lock is set.

These locks can be set to prevent children from opening the rear doors. Push down on each rear door switch to lock both rear doors.
1-3. Opening, closing and locking the doors

- **Impact detection door lock release system**
  In the event that the vehicle is subject to a strong impact, all the doors are unlocked. Depending on the force of the impact or the type of accident, however, the system may not operate.

- **Using the mechanical key**
  The doors can also be locked and unlocked with the mechanical key. (→P. 655)

- **If a wrong key is used**
  The key cylinder rotates freely to isolate inside mechanism.

- **Customization**
  Settings (e.g. unlocking function using a key) can be changed. (Customizable features →P. 709)
1-3. Opening, closing and locking the doors

**CAUTION**

■ To prevent an accident

Observe the following precautions while driving the vehicle. Failure to do so may result in a door opening and an occupant falling out, resulting in death or serious injury.

- Always use a seat belt.
- Always lock all the doors.
- Ensure that all doors are properly closed.
- Do not pull the inside handle of the doors while driving. The doors may be opened and the passengers are thrown out of the vehicle and it may result in serious injury or death.
  - Be especially careful for the front doors, as the doors may be opened even if the inside lock buttons are in locked position.
- Set the rear door child-protector locks when children are seated in the rear seats.

■ When opening or closing a door

Check the surroundings of the vehicle such as whether the vehicle is on an incline, whether there is enough space for a door to open and whether a strong wind is blowing. When opening or closing the door, hold the door handle tightly to prepare for any unpredictable movement.
1-3. Opening, closing and locking the doors

**Back door**

The back door can be locked/unlocked and opened by the following procedures.

- **Locking and unlocking the back door**
  - Entry function
    → P. 55
  - Wireless remote control
    → P. 68
  - Door lock switch
    → P. 73

- **Opening the back door from outside the vehicle**
  Raise the back door while pushing up the back door opener switch.

---

**When closing the back door**

Lower the back door using the back door handle, and make sure to push the back door down from the outside to close it.
1-3. Opening, closing and locking the doors

- **Luggage compartment light**
  The luggage compartment light turns on when the back door is opened with the luggage compartment light switch on.

- **If the back door opener is inoperative**
  The back door can be opened from the inside.

  Lift the center deck board and then push down the lever in the hole.

  ![Diagram of luggage compartment light switch](image1)

  1. Off
  2. On
**CAUTION**

- **Caution while driving**
  - Keep the back door closed while driving.
    - If the back door is left open, it may hit nearby objects while driving or luggage may be unexpectedly thrown out, causing an accident.
    - In addition, exhaust gases may enter the vehicle, causing death or a serious health hazard. Make sure to close the back door before driving.
  - Before driving the vehicle, make sure that the back door is fully closed. If the back door is not fully closed, it may open unexpectedly while driving, causing an accident.
  - Never let anyone sit in the luggage compartment. In the event of sudden braking, sudden swerving or a collision, they are susceptible to death or serious injury.

- **When children are in the vehicle**
  - Observe the following precautions.
    - Failure to do so may result in death or serious injury.
  - Do not leave children alone in the luggage compartment.
    - If a child is accidentally locked in the luggage compartment, they could have heat exhaustion.
  - Do not allow a child to open or close the back door.
    - Doing so may cause the back door to move unexpectedly, or cause the child's hands, head, or neck to be caught by the closing back door.
1-3. Opening, closing and locking the doors

**CAUTION**

- **Operating the back door**
  
  Observe the following precautions. Failure to do so may cause parts of the body to be caught, resulting in death or serious injury.
  
  - Remove any heavy loads, such as snow and ice, from the back door before opening it. Failure to do so may cause the back door to suddenly shut again after it is opened.
  
  - When opening or closing the back door, thoroughly check to make sure the surrounding area is safe.
  
  - If anyone is in the vicinity, make sure they are safe and let them know that the back door is about to open or close.
  
  - Use caution when opening or closing the back door in windy weather as it may move abruptly in strong wind.

- The back door may suddenly shut if it is not opened fully. It is more difficult to open or close the back door on an incline than on a level surface, so beware of the back door unexpectedly opening or closing by itself. Make sure that the back door is fully open and secure before using the luggage compartment.

- When closing the back door, take extra care to prevent your fingers etc. from being caught.

- When closing the back door, make sure to press it lightly on its outer surface. If the back door handle is used to fully close the back door, it may result in hands or arms being caught.
### CAUTION

**Operating the back door**
- Do not pull on the back door damper stay to close the back door, and do not hang on the back door damper stay. Doing so may cause hands to be caught or the back door damper stay to break, causing an accident.
- If a bicycle carrier or similar heavy object is attached to the back door, it may suddenly shut closed again after being opened, causing someone’s hands, head or neck to be caught and injured. When installing an accessory part to the back door, using a genuine Lexus part is recommended.

### NOTICE

**Back door damper stays**

The back door is equipped with damper stays that hold the back door in place. Observe the following precautions. Failure to do so may cause damage to the back door damper stay, resulting in malfunction.

- Do not attach any foreign objects, such as stickers, plastic sheets, or adhesives to the damper stay rod.
- Do not touch the damper stay rod with gloves or other fabric items.
- Do not attach any accessories other than genuine Lexus parts to the back door.
- Do not place your hand on the damper stay or apply lateral forces to it.
1-4. Adjustable components (seats, mirrors, steering wheel)

Front seats

Power seat (for driver’s side, and if equipped for passenger’s side)

1. Seat position adjustment switch
2. Seat cushion (front) angle adjustment switch (for driver’s side)
3. Vertical height adjustment switch (for driver’s side)
4. Seatback angle adjustment switch
5. Lumbar support adjustment switch (for driver’s side)
Before driving

CAUTION

■ Seat adjustment

To reduce the risk of sliding under the lap belt during a collision, do not recline the seat more than necessary. If the seat is too reclined, the lap belt may slide past the hips and apply restraint forces directly to the abdomen, or your neck may contact the shoulder belt, increasing the risk of death or serious injury in the event of an accident. Adjustments should not be made while driving as the seat may unexpectedly move and cause the driver to lose control of the vehicle.

After adjusting the seat, make sure that the seat is locked in position. (manual seat)
1-4. Adjustable components (seats, mirrors, steering wheel)

Rear seats

The seatbacks of the rear seats can be folded down. Pull up the seatback lock release lever until the lock is released.

Returning the seatbacks

To avoid trapping the seat belt between the seat and the inside of the vehicle, pass the seat belt inside the seat belt guide and then return the seatback securely to the locked position.
CAUTION

■ When folding the rear seatbacks down
Observe the following precautions. Failure to do so may result in death or serious injury.
● Do not fold the seatbacks down while driving.
● Stop the vehicle on level ground, set the parking brake and shift the shift position to P.
● Do not allow anyone to sit on a folded seatback or in the luggage compartment while driving.
● Do not allow children to enter the luggage compartment.

■ When returning the rear seatback to the upright position
Do not put your hand on the seat belt guide. Doing so may cause you to trap your hand between the guide and the pillar, causing an injury.

■ After returning the rear seatback to the upright position
Observe the following precautions. Failure to do so may result in death or serious injury.
● Make sure that the seatback is securely locked in position by lightly pushing it back and forth. If the seatback is not securely locked, the red marking will be visible behind the seatback lock release lever. Make sure that the red marking is not visible.

● Check that the seat belts are not twisted or caught in the seatback.
Your preferred driving position (the position of the driver’s seat and outside rear view mirrors) can be memorized and recalled with the touch of a button. It is also possible to set this function to activate automatically when the doors are unlocked.

Three different driving positions can be entered into memory.

■ Entering a position to memory

1. Turn the “POWER” switch to ON mode.
2. Adjust the driver’s seat and outside rear view mirrors to the desired positions.
3. While pressing the “SET” button, or within 3 seconds after the “SET” button is pressed, press button 1, 2 or 3 until the signal beeps.

If the selected button has already been preset, the previously recorded position will be overwritten.

■ Recalling the memorized position

1. Turn the “POWER” switch to ON mode.
2. Press button 1, 2 or 3 to recall the desired position.

*: If equipped
1-4. Adjustable components (seats, mirrors, steering wheel)

**Linking driving position memory with door unlock operation (driver’s seat only)**

Record your driving position to button 1, 2 or 3 before performing the following:

Carry only the key (including the card key) to which you want to link the driving position. If 2 or more keys are in the vehicle, the driving position cannot be linked properly.

1. Close the driver’s door and turn the “POWER” switch to OFF mode.

2. Press the desired button (1, 2 or 3) to recall the position. Then, while keep pressing the button, press the driver’s door lock switches (either lock or unlock) until the signal beeps.

   The driving position is recalled when the driver’s door is unlocked using the entry function or wireless remote control and the driver’s door is opened.

To prevent unintended triggering of the alarm, open and close a door once after a driving position has been recorded. (If a door is not opened within 30 seconds after door lock switch is pressed, the doors will be locked again and the alarm will automatically be set.)

In case that the alarm is triggered, immediately stop the alarm. (→P. 121)
1-4. Adjustable components (seats, mirrors, steering wheel)

- **Operating the driving position memory after turning the “POWER” switch off**
  Memorized positions can be activated up to 180 seconds after the driver’s door is opened and another 60 seconds after it is closed again, even after turning the “POWER” switch off.

- **Canceling the linked door unlock operation**
  1. Turn the “POWER” switch to ON mode and close the driver’s door.
  2. While pressing the “SET” button, press the driver’s door lock switches (either lock or unlock) until the signal beeps.

- **Stopping seat position operation part-way through**
  Perform any of the following operations:
  1. Press the “SET” button.
  2. Press button 1, 2 or 3.
  3. Adjust the seat using the switches (only cancels seat position recall).

- **Correct seat position**
  When the seat is in the most forward or most backward position, and the seat is being moved in those directions, the system may not correctly recognize the current position and the memorized position will not be correctly recalled.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>

- **Seat adjustment caution**
  Take care during seat adjustment so that the seat does not strike the rear passenger or squeeze your body against the steering wheel.
1-4. Adjustable components (seats, mirrors, steering wheel)

**Head restraints**

Head restraints are provided for all seats.

**Front seats**

1. **Up**
   
   Pull the head restraints up.

2. **Down**
   
   Push the head restraint down while pushing the lock release button.

**Rear center seat**

1. **Up**
   
   Pull the head restraints up.

2. **Down**
   
   Push the head restraint down while pushing the lock release button.

**Rear outboard seats**

1. **To fold**
   
   Pull up the head restraint while pressing the lock release button.

2. **To use**
   
   Lift up and push down the head restraint to the lowest lock position.
1-4. Adjustable components (seats, mirrors, steering wheel)

- **Removing the head restraints**
  - Front and rear center seats
    - Pull the head restraint up while pressing the lock release button.

- Rear outboard seats
  - Pull the head restraint up while pressing the lock release buttons.

- **Installing the head restraints**
  - Front and rear center seats
    - Align the head restraint with the installation holes and push it down to the lock position.
    - Press and hold the lock release button when lowering the head restraint.

- Rear outboard seats
  - Align the head restraint with the installation holes and push it down to the lowest lock position.
1-4. Adjustable components (seats, mirrors, steering wheel)

■ Adjusting the height of the head restraints (front seats)

Make sure that the head restraints are adjusted so that the center of the head restraint is closest to the top of your ears.

■ Adjusting the rear center seat head restraint

Always raise the head restraint one level from the stowed position when using.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ Head restraint precautions</td>
</tr>
<tr>
<td>Observe the following precautions regarding the head restraints. Failure to do so may result in death or serious injury.</td>
</tr>
<tr>
<td>● Use the head restraints designed for each respective seat.</td>
</tr>
<tr>
<td>● Adjust the head restraints to the correct position at all times.</td>
</tr>
<tr>
<td>● After adjusting the head restraints, push down on them and make sure they are locked in position.</td>
</tr>
<tr>
<td>● Do not drive with the head restraints removed.</td>
</tr>
</tbody>
</table>
Make sure that all occupants are wearing their seat belts before driving the vehicle.

■ Correct use of the seat belts

- Extend the shoulder belt so that it comes fully over the shoulder, but does not come into contact with the neck or slide off the shoulder.
- Position the lap belt as low as possible over the hips.
- Adjust the position of the seatback. Sit up straight and well back in the seat.
- Do not twist the seat belt.

■ Fastening and releasing the seat belt

1 To fasten the seat belt, push the plate into the buckle until a click sound is heard.
2 To release the seat belt, press the release button.
Adjusting the seat belt shoulder anchor height (front seats)

1. Push the seat belt shoulder anchor down while pressing the release button.
2. Push the seat belt shoulder anchor up.
   Move the height adjuster up and down as needed until you hear a click.

Seat belt pretensioners (front seats)

The pretensioner helps the seat belt to quickly restrain the occupant by retracting the seat belt when the vehicle is subjected to certain types of severe frontal or side collision and severe side collision.

The pretensioner may not activate in the event of a minor frontal impact, a minor side impact, a rear impact or a vehicle rollover.
1-4. Adjustable components (seats, mirrors, steering wheel)

**Pre-collision seat belts (front seats of vehicles with pre-collision system)**

If the system determines that a collision is unavoidable, the front seat belts will retract before the collision. (→P. 273)

**After using the rear center seat belt**

Store the buckle into the storage location in the seat cushion.

- **Emergency locking retractor (ELR)**
  
The retractor will lock the belt during a sudden stop or on impact. It may also lock if you lean forward too quickly. A slow, easy motion will allow the belt to extend so that you can move around fully.

- **Automatic locking retractor (ALR)**
  
  When a passenger’s shoulder belt is completely extended and then retracted even slightly, the belt is locked in that position and cannot be extended. This feature is used to hold the child restraint system (CRS) firmly. To free the belt again, fully retract the belt and then pull the belt out once more. (→P. 151)
■ Child seat belt usage

The seat belts of your vehicle were principally designed for persons of adult size.

● Use a child restraint system appropriate for the child, until the child becomes large enough to properly wear the vehicle's seat belt. (→ P. 146)

● When the child becomes large enough to properly wear the vehicle’s seat belt, follow the instructions on P. 92 regarding seat belt usage.

■ Replacing the belt after the pretensioner has been activated

If the vehicle is involved in multiple collisions, the pretensioner will activate for the first collision, but will not activate for the second or subsequent collisions.

■ Seat belt extender

If your seat belts cannot be fastened securely because they are not long enough, a personalized seat belt extender is available from your Lexus dealer free of charge.
1-4. Adjustable components (seats, mirrors, steering wheel)

⚠️ CAUTION

Observe the following precautions to reduce the risk of injury in the event of sudden braking, sudden swerving or an accident. Failing to do so may cause death or serious injury.

■ Wearing a seat belt
  - Ensure that all passengers wear a seat belt.
  - Always wear a seat belt properly.
  - Each seat belt should be used by one person only. Do not use a seat belt for more than one person at once, including children.
  - Lexus recommends that children be seated in the rear seat and always use a seat belt and/or an appropriate child restraint system.
  - To achieve a proper seating position, do not recline the seat more than necessary. The seat belt is most effective when the occupants are sitting up straight and well back in the seats.
  - Do not wear the shoulder belt under your arm.
  - Always wear your seat belt low and snug across your hips.
1-4. Adjustable components (seats, mirrors, steering wheel)

**CAUTION**

- **Pregnant women**
  Obtain medical advice and wear the seat belt in the proper way. (P. 92)
  Women who are pregnant should position the lap belt as low as possible over the hips in the same manner as other occupants. Extend the shoulder belt completely over the shoulder and position the belt across the chest. Avoid belt contact over the rounding of the abdominal area.
  If the seat belt is not worn properly, not only the pregnant woman, but also the fetus could suffer death or serious injury as a result of sudden braking or a collision.

- **People suffering illness**
  Obtain medical advice and wear the seat belt in the proper way. (P. 92)

- **When children are in the vehicle**
  Do not allow children to play with the seat belt. If the seat belt becomes twisted around a child’s neck, it may lead to choking or other serious injuries that could result in death.
  If this occurs and the buckle cannot be unfastened, scissors should be used to cut the belt.

- **Adjustable shoulder anchor**
  Always make sure the shoulder belt is positioned across the center of your shoulder. The belt should be kept away from your neck, but not falling off your shoulder. Failure to do so could reduce the amount of protection in an accident and cause death or serious injuries in the event of a sudden stop, sudden swerve or accident. (P. 93)
### CAUTION

<table>
<thead>
<tr>
<th>Seat belt pretensioners</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not place anything, such as a cushion, on the front passenger’s seat. Doing so will disperse the passenger’s weight, which prevents the sensor from detecting the passenger’s weight properly. As a result, the seat belt pretensioner for the front passenger’s seat may not activate in the event of a collision.</td>
</tr>
<tr>
<td>If the pretensioner has activated, the SRS warning light will come on. In that case, the seat belt cannot be used again and must be replaced at your Lexus dealer.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Seat belt damage and wear</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not damage the seat belts by allowing the belt, plate, or buckle to be jammed in the door.</td>
</tr>
<tr>
<td>Inspect the seat belt system periodically. Check for cuts, fraying, and loose parts. Do not use a damaged seat belt until it is replaced. Damaged seat belts cannot protect an occupant from death or serious injury.</td>
</tr>
<tr>
<td>Ensure that the belt and plate are locked and the belt is not twisted. If the seat belt does not function correctly, immediately contact your Lexus dealer.</td>
</tr>
<tr>
<td>Replace the seat assembly, including the belts, if your vehicle has been involved in a serious accident, even if there’s no obvious damage.</td>
</tr>
<tr>
<td>Do not attempt to install, remove, modify, disassemble or dispose of the seat belts. Have any necessary repairs carried out by your Lexus dealer. Inappropriate handling of the pretensioner may prevent it from operating properly, resulting in death or serious injury.</td>
</tr>
</tbody>
</table>
1-4. Adjustable components (seats, mirrors, steering wheel)

CAUTION

- Using a seat belt extender
  - Do not wear the seat belt extender if you can fasten the seat belt without the extender.
  - Do not use the seat belt extender when installing a child restraint system because the belt will not securely hold the child restraint system, increasing the risk of death or serious injury in the event of an accident.
  - The personalized extender may not be safe on another vehicle, when used by another person, or at a different seating position other than the one originally intended.

NOTICE

- When using a seat belt extender
  When releasing the seat belt, press on the buckle release button on the extender, not on the seat belt. This helps prevent damage to the vehicle interior and the extender itself.
1-4. Adjustable components (seats, mirrors, steering wheel)
Steering wheel

The steering wheel can be adjusted to a comfortable position.

**STEP 1**
Hold the steering wheel and push the lever down.

**STEP 2**
Adjust to the ideal position by moving the steering wheel horizontally and vertically.
After adjustment, pull the lever up to secure the steering wheel.

**CAUTION**

■ While driving
Do not adjust the steering wheel while driving.
Doing so may cause the driver to mishandle the vehicle and cause an accident, resulting in death or serious injury.

■ After adjusting the steering wheel
Make sure that the steering wheel is securely locked.
Otherwise, the steering wheel may move suddenly, possibly causing an accident, and resulting in death or serious injury.
Glare from the headlights of vehicles behind can be reduced by using the following functions:

**Manual anti-glare inside rear view mirror**

1. Normal position
2. Anti-glare position

**Auto anti-glare inside rear view mirror**

In “AUTO” mode, sensors are used to detect the headlights of vehicles behind and the reflected light is automatically reduced.

**Type A**

Turns automatic mode on/off

The indicator comes on when automatic mode is turned on.

The mirror will revert to automatic mode each time the “POWER” switch is turned to ON mode.
1-4. Adjustable components (seats, mirrors, steering wheel)

Type B

Turns automatic mode on/off

1. On
2. Off

The indicator comes on when automatic mode is turned on.
The mirror will revert to automatic mode each time the “POWER” switch is turned to ON mode.

Type C

Turns automatic mode on/off

The indicator comes on when automatic mode is turned on.
The mirror will revert to automatic mode each time the “POWER” switch is turned to ON mode.
Adjusting the height of rear view mirror

Adjust the height of the rear view mirror by moving it up and down.

To prevent sensor error (vehicles with auto anti-glare inside rear view mirror)

Type A

To ensure that the sensors operate properly, do not touch or cover them.

Type B and C
1-4. Adjustable components (seats, mirrors, steering wheel)

⚠️ CAUTION

- While driving
  Do not adjust the position of the mirror while driving.
  Doing so may lead to mishandling of the vehicle and cause an accident, resulting in death or serious injury.
1-4. Adjustable components (seats, mirrors, steering wheel)

Outside rear view mirrors

Mirror angle can be adjusted using the switch.

To select a mirror to adjust, press the switch.

1 Left
2 Right

To adjust the mirror, press the switch.

1 Up
2 Right
3 Down
4 Left

Folding the mirrors

Push the mirror back in the direction of the vehicle’s rear.
1-4. Adjustable components (seats, mirrors, steering wheel)

■ Mirror angle can be adjusted when
  The “POWER” switch is in ACCESSORY or ON mode.

■ Linked mirror function when reversing (vehicles with driving position memory)
  When the mirror select switch is in the “L” or “R” position, the outside rear view mirrors will automatically angle downwards when the vehicle is reversing in order to give a better view of the ground. To disable this function, move the mirror select switch to the neutral position (between “L” and “R”).

■ When the mirrors are fogged up
  The outside rear view mirrors can be cleared using the mirror defoggers. Turn on the rear window defogger to turn on the outside rear view mirror defoggers. (⇒P. 307)

■ Automatic adjustment of the mirror angle (vehicles with driving position memory)
  A desired mirror face angle can be entered to memory and recalled automatically by the driving position memory. (⇒P. 86)

■ Auto anti-glare function (if equipped)
  When the anti-glare inside rear view mirror is set to automatic mode, the outside rear view mirrors will activate in conjunction with the anti-glare inside rear view mirror to reduce reflected light. (⇒P. 101)
1-4. Adjustable components (seats, mirrors, steering wheel)

CAUTION

■ When driving the vehicle

Observe the following precautions while driving. Failing to do so may result in loss of control of the vehicle and cause an accident, resulting in death or serious injury.

- Do not adjust the mirrors while driving.
- Do not drive with the mirrors folded.
- Both the driver and passenger side mirrors must be extended and properly adjusted before driving.

■ When a mirror is moving

To avoid personal injury and mirror malfunction, be careful not to get your hand caught by the moving mirror.

■ When the mirror defoggers are operating

Do not touch the rear view mirror surfaces, as they can become very hot and burn you.
1-5. Opening and closing the windows and moon roof

Power windows

The power windows can be opened and closed using the switches. Operating the switch moves the windows as follows:

1. Closing
2. One-touch closing*
3. Opening
4. One-touch opening*

*: To stop the window partway, operate the switch in the opposite direction.

Window lock switch

Press the switch down to lock the passenger window.

Use this switch to prevent children from accidentally opening or closing a passenger window.
The power windows can be operated when
The “POWER” switch is in ON mode.

Operating the power windows after turning the hybrid system off
The power windows can be operated for approximately 43 seconds even after the “POWER” switch is turned to ACCESSORY mode or turned off. They cannot, however, be operated once either front door is opened.

Jam protection function
If an object becomes caught between the window and the window frame, window travel is stopped and the window is opened slightly.

When the power window does not close normally
If the jam protection function is operating abnormally and a window cannot be closed, perform the following operations using the power window switch on the relevant door.

- After stopping the vehicle, the window can be closed by holding the power window switch in the one-touch closing position while the “POWER” switch is turned to ON mode.
- If the window still cannot be closed even by carrying out the operation explained above, initialize the function by performing the following procedure.

**STEP 1**
Hold the power window switch in the one-touch closing position. Continue holding the switch for a further 6 seconds after the window has closed.

**STEP 2**
Hold the power window switch in the one-touch opening position. Continue holding the switch for a further 2 seconds after the window has opened completely.

**STEP 3**
Hold the power window switch in the one-touch closing position once again. Continue holding the switch for a further 2 seconds after the window has closed.

If you release the switch while the window is moving, start again from the beginning. If the window continues to close but then re-open slightly even after performing the above procedure correctly, have the vehicle inspected by your Lexus dealer.
1-5. Opening and closing the windows and moon roof

■ Door lock linked window operation
- The power windows can be opened and closed using the mechanical key.*
  (→P. 655)
- The power windows can be opened using the wireless remote control.*
  (→P. 68)
*: These settings must be customized at your Lexus dealer.

■ Customization
Setting (e.g. linked door lock operation) can be changed.
(Customizable features → P. 709)

⚠️ CAUTION

■ Closing the windows
Observe the following precautions. Failing to do so may result in death or serious injury.
- Check to make sure that all passengers do not have any part of their body in a position where it could be caught when a window is being operated.
- Do not allow children to operate the power windows. Closing a power window on someone can cause serious injury, and in some instances, even death.

■ Jam protection function
- Never use any part of your body to intentionally activate the jam protection function.
- The jam protection function may not work if something gets caught just before the window fully closes.
1-5. Opening and closing the windows and moon roof

Moon roof*

Use the overhead switches to open and close the moon roof and tilt it up and down.

■ Opening and closing

1 Opens the moon roof*

Push and hold “OPEN” for more than 1 second. The moon roof tilts up and then opens automatically.

2 Closes the moon roof*

Push and hold “CLOSE” for more than 1 second. The moon roof closes automatically and stops slightly before the tilt up position.

Push and hold “CLOSE” again to fully close the moon roof.

*: Lightly press either of the moon roof switches to stop the moon roof partway.

*: If equipped
1-5. Opening and closing the windows and moon roof

■ The moon roof can be operated when
The “POWER” switch is in ON mode.

■ Operating the moon roof after turning the hybrid system off
The moon roof can be operated for approximately 43 seconds even after the “POWER” switch is turned to ACCESSORY mode or turned off. It cannot, however, be operated once either front door is opened.

■ Jam protection function
If an object is detected between the moon roof and the frame while the moon roof is closing or tilting down, travel is stopped and the moon roof opens slightly.

■ Sunshade
The sunshade can be opened and closed manually. However, the sunshade will open automatically to slightly before the fully open position when the moon roof is opened.

■ Tilting up and down

1. Tilts the moon roof up*
2. Tilts the moon roof down*

*: Lightly press either of the moon roof switches to stop the moon roof partway.
When the moon roof does not close normally

Perform the following procedure:

● If the moon roof closes but then re-opens slightly
  
  **STEP 1** Stop the vehicle.
  
  **STEP 2** Press and hold the “CLOSE” switch.*1
  
  The moon roof will close, reopen and pause for approximately 10 seconds.*2 Then it will close again and tilt down. Finally it will be adjusted slightly and then stop.
  
  **STEP 3** Check to make sure that the moon roof completely stops and then release the switch.

● If the moon roof tilts down but then tilts back up
  
  **STEP 1** Stop the vehicle.
  
  **STEP 2** Press and hold the “DOWN” switch.*1
  
  The moon roof will close, reopen and pause for approximately 10 seconds in the tilt up position.*2 Then it will close again and tilt down. Finally it will be adjusted slightly and then stop.
  
  **STEP 3** Check to make sure that the moon roof has completely stopped and then release the switch.

*1: If the switch is released at the incorrect time, the procedure will have to be performed again from the beginning.

*2: If the switch is released after the above mentioned 10 second pause, automatic operation will be disabled. In that case, press and hold the “CLOSE” or “DOWN” switch, and the moon roof will close, be adjusted slightly and then stop. Check to make sure that the moon roof has completely stopped and then release the switch.

If the moon roof does not fully close even after performing the above procedure correctly, have the vehicle inspected by your Lexus dealer.
1-5. Opening and closing the windows and moon roof

■ Moon roof open warning buzzer

The buzzer sounds and a message is shown on the multi-information display in the instrument cluster when the “POWER” switch is turned off and the driver’s door is opened with the moon roof open.

<table>
<thead>
<tr>
<th>CAUTION</th>

</tbody>
</table>
Perform the following steps to open the fuel tank cap:

**Before refueling the vehicle**
- Turn the “POWER” switch off and close all the doors and windows.
- Confirm the type of fuel. (→P.116)

**Opening the fuel tank cap**

STEP 1
Press the opener to open the fuel filler door.

STEP 2
Turn the fuel tank cap slowly to open.

STEP 3
Hang the fuel tank cap on the back of the fuel filler door.
1-6. Refueling

Closing the fuel tank cap

After refueling, turn the fuel tank cap until you hear a click. Once the cap is released, it will turn slightly in the opposite direction.

- When the fuel filler door cannot be opened by pressing the inside switch
  - Remove the cover inside the luggage compartment and pull the lever.

- Fuel types
  - Unleaded gasoline (Octane rating 87 [Research Octane Number 91] or higher)

- Fuel tank capacity
  - Approximately 11.9 gal. (45 L, 9.9 Imp.gal.)
When refueling the vehicle

Observe the following precautions while refueling the vehicle. Failure to do so may result in death or serious injury.

- After exiting the vehicle and before opening the fuel door, touch an unpainted metal surface to discharge any static electricity. It is important to discharge static electricity before refueling because sparks resulting from static electricity can cause fuel vapors to ignite while refueling.
- Always hold the grips on the fuel tank cap and turn it slowly to remove it. A whooshing sound may be heard when the fuel tank cap is loosened. Wait until the sound cannot be heard before fully removing the cap. In hot weather, pressurized fuel may spray out of the filler neck and cause injury.
- Do not allow anyone that has not discharged static electricity from their body to come close to an open fuel tank.
- Do not inhale vaporized fuel. Fuel contains substances that are harmful if inhaled.
- Do not smoke while refueling the vehicle. Doing so may cause the fuel to ignite and cause a fire.
- Do not return to the vehicle or touch any person or object that is statically charged. This may cause static electricity to build up, resulting in a possible ignition hazard.

When refueling

Observe the following precautions to prevent fuel overflowing from the fuel tank:

- Securely insert the fuel nozzle into the fuel filler neck.
- Stop filling the tank after the fuel nozzle automatically clicks off.
- Do not top off the fuel tank.
### 1-6. Refueling

<table>
<thead>
<tr>
<th><strong>CAUTION</strong></th>

1-7. Theft deterrent system
Immobilizer system

The vehicle’s keys have built-in transponder chips that prevent the hybrid system from starting if a key has not been previously registered in the vehicle’s on-board computer.

Never leave the keys inside the vehicle when you leave the vehicle.

The indicator light flashes after the “POWER” switch has been turned off to indicate that the system is operating.

The indicator light stops flashing after the “POWER” switch has been turned to ACCESSORY or ON mode to indicate that the system has been canceled.
System maintenance
The vehicle has a maintenance-free type immobilizer system.

Conditions affecting operation
Depending on the surrounding environment and conditions, the immobilizer system may not operate properly. This may prevent the hybrid system from starting. (→P. 70)

Certifications for the immobilizer system
For vehicles sold in the U.S.A.
FCC ID: NI4TMIMB-1
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

For vehicles sold in Canada
Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

⚠️ NOTICE

To ensure the system operates correctly
Do not modify or remove the system. If modified or removed, the proper operation of the system cannot be guaranteed.
1-7. Theft deterrent system

**Alarm**

The system sounds the alarm and flashes the lights when forced entry is detected.

- **Triggering of the alarm**
  The alarm is triggered in the following situations when the alarm is set:
  - A locked door is unlocked or opened in any way other than using the entry function, wireless remote control or mechanical key. (The doors will lock again automatically.)
  - The hood is opened.

- **Setting the alarm system**
  Close the doors and hood, and lock all the doors. The system will be set automatically after 30 seconds.
  The indicator light changes from being on to flashing when the system is set.

- **Deactivating or stopping the alarm**
  Do one of the following to deactivate or stop the alarms:
  - Unlock the doors.
  - Turn the “POWER” switch to ACCESSORY or ON mode, or start the hybrid system. (The alarm will be deactivated or stopped after a few seconds.)
1-7. Theft deterrent system

■ System maintenance

The vehicle has a maintenance-free type alarm system.

■ Items to check before locking the vehicle

To prevent unexpected triggering of the alarm and vehicle theft, make sure of the following:

● Nobody is in the vehicle.
● The windows and moon roof are closed before the alarm is set.
● No valuables or other personal items are left in the vehicle.

■ Triggering of the alarm

The alarm may be triggered in the following situations:
(Stopping the alarm deactivates the alarm system.)

○ A person inside the vehicle opens a door or hood.

○ The 12-volt battery is recharged or replaced when the vehicle is locked.
   (→P. 661)
1-7. Theft deterrent system

■ Alarm-operated door lock
  ● When the alarm is operating, the doors are locked automatically to prevent intruders.
  ● Do not leave the key inside the vehicle when the alarm is operating, and make sure the key is not inside the vehicle when recharging or replacing the 12-volt battery.

⚠️ NOTICE

■ To ensure the system operates correctly
  Do not modify or remove the system. If modified or removed, the proper operation of the system cannot be guaranteed.
1-7. Theft deterrent system
Theft prevention labels (for U.S.A.)

These labels are attached to the vehicle to reduce vehicle theft by facilitating the tracing and recovery of parts from stolen vehicles. Do not remove under penalty of law.
**Correct driving posture**

Drive with a good posture as follows:

1. Sit upright and well back in the seat. (→P. 82)
2. Adjust the position of the seat forward or backward to ensure the pedals can be reached and easily depressed to the extent required. (→P. 82)
3. Adjust the seatback so that the controls are easily operable. (→P. 82)
4. Adjust the tilt and telescopic positions of the steering wheel downward so the airbag is facing your chest. (→P. 100)
5. Lock the head restraint in place with the center of the head restraint closest to the top of your ears. (→P. 89)
6. Wear the seat belt correctly. (→P. 92)
1-8. Safety information

**CAUTION**

- **While driving**
  - Do not adjust the position of the driver’s seat.
  - Doing so could cause the driver to lose control of the vehicle.
  - Do not place a cushion between the driver or passenger and the seatback.
  - A cushion may prevent correct posture from being achieved, and reduce the effectiveness of the seat belt and head restraint, increasing the risk of death or serious injury to the driver or passenger.
  - Do not place anything under the front seats.
  - Objects placed under the front seats may become jammed in the seat tracks and stop the seat from locking in place. This may lead to an accident, resulting in death or serious injury. The adjustment mechanism may also be damaged.

- **Adjusting the seat position**
  - Take care when adjusting the seat position to ensure that other passengers are not injured by the moving seat.
  - Do not put your hands under the seat or near the moving parts to avoid injury.
  - Fingers or hands may become jammed in the seat mechanism.
The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.

**SRS front airbags**

1. SRS driver airbag/front passenger airbag
   - Can help protect the head and chest of the driver and front passenger from impact with interior components

2. SRS knee airbags
   - Can help provide driver and front passenger protection
SRS side and curtain shield airbags

1. SRS side airbags
   Can help protect the torso of the front seat occupants

2. SRS curtain shield airbags
   Can help protect primarily the head of occupants in the outer seats
SRS airbag system components

1. Front passenger airbag
2. "AIR BAG ON" and "AIR BAG OFF" indicator lights
3. Side airbags
4. Curtain shield airbags
5. Front passenger occupant classification system (ECU and sensors)
6. Curtain shield airbag sensors
7. SRS warning light
8. Driver airbag
9. Side and curtain shield airbag sensors
10. Seat belt pretensioners and force limiters
11. Driver’s seat belt buckle switch
12. Driver’s seat position sensor
13. Knee airbags
14. Front passenger’s seat belt buckle switch
15. Front airbag sensors
16. Airbag sensor assembly
Your vehicle is equipped with ADVANCED AIRBAGS designed based on the US motor vehicle safety standards (FMVSS208). The airbag sensor assembly (ECU) controls airbag deployment based on information obtained from the sensors etc. shown in the system components diagram above. This information includes crash severity and occupant information. As the airbags deploy, a chemical reaction in the inflators quickly fills the airbags with non-toxic gas to help restrain the motion of the occupants.

If the SRS airbags deploy (inflate)

- Bruising and slight abrasions may result from contact with a deploying (inflating) SRS airbag.
- A loud noise and white powder will be emitted.
- Parts of the airbag module (steering wheel hub, airbag cover and inflator) as well as the front seats, parts of the front and rear pillars, and roof side rails, may be hot for several minutes. The airbag itself may also be hot.
- The windshield may crack.
- For Safety Connect subscribers, if the SRS airbags deploy or in the event of a severe rear-end collision, the system is designed to send an emergency call to the response center, notifying them of the vehicle’s location (without needing to push the “SOS” button) and an agent will attempt to speak with the occupants to ascertain the level of emergency and assistance required. If the occupants are unable to communicate, the agent automatically treats the call as an emergency and helps to dispatch the necessary emergency services. (→P. 492)
SRS airbag deployment conditions (SRS front airbags)

- The SRS front airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to an approximately 12-18 mph [20-30 km/h] frontal collision with a fixed wall that does not move or deform).

However, this threshold velocity will be considerably higher if the vehicle strikes an object, such as a parked vehicle and sign pole, which can move or deform on impact, or if the vehicle is involved in an underride collision (e.g. a collision in which the front of the vehicle "underrides", or goes under, the bed of a truck, etc.).

- Depending on the type of collision, it is possible that only the seat belt pretensioners will activate.

- The SRS front airbags for front passenger will not activate if there is no passenger sitting in the front passenger seat. However, the SRS front airbags for front passenger may deploy if luggage is put in the seat, even if the seat is unoccupied. (→P. 140)

SRS airbag deployment conditions (SRS side and curtain shield airbags)

- The SRS side and curtain shield airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to the impact force produced by an approximately 3300 lb. [1500 kg] vehicle colliding with the vehicle cabin from a direction perpendicular to the vehicle orientation at an approximate speed of 12-18 mph [20-30 km/h]).

- The SRS curtain shield airbags may also deploy in the event of a severe frontal collision.
Conditions under which the SRS airbags may deploy (inflate), other than a collision
The SRS front airbags may also deploy if a serious impact occurs to the underside of your vehicle. Some examples are shown in the illustration.

- Hitting a curb, edge of pavement or hard surface
- Falling into or jumping over a deep hole
- Landing hard or falling

Types of collisions that may not deploy the SRS airbags (SRS front airbags)
The SRS front airbags do not generally inflate if the vehicle is involved in a side or rear collision, if it rolls over, or if it is involved in a low-speed frontal collision. But, whenever a collision of any type causes sufficient forward deceleration of the vehicle, deployment of the SRS front airbags may occur.

- Collision from the side
- Collision from the rear
- Vehicle rollover
1-8. Safety information

■ Types of collisions that may not deploy the SRS airbags (SRS side and curtain shield airbags)

The SRS side and curtain shield airbags may not activate if the vehicle is subjected to a collision from the side at certain angles, or a collision to the side of the vehicle body other than the passenger compartment.

- Collision from the side to the vehicle body other than the passenger compartment
- Collision from the side at an angle

The SRS side and curtain shield airbags do not generally inflate if the vehicle is involved in a frontal or rear collision, if it rolls over, or if it is involved in a low-speed side collision.

- Collision from the front*
- Collision from the rear
- Vehicle rollover

*: Depending on the conditions and type of accident, the curtain shield airbags may deploy (inflate) upon frontal impact.
1-8. Safety information

When to contact your Lexus dealer
In the following cases, contact your Lexus dealer as soon as possible.

- Any of the SRS airbags has been inflated.
- The front of the vehicle is damaged or deformed, or was involved in an accident that was not severe enough to cause the SRS airbags to inflate.
- A portion of a door is damaged or deformed, or the vehicle was involved in an accident that was not severe enough to cause the SRS side and curtain shield airbags to inflate.
- The pad section of the steering wheel, dashboard near the front passenger airbag or lower portion of the instrument panel is scratched, cracked, or otherwise damaged.
- The surface of the seats with the side airbag is scratched, cracked, or otherwise damaged.
- The portion of the front pillars, rear pillars or roof side rail garnishes (padding) containing the curtain shield airbags inside is scratched, cracked, or otherwise damaged.
CAUTION

SRS airbag precautions

Observe the following precautions regarding the SRS airbags. Failure to do so may cause death or serious injury.

● The driver and all passengers in the vehicle must wear their seat belts properly. The SRS airbags are supplemental devices to be used with the seat belts.

● The SRS driver airbag deploys with considerable force, and can cause death or serious injury especially if the driver is very close to the airbag. The National Highway Traffic Safety Administration (NHTSA) advises:

Since the risk zone for the driver’s airbag is the first 2 - 3 in. (50 - 75 mm) of inflation, placing yourself 10 in. (250 mm) from your driver airbag provides you with a clear margin of safety. This distance is measured from the center of the steering wheel to your breastbone. If you sit less than 10 in. (250 mm) away now, you can change your driving position in several ways:

• Move your seat to the rear as far as you can while still reaching the pedals comfortably.

• Slightly recline the back of the seat.

Although vehicle designs vary, many drivers can achieve the 10 in. (250 mm) distance, even with the driver seat all the way forward, simply by reclining the back of the seat somewhat. If reclining the back of your seat makes it hard to see the road, raise yourself by using a firm, non-slippery cushion, or raise the seat if your vehicle has that feature.

• If your steering wheel is adjustable, tilt it downward. This points the airbag toward your chest instead of your head and neck.

The seat should be adjusted as recommended by NHTSA above, while still maintaining control of the foot pedals, steering wheel, and your view of the instrument panel controls.
### CAUTION

#### SRS airbag precautions

- **If the seat belt extender has been connected to the front seat belt buckles but the seat belt extender has not also been fastened to the latch plate of the seat belt, the SRS front airbags will judge that the driver and front passenger are wearing the seat belt even though the seat belt has not been connected. In this case, the SRS front airbags may not activate correctly in a collision, resulting in death or serious injury in the event of a collision. Be sure to wear the seat belt with the seat belt extender.**

- The SRS front passenger airbag also deploys with considerable force, and can cause death or serious injury especially if the front passenger is very close to the airbag. The front passenger seat should be as far from the airbag as possible with the seatback adjusted, so the front passenger sits upright.

- Improperly seated and/or restrained infants and children can be killed or seriously injured by a deploying airbag. An infant or child who is too small to use a seat belt should be properly secured using a child restraint system. Lexus strongly recommends that all infants and children be placed in the rear seats of the vehicle and properly restrained. The rear seats are safer for infants and children than the front passenger seat. (→ P.146)
CAUTION

SRS airbag precautions

- Do not sit on the edge of the seat or lean against the dashboard.

- Do not allow a child to stand in front of the SRS front passenger airbag unit or sit on the knees of a front passenger.

- Do not allow the front seat occupants to hold items on their knees.

- Do not lean against the door, the roof side rail or the front, side and rear pillars.

- Do not allow anyone to kneel on the passenger seats toward the door or put their head or hands outside the vehicle.
### SRS Airbag Precautions

- Do not attach anything to or lean anything against areas such as the dashboard, steering wheel pad and lower portion of the instrument panel. These items can become projectiles when the SRS driver, front passenger and knee airbags deploy.
- Do not attach anything to areas such as a door, windshield glass, side door glass, front or rear pillar, roof side rail, and assist grip.
- Do not strike or apply significant levels of force to the area of the SRS airbag components. Doing so can cause the SRS airbags to malfunction.
- Do not touch any of the component parts immediately after the SRS airbags have deployed (inflated) as they may be hot.

- If a vinyl cover is put on the area where the SRS knee airbags will deploy, be sure to remove it.
- Do not use seat accessories which cover the parts where the SRS side airbags inflate as they may interfere with inflation of the airbags. Such accessories may prevent the side airbags from activating correctly, disable the system or cause the side airbags to inflate accidentally, resulting in death or serious injury.

---

**CAUTION**

1. SRS airbag precautions
1-8. Safety information

CAUTION

- **SRS airbag precautions**
  - If breathing becomes difficult after the SRS airbags have deployed, open a door or window to allow fresh air in, or leave the vehicle if it is safe to do so. Wash off any residue as soon as possible to prevent skin irritation.
  - If the areas where the SRS airbags are stored, such as the steering wheel pad and front and rear pillar garnishes, are damaged or cracked, have them replaced by your Lexus dealer.
  - Do not place anything, such as a cushion, on the front passenger’s seat. Doing so will disperse the passenger’s weight, which prevents the sensor from detecting the passenger’s weight properly. As a result, the SRS front airbags for the front passenger may not deploy in the event of a collision.

- **Modification and disposal of SRS airbag system components**
  Do not dispose of your vehicle or perform any of the following modifications without consulting your Lexus dealer. The SRS airbags may malfunction or deploy (inflate) accidentally, causing death or serious injury.
  - Installation, removal, disassembly and repair of the SRS airbags
  - Repairs, modifications, removal or replacement of the steering wheel, instrument panel, dashboard, seats or seat upholstery, front, side and rear pillars or roof side rails
  - Repairs or modifications of the front fender, front bumper, or side of the occupant compartment
  - Installation of snow plows, winches, etc. to the front grille (bull bars or kangaroo bar etc.)
  - Modifications to the vehicle’s suspension system
  - Installation of electronic devices such as mobile two-way radios and CD players
  - Modifications to your vehicle for a person with a physical disability
Your vehicle is equipped with a front passenger occupant classification system. This system detects the conditions of the front passenger seat and activates or deactivates the devices for the front passenger.

1. Seat belt reminder light
2. SRS warning light
3. “AIR BAG OFF” indicator light
4. “AIR BAG ON” indicator light

</table>
*1: The system judges a person of adult size as an adult. When a smaller adult sits in the front passenger seat, the system may recognize him/her as a child depending on his/her physique and posture.

*2: In the event the front passenger does not wear a seat belt.

*3: When a larger child who has outgrown a child restraint system sits in the front passenger seat, the system may recognize him/her as an adult depending on his/her physique or posture.

*4: Never install a rear-facing child restraint system on the front passenger seat. A forward-facing child restraint system should only be installed on the front passenger seat when it is unavoidable. (→P.146)

*5: In case the indicator light is not illuminated, consult this manual on how to install the child restraint system properly. (→P.151)
**CAUTION**

- **Front passenger occupant classification system precautions**

  Observe the following precautions regarding front passenger occupant classification system. Failure to do so may cause death or serious injury.

  - Wear the seat belt properly.
  - Make sure the front passenger’s seat belt plate has not been left inserted into the buckle before someone sits in the front passenger seat.
  - Make sure the “AIR BAG OFF” indicator light is not illuminated when using the seat belt extender for the front passenger seat. If the “AIR BAG OFF” indicator light is illuminated, disconnect the extender tongue from the seat belt buckle, and reconnect the seat belt. Reconnect the seat belt extender after making sure the “AIR BAG ON” indicator light is illuminated. If you use the seat belt extender while the “AIR BAG OFF” indicator light is illuminated, the SRS airbags for the passenger may not activate correctly, which could cause death or serious injury in the event of a collision.
  - Do not apply a heavy load to the front passenger seat or equipment (e.g. seatback pocket).
  - Do not put weight on the front passenger seat by putting your hands or feet on the front passenger seat seatback from the rear passenger seat.
  - Do not let a rear passenger lift the front passenger seat with their feet or press on the seatback with their legs.
  - Do not put objects under the front passenger seat.
### CAUTION

**Front passenger occupant classification system precautions**

- Do not recline the front passenger seatback so far that it touches a rear seat. This may cause the “AIR BAG OFF” indicator light to be illuminated, which indicates that the passenger’s airbags will not deploy in the event of a severe accident. If the seatback touches the rear seat, return the seatback to a position where it does not touch the rear seat. Keep the front passenger seatback as upright as possible when the vehicle is moving. Reclining the seatback excessively may lessen the effectiveness of the seat belt system.

- If an adult sits in the front passenger seat, the “AIR BAG ON” indicator light is illuminated. If the “AIR BAG OFF” indicator is illuminated, ask the passenger to sit up straight, well back in the seat, feet on the floor, and with the seat belt worn correctly. If the “AIR BAG OFF” indicator still remains illuminated, either ask the passenger to move to the rear seat, or if that is not possible, move the front passenger seat fully rearward.

- When it is unavoidable to install a forward-facing child restraint system on the front passenger seat, install the child restraint system on the front passenger seat in the proper order. (→P 151)

- Do not modify or remove the front seats.

- Do not kick the front passenger seat or subject it to severe impact. Otherwise, the SRS warning light may come on to indicate a malfunction of the detection system. In this case, contact your Lexus dealer immediately.

- Child restraint systems installed on the rear seat should not contact the front seatbacks.

- Do not use a seat accessory, such as a cushion and seat cover, that covers the seat cushion surface.

- Do not modify or replace the upholstery of the front seat.
A child restraint system for a small child or baby must itself be properly restrained on the seat with the lap portion of the lap/shoulder belt.

The laws of all 50 states of the U.S.A. and Canada now require the use of child restraint systems.

---

**Points to remember**

Studies have shown that installing a child restraint on a rear seat is much safer than installing one to the front passenger seat.

- Choose a child restraint system that suits your vehicle and is appropriate to the age and size of the child.

- For installation details, follow the instructions provided with the child restraint system.
  
  General installation instructions are provided in this manual.  
  
  (→P.151)
Types of child restraints

Child restraint systems are classified into the following 3 types according to the age and size of the child.

Rear facing — Infant seat/convertible seat

Forward facing — Convertible seat

Booster seat
When installing a child restraint system on the front passenger seat

When you have to use a child restraint system on the front passenger seat, adjust the following:

- The seatback to the most upright position
- The seat cushion to the fully rearward position

Selecting an appropriate child restraint system

- Use a child restraint system appropriate for the child until the child becomes large enough to properly wear the vehicle’s seat belt.
- If the child is too large for a child restraint system, sit the child on a rear seat and use the vehicle’s seat belt. (→P. 92)
### Child restraint precautions

- For effective protection in automobile accidents and sudden stops, a child must be properly restrained, using a seat belt or child restraint system depending on the age and size of the child. Holding a child in your arms is not a substitute for a child restraint system. In an accident, the child can be crushed against the windshield, or between you and the vehicle's interior.

- Lexus strongly urges the use of a proper child restraint system that conforms to the size of the child, installed on the rear seat. According to accident statistics, the child is safer when properly restrained in the rear seat than in the front seat.

- Never install a rear-facing child restraint system on the front passenger seat even if the “AIR BAG OFF” indicator light is illuminated. In the event of an accident, the force of the rapid inflation of the front passenger airbag can cause death or serious injury to the child if the rear-facing child restraint system is installed on the front passenger seat.

- A forward-facing child restraint system may be installed on the front passenger seat only when it is unavoidable. A child restraint system that requires a top tether strap should not be used in the front passenger seat since there is no top tether strap anchor for the front passenger seat. Adjust the seatback as upright as possible and always move the seat as far back as possible even if the “AIR BAG OFF” indicator light is illuminated, because the front passenger airbag could inflate with considerable speed and force. Otherwise, the child may be killed or seriously injured.

- Do not use the seat belt extender when installing a child restraint system on the front or rear passenger seat. If installing a child restraint system with the seat belt extender connected to the seat belt, the seat belt will not securely hold the child restraint system, which could cause death or serious injury to the child or other passengers in the event of a sudden stop, sudden swerve or accident.
1-8. Safety information

**CAUTION**

**Child restraint precautions**

- Do not allow the child to lean his/her head or any part of his/her body against the door or the area of the seat, front and rear pillars or roof side rails from which the SRS side airbags or SRS curtain shield airbags deploy even if the child is seated in the child restraint system. It is dangerous if the SRS side airbags and curtain shield airbags inflate, and the impact could cause death or serious injury to the child.

- Make sure you have complied with all installation instructions provided by the child restraint manufacturer and that the system is properly secured. If it is not secured properly, it may cause death or serious injury to the child in the event of a sudden stop, sudden swerve or accident.

**When children are in the vehicle**

Do not allow children to play with the seat belt. If the seat belt becomes twisted around a child’s neck, it may lead to choking or other serious injuries that could result in death.

If this occurs and the buckle cannot be unfastened, scissors should be used to cut the belt.

**When the child restraint system is not in use**

- Keep the child restraint system properly secured on the seat even if it is not in use. Do not store the child restraint system unsecured in the passenger compartment.

- If it is necessary to detach the child restraint system, remove it from the vehicle or store it securely in the luggage compartment. This will prevent it from injuring passengers in the event of a sudden stop, sudden swerve or accident.
Installing child restraints

Follow the child restraint system manufacturer’s instructions. Firmly secure child restraints to the seats using the LATCH anchors or a seat belt. Attach the top tether strap when installing a child restraint.

The lap/shoulder belt can be used if your child restraint system is not compatible with the LATCH (Lower Anchors and Tethers for Children) system.

Child restraint LATCH anchors

LATCH anchors are provided for the outboard rear seats. (Buttons displaying the location of the anchors are attached to the seats.)

Seat belts equipped with a child restraint locking mechanism (ALR/ELR belts except driver’s seat belt) (→ P. 92)

Anchor brackets (for top tether strap)

An anchor bracket is provided for each rear seat.
Installation with LATCH system

Type A

Open the fasteners on the lower part of the seatback.

Latch the hooks of the lower straps onto the LATCH anchors. If the child restraint has a top tether strap, the top tether strap should be latched onto the top tether strap anchor.

For owners in Canada:
The symbol on a child restraint system indicates the presence of a lower connector system.
Open the fasteners on the lower part of the seatback.

Latch the buckles onto the LATCH anchors. If the child restraint has a top tether strap, the top tether strap should be latched onto the top tether strap anchor.

For owners in Canada:
The symbol on a child restraint system indicates the presence of a lower connector system.
Installing child restraints using a seat belt (child restraint lock function belt)

Rear facing — Infant seat/convertible seat

Place the child restraint system on the rear seat facing the rear of the vehicle.

Run the seat belt through the child restraint system and insert the plate into the buckle. Make sure that the belt is not twisted.

Fully extend the shoulder belt and then allow it to retract slightly in order to activate the ALR lock mode.

Lock mode allows the seat belt to retract only.
While pushing the child restraint system down into the rear seat, allow the shoulder belt to retract until the child restraint system is securely in place.

After the shoulder belt has retracted to a point where there is no slack in the belt, pull the belt to check that it cannot be extended.

**Forward-facing — Convertible seat**

Place the child restraint system on the seat facing the front of the vehicle.

Run the seat belt through the child restraint system and insert the plate into the buckle. Make sure that the belt is not twisted.
1. Fully extend the shoulder belt and then allow it to retract slightly in order to activate the ALR lock mode.

   Lock mode allows the seat belt to retract only.

2. While pushing the child restraint system into the rear seat, allow the shoulder belt to retract until the child restraint system is securely in place.

   After the shoulder belt has retracted to a point where there is no slack in the belt, pull the belt to check that it cannot be extended.

3. If the child restraint has a top tether strap, the top tether strap should be latched onto the top tether strap anchor. (→P.158)
### Booster seat

**STEP 1**
Place the booster seat on the seat facing the front of the vehicle.

**STEP 2**
Sit the child in the booster seat. Fit the seat belt to the booster seat according to the manufacturer’s instructions and insert the plate into the buckle. Make sure that the belt is not twisted.

Check that the shoulder belt is correctly positioned over the child’s shoulder and that the lap belt is as low as possible. (→P. 92)

### Removing a child restraint installed with a seat belt

Press the buckle release button and fully retract the seat belt.
Child restraint systems with a top tether strap

Secure the child restraint system using the seat belt or the LATCH anchors, press the lock release button, and raise the head restraint.

Open the anchor bracket cover, latch the hook onto the anchor bracket and tighten the top tether strap.

Make sure the top tether strap is securely latched.

Outside only: Adjust the head restraint to the downmost position.

Laws and regulations pertaining to anchors

The LATCH system conforms to FMVSS225 or CMVSS210.2. Child restraint systems conforming to FMVSS213 or CMVSS213 specifications can be used. This vehicle is designed to conform to the SAE J1819.
CAUTION

When installing a booster seat

To prevent the belt from going into ALR lock mode, do not fully extend the shoulder belt. ALR mode causes the belt to tighten only. This could cause injury or discomfort to the child. (→P. 94)

When installing a child restraint system

Follow the directions given in the child restraint system installation manual and fix the child restraint system securely in place.

If the child restraint system is not correctly fixed in place, the child or other passengers may be seriously injured or even killed in the event of sudden braking, sudden swerving or an accident.

- If the driver’s seat interferes with the child restraint system and prevents it from being attached correctly, attach the child restraint system to the right-hand rear seat.
- Adjust the front passenger seat so that it does not interfere with the child restraint system.
- Only put a forward-facing child restraint system on the front seat when unavoidable. When installing a forward-facing child restraint system on the front passenger seat, move the seat as far back as possible even if the “AIR BAG OFF” indicator light is illuminated. Failure to do so may result in death or serious injury if the airbags deploy (inflate).
<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>When installing a child restraint system</strong></td>
</tr>
<tr>
<td>- When a booster seat is installed, always ensure that the shoulder belt is positioned across the center of the child's shoulder. The belt should be kept away from the child's neck, but not so that it could fall off the child's shoulder. Failing to do so may result in death or serious injury in the event of sudden braking, sudden swerving or an accident.</td>
</tr>
<tr>
<td>- Ensure that the belt and plate are securely locked and the seat belt is not twisted.</td>
</tr>
<tr>
<td>- Shake the child restraint left and right, and forward and back to ensure that it has been securely installed.</td>
</tr>
<tr>
<td>- After securing a child restraint system, never adjust the seat.</td>
</tr>
<tr>
<td>- Follow all installation instructions provided by the child restraint system manufacturer.</td>
</tr>
<tr>
<td><strong>Do not use a seat belt extender</strong></td>
</tr>
<tr>
<td>If a seat belt extender is used when installing a child restraint system, the seat belt will not securely hold the child restraint system, which could cause death or serious injury to the child or other passengers in the event of sudden braking, sudden swerving or an accident.</td>
</tr>
<tr>
<td><strong>To correctly attach a child restraint system to the anchors</strong></td>
</tr>
<tr>
<td>When using the LATCH anchors, be sure that there are no foreign objects around the anchors and that the seat belt is not caught behind the child restraint system. Make sure the child restraint system is securely attached, or it may cause death or serious injury to the child or other passengers in the event of a sudden braking, sudden swerve or accident.</td>

2-1. Driving procedures
Driving the vehicle

The following procedures should be observed to ensure safe driving:

■ Starting the hybrid system
  →P.175

■ Driving
  STEP 1 With the brake pedal depressed, shift the shift position to D.
    (→P. 184)
    Check that the shift position indicator shows D.
  STEP 2 Release the parking brake. (→P. 194)
  STEP 3 Gradually release the brake pedal and gently depress the
        accelerator pedal to accelerate the vehicle.

■ Stopping
  STEP 1 With the shift position in D, depress the brake pedal.
  STEP 2 If necessary, set the parking brake.
    When the vehicle will be stopped for an extended period of time,
    shift the shift position to P. (→P. 184)
2-1. Driving procedures

- Parking the vehicle
  - **STEP 1** Stop the vehicle completely.
  - **STEP 2** Set the parking brake. (→P. 194)
  - **STEP 3** Shift the shift position to P. (→P. 187) Check that the shift position indicator shows P. (→P. 184)
  - **STEP 4** Press the “POWER” switch to stop the hybrid system.
  - **STEP 5** Slowly release the brake pedal.
  - **STEP 6** Lock the door, making sure that you have the electronic key on your person. When parking on a hill, block the wheels as needed.

- Starting off on a uphill
  - **STEP 1** Firmly set the parking brake with the brake pedal depressed, and then shift the shift position to D.
  - **STEP 2** Release the brake pedal and gently depress the accelerator pedal.
  - **STEP 3** Release the parking brake.
2-1. Driving procedures

■ When starting off on a uphill
The hill-start assist control is available. (→P. 271)

■ Driving in the rain
● Drive carefully when it is raining, because visibility will be reduced, the windows may become fogged-up, and the road will be slippery.
● Drive carefully when it starts to rain, because the road surface will be especially slippery.
● Refrain from high speeds when driving on an expressway in the rain, because there may be a layer of water between the tires and the road surface, preventing the steering and brakes from operating properly.

■ Breaking in your new Lexus
To extend the life of the vehicle, observing the following precautions is recommended:
● For the first 200 miles (300 km):
  Avoid sudden stops.
● For the first 1000 miles (1600 km):
  • Do not drive at extremely high speeds.
  • Avoid sudden acceleration.
  • Do not drive at a constant speed for extended periods.

■ Operating your vehicle in a foreign country
Comply with the relevant vehicle registration laws and confirm the availability of the correct fuel. (→P. 677)
2-1. Driving procedures

■ For efficient use

● Shift the shift position to D when driving.
  In the N position, the gasoline engine operates but electricity cannot be generated. The hybrid battery (traction battery) will discharge, requiring unnecessary engine power to recharge.

● Drive your vehicle smoothly.
  Avoid abrupt acceleration and deceleration. Gradual acceleration and deceleration will make more effective use of the electric motor (traction motor) without having to use gasoline engine power.

● Avoid repeated acceleration.
  Repeated acceleration consumes hybrid battery (traction battery) power, resulting in poor acceleration. Battery power can be restored by driving with the accelerator pedal slightly released.

● Shift the shift position to P when parking.
  In the N position, the hybrid battery (traction battery) does not recharge. Leaving the shift position in the N position for an extended period of time may discharge the hybrid battery (traction battery). The vehicle cannot run if the hybrid battery (traction battery) is discharged.
2-1. Driving procedures

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| **When starting the vehicle**
| Always keep your foot on the brake pedal while stopped with the hybrid system operating. This prevents the vehicle from creeping. |
| **When driving the vehicle**
| ● Do not drive if you are unfamiliar with the location of the brake and accelerator pedals to avoid depressing the wrong pedal. |
| ● Accidentally depressing the accelerator pedal instead of the brake pedal will result in sudden acceleration that may lead to an accident that could result in death or serious injury. |
| ● When backing up, you may twist your body around, leading to a difficulty in operating the pedals. Make sure to operate the pedals properly. |
| ● Make sure to keep a correct driving posture even when moving the vehicle only slightly. This allows you to depress the brake and accelerator pedals properly. |
| ● Depress the brake pedal using your right foot. Depressing the brake pedal using your left foot may delay response in an emergency, resulting in an accident. |
| ● The driver should pay extra attention to pedestrians when the vehicle is powered only by the electric motor (traction motor). Because there is no engine noise, the pedestrians may misjudge the vehicle’s movement. |
| ● Do not drive the vehicle over or stop the vehicle near flammable materials. The exhaust system and exhaust gases can be extremely hot. These hot parts may cause a fire if there is any flammable material nearby. |
| ● Do not let the vehicle roll backward while a forward driving position is selected, or roll forward while the shift position is in R. Doing so may result in an accident or damage to the vehicle. |
2-1. Driving procedures

**CAUTION**

- If the smell of exhaust is noticed inside the vehicle, open the windows and check that the back door is closed. Large amounts of exhaust in the vehicle can cause driver drowsiness and an accident, resulting in death or a serious health hazard. Have the vehicle inspected by your Lexus dealer immediately.

- Do not shift the shift position to P while the vehicle is moving. Doing so can damage the transmission and may result in a loss of vehicle control.

- Do not shift the shift position to R while the vehicle is moving forward. Doing so can damage the transmission and may result in a loss of vehicle control.

- Do not shift the shift position to D while the vehicle is moving backward. Doing so can damage the transmission and may result in a loss of vehicle control.

- Moving the shift position to N while the vehicle is moving will disengage the hybrid system. Engine braking is not available with the hybrid system disengaged.

- During normal driving, do not turn off the hybrid system. Turning the hybrid system off while driving will not cause loss of steering or braking control, but the power assist to these systems will be lost. This will make it more difficult to steer and brake, so you should pull over and stop the vehicle as soon as it is safe to do so. However, in the event of an emergency, such as if it becomes impossible to stop the vehicle in the normal way: \( \rightarrow \) P. 671

- Use engine braking (shift position B instead of shift position D) to maintain a safe speed when driving down a steep hill. Using the brakes continuously may cause the brakes to overheat and lose effectiveness. \( \rightarrow \) P. 184

- Do not adjust the positions of the steering wheel, the seat, or the inside or outside rear view mirrors while driving. Doing so may result in a loss of vehicle control that can cause accidents, resulting in death or serious injury.

- Always check that all passengers' arms, heads or other parts of their body are not outside the vehicle, as this may result in death or serious injury.
2-1. Driving procedures

**CAUTION**

- Do not drive in excess of the speed limit. Even if the legal speed limit permits it, do not drive over 85 mph (140 km/h) unless your vehicle has high-speed capability tires. Driving over 85 mph (140 km/h) may result in tire failure, loss of control and possible injury. Be sure to consult a tire dealer to determine whether the tires on your vehicle are high-speed capability tires or not before driving at such speeds.

**When driving on slippery road surfaces**

- Sudden braking, acceleration and steering may cause tire slippage and reduce your ability to control the vehicle, resulting in an accident.

- Abrupt changes from shift position D to B and rapid changes in the engine speed could cause the vehicle to skid, resulting in an accident.

- After driving through a puddle, lightly depress the brake pedal to make sure that the brakes are functioning properly. Wet brake pads may prevent the brakes from functioning properly. If the brakes on only one side are wet and not functioning properly, steering control may be affected, resulting in an accident.

**When changing the shift position**

Be careful not to change the shift position with the accelerator pedal depressed. Changing the shift position to any positions other than P or N may cause the vehicle to accelerate abruptly, causing an accident and resulting in death or serious injury. After changing the shift position, make sure to confirm the current shift position displayed on the shift position indicator inside the meter.
■ If you hear a squealing or scraping noise (brake pad wear limit indicators)

Have your Lexus dealer check and replace the brake pads as soon as possible.
Rotor damage may result if the pads are not replaced when needed.
It is dangerous to drive the vehicle when the wear limits of the brake pads and/or
those of the brake discs are exceeded.

■ When the vehicle is stopped

● Do not depress the accelerator pedal unnecessarily.
   If the vehicle is in any shift position other than P or N, the vehicle may accelerate
   suddenly and unexpectedly, causing an accident.

● Do not leave the vehicle with the hybrid system on for a long time.
   If such a situation cannot be avoided, park the vehicle in an open space and
   check that exhaust fumes do not enter the vehicle interior.

● In order to prevent accidents due to the vehicle rolling away, always keep
   depressing the brake pedal while the “READY” indicator is on. Apply the parking
   brake as necessary.

● If the vehicle is stopped on an incline, in order to prevent accidents caused by the
   vehicle rolling forward or backward, always depress the brake pedal and securely
   apply the parking brake as needed.

● Avoid revving or racing the engine.
   Running the engine at high speed while the vehicle is stopped may cause the
   exhaust system to overheat, which could result in a fire if combustible material is
   nearby.
2-1. Driving procedures

---

**CAUTION**

**When the vehicle is parked**

- Make sure to firmly apply the parking brake and shift the shift position to P. Failure to do so may cause the vehicle to move, or the vehicle to accelerate suddenly if the accelerator pedal is accidentally depressed. Also, when leaving the vehicle, make sure to turn off the hybrid system and lock the vehicle. Sound or shuddering may not be noticed even when the hybrid vehicle is ready to drive (when the “READY” indicator is illuminated).

- Do not leave glasses, cigarette lighters, spray cans, or soft drink cans in the vehicle when it is in the sun. Doing so may result in the following:
  - Gas may leak from a cigarette lighter or spray can, and may lead to a fire.
  - The temperature inside the vehicle may cause the plastic lenses and plastic material of glasses to deform or crack.
  - Soft drink cans may fracture, causing the contents to spray over the interior of the vehicle, and may also cause a short circuit in the vehicle’s electrical components.

- Do not leave cigarette lighters in the vehicle. If a cigarette lighter is in a place such as the glove box or on the floor, it may be lit accidentally when luggage is loaded or the seat is adjusted, causing a fire.

- Do not attach adhesive discs to the windshield or windows. Do not place containers such as air fresheners on the instrument panel or dashboard. Adhesive discs or containers may act as lenses, causing a fire in the vehicle.

- Do not leave a door or window open if the curved glass is coated with a metalized film such as a silver-colored one. Reflected sunlight may cause the glass to act as a lens, causing a fire.
**CAUTION**

- Do not touch the exhaust pipe while the hybrid system is operating or immediately after turning the hybrid system off. Doing so may cause burns.
- Do not leave the hybrid system operating in an area with snow build-up, or where it is snowing. If snowbanks build up around the vehicle while the hybrid system is operating, exhaust gases may collect and enter the vehicle. This may lead to death or a serious health hazard.

**Exhaust gases**

Exhaust gases include harmful carbon monoxide (CO), which is colorless and odorless. Inhaling exhaust gases may lead to death or a serious health hazard.

- If the vehicle is in a poorly ventilated area, stop the hybrid system. In a closed area, such as a garage, exhaust gases may collect and enter the vehicle. This may lead to death or a serious health hazard.
- The exhaust system should be checked occasionally. If there is a hole or crack caused by corrosion, damage to a joint or abnormal exhaust noise, be sure to have the vehicle inspected and repaired by your Lexus dealer. Failure to do so may allow exhaust gases to enter the vehicle, resulting in death or a serious health hazard.
### CAUTION

- **When taking a nap in the vehicle**

  Always turn the hybrid system off. Otherwise, if you accidentally move the shift lever or depress the accelerator pedal, this could cause an accident or fire due to hybrid system overheating. Additionally, if the vehicle is parked in a poorly ventilated area, exhaust gases may collect and enter the vehicle, leading to death or a serious health hazard.

- **When braking**
  
  - When the brakes are wet, drive more cautiously.
    
    Braking distance increases when the brakes are wet, and this may cause one side of the vehicle to brake differently than the other side. Also, the parking brake may not securely hold the vehicle.
  
  - If the electronically controlled assist function does not operate, do not follow other vehicles closely and avoid downhill or sharp turns that require braking.
    
    In this case, braking is still possible, but the brake pedal should be depressed more firmly than usual. Also, the braking distance will increase.
  
  - The brake system consists of 2 individual hydraulic systems; if one of the systems fails, the others will still operate. In this case, the brake pedal should be depressed more firmly than usual and the braking distance will increase. If this happens, do not continue to drive the vehicle. If the brake system warning light (red indicator) comes on together with the buzzer sound while driving, immediately stop the vehicle in a safe place and contact your Lexus dealer.

<th>NOTICE</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>When driving the vehicle</strong></td>
</tr>
<tr>
<td>● Do not depress the accelerator and brake pedals at the same time during driving, as this may restrain driving torque.</td>
</tr>
<tr>
<td>● Do not use the accelerator pedal or depress the accelerator and brake pedals at the same time to hold the vehicle on a hill.</td>
</tr>
<tr>
<td><strong>Avoiding damage to vehicle parts</strong></td>
</tr>
<tr>
<td>● Do not turn the steering wheel fully in either direction and hold it there for an extended period of time. Doing so may damage the power steering motor.</td>
</tr>
<tr>
<td>● When driving over bumps in the road, drive as slowly as possible to avoid damaging the wheels, underside of the vehicle, etc.</td>
</tr>
<tr>
<td><strong>If you get a flat tire while driving</strong></td>
</tr>
<tr>
<td>A flat or damaged tire may cause the following situations. Hold the steering wheel firmly and gradually depress the brake pedal to slow down the vehicle.</td>
</tr>
<tr>
<td>● It may be difficult to control your vehicle.</td>
</tr>
<tr>
<td>● The vehicle will make abnormal sounds or vibrations.</td>
</tr>
<tr>
<td>● The vehicle will lean abnormally.</td>
</tr>
<tr>
<td>Information on what to do in case of a flat tire (→ P. 640)</td>
</tr>
<tr>
<td>NOTICE</td>
</tr>
<tr>
<td>---------</td>
</tr>
<tr>
<td><strong>When encountering flooded roads</strong></td>
</tr>
<tr>
<td>Do not drive on a road that has flooded after heavy rain etc. Doing so may cause the following serious damage to the vehicle:</td>
</tr>
<tr>
<td>● Engine stalling</td>
</tr>
<tr>
<td>● Short in electrical components</td>
</tr>
<tr>
<td>● Engine damage caused by water immersion</td>
</tr>
<tr>
<td>In the event that you drive on a flooded road and the vehicle is flooded, be sure to have your Lexus dealer check the following:</td>
</tr>
<tr>
<td>● Brake function</td>
</tr>
<tr>
<td>● Changes in quantity and quality of engine oil, transmission fluid for the hybrid system etc.</td>
</tr>
<tr>
<td>● Lubricant condition for the bearings and suspension joints (where possible), and the function of all joints, bearings, etc.</td>
</tr>
<tr>
<td>If the P position control system is damaged by flooding, it may not be possible to shift the shift position to P, or from P to other positions. When the shift position cannot be changed from P to any other position, the front wheels will lock, and you will be unable to tow the vehicle with the front wheels on the ground, as the front wheels may be locked. In this case, transport the vehicle with both front wheels or all four wheels lifted.</td>
</tr>
</tbody>
</table>
Performing the following operations when carrying the electronic key on your person starts the hybrid system or changes “POWER” switch modes.

Starting the hybrid system

**STEP 1** Check that the parking brake is set.

**STEP 2** Firmly depress the brake pedal.

- Check that the “POWER” switch indicator turns green. If the indicator does not turn green, the hybrid system cannot be started.
- When the shift position is N, the hybrid system cannot start. Shift the shift position to P when starting the hybrid system. (→P. 187)

**STEP 3** Press the “POWER” switch.

Continue depressing the brake pedal until the hybrid system is completely started.

The hybrid system can be started from any “POWER” switch mode.
2.1. Driving procedures

STEP 1 Check that the “READY” indicator is on.
If the “READY” indicator changes from a flashing light to a solid light and the buzzer sounds, the hybrid system is starting normally.
The vehicle will not move when the “READY” indicator is off.
The vehicle can move when the “READY” indicator is on even if the engine is stopped. (The gasoline engine starts or stops automatically in accordance with the state of the vehicle.)

■ Stopping the hybrid system

STEP 1 Stop the vehicle completely.
STEP 2 Set the parking brake. (→P. 194)
STEP 3 Shift the shift position to P. (→P. 187)
Check that the shift position indicator shows P. (→P. 184)
STEP 4 Press the “POWER” switch.
The hybrid system will stop, and the meter display will be extinguished (the shift position indicator will be extinguished a few seconds after the meter display).
STEP 5 Slowly release the brake pedal and check that the indicator on the “POWER” switch is off.
177

2-1. Driving procedures

■ Changing “POWER” switch modes
Modes can be changed by pressing the “POWER” switch with the brake pedal released. (The mode changes each time the switch is pressed.)

1 Off
The emergency flashers can be used.

2 ACCESSORY mode
Some electrical components such as the audio system can be used.
The “POWER” switch indicator turns amber.

3 ON mode
All electrical components can be used.
The “POWER” switch indicator turns amber.

■ Auto power off function
If the vehicle is left in ACCESSORY mode for more than 20 minutes or ON mode (the hybrid system is not operating) for more than an hour with the shift position in P, the “POWER” switch will automatically turn off. However, this function cannot entirely prevent the 12-volt battery from discharging. Do not leave the vehicle with the “POWER” switch in ACCESSORY or ON mode for long periods of time when the hybrid system is not operating.

■ Sounds and vibrations specific to a hybrid vehicle
→P. 34
2.1. Driving procedures

- Electronic key battery depletion
  → P. 71
- When the ambient temperature is low, such as during winter driving conditions
  It may take time until the “READY” indicator to come on.
- Conditions affecting operation
  → P. 70
- Notes for the entry function
  → P. 62
- If the hybrid system does not start
  The immobilizer system may not have been deactivated. (→ P. 119)
- When the “POWER” switch indicator flashes in amber
  The system may be malfunctioning. Have the vehicle inspected by your Lexus dealer immediately.
- If the “READY” indicator does not come on
  If the “READY” indicator does not come on when you press the “POWER” switch with the shift position in P and the brake pedal depressed, contact your Lexus dealer immediately.
- If the hybrid system is malfunctioning
  → P. 609
- If the electronic key battery is depleted
  → P. 567
2-1. Driving procedures

■ Operation of the “POWER” switch

● When operating the “POWER” switch, one short, firm press is enough. If the switch is pressed improperly, the hybrid system may not start or the “POWER” switch mode may not change. It is not necessary to press and hold the switch.

● If attempting to restart the hybrid system immediately after turning the “POWER” switch off, the hybrid system may not start in some cases. After turning the “POWER” switch off, please wait a few seconds before restarting the hybrid system.

■ Automatically P position selection function

→ P. 190

■ When the P position control system malfunctions

The “POWER” switch will not be able to be turned off. In such a case, the switch can be turned off after applying the parking brake.

Have the vehicle inspected by your Lexus dealer immediately.

⚠️ CAUTION

■ When starting the hybrid system

Always start the hybrid system while sitting in the driver’s seat. Do not depress the accelerator pedal while starting the hybrid system under any circumstances. Doing so may cause an accident resulting in death or serious injury.

■ Stopping the hybrid system in an emergency

If you want to stop the hybrid system in an emergency while driving the vehicle, press and hold the “POWER” switch for more than 2 seconds, or press it briefly 3 times or more in succession.

However, do not touch the “POWER” switch while driving except in an emergency. Turning the hybrid system off while driving will not cause loss of steering or braking control, but the power assist to these systems will be lost. This will make it more difficult to steer and brake, so you should pull over and stop the vehicle as soon as it is safe to do so.
2-1. Driving procedures

⚠️ NOTICE

- **To prevent 12-volt battery discharge**
  - Do not leave the “POWER” switch in ACCESSORY or ON mode for long periods of time without the hybrid system on.
  - If the hybrid system is off, but the indicator on the “POWER” switch is illuminated, this indicates that the “POWER” switch is still turned on. When exiting the vehicle, always check that the “POWER” switch is off.

- **Symptoms indicating a malfunction with the “POWER” switch**
  If the “POWER” switch seems to be operating somewhat differently than usual, such as the switch sticking slightly, there may be a malfunction. Contact your Lexus dealer immediately.
2-1. Driving procedures

EV drive mode

In EV drive mode, the electric motor (traction motor), powered by the hybrid battery (traction battery), is used to drive the vehicle.

This mode allows you to drive in residential areas late at night, or in indoor parking lots etc. without concern for noises and exhaust gas emissions.

**Turns EV drive mode on/off**

When EV drive mode is turned on, the EV drive mode indicator will come on. Pressing the switch when in EV drive mode will return the vehicle to normal driving (using the gasoline engine and electric motor [traction motor]).
2-1. Driving procedures

- Situations in which EV drive mode cannot be turned on
  It may not be possible to turn EV drive mode on in the following situations. If it cannot be turned on, a buzzer will sound and a message will be shown on the multi-information display.
  - The temperature of the hybrid system is high.
    The vehicle has been left in the sun, driven on a hill, driven at high speeds, etc.
  - The temperature of the hybrid system is low.
    The vehicle has been left in temperatures lower than about 68 °F (20 °C) for a long period of time etc.
  - The gasoline engine is warming up.
  - The hybrid battery (traction battery) is low.
    An “Energy Monitor” display of level 3 or lower may indicate a low battery level. (→P. 42)
  - Vehicle speed is high.
  - The accelerator pedal is depressed firmly or the vehicle is on a hill etc.
  - The windshield defogger is in use.

- Switching to EV drive mode when the gasoline engine is cold
  If the hybrid system is started while the gasoline engine is cold, the gasoline engine will start automatically after a short period of time in order to warm up. In this case, you will become unable to switch to EV drive mode.
  After the hybrid system has started and the “READY” indicator has illuminated, press the EV drive mode switch before the gasoline engine starts to switch to EV drive mode.
2-1. Driving procedures

■ Automatic cancellation of EV drive mode
When driving in EV drive mode, the gasoline engine may automatically restart in the following situations. When EV drive mode is canceled, a buzzer will sound and the EV drive mode indicator will flash and go off.

● The hybrid battery (traction battery) becomes low.
  The remaining battery level indicated in the “Energy Monitor” display is level 2 or lower. (→P. 42)

● Vehicle speed becomes high.

● The accelerator pedal is depressed firmly or the vehicle is on a hill etc.
When it is possible to inform the driver of automatic cancelation in advance, a prior notice screen will appear on the multi-information display.

■ Possible driving distance when driving in EV drive mode
In EV drive mode, it is possible to drive up to about 1/2 mile (1 km) if driving at a speed of about 25 mph (40 km/h) or less. (The distance that is possible depends on the hybrid battery [traction battery] level and driving conditions.)

■ Fuel economy
CT200h is designed to achieve the best possible fuel economy during normal driving (using the gasoline engine and electric motor [traction motor]). Driving in EV drive mode more than necessary may lower fuel economy.

⚠️ CAUTION

■ While driving
When driving in EV drive mode, pay special attention to the area around the vehicle. Because there is no engine noise, pedestrians, people riding bicycles or other people and vehicles in the area may not be aware of the vehicle starting off or approaching them, so take extra care while driving.
Select a shift position appropriate for the driving conditions.

**Shifting the shift lever**

1. **Shift lever**
   - Operate the shift lever gently and ensure correct shifting operation.
   - When shifting to the D or R positions, move the shift lever along the shift gate.
   - To shift to the N position, slide the shift lever to the left and hold it. The shift position will change to N.
   - Shifting to B is only possible when shift position D is selected.
   - The shift lever will always return to this original position after a shifting operation.

When shifting from P to N, D or R, from D to R, or from R to D, ensure that the brake pedal is being depressed and the vehicle is stationary.
2-1. Driving procedures

2. Shift position indicator

The current shift position is illuminated.

When any shift position other than D or B is selected, the arrow toward B and B position indicator disappear from the shift position indicator.

When selecting the shift position, make sure that the shift position has been changed to the desired position by checking the shift position indicator provided on the instrument cluster.

■ Shift position purpose

<table>
<thead>
<tr>
<th>Shift position</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Parking the vehicle/starting the hybrid system</td>
</tr>
<tr>
<td>R</td>
<td>Reversing</td>
</tr>
<tr>
<td>N</td>
<td>Neutral</td>
</tr>
<tr>
<td>D</td>
<td>Normal driving*</td>
</tr>
<tr>
<td>B</td>
<td>Applying engine braking or strong braking when the accelerator pedal has been released on steep downward slopes etc.</td>
</tr>
</tbody>
</table>

*: For good fuel economy and noise reduction, the D position should usually be used.
2-1. Driving procedures

Selecting a driving mode

The following modes can be selected to suit driving conditions:

1. Normal mode
2. Eco drive mode

Suitable for improving the fuel economy, because the torque corresponding to the accelerator pedal depression amount can be generated more smoothly than it is in normal conditions and the operation of the air conditioning system (heating/cooling) will be minimized.

When the driving mode select switch is turned left, the “ECO MODE” indicator comes on in the instrument cluster.

Press the switch to change the driving mode to normal mode.

3. Sport mode

Use when high levels of response and feeling are desirable, such as when driving in mountainous regions or when overtaking.

When the driving mode select switch is turned right, the “SPORT MODE” indicator comes on in the instrument cluster.

Press the switch to change the driving mode to normal mode.
P position switch

■ When shifting the shift position to P

Fully stop the vehicle and set the parking brake, and then press the P position switch.

When the shift position is changed to P, the switch indicator comes on.
Check that the P position is illuminated on the shift position indicator.

■ Shifting the shift position from P to other positions

● While depressing the brake pedal firmly, operate the shift lever. If the shift lever is operated without depressing the brake pedal, the buzzer will sound and the shifting operation will be disabled.

● When selecting the shift position, make sure that the shift position has been changed to the desired position by checking the shift position indicator provided on the instrument cluster.

● The shift position cannot be changed from P to B directly.
2.1 Driving procedures

- **Operation of the air conditioning system in Eco drive mode (without navigation system)**
  
  Eco drive mode controls the heating/cooling operations and fan speed of the air conditioning system to enhance fuel efficiency. (→P. 304) To improve air conditioning performance, adjust the fan speed or turn off Eco drive mode.

- **Operation of the air conditioning system in Eco drive mode (with navigation system)**
  
  Eco drive mode controls the heating/cooling operations and fan speed of the air conditioning system to enhance fuel efficiency. To improve air conditioning performance, adjust the fan speed or turn off Eco drive mode. (Refer to the “Navigation System Owner’s Manual”.)

- **For the shift positions**
  
  - When the “POWER” switch is off, the shift position cannot be changed.
  - When the “POWER” switch is in ON mode (the hybrid system is not operating), the shift position can only be changed to N. The shift position will be changed to N even if the shift lever is shifted to D or R and held in that position.
  - When the “READY” indicator is on, the shift position can be changed from P to D, N or R.
  - When the “READY” indicator is flashing, the shift position cannot be changed from P to another position even if the shift lever is operated. Wait until the “READY” indicator changes from a flashing to a solid light, and then operate the shift lever again.
  - The shift position can only be changed to B directly from D.
In addition, if an attempt is made to change the shift position by moving the shift lever in any of the following situations, the buzzer will sound and the shifting operation will be disabled or the shift position will automatically change to N. When this happens, select an appropriate shift position.

- **Situations where the shifting operation will be disabled:**
  - When an attempt is made to change the shift position from P to another position by moving the shift lever without depressing the brake pedal.
  - When an attempt is made to change the shift position from P or N to B by moving the shift lever.

- **Situations where the shift position will automatically change to N:**
  - When the P position switch is pressed while the vehicle is running.*1
  - When an attempt is made to select the R position by moving the shift lever when the vehicle is moving forward.*2
  - When an attempt is made to select the D position by moving the shift lever when the vehicle is moving in reverse.*3
  - When an attempt is made to change the shift position from R to B by moving the shift lever.

*1: Shift position may be changed to P when driving at extremely low speeds.
*2: Shift position may be changed to R when driving at low speeds.
*3: Shift position may be changed to D when driving at low speeds.
2.1 Driving procedures

■ Reverse warning buzzer
When shifting into R, a buzzer will sound to inform the driver that the shift position is in R.

■ About engine braking
When shift position B is selected, releasing the accelerator pedal will apply engine braking.

• When the vehicle is driven at high speeds, compared to ordinary gasoline-fueled vehicles, the engine braking deceleration is felt less than that of other vehicles.
• The vehicle can be accelerated even when shift position B is selected.

If the vehicle is driven continuously in the B position, fuel efficiency will become low. Usually, select the D position.

■ When driving with cruise control or dynamic radar cruise control activated
Even if switching the driving mode to sport mode with the intent of enabling engine braking, engine braking will not activate because cruise control or dynamic radar cruise control will not be canceled.

■ Automatically P position selection function
When the shift position is in a position other than P, pressing the “POWER” switch with the vehicle stopped completely will cause the shift position to change to P automatically, and then the “POWER” switch will turn off.

■ If the shift position cannot be shifted from P
There is a possibility that the 12-volt battery is discharged. Check the 12-volt battery in this situation. (→ P. 658)

■ Sport mode automatic deactivation
Sport mode is automatically deactivated if the “POWER” switch is turned off after driving in sport mode.
After recharging/reconnecting the 12-volt battery
→ P. 542

Customization
Settings (e.g. Reverse warning buzzer) can be changed.
(Customizable features → P. 709)

CAUTION

When driving on slippery road surfaces
Do not accelerate or shift the shift position suddenly.
Sudden changes in engine braking may cause the vehicle to spin or skid, resulting in an accident.

For the shift lever
Do not remove the shift lever knob or use anything but a genuine Lexus shift lever knob. Also, do not hang anything on the shift lever.
Doing so could prevent the shift lever from returning to position, causing unexpected accidents to occur when the vehicle is in motion.

P position switch
Do not press the P position switch while the vehicle is moving.
If the P position switch is pressed when driving at very low speeds (for example, directly before stopping the vehicle), the vehicle may stop suddenly when the shift position switches to P, which could lead to an accident.
2-1. Driving procedures

⚠️ NOTICE

- **Hybrid battery (traction battery) charge**
  
  If the shift position is in N, the hybrid battery (traction battery) will not be charged. To help prevent the battery from discharging, avoid leaving the N position selected for an extended period of time.

- **Situations where P position control system malfunctions are possible**
  
  If any of the following situations occurs, P position control system malfunctions are possible. Immediately stop the vehicle in a safe place on level ground, apply the parking brake, and then contact your Lexus dealer.
  
  - When the "P LOCK MALFUNCTION" warning message appears on the multi-information display. (→P. 621)
  - When the shift position indicator remains off.

- **Notes regarding shift lever and P position switch operation**
  
  Avoid repeatedly operating the shift lever and P position switch in quick succession. The system protection function may activate and it will not be temporarily possible to shift the shift position other than P. If this happens, please wait for a while before attempting to change the shift position again.
2-1. Driving procedures

Turn signal lever

The turn signal lever can be used to show the following intention of the driver:

1. Right turn
2. Left turn
3. Lane change to the right (push and hold the lever partway)
   The right hand signals will flash until you release the lever.
4. Lane change to the left (push and hold the lever partway)
   The left hand signals will flash until you release the lever.

- Turn signals can be operated when
  The “POWER” switch is in ON mode.
- If the indicator flashes faster than usual
  Check that a light bulb in the front or rear turn signal lights has not burned out.
2-1. Driving procedures

Parking brake

To set the parking brake, fully depress the parking brake pedal with your left foot while depressing the brake pedal with your right foot. (Depressing the pedal again releases the parking brake.)

- **Parking brake engaged warning buzzer**
  The buzzer sounds to indicate that parking brake is still engaged (with the vehicle having reached a speed of 3 mph [5 km/h]). (→ P. 624)

- **Usage in winter time**
  → P. 287

⚠️ **NOTICE**

- **Before driving**
  Fully release the parking brake. Driving the vehicle with the parking brake set will lead to brake components overheating, which may affect braking performance and increase brake wear.
2-1. Driving procedures

Horn

To sound the horn, press on or close to the mark.

- After adjusting the steering wheel
  Make sure that the steering wheel is securely locked.
  The horn may not sound if the steering wheel is not securely locked. (→ P.100)
The following gauges and meters and display illuminate when the “POWER” switch is in ON mode:

1. Hybrid System Indicator
   Displays hybrid system output or regeneration level

2. Tachometer (if equipped)
   Displays the engine speed in revolutions per minute

3. Speedometer
   Displays the vehicle speed

4. ECO lamp and SPORT lamp (if equipped)
   Changes colors according to driving mode

5. Fuel gauge
   Displays the quantity of fuel remaining in the tank

6. Multi-information display
   Presents the driver with a variety of driving-related data. (→ P. 206)

7. Outside temperature
   The temperature range that can be displayed is from -40 °F (-40 °C) to 122 °F (50 °C)
When driving

Switches between odometer and trip meter displays. When the trip meter is displayed, pressing and holding the button will reset the trip meter.
2-2. Instrument cluster

**Instrument panel light control**

The brightness of the instrument panel lights can be adjusted by turning the dial.

1. Brighter
2. Darker

When the headlight switch is turned to ON, the brightness will be reduced slightly unless the control dial is turned fully up.

When the dial is turned fully down, the cup holder light and the foot-well lights will turn off. (→P. 445)
2-2. Instrument cluster

**Hybrid System Indicator**

1. **Power area**
   - Shows that an Eco-friendly driving range is being exceeded (during full power driving etc.)

2. **Eco area**
   - Shows that the vehicle is being driven in an Eco-friendly manner.

3. **Hybrid Eco area**
   - Shows that gasoline engine power is not being used very often.
   - The gasoline engine will automatically stop and restart under various conditions.

4. **Charge area**
   - Shows that energy is being recovered via the regenerative brake.

- Hybrid System Indicator is displayed when the driving mode is other than the sport mode.
- By keeping the indicator needle within Eco area, more Eco-friendly driving can be achieved.
- Charge area indicates regeneration* status. Regenerated energy will be used to charge the battery.

*: When used in this manual, “regeneration” refers to the conversion of energy created by the movement of the vehicle into electrical energy.
2-2. Instrument cluster

■ ECO lamp and SPORT lamp (if equipped)
  ● When sport mode is selected, the SPORT lamp (red) will illuminate.
  ● When all of the following conditions are satisfied and the Eco-friendly driving, the ECO lamp (blue) will illuminate:
    • When driving with the shift position in D
    • When either normal mode or Eco mode are selected, and EV drive mode is not in use
    • The vehicle speed is 80 mph (130 km/h) or below.

■ Tachometer (if equipped)
  Hybrid System Indicator automatically switches to the tachometer when the driving mode is set to the sport mode. However, while the cruise control or dynamic radar cruise control is active, Hybrid System Indicator will not automatically switch to the tachometer. When the cruise control or dynamic radar cruise control is activated while the tachometer is displayed, the tachometer will automatically switch to Hybrid System Indicator.

■ Engine speed
  On hybrid vehicles, engine speed is precisely controlled in order to help improve fuel efficiency and reduce exhaust emissions etc. There are times when the engine speed that is displayed may differ even when vehicle operation and driving conditions are the same.

■ Outside temperature display
  In the following situations, the correct outside temperature may not be displayed, or the display may take longer than normal to change.
  ● When stopped, or driving at low speeds (less than 12 mph [20 km/h])
  ● When the outside temperature has changed suddenly (at the entrance/exit of a garage, tunnel, etc.)
2-2. Instrument cluster

- **Customization**
  Settings (e.g. on/off operation of the ECO lamp) can be changed.
  (Customizable features → P. 709)

---

**NOTICE**

- **To prevent damage to the engine and its components**
  - Vehicles with tachometer: Do not let the indicator needle of the tachometer enter the red zone, which indicates the maximum engine speed.
  - The engine may be overheating if the high coolant temperature warning light comes on or flashes. In this case, immediately stop the vehicle in a safe place, and check the engine after it has cooled completely. (→ P. 664)
2-2. Instrument cluster

Indicators and warning lights

The indicator and warning lights on the instrument cluster and center panel inform the driver of the status of the vehicle’s various systems.

For the purpose of explanation, the following illustration displays all indicators and warning lights illuminated.

Instrument cluster

Center panel
2-2. Instrument cluster

The indicators inform the driver of the operating state of the vehicle’s various systems.

- **Turn signal indicator** (→P. 193)
- **Headlight indicator** (→P. 210)
- **Tail light indicator** (→P. 210)
- **Headlight high beam indicator** (→P. 212)
- **Fog light indicator** (if equipped) (→P. 215)
- **“READY” indicator** (→P. 175)
- **EV indicator** (→P. 32)
- **EV drive mode indicator** (→P. 181)
- **“ECO MODE” indicator** (→P. 186)
- **“SPORT MODE” indicator** (→P. 186)
- **Cruise control indicator** (→P. 228, 232)
- **Radar cruise control indicator** (if equipped) (→P. 232)
- **Intuitive parking assist indicator** (→P. 247)
- **Slip indicator** (→P. 268, 271)
- **“PCS” warning** (if equipped) (→P. 274)

*1, 2
*1, 3
2-2. Instrument cluster

**Shift position indicators**

- \( \rightarrow \text{P. 184} \)

**“AIR BAG ON/ OFF” indicator**

- \( \rightarrow \text{P. 140} \)

*1: These lights turn on when the “POWER” switch is turned to the ON mode to indicate that a system check is being performed. They will turn off after the hybrid system is on, or after a few seconds. There may be a malfunction in a system if a light does not come on, or if the lights do not turn off. Have the vehicle inspected by your Lexus dealer.

*2: The light flashes to indicate that the system is operating.

*3: The light comes on when the system is turned off. The light flashes faster than usual to indicate that the system is operating.
### Warning lights

Warning lights inform the driver of malfunctions in any of the vehicle's systems. (→P. 607)

*1: These lights turn on when the “POWER” switch is turned to ON mode to indicate that a system check is being performed. They will turn off after the hybrid system is on, or after a few seconds. There may be a malfunction in a system if a light does not come on, or if the lights do not turn off. Have the vehicle inspected by your Lexus dealer.

*2: The light flashes to indicate a malfunction.

---

### CAUTION

#### If a safety system warning light does not come on

Should a safety system light such as the ABS and SRS airbag warning light not come on when you start the hybrid system, this could mean that these systems are not available to help protect you in an accident, which could result in death or serious injury. Have the vehicle inspected by your Lexus dealer immediately if this occurs.
The multi-information display presents the driver with a variety of driving-related data including the current outside air temperature.

- **Energy monitor (→P. 42)**
  Displays the status of the hybrid system.

- **Trip information (→P. 207)**
  Displays driving range, fuel consumption and other cruising related information.

- **Instrument cluster setting (→P. 709)**
  Changes instrument cluster display settings

- **Intuitive parking assist display (if equipped) (→P. 247)**
  Automatically displayed when the system is used

- **Dynamic radar cruise control display (if equipped) (→P. 232)**
  Automatically displayed when the system is used

- **Warning messages (→P. 620)**
  Automatically displayed when a malfunction occurs in one of the vehicle's systems
Switching the display

Items displayed can be switched by pressing the “DISP” switch.

Trip information

- **Current fuel consumption/Average fuel consumption after refueling**
  
  Displays the instant fuel consumption and average fuel consumption after refueling.
  
  Use the displayed average fuel consumption as a reference.

- **Average fuel consumption**
  
  Displays the average fuel consumption since the function was reset.
  
  - The function can be reset by pressing the “DISP” switch for longer than 1 second when the average fuel consumption is displayed.
  - Use the displayed average fuel consumption as a reference.
2-2. Instrument cluster

- **Cruising range**
  
  Displays the estimated maximum distance that can be driven with the quantity of fuel remaining.
  
  - This distance is computed based on your average fuel consumption. As a result, the actual distance that can be driven may differ from that displayed.
  - When only a small amount of fuel is added to the tank, the display may not be updated. When refueling, turn the “POWER” switch off. If the vehicle is refueled without turning the “POWER” switch off, the display may not be updated.

- **Elapsed time**
  
  Displays the elapsed time since the hybrid system was started or the function was reset.
  
  The function can be reset by pressing the “DISP” switch for longer than 1 second when the elapsed time is displayed.

- **Average vehicle speed**
  
  Displays the average vehicle speed since the function was reset.
  
  The function can be reset by pushing the “DISP” switch for longer than 1 second when the average vehicle speed is displayed.
2-2. Instrument cluster

■ When disconnecting and reconnecting 12-volt battery terminals

When driving

When disconnecting and reconnecting 12-volt battery terminals

The following information will be reset:

- Average fuel consumption after refueling
- Average fuel consumption
- Cruising range
- Elapsed time
- Average vehicle speed

NOTICE

■ The multi-information display at low temperatures

Allow the interior of the vehicle to warm up before using the liquid crystal information display. At extremely low temperatures, the information display monitor may respond slowly, and display changes may be delayed.
The headlights can be operated manually or automatically.
Turning the end of the lever turns on the lights as follows:

**Type A**

1. **AUTO** The headlights and side marker, parking lights, daytime running lights and so on turn on and off automatically (when the "POWER" switch is in ON mode).
2. **DRL** The side marker, parking, tail, license plate, daytime running lights and instrument panel lights turn on.

**Type B**

3. **DRL** The headlights and all the lights listed above (except daytime running lights) turn on.
4. **OFF** The daytime running lights turn off
2.3. Operating the lights and windshield wipers

Type C

1. The daytime running lights turn on.
2. The side marker, parking, tail, license plate, daytime running lights and instrument panel lights turn on.
3. The headlights and all the lights listed above (except daytime running lights) turn on.
4. The headlights and side marker, parking lights, daytime running lights and so on turn on and off automatically (when the “POWER” switch is in ON mode).
2-3. Operating the lights and windshield wipers

Turning on the high beam headlights

1. With the headlights on, push the lever away from you to turn on the high beams.

2. Pull the lever toward you to the center position to turn the high beams off.

3. Pull the lever toward you and release it to flash the high beams once.

   You can flash the high beams with the headlights on or off.
2-3. Operating the lights and windshield wipers

Daytime running light system

To make your vehicle more visible to other drivers, the parking lights turn on automatically (at an increased intensity) whenever the hybrid system is started and the parking brake is released. Daytime running lights are not designed for use at night.

For the U.S.A.: Daytime running lights can be turned off by operating the headlight switch to DRL OFF position.

Compared to turning on the headlights, the daytime running light system offers greater durability and consumes less electricity, so it can help improve fuel economy.

Headlight control sensor

The sensor may not function properly if an object is placed on the sensor, or anything that blocks the sensor is affixed to the windshield.

Doing so interferes with the sensor detecting the level of ambient light and may cause the automatic headlight system to malfunction.

Automatic light off system

When the headlights come on: The headlights and tail lights turn off 30 seconds after a door is opened and closed if the “POWER” switch is turned to ACCESSORY mode or turned off. (The lights turn off immediately if on the key is pressed after all the doors are locked.)

When only the tail lights come on: The tail lights turn off automatically if the “POWER” switch is turned to ACCESSORY mode or turned off and the driver’s door is opened.

To turn the lights on again, turn the “POWER” switch to ON mode, or turn the light switch off once and then back to or.
2-3. Operating the lights and windshield wipers

- **Automatic headlight leveling system (if equipped)**
  The level of the headlights is automatically adjusted according to the number of passengers and the loading condition of the vehicle to ensure that the headlights do not interfere with other road users.

- **Customization**
  Settings (e.g. light sensor sensitivity) can be changed.
  (Customizable features → P. 709)

---

**NOTICE**

- **To prevent 12-volt battery discharge**
  Do not leave the lights on longer than necessary when the hybrid system is off.
2-3. Operating the lights and windshield wipers

Fog light switch

The fog lights secure excellent visibility in difficult driving conditions, such as in rain and fog.

Type A

1. Turns the fog lights off
2. Turns the fog lights on

*: If equipped
2-3. Operating the lights and windshield wipers

Fog lights can be used when
The headlights are on in low beam.

⚠️ NOTICE

- **To prevent 12-volt battery discharge**
  Do not leave the lights on longer than necessary when the hybrid system is off.
2-3. Operating the lights and windshield wipers

Windshield wipers and washer

Intermittent windshield wipers with interval adjuster (if equipped)
The wiper operation is selected by moving the lever as follows.
When intermittent windshield wiper operation is selected, wiper intervals can be also adjusted.

Type A

1. OFF
2. Intermittent windshield wiper operation
3. Low speed windshield wiper operation
4. High speed windshield wiper operation
5. Increases the intermittent windshield wiper frequency
6. Decreases the intermittent windshield wiper frequency

1. OFF
2. Intermittent windshield wiper operation
3. Low speed windshield wiper operation
4. High speed windshield wiper operation
5. Increases the intermittent windshield wiper frequency
6. Decreases the intermittent windshield wiper frequency
2-3. Operating the lights and windshield wipers

**Washer/wiper dual operation**

The wipers will automatically operate a couple of times after the washer squirts.

**Type B**

1. **OFF**  
   OFF

2. **INT**  
   Intermittent windshield wiper operation

3. **LO**  
   Low speed windshield wiper operation

4. **HI**  
   High speed windshield wiper operation

5. **MIST**  
   Temporary operation
2-3. Operating the lights and windshield wipers

Increases the intermittent windshield wiper frequency
Decreases the intermittent windshield wiper frequency
Washer/wiper dual operation
The wipers will automatically operate a couple of times after the washer squirts.
Rain-sensing windshield wipers (if equipped)

When “AUTO” is selected, the wipers will operate automatically when the sensor detects falling rain. The system automatically adjusts wiper timing in accordance with rain volume and vehicle speed.

When “AUTO” is selected, the sensor sensitivity can be adjusted as follows by turning the switch ring:

Type A

1. OFF
2. AUTO Rain-sensing wiper operation
3. Low speed wiper operation
4. High speed wiper operation
5. Temporary operation
2.3. Operating the lights and windshield wipers

A. Increases the sensitivity
B. Decreases the sensitivity

Washer/wiper dual operation
The wipers will automatically operate a couple of times after the washer squirts.

Type B

1. OFF  OFF
2. AUTO  Rain-sensing wiper operation
3. LO    Low speed wiper operation
4. HI    High speed wiper operation
5. MIST  Temporary operation
The windshield wipers and washer can be operated when
The "POWER" switch is in ON mode.

Increases the sensitivity

Decreases the sensitivity

Washer/wiper dual operation
The wipers will automatically operate a couple of times after the washer squirts.
Raindrop sensor (vehicles with rain-sensing windshield wipers)

The raindrop sensor judges the amount of raindrops.

An optical sensor is adopted. It may not operate properly when sunlight from the rising or setting of the sun intermittently strikes the windshield, or if bugs etc. are present on the windshield.

If the wiper switch is turned to the “AUTO” position while the “POWER” switch is in ON mode, the wipers will operate once to show that AUTO mode is activated.

If the temperature of the raindrop sensor is 194 °F (90 °C) or higher, or 5 °F (-15 °C) or lower, automatic operation may not occur. In this case, operate the wipers in any mode other than “AUTO”.

If no windshield washer fluid sprays

Check that the washer nozzles are not blocked if there is washer fluid in the washer fluid tank.

Caution regarding the use of windshield wipers in “AUTO” mode (vehicles with rain-sensing windshield wipers)

The windshield wipers may operate unexpectedly if the sensor is touched or the windshield is subject to vibration in “AUTO” mode. Take care that your fingers etc. do not become caught in the windshield wipers.
2-3. Operating the lights and windshield wipers

⚠️ NOTICE

- **When the windshield is dry**
  Do not use the wipers, as they may damage the windshield.

- **When the washer fluid tank is empty**
  Do not operate the switch continually as the washer fluid pump may overheat.

- **When a nozzle becomes blocked**
  In this case, contact your Lexus dealer.
  Do not try to clear it with a pin or other object. The nozzle will be damaged.

- **To prevent 12-volt battery discharge**
  Do not leave the wipers on longer than necessary when the hybrid system is off.
2-3. Operating the lights and windshield wipers

Rear window wiper and washer*

The wiper operation is selected by moving the lever as follows:

Type A

1. OFF
2. Intermittent window wiper operation
3. Normal window wiper operation
4. Washer/wiper dual operation
5. Washer/wiper dual operation

* If equipped
2-3. Operating the lights and windshield wipers

The rear window wiper and washer can be operated when the “POWER” switch is in ON mode.

⚠️ NOTICE

- When the rear window is dry
  Do not use the wiper, as it may damage the rear window.
- When the washer fluid tank is empty
  Do not operate the switch continually as the washer fluid pump may overheat.
2-3. Operating the lights and windshield wipers

Headlight cleaner switch*

The headlight cleaners can be operated when
The “POWER” switch is in ON mode and the headlight switch is turned on.

Windshield washer linked operation
Only for the first time when the windshield washer is operated with the “POWER” switch in ON mode and the headlights on, the headlight cleaners will operate once. (→P. 217)

 NOTICE

■ When the washer fluid tank is empty
Do not press the switch continually as the washer fluid pump may overheat.

*: If equipped
2-4. Using other driving systems

**Cruise control**

Use the cruise control to maintain a set speed without depressing the accelerator pedal.

**Setting the vehicle speed**

Press the “ON-OFF” button to activate the cruise control.

Cruise control indicator will come on.

Press the button again to deactivate the cruise control.

*: If equipped
When driving

Accelerate or decelerate the vehicle to the desired speed, and push the lever down to set the speed.

“SET” will be displayed.
The vehicle speed at the moment the lever is released becomes the set speed.

---

### Adjusting the set speed

To change the set speed, operate the lever until the desired set speed is obtained.

1. Increases the speed
2. Decreases the speed

Fine adjustment: Momentarily move the lever in the desired direction.
Large adjustment: Hold the lever in the desired direction.

The set speed will be increased or decreased as follows:

Fine adjustment: By approximately 1 mph (1.6 km/h) each time the lever is operated.
Large adjustment: The set speed can be increased or decreased continually until the lever is released.
2-4. Using other driving systems

■ Canceling and resuming the constant speed control

Pulling the lever toward you cancels the constant speed control.

The speed setting is also canceled when the brakes are applied.

Pushing the lever up resumes the constant speed control.

Resuming is available when the vehicle speed is more than approximately 25 mph (40 km/h).

■ Cruise control can be set when

- The shift position is in D.
- Vehicle speed is above approximately 25 mph (40 km/h).

■ Accelerating after setting the vehicle speed

- The vehicle can be accelerated normally. After acceleration, the set speed resumes.
- Even without canceling the cruise control, the set speed can be increased by first accelerating the vehicle to the desired speed and then pushing the lever down to set the new speed.

■ Automatic cruise control cancelation

Cruise control will stop maintaining the vehicle speed in any of the following situations.

- Actual vehicle speed falls more than approximately 10 mph (16 km/h) below the preset vehicle speed.
  At this time, the memorized set speed is not retained.
- Actual vehicle speed is below approximately 25 mph (40 km/h).
- Enhanced VSC is activated.
If the warning message for the cruise control is shown on the multi-information display
Press the “ON-OFF” button once to deactivate the system, and then press the button again to reactivate the system.
If the cruise control speed cannot be set or if the cruise control cancels immediately after being activated, there may be a malfunction in the cruise control system. Have the vehicle inspected by your Lexus dealer.

⚠️ CAUTION

■ To avoid operating the cruise control by mistake
Switch the cruise control off using the “ON-OFF” button when not in use.

■ Situations unsuitable for cruise control
Do not use cruise control in any of the following situations. Doing so may result in loss of control and could cause an accident resulting in death or serious injury.
- In heavy traffic
- On roads with sharp bends
- On winding roads
- On slippery roads, such as those covered with rain, ice or snow
- On steep hills
  Vehicle speed may exceed the set speed when driving down a steep hill.
- During emergency towing
2-4. Using other driving systems

Dynamic radar cruise control*

Dynamic radar cruise control supplements conventional cruise control with a vehicle-to-vehicle distance control. In vehicle-to-vehicle distance control mode, the vehicle automatically accelerates or decelerates in order to maintain a set following distance from vehicles ahead.

1. Indicators
2. Display
3. Set speed
4. Vehicle-to-vehicle distance button
5. Cruise control switch
2-4. Using other driving systems

Setting the vehicle speed (vehicle-to-vehicle distance control mode)

Press the "ON-OFF" button to activate the cruise control.
Radar cruise control indicator will come on.
Press the button again to deactivate the cruise control.

Accelerate or decelerate the vehicle to the desired speed, and push the lever down to set the speed.
"SET" will be displayed.
The vehicle speed at the moment the lever is released becomes the set speed.
2.4. Using other driving systems

■ Adjusting the set speed
To change the set speed, operate the lever until the desired set speed is displayed.

1 Increases the speed
2 Decreases the speed

Fine adjustment: Momentarily move the lever in the desired direction.
Large adjustment: Hold the lever in the desired direction.

In the vehicle-to-vehicle distance control mode, the set speed will be increased or decreased as follows:

When the set speed is shown in “MPH”
Fine adjustment: By approximately 1 mph (1.6 km/h) each time the lever is operated
Large adjustment: By approximately 5 mph (8 km/h) for each 0.75 seconds the lever is held

When the set speed is shown in “km/h”
Fine adjustment: By approximately 0.6 mph (1 km/h) each time the lever is operated
Large adjustment: By approximately 3.1 mph (5 km/h) for each 0.75 seconds the lever is held

In the constant speed control mode (→ P. 240), the set speed will be increased or decreased as follows:
Fine adjustment: By approximately 1 mph (1.6 km/h) each time the lever is operated
Large adjustment: The set speed can be increased or decreased continually until the lever is released.
2-4. Using other driving systems

Changing the vehicle-to-vehicle distance

Pressing the button changes the vehicle-to-vehicle distance as follows:

1. Long
2. Medium
3. Short

The vehicle-to-vehicle distance is set automatically to long mode when the “POWER” switch is turned to ON mode.

If a vehicle is running ahead of you, the preceding vehicle mark will also be displayed.

Vehicle-to-vehicle distance settings

Select a distance from the table below. Note that the distances shown correspond to a vehicle speed of 50 mph (80 km/h). Vehicle-to-vehicle distance increases/decreases in accordance with vehicle speed.

<table>
<thead>
<tr>
<th>Distance options</th>
<th>Vehicle-to-vehicle distance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Long</td>
<td>Approximately 160 ft. (50 m)</td>
</tr>
<tr>
<td>Medium</td>
<td>Approximately 130 ft. (40 m)</td>
</tr>
<tr>
<td>Short</td>
<td>Approximately 100 ft. (30 m)</td>
</tr>
</tbody>
</table>
2.4. Using other driving systems

Canceling and resuming the speed control

1. Pulling the lever toward you cancels the cruise control.
   The speed setting is also canceled when the brakes are applied.

2. Pushing the lever up resumes the cruise control and returns vehicle speed to the set speed.
   Resuming is available when the vehicle speed is more than approximately 25 mph (40 km/h).
Driving in vehicle-to-vehicle distance control mode

This mode employs a radar sensor to detect the presence of vehicles up to approximately 400 ft. (120 m) ahead, determines the current vehicle-to-vehicle following distance, and operates to maintain a suitable following distance from the vehicle ahead.

Note that vehicle-to-vehicle distance will close in when traveling on long downhill slopes.
2-4. Using other driving systems

1. Example of constant speed cruising
   When there are no vehicles ahead
   The vehicle travels at the speed set by the driver. The desired vehicle-to-vehicle distance can also be set by operating the vehicle-to-vehicle distance control.

2. Example of deceleration cruising
   When the vehicle ahead is driving slower than the set speed
   When a vehicle is detected running ahead of you, the system automatically decelerates your vehicle. When a greater reduction in vehicle speed is necessary, the system applies the brakes. A warning tone warns you when the system cannot decelerate sufficiently to prevent your vehicle from closing in on the vehicle ahead.

3. Example of follow-up cruising
   When following a vehicle driving slower than the set speed
   The system continues follow-up cruising while adjusting for changes in the speed of the vehicle ahead in order to maintain the vehicle-to-vehicle distance set by the driver.

4. Example of acceleration
   When there are no longer any vehicles ahead driving slower than the set speed
   The system accelerates until the set speed is reached. The system then returns to constant speed cruising.
Approach warning

When your vehicle is too close to a vehicle ahead, and sufficient automatic deceleration via the cruise control is not possible, the display will flash and the buzzer will sound to alert the driver. An example of this would be if another driver cuts in front of you while you are following a vehicle. Apply the brakes to ensure an appropriate vehicle-to-vehicle distance.

- **Warnings may not occur when**
  
  In the following instances, there is a possibility that the warnings will not occur:
  
  - When the speed of the vehicle ahead matches or exceeds your vehicle speed
  - When the vehicle ahead is traveling at an extremely slow speed
  - Immediately after the cruise control speed was set
  - At the instant the accelerator is applied
Selecting conventional constant speed control mode

Constant speed control mode differs from vehicle-to-vehicle distance control mode. When constant speed control mode is selected, your vehicle will maintain a set speed regardless of whether or not there are other vehicles in the lane ahead.

1. Press the “ON-OFF” button to activate the cruise control.
   Press the button again to deactivate the cruise control.

2. Switch to constant speed control mode.
   (Push the lever forward and hold for approximately one second.)
   Cruise control indicator will come on.

   When in constant speed control mode, to return to vehicle-to-vehicle distance control mode, push the lever forward again and hold for approximately 1 second.
   After the desired speed has been set, it is not possible to return to vehicle-to-vehicle distance control mode.

   If the “POWER” switch is turned off and then turned to ON mode again, the vehicle will automatically return to vehicle-to-vehicle distance control mode.

   Adjusting the speed setting: →P. 234

   Canceling and resuming the speed setting: →P. 236
2-4. Using other driving systems

- **Dynamic radar cruise control can be set when**
  - The shift position is in D.
  - Vehicle speed is above approximately 30 mph (50 km/h).

- **Accelerating after setting the vehicle speed**
  The vehicle can accelerate normally. After acceleration, the set speed resumes. However, during vehicle-to-vehicle distance control mode, the vehicle speed may decrease below the set speed in order to maintain the distance to the vehicle ahead.

- **Set speed**
  The set speed may be unsustainable depending on driving circumstances.

- **Automatic cancelation of vehicle-to-vehicle distance control**
  Vehicle-to-vehicle distance control driving is automatically canceled in the following situations:
  - Actual vehicle speed falls below approximately 25 mph (40 km/h).
  - Enhanced VSC is activated.
  - The sensor cannot operate correctly because it is covered in some way.
  - The windshield wipers are operating at high speed. (when the wiper switch is set to the “AUTO” mode or the high speed wiper operation position).

If vehicle-to-vehicle distance control driving is automatically canceled for any other reason, there may be a malfunction in the system. Contact your Lexus dealer.
Automatic cancelation of constant speed control

The cruise control will stop maintaining the vehicle speed in the following situations:

- Actual vehicle speed is more than approximately 10 mph (16 km/h) below the set vehicle speed.
  At this time, the memorized set speed is not retained.
- Vehicle speed falls below approximately 25 mph (40 km/h).
- Enhanced VSC is activated.

Radar sensor and grille cover

Always keep the sensor and grille cover clean to ensure that the vehicle-to-vehicle distance control operates properly. (Some obstructions, such as snow, ice and plastic objects, cannot be detected by the obstruction sensor.)

Dynamic radar cruise control is canceled if an obstruction is detected.

1. Grille cover
2. Radar sensor
2-4. Using other driving systems

■ Warning messages and buzzers for dynamic radar cruise control

Warning messages and buzzers are used to indicate a system malfunction or to inform the driver of the need for caution while driving. (→P. 620)

■ Certification

For vehicles sold in the U.S.A.

FCC ID: HYQDNMWR004

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Radiofrequency radiation exposure Information:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
This equipment should be installed and operated with minimum distance of 20 cm between the radiator (antenna) and your body.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

For vehicles sold in Canada

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
2-4. Using other driving systems

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ Before using dynamic radar cruise control</td>
</tr>
<tr>
<td>Do not overly rely on vehicle-to-vehicle distance control.</td>
</tr>
<tr>
<td>Be aware of the set speed. If automatic deceleration/acceleration is not appropriate, adjust the vehicle speed, as well as the distance between your vehicle and vehicles ahead by applying the brakes etc.</td>
</tr>
<tr>
<td>■ Cautions regarding the driving assist systems</td>
</tr>
<tr>
<td>Observe the following precautions.</td>
</tr>
<tr>
<td>Failure to do so may cause an accident resulting in death or serious injury.</td>
</tr>
<tr>
<td>- Assisting the driver to measure following distance</td>
</tr>
<tr>
<td>The dynamic radar cruise control is only intended to help the driver in determining the following distance between the driver’s own vehicle and a designated vehicle traveling ahead. It is not a mechanism that allows careless or inattentive driving, and it is not a system that can assist the driver in low-visibility conditions. It is still necessary for driver to pay close attention to the vehicle’s surroundings.</td>
</tr>
<tr>
<td>- Assisting the driver to judge proper following distance</td>
</tr>
<tr>
<td>The dynamic radar cruise control determines whether the following distance between the driver’s own vehicle and a designated vehicle traveling ahead is appropriate or not. It is not capable of making any other type of judgement. Therefore, it is absolutely necessary for the driver to remain vigilant and to determine whether or not there is a possibility of danger in any given situation.</td>
</tr>
<tr>
<td>- Assisting the driver to operate the vehicle</td>
</tr>
<tr>
<td>The dynamic radar cruise control has no capability to prevent or avoid a collision with a vehicle traveling ahead. Therefore, if there is ever any danger, the driver must take immediate and direct control of the vehicle and act appropriately in order to ensure the safety of all involved.</td>
</tr>
<tr>
<td>■ To avoid inadvertent cruise control activation</td>
</tr>
<tr>
<td>Switch the cruise control off using the “ON-OFF” button when not in use.</td>
</tr>
</tbody>
</table>
### CAUTION

**Situations unsuitable for dynamic radar cruise control**

Do not use dynamic radar cruise control in any of the following situations. Doing so may result in inappropriate speed control and could cause an accident resulting in death or serious injury.

- In heavy traffic
- On roads with sharp bends
- On winding roads
- On slippery roads, such as those covered with rain, ice or snow
- On steep downhills, or where there are sudden changes between sharp up and down gradients
  
  Vehicle speed may exceed the set speed when driving down a steep hill.
- At entrances to expressways
- When weather conditions are bad enough that they may prevent the sensors from functioning correctly (fog, snow, sandstorm, heavy rain, etc.)
- When an approach warning buzzer is heard often
- During emergency towing

**When the sensor may not be correctly detecting the vehicle ahead**

Apply the brakes as necessary when any of the following types of vehicles are in front of you.

As the sensor may not be able to correctly detect these types of vehicles, the approach warning (→P. 239) will not be activated, and a fatal or serious accident may result.

- Vehicles that cut in suddenly
- Vehicles traveling at low speeds
- Vehicles that are not moving
- Vehicles with small rear ends (trailers with no load on board etc.)
- Motorcycles traveling in the same lane
2-4. Using other driving systems

⚠️ CAUTION

- **Conditions under which the vehicle-to-vehicle distance control may not function correctly**

  Apply the brakes as necessary in the following conditions as the radar sensor may not be able to correctly detect vehicles ahead, and a fatal or serious accident may result:

  - When water or snow thrown up by the surrounding vehicles hinders the functioning of the sensor
  - When your vehicle is pointing upwards (caused by a heavy load in the luggage compartment etc.)
  - When the road curves or when the lanes are narrow
  - When steering wheel operation or your position in the lane is unstable
  - When the vehicle ahead of you decelerates suddenly

- **Handling the radar sensor**

  Observe the following to ensure the cruise control system can function effectively. Otherwise, the system may not function correctly and could result in an accident.

  - Keep the sensor and grille cover clean at all times.
    - Clean the sensor and grille cover with a soft cloth so you do not mark or damage them.
  - Do not subject the sensor or surrounding area to a strong impact.
    - If the sensor moves even slightly off position, the system may malfunction. If the sensor or surrounding area is subject to a strong impact, always have the area inspected and adjusted by a Lexus dealer.
  - Do not disassemble the sensor.
  - Do not attach accessories or stickers to the sensor, grille cover or surrounding area.
  - Do not modify or paint the sensor and grille cover.
  - Do not replace them with non-genuine parts.
The distance from your vehicle to nearby obstacles when parallel parking or maneuvering into a garage is measured by the sensors and communicated via the multi-information display, navigation system screen (if equipped) and a buzzer. Always check the surrounding area when using this system.

**Types of sensors**

1. Front corner sensors
2. Rear corner sensors
3. Rear center sensors

**Intuitive parking assist switch**

Turns the intuitive parking assist on/off

When on, the buzzer sounds and the indicator light comes on to inform the driver that the system is operational.

*If equipped*
2-4. Using other driving systems

Display

When the sensors detect an obstacle, a graphic is shown on the multi information display depending on the position and distance to the obstacle.

■ Multi-information display

1. Front corner sensor operation
2. Rear corner sensor operation
3. Rear center sensor operation

■ Navigation system screen (if equipped)

When the vehicle is moving forward

A graphic is automatically displayed when an obstacle is detected. The screen can be set so that the graphic is not displayed. (→P.252)

When the vehicle is moving backward

A simplified image is displayed on the right upper corner of the navigation system screen when an obstacle is detected.
## The distance display and buzzer

When a sensor detects an obstacle, the direction of and the approximate distance to the obstacle are displayed and the buzzer sounds.

### Corner sensors

</tbody>
</table>
2.4. Using other driving systems

Detection range of the sensors

1. Approximately 1.6 ft. (50 cm)
2. Approximately 4.9 ft. (150 cm)
3. Approximately 1.6 ft. (50 cm)

The diagram shows the detection range of the sensors. Note that the sensors cannot detect obstacles that are extremely close to the vehicle.

The range of the sensors may change depending on the shape of the object etc.
2-4. Using other driving systems

Setting up intuitive parking assist (vehicles with navigation system)

You can change the warning beep volume and navigation system screen operating conditions.

**STEP 1** Press the “MENU” button on the Remote Touch.
**STEP 2** Select “Setup” on the “Menu” screen.
**STEP 3** Select “Vehicle” on the “Setup” screen.
**STEP 4** Select “LEXUS Park Assist” on the “Vehicle Settings” screen.

1. Alert volume setting
2. Display on/off
3. Alert distance setting

Make sure to save after changing settings.

■ The intuitive parking assist can be operated when

● Front corner sensors:
  • The “POWER” switch is in ON mode.
  • The shift position is in other than P.
  • The vehicle speed is less than about 6 mph (10 km/h).

● Rear corner and center sensors:
  • The “POWER” switch is in ON mode.
  • The shift position is in R.
Sensor detection information

Certain vehicle conditions and the surrounding environment may affect the ability of a sensor to correctly detect an obstacle. Particular instances where this may occur are listed below.

- There is dirt, snow or ice on a sensor.
- A sensor is frozen.
- A sensor is covered in any way.
- The vehicle is leaning considerably to one side.
- On an extremely bumpy road, on an incline, on gravel, or on grass
- The vicinity of the vehicle is noisy due to vehicle horns, motorcycle engines, air brakes of large vehicles, or other loud noises producing ultrasonic waves.
- There is another vehicle equipped with parking assist sensors in the vicinity.
- A sensor is coated with a sheet of spray or heavy rain.
- The vehicle is equipped with a fender pole or radio antenna.
- Towing eyelets are installed.
- A bumper or sensor receives a strong impact.
- The vehicle is approaching a tall or right-angled curb.
- In harsh sunlight or intense cold weather
- A non-genuine Lexus suspension (lowered suspension etc.) is installed.

In addition to the examples above, there are instances in which, because of their shape, signs and other objects may be judged by a sensor to be closer than they are.

The shape of the obstacle may prevent a sensor from detecting it. Pay particular attention to the following obstacles:

- Wires, fences, ropes, etc.
- Cotton, snow and other materials that absorb sound waves
- Sharply-angled objects
- Low obstacles
- Tall obstacles with upper sections projecting outwards in the direction of your vehicle
2-4. Using other driving systems

■ Navigation system screen display (if equipped)
  If an obstacle is detected while the vehicle is reversing, the warning indicator will appear in the top right of the screen even if the display setting has been set to off.

■ If a message is displayed
  → P. 620

■ Certification
  For vehicles sold in the U.S.A.
  This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions; (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

  For vehicles sold in Canada
  This ISM device complies with Canadian ICES-001.
  Cet appareil ISM est conforme à la norme NMB-001 du Canada.

⚠️ CAUTION

■ Caution when using the intuitive parking assist-sensor
  Observe the following precautions.
  Failure to do so may result in the vehicle being unable to be driven safely and possibly cause an accident.
  ● Do not use the sensor at speeds in excess of 6 mph (10 km/h).
  ● Do not attach any accessories within the sensor range.
**NOTICE**

- **Notes when washing the vehicle**
  Do not apply intensive bursts of water or steam to the sensor area. Doing so may result in the sensor malfunctioning.

- **Conditions possibly indicating system malfunctions**
  If any of the following occurs, the system may be malfunctioning due to a sensor failure etc. Have the vehicle inspected by your Lexus dealer.
  - The buzzer does not sound when the intuitive parking assist mode is set.
  - The sensor operation display flashes and the buzzer sounds even when no obstacle is detected.
  - An area of the sensors is hit or subjected to a strong impact.
  - Either bumper is hit.
  - The sensor operation display remains on even though no buzzer sounds.
2-4. Using other driving systems

Rear view monitor system*

The rear view monitor system assists the driver by displaying an image of the view behind the vehicle while reversing. The image is displayed in reverse on the screen. This allows the image to appear in the same manner as that of the rear view mirror.

The rear view image is displayed when the shift position is in R and the “POWER” switch is in ON mode.

This reversed image is a similar image to the one on the inside rear view mirror.

If you shift the shift position to any positions other than R, the screen is turned off.

Switching the screen

Type A

To temporarily turn off the monitor when it is on.
Push the “AUTO” button. The indicator should turn orange.
The monitor will automatically turn on again after the “POWER” switch is turned OFF and ON.

To manually turn on the monitor when it is turned off.
Push the “AUTO” button. The indicator should turn green.

*: If equipped
2-4. Using other driving systems

Type B

- To temporarily turn off the monitor when it is on.
  Push the button. The indicator should turn orange.
  The monitor will automatically turn on again after the “POWER” switch is turned OFF and ON.

- To manually turn on the monitor when it is turned off.
  Push the button. The indicator should turn green.

Type C

- To temporarily turn off the monitor when it is on.
  Push the button. The indicator should turn orange.
  The monitor will automatically turn on again after the “POWER” switch is turned OFF and ON.

- To manually turn on the monitor when it is turned off.
  Push the button. The indicator should turn green.

■ When using the rear view monitor system
  The anti-glare function of the inside rear view mirror will be canceled.

■ Automatic shut off
  The display will be turned off automatically after 5 minutes.
2-4. Using other driving systems

Display mode

The rear view monitor display mode can be adjusted when the “POWER” switch is in ON mode and the shift position is in R.

● To select a display language (English, French or Spanish).

1. Push and hold the “AUTO” (type A), (type B) or (type C) button for 6 to 12 seconds.
   The monitor should turn on and the indicator should turn green.

2. Push the “AUTO” (type A), (type B) or (type C) button.

3. Each time the “AUTO” (type A), (type B) or (type C) button is pushed and released, the language will change.
   The warning message should flash 5 seconds after the button is released, indicating that the change has been completed.

● To permanently disable the monitor.

Push and hold the “AUTO” (type A), (type B) or (type C) button for 12 to 15 seconds.
   The monitor will turn off and on after 6 seconds. Continue holding the button down until the display turns back off.
   The indicator should flash orange.
   The monitor will not automatically turn on again after the “POWER” switch is turned OFF and ON.

● To manually turn on the monitor when it is turned off.

Push the “AUTO” (type A), (type B) or (type C) button. The indicator should turn green.
2-4. Using other driving systems

Displayed area

The area covered by the camera is limited. Objects which are close to either corner of the bumper or under the bumper cannot be seen on the screen.

The area displayed on the screen may vary according to vehicle orientation or road conditions.
2-4. Using other driving systems

Rear view monitor guide lines

Guide lines are displayed on the screen.

Guide lines shown differ from those shown on the actual screen.

1 Vehicle width extension guide lines (blue)
   These lines indicate the estimated vehicle width extension.

2 Distance guide line (blue)
   This line indicates a position on the ground about 3 ft. (1 m) behind on the ground of the rear bumper of your vehicle.

3 Distance guide line (red)
   This line indicates a position on the ground about 1.5 ft. (0.5 m) behind on the ground of the rear bumper of your vehicle.

4 Vehicle center guide lines (blue)
   These lines indicate the estimated vehicle center on the ground.
2.4. Using other driving systems

Driving precautions

When the grade behind the vehicle slopes up sharply, objects appear to be farther away than they actually are.

When the grade behind the vehicle slopes down sharply, objects appear to be closer than they actually are.
The distance that appears on the screen between three-dimensional objects (such as vehicles) and flat surfaces (such as the road) and the actual distance differ as follows.

In reality, \( C = A < B \) (C and A are equally far away; B is farther than C and A). However, on the screen, the situation appears to be \( A < B < C \).

On the screen, it appears that a truck is parking about 1.5 ft. (0.5 m) away. However, in reality if you back up to point A, you will hit the truck.
2-4. Using other driving systems

Rear view monitor system camera

The camera uses a special lens. The distance of the image that appears on the screen differs from the actual distance.

In the following cases, it may be difficult to see the images on the screen, even when the system is functioning correctly.

- In the dark (e.g. at night).
- If the temperature near the lens is extremely high or low.
- If water droplets get on the camera, or when humidity is high (e.g. when it rains).
- If foreign matter (e.g. snow or mud) get on the camera lens.
- If the sun or headlights are shining directly into the camera lens.
- When the camera has scratches or dirt on it.
- A bright object such as a white wall is reflected in the mirror surface over the monitor.
- When the camera is used under fluorescent light, sodium lights, or mercury lights etc., the lights and the illuminated areas may appear to flicker.
2.4. Using other driving systems

- **Smear effect**

  If a bright light (e.g. sunlight reflected off the vehicle body) is picked up by the camera, a smear effect* peculiar to the camera may occur.

  *: Smear effect – A phenomenon that occurs when a bright light (for example, sunlight reflected off the vehicle body) is picked up by the camera; when transmitted by the camera, the light source appears to have a vertical streak above and below it.

- **Flicker effect**

  When the camera is used under fluorescent lights, sodium lights, mercury lights, etc., the lights and the illuminated areas may appear to flicker.
## CAUTION

When using the rear view monitor system

Observe the following precautions to avoid an accident that could result in death or serious injuries.

- Never depend solely on the monitor system when reversing.
- Always check visually and with the mirrors to confirm your intended path is clear.
- Depicted distances between objects and flat surfaces differ from actual distances.
- Do not use the system if the back door is not completely closed.
- Never back up while looking only at the screen. The image on the screen is different from actual conditions. Depicted distances between objects and flat surfaces will differ from actual distance. If you back up while looking only at the screen, you may hit a vehicle, a person or an object. When backing up, be sure to check behind and all around the vehicle visually and with mirrors before proceeding.
- Always check the vehicle surrounding area, because the guide lines are ancillary.
- The guide lines are ancillary lines and does not change even if the steering wheel is turned.
### CAUTION

**Conditions which may affect the rear view monitor system**

- If the back of the vehicle has been hit, the camera's position and mounting angle may have been changed. Have the vehicle inspected by your Lexus dealer.
- Rapid temperature changes, such as when hot water is poured on the vehicle in cold weather, may cause the system to function abnormally.
- If the camera lens is dirty, it cannot transmit a clear image. Rinse with water and wipe with a soft cloth. If the camera lens is extremely dirty, wash with a mild cleanser and rinse.
- The displayed image may be darker and moving images may be slightly distorted when the system is cold.
- When washing the vehicle, do not apply intensive bursts of water to the camera or camera area. Doing so may result in the camera malfunctioning.
- Do not allow organic solvent, car wax, window cleaner or glass coat to adhere to the camera. If this happens, wipe it off as soon as possible.
- As the camera has a waterproof construction, do not detach, disassemble or modify it. This may cause incorrect operation.
- Do not hit the camera or subject it to strong impacts as this may cause its position and mounting angle to change.
- Do not scrub the camera lens roughly or clean it with a hard brush or abrasive cleaner. Doing so may damage the lens and adversely affect the image.
2-4. Using other driving systems

Driving assist systems

To help enhance driving safety and performance, the following systems operate automatically in response to various driving situations. Be aware, however, that these systems are supplementary and should not be relied upon too heavily when operating the vehicle.

- **ABS (Anti-lock Brake System)**
  Helps to prevent wheel lock when the brakes are applied suddenly, or if the brakes are applied while driving on a slippery road surface

- **Brake assist**
  Generates an increased level of braking force after the brake pedal is depressed when the system detects a panic stop situation

- **VSC (Vehicle Stability Control)**
  Helps the driver to control skidding when swerving suddenly or turning on slippery road surfaces

- **TRAC (Traction Control)**
  Helps to maintain drive power and prevent the drive wheels from spinning when starting the vehicle or accelerating on slippery roads

- **EPS (Electric Power Steering)**
  Employs an electric motor to reduce the amount of effort needed to turn the steering wheel

- **Enhanced VSC (Enhanced Vehicle Stability Control)**
  Provides cooperative control of the ABS, TRAC, VSC and EPS. Helps to maintain directional stability when swerving on slippery road surfaces by controlling steering performance.

- **Hill-start assist control**
  → P. 271

- **PCS (Pre-Collision System) (if equipped)**
  → P. 273
2-4. Using other driving systems

When the VSC/TRAC systems are operating

If the vehicle is in danger of slipping or if any of the drive wheels spins, the slip indicator light flashes to indicate that the VSC/TRAC systems are operating.

- Sounds and vibrations caused by the ABS, brake assist, VSC and TRAC
  - A sound may be heard from the engine compartment when the hybrid system is started, just after the vehicle begins to move, if the brake pedal is depressed forcefully or repeatedly, or 1-2 minutes after the hybrid system is stopped. This sound does not indicate that a malfunction has occurred in any of these systems.
  - Any of the following conditions may occur when the above systems are operating. None of these indicates that a malfunction has occurred.
    - Vibrations may be felt through the vehicle body and steering.
    - A motor sound may be heard after the vehicle comes to a stop.
    - The brake pedal may pulsate slightly after the ABS is activated.
    - The brake pedal may move down slightly after the ABS is activated.

- EPS operation sound
  - When the steering wheel is operated, a motor sound (whirring sound) may be heard. This does not indicate a malfunction.

- Reduced effectiveness of the EPS system
  - The effectiveness of the EPS system is reduced to prevent the system from overheating when there is frequent steering input over an extended period of time. The steering wheel may feel heavy as a result. Should this occur, refrain from excessive steering input or stop the vehicle and turn the hybrid system off. The EPS system should return to normal within 10 minutes.

2-4. Using other driving systems

Hill-start assist control

Hill-start assist control helps to prevent the vehicle from rolling backwards when starting on an incline or slippery slope.

To engage hill-start assist control, further depress the brake pedal when the vehicle is stopped completely.

A buzzer will sound once to indicate the system is activated. The slip indicator will also start flashing.

Hill-start assist control operates for about 2 seconds after the brake pedal is released.

If the slip indicator does not flash and the buzzer does not sound when the brake pedal is further depressed, slightly reduce the pressure on the brake pedal (do not allow the vehicle to roll backward) and then firmly depress it again. If the system still does not operate, check if the operating conditions explained above have been met.

Hill-start assist control operating conditions

- The system operates in the following situations:
  - The shift position is in a position other than P.
  - The parking brake is not applied.
  - The accelerator pedal is not depressed.
- Hill-start assist control cannot be operated while the slip indicator light is illuminated.

Hill-start assist control

- While hill-start assist control is operating, the brakes remain automatically applied after the driver releases the brake pedal. The stop lights and the high mounted stoplight turn on.
- Hill-start assist control operates for about 2 seconds after the brake pedal is released.
- If the slip indicator does not flash and the buzzer does not sound when the brake pedal is further depressed, slightly reduce the pressure on the brake pedal (do not allow the vehicle to roll backward) and then firmly depress it again. If the system still does not operate, check if the operating conditions explained above have been met.
2-4. Using other driving systems

■ Hill-start assist control buzzer
  ● When hill-start assist control is activated, the buzzer will sound once.
  ● In the following situations, hill-start assist control will be canceled and the buzzer will sound twice.
    • No attempt is made to drive the vehicle within approximately 2 seconds of releasing the brake pedal.
    • Push the P position switch.
    • The parking brake is applied.
    • The brake pedal is depressed again.
    • The brake pedal has been depressed for more than approximately 3 minutes.

■ If the slip indicator comes on
  It may indicate a malfunction in the system. Contact your Lexus dealer.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ Hill-start assist control</td>
</tr>
<tr>
<td>● Do not overly rely on hill-start assist control. Hill-start assist control may not operate effectively on extremely steep inclines or roads covered in ice.</td>
</tr>
<tr>
<td>● Unlike the parking brake, hill-start assist control is not intended to hold the vehicle stationary for an extended period of time. Do not attempt to use hill-start assist control to hold the vehicle on an incline for an extended period of time, as doing so may lead to an accident.</td>
</tr>
</tbody>
</table>
When the radar sensor detects possibility of a frontal collision, the pre-collision system such as the brakes and seat belts are automatically engaged to lessen impact as well as vehicle damage.

- **Pre-collision seat belts (front seat belts only)**
  If the pre-collision sensor detects that a collision is unavoidable, the pre-collision system will retract the seat belt before the collision occurs. The same will happen if the driver makes an emergency braking or loses control of the vehicle. (→P. 94)
  However, when the VSC system is disabled, the system will not operate in the event of skidding.

- **Pre-collision brake assist**
  When there is a high possibility of a frontal collision, the system applies greater braking force in relation to how strongly the brake pedal is depressed.

- **Pre-collision braking**
  When there is a high possibility of a frontal collision, the system warns the driver using a warning light, warning display and buzzer. If the system determines that a collision is unavoidable, the brakes are automatically applied to reduce the collision speed. Pre-collision braking can be disabled using the pre-collision braking off switch.
2-4. Using other driving systems

**Disabling pre-collision braking**

1. Pre-collision braking disabled
2. Pre-collision braking enabled

The "PCS" warning light will turn on when pre-collision braking is disabled.

**Radar sensor**

The radar sensor detects vehicles or other obstacles on or near the road ahead and determines whether a collision is imminent based on the position, speed, and heading of the obstacles.
The pre-collision system is operational when

- **Pre-collision seat belts (type A)**
  - Vehicle speed is greater than about 19 mph (30 km/h).
  - The system detects sudden braking or skidding.
  - The front occupants are wearing a seat belt.

- **Pre-collision seat belts (type B)**
  - Vehicle speed is greater than about 4 mph (5 km/h).
  - The speed at which your vehicle is approaching the obstacle or the vehicle running ahead of you is greater than about 19 mph (30 km/h).
  - The front occupants are wearing a seat belt.

- **Pre-collision brake assist:**
  - Vehicle speed is greater than about 19 mph (30 km/h).
  - The speed at which your vehicle is approaching the obstacle or the vehicle running ahead of you is greater than about 19 mph (30 km/h).
  - The brake pedal is depressed.

- **Pre-collision braking:**
  - The pre-collision braking off switch is not pressed.
  - Vehicle speed is greater than about 10 mph (15 km/h).
  - The speed at which your vehicle is approaching the obstacle or the vehicle running ahead of you is greater than about 10 mph (15 km/h).
2-4. Using other driving systems

- Conditions that may trigger the system even if there is no possibility of a collision
  - When there is an object by the roadside at the entrance to a curve
  - When passing an oncoming vehicle on a curve
  - When driving over a narrow iron bridge
  - When there is a metal object on the road surface
  - When driving on an uneven road surface (nose up, nose down)
  - When passing an oncoming vehicle on a left-turn
  - When your vehicle rapidly closes on the vehicle in front
  - When a grade separation/interchange, sign, billboard, or other structure appears to be directly in the vehicle's line of travel
  - When the steep angle of the road causes a metal object located beneath the road surface to be seen ahead of the vehicle
  - When an extreme change in vehicle height occurs
  - When the axis of the radar is out of adjustment
  - When passing through certain toll gates
  - When passing through an overpass

When the system is activated in the situations described above, there is also a possibility that the seat belts will retract quickly and the brakes will be applied with a force greater than normal. When the seat belt is locked in the retracted position, stop the vehicle in a safe place, release the seat belt and refasten it.

- Obstacles not detected

The sensor cannot detect plastic obstacles such as traffic cones. There may also be occasions when the sensor cannot detect pedestrians, animals, bicycles, motorcycles, trees, or snowdrifts.
When there is a malfunction in the system
Warning lights and/or warning messages will turn on or flash. (→P. 607, 620)

Situations in which the pre-collision system does not function properly
The system may not function effectively in situations such as the following:
● On roads with sharp bends or uneven surfaces
● If a vehicle suddenly moves in front of vehicle, such as at an intersection
● If a vehicle suddenly cuts in front of vehicle, such as when overtaking
● In inclement weather such as heavy rain, fog, snow or sand storms
● When your vehicle is skidding with the VSC system off
● When an extreme change in vehicle height occurs
● When the axis of the radar is out of adjustment

Automatic cancelation of the pre-collision system
When a malfunction occurs due to sensor contamination, etc. that results in the sensors being unable to detect obstacles, the pre-collision system will be automatically disabled. In this case, the system will not activate even if there is a collision possibility.
2-4. Using other driving systems

Certification

For vehicles sold in the U.S.A.
FCC ID: HYQDNMWR004
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Radiofrequency radiation exposure Information:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
This equipment should be installed and operated with minimum distance of 20 cm between the radiator (antenna) and your body.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

For vehicles sold in Canada
Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
2-4. Using other driving systems

CAUTION

Limitations of the pre-collision system

Do not overly rely on the pre-collision system. Always drive safely, taking care to observe your surroundings and checking for any obstacles or other road hazards. Failure to do so may cause an accident resulting in death or serious injury.

Cautions regarding the assist contents of the system

By means of alarms and brake control, the pre-collision system is intended to assist the driver in avoiding collisions through the process of LOOK-JUDGE-ACT. There are limits to the degree of assistance the system can provide, so please keep in mind the following important points.

- Assisting the driver in watching the road
  The pre-collision system is only able to detect obstacles directly in front of the vehicle, and only within a limited range. It is not a mechanism that allows careless or inattentive driving, and it is not a system that can assist the driver in low-visibility conditions. It is still necessary for the driver to pay close attention to the vehicle's surroundings.

- Assisting the driver in making correct judgement
  When attempting to estimate the possibility of a collision, the only data available to the pre-collision system is that from obstacles it has detected directly in front of the vehicle. Therefore, it is absolutely necessary for the driver to remain vigilant and to determine whether or not there is a possibility of collision in any given situation.

- Assisting the driver in taking action
  The pre-collision system's braking assist feature is designed to help reduce the severity of a collision, and so only acts when the system has judged that a collision is unavoidable. This system by itself is not capable of automatically avoiding a collision or bringing the vehicle to a stop safely. For this reason, when encountering a dangerous situation the driver must take direct and immediate action in order to ensure the safety of all involved.
## 2-4. Using other driving systems

### CAUTION

- **When the sensor may not be correctly detecting the vehicle ahead**
  - Apply the brakes as necessary in any of the following situations.
  - When water or snow thrown up by the surrounding vehicles hinders the functioning of the sensor
  - When your vehicle is pointing upwards (caused by a heavy load in the luggage compartment etc.)
  - Vehicles that cut in suddenly
  - Vehicles with small rear ends (trailers with no load on board etc.)
  - Motorcycles traveling in the same lane

- **Handling the radar sensor**
  - Observe the following to ensure the pre-collision system can function effectively:
    - Keep the sensor and front grille cover clean at all times.
      - Clean the sensor and front grille cover with a soft cloth so you do not mark or damage them.
    - Do not subject the sensor or surrounding area to a strong impact.
      - If the sensor moves even slightly off position, the system may become inaccurate or malfunction. If the sensor or surrounding area is subject to a strong impact, always have the area inspected and adjusted by your Lexus dealer.
    - Do not disassemble the sensor.
    - Do not attach accessories or stickers to the sensor, grille cover or surrounding area.
    - Do not modify or paint the sensor and grille cover.
Take notice of the following information about storage precautions, cargo capacity and load:

- Stow cargo and luggage in the luggage compartment whenever possible.
- Be sure all items are secured in place.
- To maintain vehicle balance while driving, position luggage evenly within the luggage compartment.
- For better fuel economy, do not carry unnecessary weight.
Capacity and distribution

Cargo capacity depends on the total weight of the occupants.

\[(\text{Cargo capacity}) = (\text{Total load capacity}) - (\text{Total weight of occupants})\]

**Steps for Determining Correct Load Limit**

1. Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs.” on your vehicle’s placard.
2. Determine the combined weight of the driver and passengers that will be riding in your vehicle.
3. Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.
4. The resulting figure equals the available amount of cargo and luggage load capacity.
   For example, if the “XXX” amount equals 1400 lbs. and there will be five 150 lb passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs. \((1400 - 750 (5 \times 150) = 650 \text{ lbs.})\)
5. Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in Step 4.
6. If your vehicle will be towing a trailer, load from your trailer will be transferred to your vehicle. Consult this manual to determine how this reduces the available cargo and luggage load capacity of your vehicle. (→P. 286)
   Lexus does not recommend towing a trailer with your vehicle. Your vehicle is not designed for trailer towing.
When 2 people with the combined weight of A lb. (kg) are riding in your vehicle, which has a total load capacity (vehicle capacity weight) of B lb. (kg), the available amount of cargo and luggage load capacity will be as follows:

\[ B^{*2} \text{ lb. (kg)} - A^{*4} \text{ lb. (kg)} = C^{*6} \text{ lb. (kg)} \]

*1: A = Weight of people  
*2: B = Total load capacity  
*3: C = Available cargo and luggage load

In this condition, if 3 more passengers with the combined weight of D lb. (kg) get on, the available cargo and luggage load will be reduced E lb. (kg) as follows:

\[ C \text{ lb. (kg)} - D^{*4} \text{ lb. (kg)} = E^{*5} \text{ lb. (kg)} \]

*4: D = Additional weight of people  
*5: E = Available cargo and luggage load

As shown in the example above, if the number of occupants increases, the cargo and luggage load will be reduced by an amount that equals the increased weight due to the additional occupants. In other words, if an increase in the number of occupants causes an excess of the total load capacity (combined weight of occupants plus cargo and luggage load), you must reduce the cargo and luggage on your vehicle.
CAUTION

■ Things that must not be carried in the luggage compartment

The following things may cause a fire if loaded in the luggage compartment:
● Receptacles containing gasoline
● Aerosol cans

■ Storage precautions

Observe the following precautions. Failure to do so may result in death or serious injury.
● Stow cargo and luggage in the luggage compartment whenever possible.
● Do not stack cargo and luggage in the luggage compartment higher than the seatbacks.
  Such items may be thrown about and possibly injure people in the vehicle in the event of sudden braking or in an accident.
● Do not place cargo or luggage in or on the following locations as the item may get under the brake or accelerator pedal and prevent the pedals from being depressed properly, block the driver’s vision, or hit the driver or passengers, causing an accident:
  • At the feet of the driver
  • On the front passenger or rear seats (when stacking items)
  • On the luggage cover
  • On the instrument panel
  • On the dashboard
● Secure all items in the occupant compartment, as they may shift and injure someone in the event of an accident or sudden braking.
● When you fold down the rear seats, long items should not be placed directly behind the front seats.
● Never allow anyone to ride in the luggage compartment. It is not designed for passengers. They should ride in their seats with their seat belts properly fastened. Otherwise, they are much more likely to suffer death or serious bodily injury, in the event of sudden braking or an accident.
CAUTION

- Capacity and distribution
  - Do not exceed the maximum axle weight rating or the total vehicle weight rating.
  - Even if the total load of occupant’s weight and the cargo load is less than the total load capacity, do not apply the load unevenly. Improper loading may cause deterioration of steering or braking control which may cause death or serious injury.
Vehicle load limits include total load capacity, seating capacity, towing capacity and cargo capacity.

- **Total load capacity (vehicle capacity weight):** → P. 674
  Total load capacity means the combined weight of occupants, cargo and luggage.

- **Seating capacity: 5 occupants (Front 2, Rear 3)**
  Seating capacity means the maximum number of occupants whose estimated average weight is 150 lb. (68 kg) per person.

- **Towing capacity**
  Lexus does not recommend towing a trailer with your vehicle.

- **Cargo capacity**
  Cargo capacity may increase or decrease depending on the weight and the number of occupants.

---

**Total load capacity and seating capacity**

These details are also described on the tire and loading information label. (→ P. 558)

---

**CAUTION**

- **Overloading the vehicle**
  Do not overload the vehicle.
  It may not only cause damage to the tires, but also degrade steering and braking ability, resulting in an accident.
Carry out the necessary preparations and inspections before driving the vehicle in winter. Always drive the vehicle in a manner appropriate to the prevailing weather conditions.

**Pre-winter preparations**
- Use fluids that are appropriate to the prevailing outside temperatures.
  - Engine oil
  - Engine/power control unit coolant
  - Washer fluid
- Have a service technician inspect the condition of the 12-volt battery.
- Have the vehicle fitted with four snow tires or purchase a set of tire chains for the front tires.
  
  Ensure that all tires are the same size and brand, and that chains match the size of the tires.
Before driving the vehicle
Perform the following according to the driving conditions:

- Do not try to forcibly open a window or move a wiper that is frozen. Pour warm water over the frozen area to melt the ice. Wipe away the water immediately to prevent it from freezing.

- To ensure proper operation of the climate control system fan, remove any snow that has accumulated on the air inlet vents in front of the windshield.

- Check for and remove any excess ice or snow that may have accumulated on the exterior lights, vehicle’s roof, chassis, around the tires or on the brakes.

- Remove any snow or mud from the bottom of your shoes before getting in the vehicle.

When driving the vehicle
Accelerate the vehicle slowly, keep a safe distance between you and the vehicle ahead, and drive at a reduced speed suitable to road conditions.

When parking the vehicle
Park the vehicle and shift the shift position to P and block the wheel under the vehicle without setting the parking brake. The parking brake may freeze up, preventing it from being released. If necessary, block the wheels to prevent inadvertent sliding or creeping.

Selecting tire chains

Use the correct tire chain size when mounting the tire chains. Chain size is regulated for each tire size.

Side chain:

- 0.12 in. (3 mm) in diameter

Cross chain:

- 0.16 in. (4 mm) in diameter

Regulations on the use of tire chains

Regulations regarding the use of tire chains vary depending on location and type of road. Always check local regulations before installing chains.

Tire chain installation

Observe the following precautions when installing and removing chains:

- Install and remove tire chains in a safe location.
- Install tire chains on the front tires only. Do not install tire chains on the rear tires.
- Install tire chains on front tires as tightly as possible. Retighten chains after driving 1/4 - 1/2 mile (0.5 - 1.0 km).
- Install tire chains following the instructions provided with the tire chains.
## CAUTION

### Driving with snow tires

- Observe the following precautions to reduce the risk of accidents. Failure to do so may result in a loss of vehicle control and cause death or serious injury.
  - Use tires of the size specified.
  - Maintain the recommended level of air pressure.
  - Do not drive in excess of 75 mph (120 km/h), regardless of the type of snow tires being used.
  - Use snow tires on all, not just some wheels.

### Driving with tire chains

- Observe the following precautions to reduce the risk of accidents. Failure to do so may result in the vehicle being unable to be driven safely, and may cause death or serious injury.
  - Do not drive in excess of the speed limit specified for the tire chains being used, or 30 mph (50 km/h), whichever is lower.
  - Avoid driving on bumpy road surfaces or over potholes.
  - Avoid sudden turns and braking, as use of chains may adversely affect vehicle handling.
  - Slow down sufficiently before entering a curve to ensure that vehicle control is maintained.

### When parking the Vehicle

When parking the vehicle without applying the parking brake, make sure to chock the wheels. If you do not chock the wheels, the vehicle may move unexpectedly, possibly resulting in an accident.
2-5. Driving information

⚠️ NOTICE

- **Repairing or replacing snow tires**
  Request repairs or replacement of snow tires from Lexus dealers or legitimate tire retailers. This is because the removal and attachment of snow tires affects the operation of the tire pressure warning valves and transmitters.

- **Fitting tire chains**
  The tire pressure warning valves and transmitters may not function correctly when tire chains are fitted.
2-5. Driving information
Trailer towing

Lexus does not recommend towing a trailer with your vehicle. Lexus also does not recommend the installation of a tow hitch or the use of a tow hitch carrier for a wheelchair, scooter, bicycle, etc. Your vehicle is not designed for trailer towing or for the use of tow hitch mounted carriers.
2-5. Driving information

Dinghy towing

Your vehicle is not designed to be dinghy towed (with 4 wheels on the ground) behind a motor home.

⚠️ NOTICE

- To avoid serious damage to your vehicle
  Do not tow your vehicle with the four wheels on the ground.

3-1. Using the air conditioning system and defogger

**Automatic air conditioning system**

Air outlets and fan speed are automatically adjusted according to the temperature setting.

**Vehicles with a navigation system**
Refer to the “Navigation System Owner’s Manual”.

**Vehicles without a navigation system**

![Diagram of air conditioning system controls]
3-1. Using the air conditioning system and defogger

**Using automatic air conditioning system**

**STEP 1** Press  

The air conditioning system begins to operate. Air outlets and fan speed are automatically adjusted according to the temperature setting.

**STEP 2** Press  to increase the temperature and  to decrease the temperature.

When  is pressed (the indicator on  is on) or the passenger’s side temperature control button is pressed, the temperature for the driver and passenger seats can be adjusted separately.

**STEP 3** Press  

The cooling and dehumidification function switches between on and off each time the button is pressed.
3-1. Using the air conditioning system and defogger

Adjusting the settings manually

■ Basic setting

**STEP 1.** To turn on the air conditioning system and adjust the fan speed, press [ ] to increase the fan speed and [ ] to decrease the fan speed.

Press [ ] to turn the fan off.

**STEP 2.** To adjust the temperature setting, press [ ] to increase the temperature and [ ] to decrease the temperature.

When [ ] is pressed (the indicator on [ ] is on) or the passenger’s side temperature control button is pressed, the temperature for the driver and passenger seats can be adjusted separately.
To change the air outlets, press the button.

The air outlets used are switched each time the button is pressed. The air flow shown on the display indicates the following:

Air flows to the upper body.

Air flows to the upper body and feet.
Air flows to the feet.

Air flows to the feet and the windshield defogger operates.

■ Switching between outside air and recirculated air modes

Press .

The mode switches between (recirculated air mode) and (outside air mode) modes each time the button is pressed.
3-1. Using the air conditioning system and defogger

**Defogging the windshield**

*Defogging*

The air conditioning system operates automatically.

Recirculated air mode will automatically switch to outside air mode. It is not possible to return to recirculated air mode when the switch is on.

**Micro dust and pollen filter button**

*Operates micro dust and pollen filter on/off.*

Outside air mode switches to (recirculated air) mode. Pollen is removed from the air and the air flows to the upper part of the body.

Usually the system will turn off automatically after approximately 3 minutes.
3-1. Using the air conditioning system and defogger

</tr>
<tr>
<td>• When the “POWER” switch is turned off, the current air conditioning settings will automatically be registered to the electronic key that was used to unlock the vehicle.</td>
</tr>
</tbody>
</table>

The system may not operate correctly if more than one electronic key is in the vicinity or if the smart access system with push-button start is used to unlock a passenger door.

Settings for the electronic key and the corresponding door can be changed. Contact your Lexus dealer.
3-1. Using the air conditioning system and defogger

- **Using automatic mode**
  Fan speed is adjusted automatically according to the temperature setting and ambient conditions. As a result, the following may occur:
  - Immediately after the button is pressed, the fan may stop for a while until warm or cool air is ready to flow.
  - Cool air may flow to the area around the upper body when the heater is on.

- **Humidity sensor (if equipped)**
  A sensor, which detects humidity inside the vehicle and the temperature of the windshield, is provided to detect fog on the front windscreen. Due to the sensor, when automatic mode is set the air conditioning may make the following controls:
  - Changing the amount of air flow
  - Changing the amount of air introduced from outside when in outside air mode with the air vents in the position
  - Changing the settings of the air vents to when the is set

- **Using the system in recirculated air mode**
  The windows will fog up more easily if recirculated air mode is used.

- **Switching between outside air and recirculated air modes**
  Recirculated air mode or outside air mode may be automatically switched to in accordance with the temperature setting and the inside temperature.
3-1. Using the air conditioning system and defogger

■ Window defogger feature
Recirculated air mode may automatically switch to (outside air) mode in situations where the windows need to be defogged.

■ Micro dust and pollen filter
In order to prevent the windshield from fogging up when the outside air is cold, the following may occur:
• Outside air mode does not switch to (recirculated air) mode.
• The air conditioning system operates automatically.
• The operation cancels after 1 minute.

In rainy weather, the windows may fog up. Press .

■ When outside air temperature is below 32 °F (0 °C)
The cooling and dehumidification function may not operate even when is pressed.

■ Operation of the air conditioning system in Eco drive mode
In the Eco drive mode, the air conditioning system is controlled as follows to prioritize fuel efficiency:
• Engine speed and compressor operation controlled to restrict heating/cooling capacity
• Fan speed restricted when automatic mode is selected

To improve air conditioning performance, perform the following operations:
• Adjust the fan speed
• Turn off Eco drive mode
• Customize the air conditioning control of Eco drive mode. (→P. 709)
3-1. Using the air conditioning system and defogger

■ Air conditioning odors

- During use, various odors from inside and outside the vehicle may enter into and accumulate in the air conditioning system. This may then cause odor to be emitted from the vents.
- To reduce potential odors from occurring:
  - It is recommended that the air conditioning system be set to outside air mode prior to turning the vehicle off.
  - The start timing of the blower may be delayed for a short period of time immediately after the air conditioning system is started in AUTO mode.

■ Customization

Settings (e.g. enable/disable automatic operation of the air conditioning compressor when the “AUTO” switch ON) can be changed.
(Customizable features → P. 709)

⚠️ CAUTION

■ To prevent the windshield from fogging up

Do not use during cool air operation in extremely humid weather. The difference between the temperature of the outside air and that of the windshield can cause the outer surface of the windshield to fog up, blocking your vision.
3-1. Using the air conditioning system and defogger

</tr>
</tbody>
</table>
3-1. Using the air conditioning system and defogger
Rear window and outside rear view mirror defoggers switch

Defoggers are used to defog the rear window, and to remove raindrops, dew and frost from the outside rear view mirrors.

CAUTION

When the outside rear view mirror defoggers are on
Do not touch the outside surface of the rear view mirrors, as they can become very hot and burn you.

Operating conditions
The “POWER” switch is in ON mode.

The outside rear view mirror defoggers
Turning the rear window defogger on will turn the outside rear view mirror defoggers on.

Turns the rear window and outside rear view mirror defoggers on/off
The defoggers will automatically turn off after 15 minutes.
3-1. Using the air conditioning system and defogger
Windshield wiper de-icer*

This feature is used to prevent ice from building up on the windshield and wiper blades.

Turns the windshield wiper de-icer on/off

The windshield wiper de-icer will automatically turn off after approximately 15 minutes.

Operating conditions
The “POWER” switch is in ON mode.

CAUTION

When the windshield wiper de-icer is on
Do not touch the lower part of the windshield or the side of the front pillars, as the surfaces can become very hot and burn you.

*: If equipped
3-2. Using the audio system

Audio system types

**Vehicles with a navigation system**
Owners of models equipped with a navigation system should refer to the "Navigation System Owner’s Manual”.

**Vehicles without a navigation system**
Type A: CD player and AM/FM radio
Type B and C: CD player with changer and AM/FM radio

**Type A**
3-2. Using the audio system

Type B

Type C
Using cellular phones

Interference may be heard through the audio system’s speakers if a cellular phone is being used inside or close to the vehicle while the audio system is operating.
3-2. Using the audio system

**CAUTION**

- Certification
  - Part 15 of the FCC Rules
    - FCC Warning:
      Any unauthorized changes or modifications to this equipment will void the user's authority to operate this device.
  - Laser products
    - Do not take this unit apart or attempt to make any changes by yourself.
      This is an intricate unit that uses a laser pickup to retrieve information from the surface of compact discs. The laser is carefully shielded so that its rays remain inside the cabinet. Therefore, never try to disassemble the player or alter any of its parts since you may be exposed to laser rays and dangerous voltages.
    - This product utilizes a laser.
      Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

**NOTICE**

- To prevent 12-volt battery discharge
  - Do not leave the audio system on longer than necessary with the hybrid system is not operating.
- To avoid damaging the audio system
  - Take care not to spill drinks or other fluids over the audio system.

Adjusting the frequency
Setting station presets (excluding XM® Satellite Radio)

**STEP 1.** Search for the desired stations by turning or pressing “∧” or “∨” on .

**STEP 2.** Press and hold the button (from 1 to 6) the station is to be set to until you hear a beep.

Scanning radio stations (excluding XM® Satellite Radio)

- **Scanning the preset radio stations**
  - **STEP 1.** Press and hold until you hear a beep.
  - **STEP 2.** When the desired station is reached, press the button again.

- **Scanning all the radio stations within range**
  - **STEP 1.** Press .
    - All the stations with reception will be played for 5 seconds each.
  - **STEP 2.** When the desired station is reached, press the button again.
RDS (Radio Data System) (type A and B)

This feature allows your radio to receive station identification information and program information (classical, jazz, etc.) from radio stations which broadcast this information.

Receiving RDS broadcasts

**STEP 1** Press “∧” or “∨” on (type A) or (type B) during FM reception.

The type of program changes each time the button is pressed.

- “ROCK”
- “EASYLIS” (Easy listening)
- “CLS/JAZZ” (Classical music and Jazz)
- “R & B” (Rhythm and Blues)
- “INFORM” (Information)
- “RELIGION”
- “MISC” (Miscellaneous)
- “ALERT” (Emergency messages)

If the system receives no RDS stations, “NO PTY” appears on the display.

**STEP 2** Press or “∧” or “∨” on .

The radio seeks or scans for stations of the relevant program type.
3-2. Using the audio system

- Displaying radio station names
  
  Press TEXT .

- Displaying radio text messages
  
  Press TEXT twice.

  A text message is displayed when "MSG" is shown on the screen.

  If the text continues past the end of the display, ► is displayed. Press and hold TEXT until you hear a beep.

*XM® Satellite Radio (type A and B)*

- Receiving XM® Satellite Radio
  
  **STEP 1** Press AM-SAT (type A) or SAT (type B).

  The display changes as follows each time the button is pressed.

  Type A: “AM” → “SAT1” → “SAT2” → “SAT3”

  Type C: “SAT1” → “SAT2” → “SAT3”

  **STEP 2** Turn TUN:SEL to select the desired channel in all the categories or press “∧” or “∨” on SEEK-TRACK to select the desired channel in the current category.
Setting XM® Satellite Radio channel presets
Select the desired channel. Press and hold the button (from 1 to 6) the channel is to be set to until you hear a beep.

Changing the channel category
Press “∧” or “∨” on [TYPE FOLDER] (type A) or [TYPE DISC] (type B).

Scanning the XM® Satellite Radio channels

- Scanning the channels in the current category
  
  **STEP 1** Press [SCAN].
  
  **STEP 2** When the desired channel is reached, press the button again.

- Scanning the preset channels
  
  **STEP 1** Press and hold [SCAN] until you hear a beep.
  
  **STEP 2** When the desired channel is reached, press the button again.
3-2. Using the audio system

■ Displaying text information

Press \text{TEXT}\. The display will show up to 10 characters. The display changes as follows each time the button is pressed:

- CH NAME
- TITLE (SONG/PROGRAM TITLE)
- NAME (ARTIST NAME/FEATURE)
- CH NUMBER

■ When the 12-volt battery is disconnected

All preset stations are erased.

■ Reception sensitivity

- Cargo loaded on the roof luggage carrier, especially metal objects, may adversely affect the reception of XM\textsuperscript{®} Satellite Radio.
- Maintaining perfect radio reception at all times is difficult due to the continually changing position of the antenna, differences in signal strength and surrounding objects, such as trains, transmitters, etc.
- When \text{SCAN} is used, automatic station selection may not be possible.
- The radio antenna is mounted on the rear roof. The antenna can be removed from the base by turning.
Receiving XM® Satellite Radio

An XM® Satellite Radio is a tuner designed exclusively to receive broadcasts provided under a separate subscription. Availability is limited to the 48 contiguous states and 10 Canadian provinces.

- XM® subscriptions
  For detailed information about XM® Satellite Radio or to subscribe:
  Canada — Visit on the web at www.xmradio.ca or call 1-877-515-3987.

- Radio ID
  You will need the radio ID when activating XM® service or reporting a problem.
  Select “CH000” using , and the receiver’s 8-character ID number will appear.

- Satellite tuner
  The tuner supports only Audio Services (Music and Talk) and the accompanying Text Information of XM® Satellite Radio.
3-2. Using the audio system

If the satellite radio does not operate normally

If a problem occurs with the XM® tuner, a message will appear on the display. Refer to the table below to identify the problem, and take the suggested corrective action.

<table>

Contact the XM® Listener Care Center at 1-877-515-3987.
3-2. Using the audio system

Certifications for the radio tuner

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by trying one or more of the following:

● Reorienting or relocate the receiving antenna.
● Increasing the separation between the equipment and receiver.
● Connecting the equipment into an outlet on a circuit different from that to which the receiver is connected.
● Consulting the dealer or an experienced radio/TV technician for help.

NOTICE

To prevent damage, remove the antenna in the following cases

● The antenna will touch the ceiling of a garage.
● A cover will be put on the roof.
● When driving through an automatic car wash.
● Any other cases where there is a risk of touching surrounding parts.

    - Insert a CD.
  - **Type B and C**

  **STEP 1** Press \( \text{LOAD} \),

  "WAIT" is shown on the display.

  **STEP 2** When the indicator on the slot turns from amber to green, insert a CD.

  The display changes from "WAIT" to "LOAD".

- **Loading multiple CDs (type B and C)**

  **STEP 1** Press and hold \( \text{LOAD} \) until you hear a beep.

  "WAIT" is shown on the display.

  **STEP 2** When the indicator on the slot turns from amber to green, insert a CD.

  The display changes from "WAIT" to "LOAD".

  The indicator on the slot turns to amber when the CD is being inserted.

  **STEP 3** When the indicator on the slot turns from amber to green, insert the next CD.

  Repeat the procedure for the remaining CDs.

  To cancel the operation, press \( \text{LOAD} \). If you do not insert a disc within 15 seconds, loading will be canceled automatically.
3-2. Using the audio system

**Ejecting CDs**

■ Ejecting a CD

Type A

Press ▲ and remove the CD.

Type B and C

To select the CD to be ejected, press “▲” or “▼” on ▲ TYPE-DISC ▲ (type B) or ▼ CD-DISC ▼ (type C).

The selected disc number is shown on the display.

STEP 1

STEP 2

Press ▲ and remove the CD.

■ Ejecting all the CDs (type B and C)

Press and hold ▲ until you hear a beep, and then remove the CDs.
Selecting, fast-forwarding, reversing and scanning tracks

■ Selecting a track

Press “▲” to move up or “▼” to move down using SEEK-TRACK until the desired track number appears on the displayed.

■ Fast-forwarding and reversing tracks

To fast-forward or reverse, press and hold “▲” or “▼” on SEEK-TRACK until you hear a beep.

■ Scanning tracks

1. Press SCAN.
   The first 10 seconds of each track will be played.
   To cancel, press SCAN again.

2. Press the button again when the desired track is reached.
3-2. Using the audio system

**Selecting a CD (type B and C)**

- **Selecting a CD to play**
  
  To select the desired CD, press "▲" or "▼" on \( \text{SELECT} \) (type B) or \( \text{CHOOSE} \) (type C).

- **Scanning loaded CDs**

  **STEP 1** Press and hold \( \text{SCAN} \) until you hear a beep.

  The first 10 seconds of the first track on each CD will be played.

  To cancel, press \( \text{SCAN} \) again.

  **STEP 2** Press the button again when the desired CD is reached.

**Playing and pausing tracks (type B and C)**

- To play or pause a track, press \( \text{3} \).

**Random playback**

- **Current CD**

  Press \( \text{1} \):

  Songs are played in random order.

  To cancel, press \( \text{1} \) again.

- **All CDs (type B and C)**

  Press and hold \( \text{3} \) until you hear a beep.

  Tracks on all loaded CDs are played in random order.

  To cancel, press \( \text{3} \) again.
3-2. Using the audio system

**Repeat play**

- **Repeating a track**
  Press \(\text{②}\).
  To cancel, press \(\text{②}\) again.

- **Repeating all of the tracks on a CD (type B and C)**
  Press and hold \(\text{②}\) until you hear a beep.
  To cancel, press \(\text{②}\) again.

**Switching the display**

Press \(\text{TEXT}\).

Each time the button is pressed, the display changes in the following order:
Elapsed time → CD title → Track title

**CD player protection feature**

To protect the internal components, playback is automatically stopped when a problem is detected.

**Display**

Up to 12 characters can be displayed at a time.
If there are 13 or more characters, pressing and holding \(\text{TEXT}\) for 1 second or more enables to display the remaining characters.
A maximum of 24 characters can be displayed.
If \(\text{TEXT}\) is pressed for more than 1 second again or has not been operated for more than 6 seconds, the display will return to the first 12 characters.
Depending on the contents recorded, the characters may not be displayed properly or may not be displayed at all.
When “ERROR” or “WAIT” is shown on the display

“ERROR”: This indicates a trouble either in the CD or inside the player. The CD may be dirty, damaged, or inserted up-side down.

“WAIT”: This indicates that operation is stopped due to a high temperature inside the player. Wait for a while and then press CD (type A and B) or CD (type C). If the CD still cannot be played back, contact your Lexus dealer.

Discs that can be used

Discs with the marks shown below can be used. Playback may not be possible depending on recording format or disc features, or due to scratches, dirt or deterioration.

CDs with copy-protection features may not be used.

Lens cleaners

Do not use lens cleaners. Doing so may damage the CD player.

If discs are left inside the CD player or in the ejected position for extended periods of time

The discs may be damaged and may not play properly.
3-2. Using the audio system

⚠️ NOTICE

- **CDs and adapters that cannot be used**
  Do not use the following types of CDs, 3 in. (8 cm) CD adapters or Dual Discs. Doing so may damage the CD player and/or the CD load/eject function.
  - CDs that have a diameter that is not 4.7 in. (12 cm)
  - Low-quality and deformed CDs
  - CDs with a transparent or translucent recording area
  - CDs that have had tape, stickers or CD-R labels attached to them, or that have had the label peeled off
NOTICE

CD player precautions

Failure to follow the precautions below may result in serious damage to the CDs or the player itself.

- Do not insert anything other than CDs into the CD slot.
- Do not apply oil to the CD player.
- Store CDs away from direct sunlight.
- Never try to disassemble any part of the CD player.
- Do not insert more than one CD at a time.

Type B and C
Press 5 or 6 to select the desired folder.

■ Returning to the first folder

Type A
Press and hold “∨” on until you hear a beep.

Type B and C
Press and hold 5 until you hear a beep.
3-2. Using the audio system

- **Scanning the first file of all the folders**
  
  **STEP 1.** Press and hold [SCAN] until you hear a beep.  
  The first 10 seconds of the first file in each folder will be played.
  
  **STEP 2.** When the desired folder is reached, press [SCAN] again.

- **Fast-forwarding and reversing files**
  
  To fast-forward or reverse, press and hold “∧” or “∨” on [SEEK-TRACK] until you hear a beep.

- **Selecting and scanning files**
  
  - **Selecting file**
    
    Turn [TUNE-SEL] or press “∧” or “∨” on [SEEK-TRACK] to select the desired file.
  
  - **Scanning the files in a folder**
    
    Press [SCAN].  
    
    The first 10 seconds of each file will be played.
    
    To cancel, press [SCAN] again.
    
    When the desired file is reached, press [SCAN] again.
3-2. Using the audio system

### Playing and pausing files (type B and C)
To play or pause a file, press \[ \text{3} \].

### Random playback

- **Playing files from a folder in random order**
  Press \[ \text{1} \].
  To cancel, press \[ \text{1} \] again.

- **Playing all the files from a disc in random order**
  Press and hold \[ \text{1} \] until you hear a beep.
  To cancel, press \[ \text{1} \] again.

### Repeat play

- **Repeating a file**
  Press \[ \text{2} \].
  To cancel, press \[ \text{2} \] again.

- **Repeating all the files in a folder**
  Press and hold \[ \text{2} \] until you hear a beep.
  To cancel, press \[ \text{2} \] again.

### Switching the display

Press \[ \text{TEXT} \].

Each time the button is pressed, the display changes in the following order:
Folder no./File no./Elapsed time → Folder name → File name → Album title
(MP3 only) → Track title → Artist name
3-2. Using the audio system

- **CD player protection feature**
  → P. 332

- **Display**
  → P. 332

- **When "ERROR", "WAIT" or "NO MUSIC" is shown on the display**
  "ERROR": This indicates a problem either in the CD or inside the player. The CD may be dirty, damaged, or inserted up-side down.

  "WAIT": This indicates that operation is stopped due to a high temperatures inside the player. Wait for a while and then press [CD] (type A and B) or [CD] (type C). If the CD still cannot be played back, contact your Lexus dealer.

  "NO MUSIC": This indicates that an MP3/WMA file is not included in the CD.

- **Discs that can be used**
  → P. 333

- **Lens cleaners**
  → P. 333

- **If discs are left inside the CD player or in the ejected position for extended periods of time**
  → P. 333
3-2. Using the audio system

**MP3 and WMA files**

MP3 (MPEG Audio LAYER 3) is a standard audio compression format. Files can be compressed to approximately 1/10 of their original size by using MP3 compression.

WMA (Windows Media Audio) is a Microsoft audio compression format. This format compresses audio data to a size smaller than that of the MP3 format.

There is a limit to the MP3 and WMA file standards that can be used and to the media/formats on which the files are recorded.

- **MP3 file compatibility**
  - Compatible standards
    - MP3 (MPEG LAYER 3, MPEG LAYER 2)
  - Compatible sampling frequencies
    - MPEG LAYER 3: 32, 44.1, 48 (kHz)
    - MPEG LAYER 2: 16, 22.05, 24 (kHz)
  - Compatible bit rates (compatible with VBR)
    - MPEG LAYER 3: 64, 80, 96, 128, 160, 192, 224, 256, 320 (kbps)
    - MPEG LAYER 2: 64, 80, 96, 128, 144, 160 (kbps)
  - Compatible channel modes: stereo, joint stereo, dual channel and monaural

- **WMA file compatibility**
  - Compatible standards
    - WMA Ver. 7, 8, 9
  - Compatible sampling frequencies
    - 32, 44.1, 48 (kHz)
  - Compatible bit rates (only compatible with 2-channel playback)
    - Ver. 7, 8: CBR 48, 64, 80, 96, 128, 160, 192 (kbps)
    - Ver. 9: CBR 48, 64, 80, 96, 128, 160, 192, 256, 320 (kbps)
3-2. Using the audio system

● Compatible media
   Media that can be used for MP3 and WMA playback are CD-Rs and CD-RWs.
   Playback in some instances may not be possible if the CD-R or CD-RW is not finalized. Playback may not be possible or the audio may jump if the disc is scratched or marked with fingerprints.

● Compatible disc formats
   The following disc formats can be used:
   - Disc formats: CD-ROM Mode 1 and Mode 2
   - CD-ROM XA Mode 2, Form 1 and Form 2
   - File formats: ISO9660 Level 1, Level 2, (Romeo, Joliet)
   MP3 and WMA files written in any format other than those listed above may not play correctly, and their file names and folder names may not be displayed correctly.
   Items related to standards and limitations are as follows:
   - Maximum directory hierarchy: 8 levels (including the root)
   - Maximum length of folder names/file names: 32 characters
   - Maximum number of folders: 192 (including the root)
   - Maximum number of files per disc: 255

● File names
   The only files that can be recognized as MP3/WMA and played are those with the extension .mp3 or .wma.

● Discs containing multi-session recordings
   As the audio system is compatible with multi-sessions, it is possible to play discs that contain MP3 and WMA files. However, only the first session can be played.
3-2. Using the audio system

- **ID3 and WMA tags**
  ID3 tags can be added to MP3 files, making it possible to record the track title, artist name, etc.

  The system is compatible with ID3 Ver. 1.0, 11, and Ver. 2.2, 2.3 ID3 tags. (The number of characters is based on ID3 Ver. 1.0 and 11.)

  WMA tags can be added to WMA files, making it possible to record the track title and artist name in the same way as with ID3 tags.

- **MP3 and WMA playback**
  When a disc containing MP3 or WMA files is inserted, all files on the disc are first checked. Once the file check is finished, the first MP3 or WMA file is played. To make the file check finish more quickly, we recommend you do not write in any files other than MP3 or WMA files or create any unnecessary folders.

  Discs that contain a mixture of music data and MP3 or WMA format data cannot be played.

- **Extensions**
  If the file extensions .mp3 and .wma are used for files other than MP3 and WMA files, they will be mistakenly recognized and played as MP3 and WMA files. This may result in large amounts of interference and damage to the speakers.
3-2. Using the audio system

Playback
• To play MP3 files with steady sound quality, we recommend a fixed bit rate of at least 128 kbps and a sampling frequency of 44.1 kHz.
• CD-R or CD-RW playback may not be possible in some instances, depending on the characteristics of the disc.
• There is a wide variety of freeware and other encoding software for MP3 and WMA files on the market, and depending on the status of the encoding and the file format, poor sound quality or noise at the start of playback may result. In some cases, playback may not be possible at all.
• When files other than MP3 or WMA files are recorded on a disc, it may take more time to recognize the disc and in some cases, playback may not be possible at all.
• Microsoft, Windows, and Windows Media are the registered trademarks of Microsoft Corporation in the U.S.A. and other countries.

Selecting a list

**STEP 1** Turn to display the first selection list.

**STEP 2** Press to select the desired item.

Pressing the knob changes to the second selection list.

**STEP 3** Repeat the same procedure to select the desired song name.

To return to the previous selection list, select "GO BACK" or press .
3-2. Using the audio system

**Selecting songs**

Turn \[ TUNE-SEL \] or press “∧” or “∨” on \[ SEEK-TRACK \] to select the desired song.

**Playing and pausing songs**

To play or pause a song, press \[ 3 \].

**Fast-forwarding and rewinding songs**

To fast-forward or rewind, press and hold “∧” or “∨” on \[ SEEK-TRACK \] until you hear a beep.

**Shuffle playback**

- **Playing songs from one playlist or album in random order**
  
  Press \[ 1 \].
  
  To cancel, press \[ 1 \] again.

- **Playing songs from all the playlists or albums in random order**
  
  Press and hold \[ 1 \] until you hear a beep.
  
  To cancel, press \[ 1 \] again.
3-2. Using the audio system

**Repeat play**

Press \[\text{2} \].

To cancel, press \[\text{1} \] again.

**Switching the display**

Press \[\text{TEXT} \].

Each time the button is pressed, the display changes in the following order:
Elapsed time → Album title → Track title → Artist name

**Adjusting sound quality and volume balance**

**STEP 1** Press \[\text{TUNE SEL} \] to enter iPod menu mode.

**STEP 2** Pressing \[\text{TUNE SEL} \] changes sound modes. (→ P. 372)
3-2. Using the audio system

■ About iPod

● Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.
● iPod is a trademark of Apple, Inc., registered in the U.S. and other countries.

■ iPod functions

● When an iPod is connected and the audio source is changed to iPod mode, the iPod will resume play from the same point in which it was last used.
● Depending on the iPod that is connected to the system, certain functions may not be available. Disconnecting the device and reconnecting it once again may resolve some malfunctions.

■ iPod problems

To resolve most problems encountered when using your iPod, disconnect your iPod from the vehicle iPod connection and reset it.
For instructions on how to reset your iPod, refer to your iPod Owner’s Manual.

■ Display

→ P. 332

■ Error messages

“ERROR”: This indicates a problem in the iPod or its connection.
“NO MUSIC”: This indicates that there is no music data in the iPod.
“EMPTY”: This indicates that an empty playlist is selected.
“UPDATE”: This indicates that the version of the iPod is not compatible. Upgrade your iPod software to the latest version.

Error messages

“ERROR”: This indicates a problem in the USB memory or its connection.

“NO MUSIC”: This indicates that no MP3/WMA files are included in the USB memory.

USB memory

● Compatible devices

USB memory that can be used for MP3 and WMA playback

● Compatible device formats

The following device formats can be used:

• USB communication formats: USB2.0 FS (12mbps)
• File formats: FAT16/32 (Windows)
• Correspondence class: Mass storage class

MP3 and WMA files written in any format other than those listed above may not play correctly, and their file names and folder names may not be displayed correctly.

Items related to standards and limitations are as follows:

• Maximum directory hierarchy: 8 levels
• Maximum number of folders in a device: 999 (including the root)
• Maximum number of files in a device: 65025
• Maximum number of files per folder: 255
3-2. Using the audio system

● MP3 and WMA files
  MP3 (MPEG Audio LAYER 3) is a standard audio compression format. Files can be compressed to approximately 1/10 of their original size using MP3 compression.
  WMA (Windows Media Audio) is a Microsoft audio compression format. This format compresses audio data to a size smaller than that of the MP3 format. There is a limit to the MP3 and WMA file standards that can be used and to the media/formats on which the files are recorded.

● MP3 file compatibility
  • Compatible standards
    MP3 (MPEG1 AUDIO LAYER II, III, MPEG2 AUDIO LAYER II, III, MPEG2.5)
  • Compatible sampling frequencies
    MPEG1 AUDIO LAYER II, III: 32, 44.1, 48 (kHz)
    MPEG2 AUDIO LAYER II, III: 16, 22.05, 24 (kHz)
    MPEG2.5: 8, 11.025, 12 (kHz)
  • Compatible bit rates (compatible with VBR)
    MPEG1 AUDIO LAYER II, III: 32-320 (kbps)
    MPEG2 AUDIO LAYER II, III: 32-160 (kbps)
    MPEG2.5: 32-160 (kbps)
  • Compatible channel modes: stereo, joint stereo, dual channel and monaural

● WMA file compatibility
  • Compatible standards
    WMA Ver. 9
  • Compatible sampling frequencies
    HIGH PROFILE 32, 44.1, 48 (kHz)
  • Compatible bit rates
    HIGH PROFILE 32-320 (kbps, VBR)
File names
The only files that can be recognized as MP3/WMA and played are those with the extension .mp3 or .wma.

ID3 and WMA tags
ID3 tags can be added to MP3 files, making it possible to record the track title, artist name, etc.

The system is compatible with ID3 Ver. 1.0, 1.1, and Ver. 2.2, 2.3, 2.4 ID3 tags. (The number of characters is based on ID3 Ver. 1.0 and 1.1.)

WMA tags can be added to WMA files, making it possible to record the track title and artist name in the same way as with ID3 tags.

MP3 and WMA playback
- When a device containing MP3 or WMA files is connected, all files in the USB memory device are checked. Once the file check is finished, the first MP3 or WMA file is played. To make the file check finish more quickly, we recommend that you do not include any files other than MP3 or WMA files or create any unnecessary folders.
- When the USB device is connected and the audio source is changed to USB memory mode, the USB device will start playing the first file in the first folder. If the same device is removed and reinserted (and the contents have not been changed), the USB device will resume play from the same point in which it was last used.

Extensions
If the file extensions .mp3 and .wma are used for files other than MP3 and WMA files, they will be mistakenly recognized and played as MP3 and WMA files. This may result in large amounts of interference and damage to the speakers.
3-2. Using the audio system

Playback

- To play MP3 files with steady sound quality, we recommend a fixed bit rate of at least 128 kbps and a sampling frequency of 44.1 kHz.
- There is a wide variety of freeware and other encoding software for MP3 and WMA files on the market, and depending on the status of the encoding and the file format, poor sound quality or noise at the start of playback may result. In some cases, playback may not be possible at all.
- Microsoft, Windows, and Windows Media are registered trademarks of Microsoft Corporation in the U.S.A. and other countries.

CAUTION

- Caution while driving
  Do not connect USB memory or operate the controls.

NOTICE

- To prevent damage to USB memory
  - Do not leave USB memory in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the player.
  - Do not push down on or apply unnecessary pressure to the USB memory while it is connected as this may damage the USB memory or its terminal.
  - Do not insert foreign objects into the port as this may damage the USB memory or its terminal.
3-2. Using the audio system
Optimal use of the audio system

1 Displays the current mode
2 Changes the following settings:
   • Sound quality and volume balance
     → P. 372
   The sound quality and balance setting can be changed to produce the best sound.
   • Automatic Sound Levelizer on/off
     → P. 373
3-2. Using the audio system

### Adjusting sound quality and volume balance

#### Changing sound quality modes

Press .

Pressing the button changes sound modes in the following order:

“BAS” → “MID” → “TRE” → “FAD” → “BAL” → “ASL”

#### Adjusting sound quality

Turning adjusts the level.

<table>
<thead>
<tr>
<th>Mode displayed</th>
<th>Sound quality mode</th>
<th>Level</th>
<th>Turn counter-clockwise</th>
<th>Turn clockwise</th>
</tr>
</thead>
<tbody>
<tr>
<td>“BAS”</td>
<td>Bass*</td>

<td>Left/right volume balance</td>
<td>L7 to R7</td>
<td>Shifts to left</td>
<td>Shifts to right</td>
</tr>
</tbody>
</table>

*: The sound quality level is adjusted individually in each audio mode.
3-2. Using the audio system

Turning the Automatic Sound Levelizer (ASL) on/off

Turning clockwise turns on the ASL, and turning counterclockwise turns off the ASL.

ASL automatically adjusts the volume and tone quality according to the noise level as you drive your vehicle.
3-2. Using the audio system
Using the AUX port

This port can be used to connect a portable audio device and listen to it through the vehicle's speakers.

**STEP 1** Press down and release the lid.

**STEP 2** Open the cover and connect the portable audio device.

**STEP 3** Press \( \text{CD AUX} \) (type A and B) or \( \text{AUX-USB} \) (type C).

- **Operating portable audio devices connected to the audio system**
  The volume can be adjusted using the vehicle's audio controls. All other adjustments must be made on the portable audio device itself.

- **When using a portable audio device connected to the power outlet**
  Noise may occur during playback. Use the power source of the portable audio device.
3-2. Using the audio system

**CAUTION**

■ Caution while driving
   Do not connect portable audio device or operate the controls.

**NOTICE**

■ To prevent damage to portable audio device
   ○ Do not leave portable audio devices in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the device.
   ○ Do not push down on or apply unnecessary pressure to the portable audio device while it is connected as this may damage the portable audio device or its terminal.
   ○ Do not insert foreign objects into the port as this may damage the portable audio device or its terminal.
Some audio features can be controlled using the switches on the steering wheel.

Operation may differ depending on the type of audio system or navigation system. For details, refer to the manual provided with the audio system or navigation system.

1. Turns the power on, selects an audio source
2. Increases/decreases volume
3. Radio mode:
   - Selects a radio station
4. CD mode:
   - Selects a track, file (MP3 and WMA) and disc
5. Bluetooth® audio mode:
   - Selects a track and album
6. iPod mode:
   - Selects a song
7. USB memory mode:
   - Selects a file and folder
3-2. Using the audio system

**Turning the power on**

Press \( \text{when the audio system is turned off.} \)

The audio system can be turned off by holding the switch down for 1 second or more.

**Changing the audio source**

Press \( \text{when the audio system is turned on. The audio source changes as follows each time the button is pressed. If no discs are inserted in the player, that mode will be skipped.} \)

**Type A**
- FM1 → FM2 → SAT1 (if equipped) → SAT2 (if equipped) → SAT3 (if equipped) → CD player → iPod or USB memory → Bluetooth® audio → AUX → AM → FM1

**Type B and C**
- FM1 → FM2 → SAT1 (if equipped) → SAT2 (if equipped) → SAT3 (if equipped) → CD player → Bluetooth® audio → AUX → iPod or USB memory → AM → FM1

**Adjusting the volume**

Press “+” on \( \text{to increase the volume and “-” to decrease the volume.} \)

Hold down the button to continue increasing or decreasing the volume.
3-2. Using the audio system

Selecting a radio station

**STEP 1** Press \( \) to select radio mode.

**STEP 2** Press “\(^\wedge\)” or “\(^\vee\)” on \( \) to select a radio station.

To scan for receivable stations, press and hold “\(^\wedge\)” or “\(^\vee\)” on the button until you hear a beep.

Selecting a track/file or song

**STEP 1** Press \( \) to select CD, Bluetooth® audio, iPod or USB memory mode.

**STEP 2** Press “\(^\wedge\)” or “\(^\vee\)” on \( \) to select the desired track/file or song.

Selecting an album

**STEP 1** Press \( \) to select Bluetooth® audio mode.

**STEP 2** Press and hold “\(^\wedge\)” or “\(^\vee\)” on \( \) until you hear a beep.
Selecting a folder

**STEP 1** Press 

**STEP 2** Press and hold “∧” or “∨” on until you hear a beep.

Selecting a disc in the CD player

**STEP 1** Press 

**STEP 2** Press and hold “∧” or “∨” on until you hear a beep.

Canceling automatic selection of a radio station

Press again.

**CAUTION**

To reduce the risk of an accident
Exercise care when operating the audio switches on the steering wheel.
The Bluetooth® audio system enables you to enjoy music played on a portable digital audio player (portable player) from the vehicle speakers via wireless communication.

This audio system supports Bluetooth®, a wireless data system capable of playing portable audio music without cables. If your portable player does not support Bluetooth®, the Bluetooth® audio system will not function.

Vehicles with a navigation system:
Refer to the “Navigation System Owner’s Manual”.

Vehicles without a navigation system:

- Conditions under which the system will not operate
  - If using a portable player that does not support Bluetooth®
  - If the portable player is switched off
  - If the portable player is not connected
  - If the portable player’s battery is low
  - If the portable player is behind the seat or in the glove box or console box
  - If metal is covering or touching the portable player
When transferring ownership of the vehicle
Be sure to initialize the system to prevent personal data from being improperly accessed. (→P. 434)

About Bluetooth®
Bluetooth is a registered trademark of Bluetooth SIG, Inc.

Compatible models
- Bluetooth® specifications:
  Ver. 1.2, or higher (Recommended: Ver. 2.0+EDR or higher)
- Following Profiles:
  • A2DP (Advanced Audio Distribution Profile) Ver. 1.0 or higher
  • AVRCP (Audio/Video Remote Control Profile) Ver. 1.0 or higher (Ver. 1.3 or higher recommended)

Portable players must correspond to the above specifications in order to be connected to the Bluetooth® audio system. However, please note that some functions may be limited depending on the type of portable player.
Please go to the website at http://www.lexus.com/MobileLink to find approved portable players for this system.

Certification for the Bluetooth® audio system
FCC ID: ACJ932C5ZZZ035
IC ID: 216J-C5ZZZ035
MADE IN JAPAN
FCC ID: AJDK018
IC ID: 775E-K018
MADE IN JAPAN

This device complies with Part 15 of FCC Rules and RSS-Gen of IC Rules. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of this device.
### CAUTION

**FCC WARNING**

Alteration or modifications carried out without appropriate authorization may invalidate the user’s right to operate the equipment.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that it deemed to comply without maximum permissive exposure evaluation (MPE). But it is desirable that it should be installed and operated keeping the radiator at least 20cm or more away from person's body (excluding extremities: hands, wrists, feet and ankles).

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

**Caution while driving**

Do not connect portable players or operate the controls.

**Caution regarding interference with electronic devices**

- An antenna for the Bluetooth® connection is built in the instrument panel. People with implanted pacemakers or cardiac defibrillators should maintain a reasonable distance between themselves and the Bluetooth® antennas. The radio waves may affect the operation of such devices.

- Before using portable players, users of any electrical medical device other than implanted pacemakers and implanted cardiac defibrillators should consult the manufacturer of the device for information about its operation under the influence of radio waves. Radio waves could have unexpected effects on the operation of such medical devices.

### NOTICE

**To prevent damage to portable players**

Do not leave portable players in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the player.
3-3. Using the Bluetooth® audio system

Using the Bluetooth® audio system

Audio unit

Type A

Display
A message, name, number, etc. is displayed.

Lower-case characters and special characters cannot be displayed.

Displays information that is too long to be displayed at one time on the display (press and hold)

Selects items such as menu and number
Turn: Selects an item
Press: Inputs the selected item

Bluetooth® connection condition

If “BT” is not displayed, the Bluetooth® audio system cannot be used.

Type B

Type C
3-3. Using the Bluetooth® audio system

**Steering wheel switch**

Talk switch
Turns the voice command system on (press)/turns the voice command system off (press and hold)

**Microphone**
Operating the system using voice commands

By following voice guidance instructions output from the speaker, voice commands enable the operation of the Bluetooth® audio system without the need to check the display or operate the system.

Operation procedure when using voice commands
Press the talk switch and follow voice guidance instructions.

Auxiliary commands when using voice commands
The following auxiliary commands can be used when operating the system using a voice command:

“Cancel”: Exits the Bluetooth® audio system
“Repeat”: Repeats the previous voice guidance instruction
“Go back”: Returns to the previous procedure
“Help”: Reads aloud the function summary if a help comment is registered for the selected function
3-3. Using the Bluetooth® audio system

| Using the Bluetooth® audio system for the first time |

Before using the Bluetooth® audio system, it is necessary to register a Bluetooth® enabled portable player in the system. Follow the procedure below to register (pair) a portable player:

**STEP 1** Press (type A and B) or (type C) and select “BTA MENU” using .

**STEP 2** Press the talk switch or select “BTA Setup” using .

The introductory guidance and portable player name registration instructions are heard.

**STEP 3** Select “Pair Audio Player (Pair Audio)” using a voice command or .

**STEP 4** Register a portable player name by either of the following methods:

a. Select “Record Name” using , and say the name to be registered.

b. Press the talk switch and say the name to be registered.

A voice guidance instruction to confirm the input is heard.
3-3. Using the Bluetooth® audio system

**STEP 5** Select “Confirm” using a voice command or .

A passkey is displayed and heard, and a voice guidance instruction for inputting the passkey into the portable player is heard.

**STEP 6** Input the passkey into the portable player.

Refer to the manual that comes with the portable player for the operation of the portable player.

Guidance for registration completion is heard.

If the portable player has a Bluetooth® phone, the phone can be registered at the same time. A voice guidance instruction to register a Bluetooth® phone is heard.

**STEP 7** Select “Yes” or “No” using a voice command or .

</table>
3-4. Using the hands-free phone system (for cellular phones)

- **Conditions under which the system will not operate**
  - If using a cellular phone that does not support Bluetooth®
  - If the cellular phone is switched off
  - If you are outside service range
  - If the cellular phone is not connected
  - If the cellular phone’s battery is low
  - If the cellular phone is behind the seat or in the glove box or console box
  - If metal is covering or touching the phone

- **Signal status**
  
  This display may not correspond exactly with the cellular phone itself.

- **When using the hands-free system**
  
  - The audio system and voice guidance are muted when making a call.
  - If both parties speak at the same time, it may be difficult to hear.
  - If the incoming call volume is overly loud, an echo may be heard.
  - Try to face toward the microphone as much as possible when speaking.
  - In the following circumstances, it may be difficult to hear the other party:
    - When driving on unpaved roads
    - When driving at high speeds
    - When a window is open
    - When the air conditioning is blowing directly on the microphone
    - When the air conditioning is set to high

- **When transferring ownership of the vehicle**
  
  Be sure to initialize the system to prevent personal data from being improperly accessed. (➔P. 434)
For detailed information about Handsfree Phone System

For assistance with pairing and operating your cell phone, go to the website www.lexus.letstalk.com.

About Bluetooth®

Bluetooth is a registered trademark of Bluetooth SIG, Inc.

Compatible models

Compatible with HFP (Hands Free Profile) Ver. 1.5 and OPP (Object Push Profile) Ver. 1.1.

If your cellular phone does not support HFP, you cannot enter the Bluetooth® phone. If your cellular phone supports OPP alone, you cannot use the Bluetooth® phone.

Please go to http://www.lexus.com/MobileLink to find approved Bluetooth® phones for this system.

Certification for the hands-free system

FCC ID: ACJ932C5ZZZ035
IC ID: 216J-C5ZZZ035
MADE IN JAPAN

FCC ID: AJDK018
IC ID: 775E-K018
MADE IN JAPAN

This device complies with Part 15 of FCC Rules and RSS-Gen of IC Rules. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of this device.
## CAUTION

### FCC WARNING
Alteration or modifications carried out without appropriate authorization may invalidate the user’s right to operate the equipment.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that it deemed to comply without maximum permissive exposure evaluation (MPE). But it is desirable that it should be installed and operated keeping the radiator at least 20cm or more away from person's body (excluding extremities: hands, wrists, feet and ankles).

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

### Caution while driving
Do not use a cellular phone or connect the Bluetooth® phone.

### Caution regarding interference with electronic devices
- An antenna for the Bluetooth® connection is built in the instrument panel. People with implanted pacemakers or cardiac defibrillators should maintain a reasonable distance between themselves and the Bluetooth® antennas. The radio waves may affect the operation of such devices.
- Before using cellular phones, users of any electrical medical device other than implanted pacemakers and implanted cardiac defibrillators should consult the manufacturer of the device for information about its operation under the influence of radio waves. Radio waves could have unexpected effects on the operation of such medical devices.

## NOTICE

### To prevent damage to cellular phones
Do not leave cellular phones in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the phone.

3-4. Using the hands-free phone system (for cellular phones)

Making a phone call

- **Making a phone call**
  - Dialing by inputting a number
    “Dial by number”
  - Dialing by inputting a name
    “Dial by name”
  - Speed dialing
  - Dialing a number stored in the outgoing history memory
    “Redial”
  - Dialing a number stored in the incoming history memory
    “Call back”

- **Receiving a phone call**
  - Answering the phone
  - Refusing the call

- **Transferring a call**

- **Call waiting**

- **Using the call history memory**
  - Dialing
  - Storing data in the phone book
  - Deleting
Dialing by inputting a number

**STEP 1** Press the talk switch and say “Dial by number”.

**STEP 2** Press the talk switch and say the phone number.

**STEP 3** Dial by one of the following methods:
   a. Press the off-hook switch.
   b. Press the talk switch and say “Dial”.
   c. Select “Dial” using ![Select Dial](image)

Dialing by inputting a name

**STEP 1** Press the talk switch and say “Dial by name”.

**STEP 2** Select a registered name to be input by either of the following methods:
   a. Press the talk switch and say a registered name.
   b. Press the talk switch and say “List Names”. Press the talk switch when the desired name is read aloud.

**STEP 3** Dial by one of the following methods:
   a. Press the off-hook switch.
   b. Press the talk switch and say “Dial”.
   c. Select “Dial” using ![Select Dial](image)
3-4. Using the hands-free phone system (for cellular phones)

**Speed dialing**

**STEP 1** Press the off-hook switch.
**STEP 2** Press the preset button in which the desired number is registered.
**STEP 3** Press the off-hook switch.

**When receiving a phone call**

- **Answering the phone**
  Press the off-hook switch.

- **Refusing the call**
  Press the on-hook switch.

**Transferring a call**

A call can be transferred between the cellular phone and system while dialing, receiving a call, or during a call. Use one of the following methods:

a. Operate the cellular phone.
   Refer to the manual that comes with the cellular phone for the operation of the phone.

b. Press the off-hook switch*1.

c. Press the talk switch and say “Call Transfer”*2.

*1: This operation can be performed only when transferring a call from the cellular phone to the system during a call.

*2: While the vehicle is in motion, calls cannot be transferred from the system to the cellular phone.
3-4. Using the hands-free phone system (for cellular phones)

**Call waiting**

When a call is interrupted by an incoming call from a third party, the following options will become available:

- **Answer the incoming call**: Press the off-hook switch. (Press the off-hook switch again as necessary to switch back and forth between calls.)
- **Refuse the incoming call**: Press the on-hook switch.

**Using the call history memory**

Follow the procedure below to use a number stored in the call history memory:

**STEP 1** Press the talk switch and say “Redial” (when using a number stored in the outgoing call history memory) or “Call back” (when using a number stored in the incoming call history memory).

**STEP 2** Select the number by either of the following methods:

- a. Say “Previous” or “Go back” until the desired number is displayed.
- b. Select the desired number using the [TUNING SET] button.
3-4. Using the hands-free phone system (for cellular phones)

**STEP 3** The following operations can be performed:

- **Dialing:** Press the off-hook switch or select “Dial” using a voice command or .

- **Storing the number in the phone book:** Select “Store” and then “Confirm” using a voice command or .

- **Deleting:** Select “Delete” and then “Confirm” using a voice command or .

---

**Call waiting**

- If your phone does not support HFP Ver. 1.5, this function cannot be used.
- Call waiting operation may differ depending on your cellular phone and service provider.

**Call history**

Up to 5 numbers can be stored in each of the outgoing and incoming call history memories.

**When talking on the phone**

- Do not talk simultaneously with the other party.
- Keep the volume of the received voice down. Otherwise, voice echo will increase.
3-4. Using the hands-free phone system (for cellular phones)

Setting a cellular phone

Registering a cellular phone in the hands-free phone system allows the system to function. The following functions can be used for registered cellular phones:

Functions and operation procedures
To enter the menu for each function, follow the steps below using a voice command or:

- Registering a cellular phone
  1. “Setup” → 2. “Phone Setup” → 3. “Pair Phone”

- Selecting a cellular phone to be used
  1. “Setup” → 2. “Phone Setup” → 3. “Connect Phone (Connect)”

- Changing the registered name of a cellular phone
  1. “Setup” → 2. “Phone Setup” → 3. “Change Name”

- Listing the registered cellular phones

- Changing the passkey

- Deleting a registered cellular phone
3-4. Using the hands-free phone system (for cellular phones)

**Registering a cellular phone**

Select “Pair Phone” using a voice command or , and perform the procedure for registering a cellular phone. (→ P. 412)

**Selecting a cellular phone to be used**

**Pattern A**

**STEP 1** Select “Connect Phone (Connect)” using a voice command or .

**Pattern B**

**STEP 1** Select the cellular phone to be used using .
Changing the registered name of a cellular phone

**STEP 1** Select “Change Name” using a voice command or.

**Pattern A**

**STEP 2** Select the name of the cellular phone to be changed by either of the following methods, and select “Confirm” using a voice command or:

a. Press the talk switch and say the name of the desired cellular phone.
b. Press the talk switch and say “List Phones”. When the name of the desired cellular phone is read aloud, press the talk switch.

**Pattern B**

**STEP 2** Select the desired cellular phone name to be changed using.

**STEP 3** Press the talk switch or select “Record Name” using, and say the new name.

**STEP 4** Select “Confirm” using a voice command or.
Listing the registered cellular phones

Select “List Phones” using a voice command or . The list of registered cellular phones will be read aloud. When listing is complete, the system returns to “Phone Setup”.

Pressing the talk switch while the name of a cellular phone is being read aloud selects the cellular phone, and the following functions will become available:

- Selecting a cellular phone: “Connect Phone (Connect)”
- Changing a registered name: “Change Name”
- Deleting a cellular phone: “Delete Phone”
Changing the passkey

**STEP 1** Select “Set Passkey” using a voice command or .

**Pattern A**

**STEP 2** Press the talk switch, say a 4 to 8-digit number, and select “Confirm” using a voice command or .

**Pattern B**

**STEP 2** Select a 4 to 8-digit number using .

The number should be input 1 digit at a time.

**STEP 3** When the entire number to be registered as a passkey has been input, press again.

If the number to be registered has 8 digits, pressing of the knob is not necessary.
Deleting a registered cellular phone

**STEP 1**: Select “Delete Phone” using a voice command or .

**Pattern A**

**STEP 2**: Select the cellular phone to be deleted by either of the following methods and select “Confirm” using a voice command or :

a. Press the talk switch and say the name of the desired cellular phone.

b. Press the talk switch and say “List Phones”. When the name of the desired cellular phone is read aloud, press the talk switch.

**Pattern B**

**STEP 2**: Select the desired cellular phone to be deleted using .

If the cellular phone to be deleted is paired as a Bluetooth® audio player, the registration of the audio player can be deleted at the same time. A voice guidance instruction to delete a Bluetooth® audio player is heard.

**STEP 3**: Select “Yes” or “No” using a voice command or .

(Bluetooth® audio player → P. 381)
The number of cellular phones that can be registered

Up to 6 cellular phones can be registered in the system.
3-4. Using the hands-free phone system (for cellular phones)

Security and system setup

**Security setting items and operation procedures**

To enter the menu for each function, follow the steps below using a voice command or:

- Setting or changing the PIN (Personal Identification Number)

- Locking the phone book

- Unlocking the phone book

**System setup items and operation procedures**

To enter the menu for each function, follow the steps below using:

- Setting voice guidance volume

- Displaying the Bluetooth® device address and name

- Initializing the system
3-4. Using the hands-free phone system (for cellular phones)

Setting or changing the PIN

■ Setting a PIN

**STEP 1** Select “Set PIN” using a voice command or 

**STEP 2** Enter a PIN using a voice command or

When using input the code 1 digit at a time.

■ Changing the PIN

**STEP 1** Select “Set PIN” using a voice command or 

**STEP 2** Enter the registered PIN using a voice command or

**STEP 3** Enter a new PIN using a voice command or

When using input the code 1 digit at a time.
3-4. Using the hands-free phone system (for cellular phones)

**Locking or unlocking the phone book**

**STEP 1** Select “Phonebook Lock (Phbk Lock)” or “Phonebook Unlock (Phbk Unlock)” using a voice command or .

**STEP 2** Input the PIN by either of the following methods and select “Confirm” using a voice command or :

a. Press the talk switch and say the registered PIN.

b. Input a new PIN using .

**Setting voice guidance volume**

**STEP 1** Select “Guidance Vol” using .

**STEP 2** Change the voice guidance volume.

To decrease the volume: Turn counterclockwise.

To increase the volume: Turn clockwise.
Displaying the Bluetooth® device address and name

**STEP 1** Select “Device Name” using .

**STEP 2** Turn to display the Bluetooth® device address and name.

**STEP 3** Select “Go Back” using to return to “System Setup”.

Initializing the system

**STEP 1** Select “Initialize” and then “Confirm” using .

**STEP 2** Select “Confirm” again using .
3-4. Using the hands-free phone system (for cellular phones)

■ Initialization

The following data in the system can be initialized:

- Phone book
- Outgoing and incoming call history
- Speed dials
- Registered cellular phone data
- Security code
- Registered Bluetooth® enabled portable player data
- Passkey for the cellular phones
- Passkey for the Bluetooth® audio players
- Guidance volume
- Receiver volume
- Ring tone volume

Once the initialization has been completed, the data cannot be restored to its original state.

■ When the phone book is locked

The following functions cannot be used:

- Dialing by inputting a name
- Speed dialing
- Dialing a number stored in the call history memory
- Using the phone book
3-4. Using the hands-free phone system (for cellular phones)

Using the phone book

To enter the menu for each function, follow the steps below using a voice command or:

- Adding a new phone number
  1. “Phonebook” → 2. “Add Entry”

- Changing the registered name in the phone book
  1. “Phonebook” → 2. “Change Name”

- Listing the registered data

- Setting speed dials
  1. “Phonebook” → 2. “Set Speed Dial (Speed Dial)”

- Deleting the registered data

- Deleting speed dials
  1. “Phonebook” → 2. “Delete Speed Dial (Del Spd Dial)”
Adding a new phone number

The following methods can be used to add a new phone number:

- Inputting a phone number using a voice command
- Transferring data from the cellular phone
- Inputting a phone number using
- Selecting a phone number from outgoing or incoming call history

Adding procedure

**STEP 1** Select “Add Entry” using a voice command or.

**STEP 2** Use one of the following methods to input a telephone number:

Inputting a telephone number using a voice command:

**STEP2-1** Select “By Voice” using a voice command or.

**STEP2-2** Press the talk switch, say the desired number, and select “Confirm” using a voice command.
Transferring data from the cellular phone:

STEP2-1 Select “By Phone” and then “Confirm” using a voice command or .

STEP2-2 Transfer the data from the cellular phone.
Refer to the manual that comes with the cellular phone for the details of transferring data.

STEP2-3 Select the data to be registered by either of the following methods:
   a. Say “Previous” or “Next” until the desired data is displayed, and select “Confirm” using a voice command.
   
b. Select the desired data using .

Inputting a phone number using :

STEP2-1 Select “Manual Input” using .

STEP2-2 Input a phone number using , and press again.
Input the phone number 1 digit at a time.
3-4. Using the hands-free phone system (for cellular phones)

Selecting a phone number from outgoing or incoming call history:

STEP2-1 Select “Call History” using a voice command or 

STEP2-2 Select “Outgoing” or “Incoming” using a voice command or 

STEP2-3 Select the data to be registered by either of the following methods:
   a. Say “Previous” or “Go back” until the desired data is displayed, and select “Confirm” using a voice command.

   b. Select the desired data using .
3-4. Using the hands-free phone system (for cellular phones)

**STEP 3** Select the name to be registered by either of the following methods, and select “Confirm” using a voice command or .

- a. Press the talk switch and say the desired name.
- b. Select “Record Name” using , and say the desired name.

**STEP 4** Select “Confirm” using a voice command or .

In **STEP 4**, selecting “Set Speed Dial (Speed Dial)” instead of “Confirm” registers the newly added phone number as a speed dial.
3-4. Using the hands-free phone system (for cellular phones)

**Changing the registered name in the phone book**

**STEP 1:** Select “Change Name” using a voice command or .

**Pattern A**

**STEP 2:** Select the name to be changed by either of the following methods, and select “Confirm” using a voice command or :

a. Press the talk switch, say the desired name.

b. Press the talk switch, and say “List Names”. When the desired name is read aloud, press the talk switch.

**Pattern B**

**STEP 2:** Select the desired name to be changed using .

**STEP 3:** Press the talk switch or select “Record Name” using , and say the new name.

**STEP 4:** Select “Confirm” using a voice command or .
3-4. Using the hands-free phone system (for cellular phones)

**Listing the registered data**

Select “List Names” using a voice command or . The list of the registered data will be read aloud. When listing is complete, the system returns to the “Phonebook”.

Pressing the talk switch while the desired data is being read aloud selects the data, and the following function will become available:

- Dialing: “Dial”
- Changing a registered name: “Change Name”
- Deleting an entry: “Delete Entry”
- Setting a speed dial: “Set Speed Dial (Speed Dial)”
Setting speed dial

**STEP 1** Select “Set Speed Dial (Speed Dial)” using a voice command or .

**Pattern A**

**STEP 2** Select the data to be registered as a speed dial by either of the following methods, and select “Confirm” using a voice command or :

a. Press the talk switch, say the desired name.
b. Press the talk switch, and say “List Names”. When the desired name is read aloud, press the talk switch.

**Pattern B**

**STEP 2** Select the desired data using .

**STEP 3** Select the desired preset button, and register the data into speed dial by either of the following methods:

a. Press the desired preset button, and select “Confirm” by using a voice command or .
b. Press and hold the desired preset button.
Deleting the registered data

**STEP 1** Select “Delete Entry” using a voice command or .

**Pattern A**

**STEP 2** Select the data to be deleted by either of the following methods, and select “Confirm” using a voice command or :

a. Press the talk switch, and say the name of the desired phone number.

b. Press the talk switch, say “List Names”. When the name of the desired phone number is read aloud, press the talk switch.

**Pattern B**

**STEP 2** Select the desired data to be deleted using .
Deleting speed dials

**STEP 1.** Select “Delete Speed Dial (Del Spd Dial)” using a voice command or .

**STEP 2.** Press the preset button to which the desired speed dial is registered, and select “Confirm” using a voice command or .

- **Limitation of number of digits**

  A phone number that exceeds 24 digits cannot be registered.
3-5. Using the interior lights
Interior lights list

1. Cup holder light (when the “POWER” switch is in ACCESSORY or ON mode)
2. Front personal/interior lights (→P. 446)
3. Rear interior light (→P. 447)
4. Footwell lights
5. Outer foot lights

When the instrument panel light control dial is turned fully down, the cup holder light and the footwell lights will turn off. (→P. 198)
3-5. Using the interior lights

Personal/interior light main switch and front personal/interior lights

**Personal/interior light main switch**

1. Turns the lights off
2. Turns the door position on
3. Turns the lights on

**Front personal/interior lights**

Turns the lights on/off
3-5. Using the interior lights

Rear interior light

1. Turns the light on
2. Turns the door position on*

*: When the personal/interior light main switch is in the off position, the rear interior light will not turn on even if the door is opened with the rear interior light switch in door position.

- Illuminated entry system
  The lights automatically turn on/off according to “POWER” switch mode, the presence of the electronic key, whether the doors are locked/unlocked, and whether the doors are opened/closed.

- To prevent 12-volt battery discharge
  If the interior lights remain on when the door is not fully closed and the interior light switch (door position on/off) is on, the lights will go off automatically after 20 minutes.

- Customization
  Settings (e.g. the time elapsed before the lights turn off) can be changed.
  (Customizable features → P. 709)
3-6. Using the storage features
List of storage features

![Car interior with storage features labeled]

- Console box
- Bottle holders
- Auxiliary boxes
- Glove box
- Cup holders

**CAUTION**

- **Items that should not be left in the storage spaces**
  
  Do not leave glasses, lighters or spray cans in the storage spaces, as this may cause the following when cabin temperature becomes high:
  
  - Glasses may be deformed by heat or cracked if they come into contact with other stored items.
  
  - Lighters or spray cans may explode. If they come into contact with other stored items, the lighter may catch fire or the spray can may release gas, causing a fire hazard.
Glove box

The glove box can be opened by pressing the lock release button and locked and unlocked using the mechanical key.

1. Open
2. Lock
3. Unlock

**CAUTION**

- **Caution while driving**
  
  Keep the glove box closed when not in use. In the event of sudden braking or sudden swerving, an accident may occur due to an occupant being struck by the open glove box or the items stored inside.
3-6. Using the storage features

**Console box**

- **Lift the lid while pushing the knob to release the lock.**

- **Tray in the console box**

  - The tray slides forward/backward and can be removed.

---

**CAUTION**

- **Caution while driving**

  Keep the console box closed when not in use. In the event of sudden braking, an accident may occur due to an occupant being struck by the open console box or the items stored inside.
Cup holders

■ Cup holder partition

The partition in the cup holder can also be used to store a small cup or can.

CAUTION

■ Items unsuitable for the cup holder

Do not place anything other than cups or aluminum cans in the cup holders. Other items may be thrown out of the holders in the event of an accident or sudden braking, causing injury. If possible, cover hot drinks to prevent burns.
3-6. Using the storage features

Bottle holders

<table>

3-6. Using the storage features

Auxiliary boxes

**Type A**

Press in the lid.

This box is useful for temporarily storing sunglasses and similar small items.

**Type B**

**Type C (if equipped)**
3-6. Using the storage features

Auxiliary boxes

Type D (if equipped)

Type E (if equipped)
Auxiliary box (type E)

If an object has fallen down the back of the lid, the fallen object can be retrieved by removing the cover inside the auxiliary box.

Remove the mat.

Remove the cover using a flathead screwdriver protected with tape etc.

**CAUTION**

- **Caution while driving (type A and E)**
  Keep the auxiliary boxes closed when not in use. In the event of sudden braking, an accident may occur due to an occupant being struck by an open auxiliary box or the items stored inside.

- **Items unsuitable for storing (type A)**
  Do not store items heavier than 0.44 lb. (200 g).
  Doing so may cause the auxiliary box to open and the items inside may fall out, resulting in an accident.
3-6. Using the storage features

**Auxiliary boxes**

<table>

<td><strong>Auxiliary box (type E)</strong></td>
</tr>
<tr>
<td>Do not leave items in the auxiliary box or on the dashboard for long periods of time when the vehicle is in the sun. The inside of the auxiliary box and the dashboard will become extremely hot compared to other parts of the vehicle, and the items could be deformed or damaged.</td>
</tr>
</tbody>
</table>
3-7. Other interior features

Sun visors

1. To set the visor in the forward position, flip it down.
2. To set the visor in the side position, flip down, unhook, and swing it to the side.
3-7. Other interior features
Vanity mirrors

Slide the cover to open.
The light turns on when the cover is opened.

⚠️ NOTICE

To prevent 12-volt battery discharge
Do not leave the vanity lights on for extended periods while the hybrid system is off.
3-7. Other interior features

Clock

Vehicles with a navigation system
Refer to the “Navigation System Owner’s Manual”.

Vehicles without navigation system
The clock can be adjusted by pressing the buttons.

1 Adjusts the hours
2 Adjusts the minutes
3 Rounds to the nearest hour*

*: e.g. 1:00 to 1:29 → 1:00
   1:30 to 1:59 → 2:00

The clock is displayed when
The “POWER” switch is in ACCESSORY or ON mode.
3-7. Other interior features

Power outlet

The power outlets can be used for 12 V accessories that run on less than 10 A.

Center console

STEP 1
Press down and release the lid.

STEP 2
Open the cover.
Auxiliary box (if equipped)

**STEP 1**

Press the button.

**STEP 2**

Open the cover.
The power outlet can be used when
The “POWER” switch is in ACCESSORY or ON mode.

Connecting power cables from the power outlet (auxiliary box)

The gap in the lid allows power cables to be passed through even when the lid is closed.

\[\text{NOTICE}\]

To avoid damaging the power outlet
Close the power outlet lid when the power outlet is not in use.
Foreign objects or liquids that enter the power outlet may cause a short circuit.

To prevent blown fuse
Do not use an accessory that uses more than 12 V 10 A.

To prevent 12-volt battery discharge
Do not use the power outlet longer than necessary when the hybrid system is off.
3-7. Other interior features

Heated steering wheel

The heated steering wheel heats the side grips of the steering wheel.

Turns the heater on/off

The indicator light comes on when the heater is operating.

- The heated steering wheel can be used when
  The “POWER” switch is in ON mode.

- Timer
  The heated steering wheel will automatically turn off after about 30 minutes.

- If the indicator light flashes
  Press the button to turn the heated steering wheel off and then press the button again. If the indicator light still flashes, a malfunction may be occurring. Turn the heated steering wheel off and have the vehicle inspected by your Lexus dealer.

*: If equipped
3-7. Other interior features

⚠️ CAUTION

Burns

Care should be taken to prevent injury if anyone in the following categories comes in contact with the steering wheel when the heated steering wheel is on:

- Babies, small children, the elderly, the sick and the physically challenged
- Persons with sensitive skin
- Persons who are fatigued
- Persons who have taken alcohol or drugs that induce sleep (sleeping drugs, cold remedies, etc.)

Do not use the heated steering wheel more than necessary. Doing so may cause minor burns or overheating.

⚠️ NOTICE

To prevent 12-volt battery discharge

Turn the heater off when the hybrid system is off.
3-7. Other interior features
Seat heaters*

The seat heaters can be used when
The “POWER” switch is in ON mode.

When not in use
Turn the knob fully counterclockwise. The indicator light goes off.
Press the knob into the recessed position.

1. Pops the knob out
2. Turns the seat heater on
   The indicator light comes on.
3. Adjusts the seat temperature
   The further you turn the knob clockwise, the warmer the seat becomes.

*: If equipped
3-7. Other interior features

3-7. Other interior features

Floor mat

Use only floor mats designed specifically for vehicles of the same model and model year as your vehicle. Fix them securely in place onto the carpet.

**STEP 1**
Insert the retaining hooks (clips) into the floor mat eyelets.

**STEP 2**
Turn the upper knob of each retaining hook (clip) to secure the floor mats in place.

* Always align the marks.

The shape of the retaining hooks (clips) may differ from that shown in the illustration.
CAUTION

Observe the following precautions. Failure to do so may cause the driver’s floor mat to slip, possibly interfering with the pedals while driving. An unexpectedly high speed may result or it may become difficult to stop the vehicle, leading to a serious accident.

**When installing the driver’s floor mat**
- Do not use floor mats designed for other models or different model year vehicles, even if they are Lexus Genuine floor mats.
- Only use floor mats designed for the driver’s seat.
- Always install the floor mat securely using the retaining hooks (clips) provided.
- Do not use two or more floor mats on top of each other.
- Do not place the floor mat bottom-side up or upside-down.

**Before driving**
- Check that the floor mat is securely fixed in the correct place with all the provided retaining hooks (clips). Be especially careful to perform this check after cleaning the floor.
- With the hybrid system stopped and the shift position in P, fully depress each pedal to the floor to make sure it does not interfere with the floor mat.
3-7. Other interior features
Luggage compartment features

■ Cargo hooks

Raise the hook to use.
The cargo hooks are provided for securing loose items.
3-7. Other interior features

**Auxiliary boxes**

**Center**
Lift the center deck board.

**Right side**
Lift the right side deck board.

**Left side (if equipped)**
Lift the left side deck board.
3-7. Other interior features

Luggage cover (if equipped)

Pull out the luggage cover and secure it to the hook brackets.

Removing the luggage cover

Retract the cover and release both ends, then lift it out.
**Stowing the luggage cover**

**STEP 1** Remove the side deck boards and open the center auxiliary box.

**STEP 2** Adjust the cover so that the information label is facing up.

**STEP 3** Fold the rear edge of the cover over, replace the side deck boards and close the center auxiliary box.
3-7. Other interior features

■ Owner’s Manual holder

A part of the center auxiliary box can be used as an Owner’s Manual holder.

⚠️ CAUTION

■ When the cargo hooks are not in use
To avoid injury, always return the cargo hooks to their stowed positions.

■ Deck boards
If the deck boards are removed, return them to their original positions before driving. In the event of sudden braking, an accident may occur due to an occupant being struck by the deck boards or the items stored in the auxiliary box.

■ Caution for the luggage cover
Do not allow children to climb on the luggage cover. Climbing on the luggage cover could result in damage to the luggage cover, possibly causing death or serious injury to the child.
The garage door opener can be programmed to operate garage doors, gates, entry doors, door locks, home lighting systems, security systems, and other devices.

The garage door opener (HomeLink® Universal Transceiver) is manufactured under license from HomeLink®.

**Programming the HomeLink®**

The HomeLink® compatible transceiver in your vehicle has 3 buttons which can be programmed to operate 3 different devices. Refer to the programming method below appropriate for the device.

1. Indicator light
2. Buttons

*: If equipped
Before programming HomeLink®

- During programming, it is possible that garage doors, gates, or other devices may operate. For this reason, make sure that people and objects are clear of the garage door or other devices to prevent injury or other potential harm.

- It is recommended that a new battery be placed in the remote control transmitter for more accurate programming.

- Garage door openers manufactured after 1995 may be equipped with rolling code protection. If this is the case, you will need a step-ladder or other sturdy, safe device to reach the “Learn” or “Smart” button on the garage door opener motor.

Programming HomeLink®

Point the remote control transmitter for the device 1 to 3 in. (25 to 75 mm) from the HomeLink® buttons.

Keep the HomeLink® indicator light in view while programming.
For U.S.A. owner’s
Press and hold the HomeLink® button you want to program and the handheld transmitter button simultaneously. When the HomeLink® indicator light changes from a slow to a rapid flash, you can release both buttons.

Programming has completed when the indicator light changes to a rapid flash.

Programming an entry gate (for U.S.A. owners)/Programming a device in the Canadian market
With one hand, press and hold the HomeLink® button you want to program. With your other hand, press and release the remote control transmitter every 2 seconds and repeat this cycle until the HomeLink® indicator light starts to flash rapidly. Then, release the buttons.
Test the HomeLink® operation by pressing the newly programmed button and observing the indicator light:

If the indicator light remains constant:
Programming is complete. Pressing the HomeLink® button should activate your device.

If the indicator light blinks rapidly for 2 seconds, and then remains constant:
Proceed to **STEP 4** for Programming a Rolling Code System.
Programming a Rolling Code System

**STEP 4**
Locate the “Learn” or “Smart” button on the garage door opener motor in the garage.

This button can usually be found where the hanging antenna wire is attached to the unit. The name and color of the button may vary by manufacturer. Please refer to the operator’s manual supplied with the garage door opener motor for details.

**STEP 5**
Press and release the “Learn” or “Smart” button. Perform **STEP 6** within 30 seconds after performing **STEP 5**.

**STEP 6**
Press and hold the programmed HomeLink® button (located inside the vehicle) for 2 seconds and release it. Repeat this sequence (press/hold/release) up to 3 times to complete programming.

If the garage door opener motor activates when the HomeLink® button is pressed, the garage door opener motor recognizes the HomeLink® signal.

**STEP 7**
Repeat the steps above to program another device for any of the remaining HomeLink® buttons.
Reprogramming a single HomeLink® button
When the following procedure is performed, buttons which already have devices registered to them can be overwritten:

**STEP 1** With one hand, press and hold the desired HomeLink® button.
**STEP 2** When the HomeLink® indicator starts flashing, continue to hold the HomeLink® button and perform “Programming the HomeLink®” from **STEP 1** (it takes 20 seconds for the HomeLink® indicator to start flashing).

Erasing the entire HomeLink® memory (all three programs)
Press and hold the 2 outside buttons shown in the illustration for 10 seconds until the indicator light flashes.
If you sell your vehicle, be sure to erase the programs stored in the HomeLink® memory.
Programs stored in the HomeLink® memory

- The registered codes are not erased even if the 12-volt battery cable is disconnected.
- If learning failed when registering a different code to a HomeLink® button that already has a code registered to it, the already registered code is not erased.

Certification for the garage door opener

For vehicles sold in the U.S.A.
FCC ID: NZL0BIHL4
FCC ID: NZLWZLHL4
FCC ID: NZLGHSLHL4

NOTE:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING:
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

For vehicles sold in Canada
NOTE:
Operation is subject to the following two conditions:
(1) this device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation of the device.

When support is necessary

Visit on the web at www.homelink.com or call 1-800-355-3515.
**CAUTION**

- **When programming a garage door or other remote control device**
  The garage door or other device may operate, so ensure people and objects are out of danger to prevent potential harm.

- **Conforming to federal safety standards**
  Do not use the HomeLink® compatible transceiver with any garage door opener or device that lacks safety stop and reverse features as required by federal safety standards.
  This includes any garage door that cannot detect an interfering object. A door or device without these features increases the risk of death or serious injury.

- **When operating or programming HomeLink®**
  Never allow a child to operate or play with the HomeLink® buttons.
3-7. Other interior features

Compass

The compass on the inside rear view mirror indicates the direction in which the vehicle is heading.

■ Operation

Vehicles without garage door opener

Type A

To turn the compass on or off, press the “AUTO” button for more than 3 seconds.

Type B

*: If equipped
Vehicles with garage door opener

Type A

To turn the compass on or off, press the button.

Type B

To turn the compass on or off, press the button.

Calibrating the compass

The direction display deviates from the true direction determined by the earth’s magnetic field. The amount of deviation varies depending on the geographic position of the vehicle.

If you cross over one of the map boundaries shown in illustration, the compass will deviate. To obtain higher precision or perfect calibration, refer to "Deviation calibration".
Deviation calibration

Vehicles without garage door opener

STEP 1: Stop the vehicle.

STEP 2: Press and hold the “AUTO” button for 6 seconds. A number (1 to 15) appears on the compass display.

Type A

STEP 3: Referring to the map above, press the “AUTO” button to select the number of the zone you are in.

If the direction is displayed several seconds after adjustment, the calibration is complete.
Vehicles with garage door opener

**STEP 1** Stop the vehicle.

**STEP 2** Press and hold the button for 3 seconds. A number (1 to 15) appears on the compass display.

**Type A**

**STEP 3** Referring to the map above, press the button to select the number of the zone you are in.

If the direction is displayed several seconds after adjustment, the calibration is complete.

**Type B**
Circling calibration

Vehicles without garage door opener

**STEP 1** Stop the vehicle in a place where it is safe to drive in a circle.

**STEP 2** Press and hold the "AUTO" button for 9 seconds.

"C" appears on the compass display.

Type A

Drive the vehicle at 5 mph (8 km/h) or less in a circle until a direction is displayed.

If there is not enough space to drive in a circle, drive around the block until a direction is displayed.
Vehicles with garage door opener

**STEP 1** Stop the vehicle in a place where it is safe to drive in a circle.

**STEP 2** Press and hold the button for 6 seconds.

“C” appears on the compass display.

**Type A**

Drive the vehicle at 5 mph (8 km/h) or less in a circle until a direction is displayed.

If there is not enough space to drive in a circle, drive around the block until a direction is displayed.
3-7. Other interior features

- Conditions unfavorable to correct operation
  The compass may not show the correct direction in the following conditions:
  - The vehicle is stopped immediately after turning.
  - The vehicle is on an inclined surface.
  - The vehicle is in a place where the earth’s magnetic field is subject to interference by artificial magnetic fields (underground car park/parking lot, under a steel tower, between buildings, roof car park/parking lot, near an intersection, near a large vehicle, etc.).
  - The vehicle has become magnetized. (There is a magnet or metal object near the inside rear view mirror.)
  - The battery has been disconnected.
  - A door is open.

- CAUTION

  - While driving the vehicle
    Do not adjust the display. Adjust the display only when the vehicle is stopped.

  - When doing the circling calibration
    Secure a wide space, and watch out for people and vehicles in the vicinity. Do not violate any local traffic rules while performing circling calibration.
### NOTICE

- **To avoid compass malfunctions**
  Do not place magnets or any metal objects near the inside rear view mirror. Doing this may cause the compass sensor to malfunction.

- **To ensure normal operation of the compass**
  - Do not perform a circling calibration of the compass in a place where the earth’s magnetic field is subject to interference by artificial magnetic fields.
  - During calibration, do not operate electric systems (moon roof, power windows, etc.) as they may interfere with the calibration.
Safety Connect is a subscription-based telematics service that uses Global Positioning System (GPS) data and embedded cellular technology to provide safety and security features to subscribers. Safety Connect is supported by Lexus’ designated response center, which operates 24 hours per day, 7 days per week.

Safety Connect service is available by subscription on select, telematics hardware-equipped vehicles.

By using the Safety Connect service, you are agreeing to be bound by the Telematics Subscription Service Agreement and its Terms and Conditions, as in effect and amended from time to time, a current copy of which is available at Lexus.com. All use of the Safety Connect service is subject to such then-applicable Terms and Conditions.

System components

1. Microphone
2. LED light indicators
3. "SOS" button

*: If equipped
Services
Subscribers have the following Safety Connect services available:

- Automatic Collision Notification*
  Helps drivers receive necessary response from emergency service providers. (→P. 495)

- Stolen Vehicle Location
  Helps drivers in the event of vehicle theft. (→P. 496)

- Emergency Assistance Button (SOS)
  Connects drivers to response-center support. (→P. 496)

- Enhanced Roadside Assistance
  Provides drivers various on-road assistance. (→P. 496)

Subscription
After you have signed the Telematics Subscription Service Agreement and are enrolled, you can begin receiving services.

A variety of subscription terms is available for purchase. Contact your Lexus dealer, call 1-800-25-LEXUS (1-800-255-3987) or push the “SOS” button in your vehicle for further subscription details.
3-7. Other interior features

■ Safety Connect Services Information

- Phone calls using the vehicle’s Bluetooth® technology will not be possible during Safety Connect.
- Safety Connect is available beginning Fall 2009 on select Lexus models. Contact with the Safety Connect response center is dependent upon the telematics device being in operative condition, cellular connection availability, and GPS satellite signal reception, which can limit the ability to reach the response center or receive emergency service support. Enrollment and Telematics Subscription Service Agreement required. A variety of subscription terms is available; charges vary by subscription term selected.
- Automatic Collision Notification, Emergency Assistance and Stolen Vehicle Location will function in the United States, including Hawaii and Alaska, and in Canada, and Enhanced Roadside Assistance will function in the United States (except Hawaii) and in Canada. No Safety Connect services will function outside of the United States in countries other than Canada.
- Safety Connect services are not subject to section 255 of the Telecommunications Act and the device is not TTY compatible.

■ Languages

The Safety Connect response center will offer support in multiple languages. The Safety Connect system will offer voice prompts in English and Spanish. Please indicate your language of choice when enrolling.

■ When contacting the response center

You may be unable to contact the response center if the network is busy.
Safety Connect LED light Indicators

When the “POWER” switch is turned to ON mode, the red indicator light comes on for 2 seconds then turns off. Afterward, the green indicator light comes on, indicating that the service is active.

The following indicator light patterns indicate specific system usage conditions:

- Green indicator light on = Active service
- Green indicator light flashing = Safety Connect call in process
- Red indicator light (except at vehicle start-up) = System malfunction (contact your Lexus dealer)
- No indicator light (off) = Safety Connect service not active

Safety Connect services

Automatic Collision Notification

In case of either airbag deployment or severe rear-end collision, the system is designed to automatically call the response center. The responding agent receives the vehicle’s location and attempts to speak with the vehicle occupants to assess the level of emergency. If the occupants are unable to communicate, the agent automatically treats the call as an emergency, contacts the nearest emergency services provider to describe the situation, and requests that assistance be sent to the location.
Stolen Vehicle Location
If your vehicle is stolen, Safety Connect can work with local authorities to assist them in locating and recovering the vehicle. After filing a police report, call the Safety Connect response center at 1-800-25-LEXUS (1-800-255-3987) and follow the prompts for Safety Connect to initiate this service.
In addition to assisting law enforcement with recovery of a stolen vehicle, Safety-Connect-equipped vehicle location data may, under certain circumstances, be shared with third parties to locate your vehicle. Further information is available at Lexus.com.

Emergency Assistance Button (“SOS”)
In the event of an emergency on the road, push the “SOS” button to reach the Safety Connect response center. The answering agent will determine your vehicle’s location, assess the emergency, and dispatch the necessary assistance required.
If you accidentally press the “SOS” button, tell the response-center agent that you are not experiencing an emergency.

Enhanced Roadside Assistance
Enhanced Roadside Assistance adds GPS data to the already included warranty-based Lexus roadside service. Subscribers can press the “SOS” button to reach a Safety Connect response-center agent, who can help with a wide range of needs, such as: towing, flat tire, fuel delivery, etc. For a description of the Roadside Assistance services and their limitations, please see the Safety Connect Terms and Conditions, which are available at Lexus.com.
Safety information for Safety Connect

Important! Read this information before using Safety Connect.

Exposure to radio frequency signals

The Safety Connect system installed in your vehicle is a low-power radio transmitter and receiver. It receives and also sends out radio frequency (RF) signals.

In August 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for mobile wireless phones. Those guidelines are consistent with the safety standards previously set by the following U.S. and international standards bodies.

- ICNIRP (International Commission on Non-Ionizing Radiation Protection) [1996]

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. Over 120 scientists, engineers, and physicians from universities, and government health agencies and industries reviewed the available body of research to develop the ANSI Standard (C95.1).

The design of Safety Connect complies with the FCC guidelines in addition to those standards.

4-1. Maintenance and care
Cleaning and protecting the vehicle exterior

Perform the following to protect the vehicle and maintain it in prime condition:

- Working from top to bottom, liberally apply water to the vehicle body, wheel wells and underside of the vehicle to remove any dirt and dust.
- Wash the vehicle body using a sponge or soft cloth, such as a chamois.
- For hard-to-remove marks, use car wash soap and rinse thoroughly with water.
- Wipe away any water.
- Wax the vehicle when the waterproof coating deteriorates.

If water does not bead on a clean surface, apply wax when the vehicle body is cool.

- Automatic car washes

  - Fold the mirrors and remove the antenna before washing the vehicle. Start washing from the front of the vehicle. Make sure to re-install the antenna and extend the mirrors before driving.
  - Brushes used in automatic car washes may scratch the vehicle surface and harm your vehicle’s paint.
  - Roof antenna, rear spoiler may not be washable in some automatic car washes. There may also be an increased risk of damage to vehicle.
■ High pressure car washes
   ● Do not allow the nozzles of the car wash to come within close proximity of the windows.
   ● Before using the car wash, check that the fuel filler door on your vehicle is closed properly.

■ When using a car wash
   If the door handle becomes wet while the electronic key is within the effective range, the door may lock and unlock repeatedly. Place the key in a position 6 ft. (2 m) or more separate from the vehicle while the vehicle is being washed. (Take care to ensure that the key is not stolen.)

■ Aluminum wheels
   ● Remove any dirt immediately by using a neutral detergent. Do not use hard brushes or abrasive cleaners. Do not use strong or harsh chemical cleaners. Use the same mild detergent and wax as used on the paint.
   ● Do not use detergent on the wheels when they are hot, for example after driving for long distance in the hot weather.
   ● Wash detergent from the wheels immediately after use.

■ Bumpers
   Do not scrub with abrasive cleaners.

■ Front side windows water-repellent coating
   ● The following precautions can extend the effectiveness of the water-repellent coating.
     • Remove any dirt, etc. from the front side windows regularly.
     • Do not allow dirt and dust to accumulate on the windows for a long period. Clean the windows with a soft, damp cloth as soon as possible.
     • Do not use wax or glass cleaners that contain abrasives when cleaning the windows.
     • Do not use any metallic objects to remove condensation build up.
   ● When the water-repellent performance has become insufficient, the coating can be repaired. Contact your Lexus dealer.
4-1. Maintenance and care

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ When washing the vehicle</td>
</tr>
</tbody>
</table>

Do not apply water to the inside of the engine compartment. Doing so may cause the electrical components etc. to catch fire.

■ When cleaning the windshield (vehicles with rain-sensing windshield wipers)

Set the wiper switch to off.
If the switch is in “AUTO”, the wipers may operate unexpectedly in the following situations, and may result in hands being caught or other serious injuries and cause damage to the wiper blades.

- When the upper part of the windshield where the raindrop sensor is located is touched by hand
- When a wet rag or similar is held close to the raindrop sensor
- If something bumps against the windshield
- If you directly touch the raindrop sensor body or if something bumps into the raindrop sensor

■ Precautions regarding the exhaust pipe

Exhaust gasses cause the exhaust pipe to become quite hot.
When washing the vehicle, be careful not to touch the pipe until it has cooled sufficiently, as touching a hot exhaust pipe can cause burns.
**NOTICE**

- To prevent paint deterioration and corrosion on the body and components (aluminum wheels etc.)
  - Wash the vehicle immediately in the following cases:
    - After driving near the sea coast
    - After driving on salted roads
    - If coal tar or tree sap is present on the paint surface
    - If dead insects, insect droppings or bird droppings are present on the paint surface
    - After driving in an area contaminated with soot, oily smoke, mine dust, iron powder or chemical substances
    - If the vehicle becomes heavily soiled with dust or mud
    - If liquids such as benzene and gasoline are spilled on the paint surface
  - If the paint is chipped or scratched, have it repaired immediately.
  - To prevent the wheels from corroding, remove any dirt and store in a place with low humidity when storing the wheels.

- **Cleaning the exterior lights**
  - Wash carefully. Do not use organic substances or scrub with a hard brush. This may damage the surfaces of the lights.
  - Do not apply wax to the surfaces of the lights. Wax may cause damage to the lenses.
### NOTICE

- **Antenna installation and removal precautions**
  - Before driving, ensure that the antenna is installed.
  - When the antenna is removed, such as before entering an automatic car wash, make sure to store it in a suitable place so as not to lose it. Also, before driving, make sure to reinstall the antenna in its original position.

- **When using an automatic car wash (vehicles with rain-sensing windshield wipers)**
  - Set the wiper switch to the off position.
  - If the wiper switch is in ‘AUTO’, the wipers may operate and the wiper blades may be damaged.
4-1. Maintenance and care

Cleaning and protecting the vehicle interior

The following procedures will help protect your vehicle’s interior and keep it in top condition:

- **Protecting the vehicle interior**
  - Remove dirt and dust using a vacuum cleaner. Wipe dirty surfaces with a cloth dampened with lukewarm water.

- **Cleaning the leather areas**
  - Remove dirt and dust using a vacuum cleaner.
  - Wipe off any excess dirt and dust with a soft cloth dampened with diluted detergent.
    - Use a diluted water solution of approximately 5% neutral wool detergent.
  - Wring out any excess water from the cloth and thoroughly wipe off all remaining traces of detergent.
  - Wipe the surface with a dry, soft cloth to remove any remaining moisture. Allow the leather to dry in a shaded and ventilated area.

- **Cleaning the synthetic leather areas**
  - Remove loose dirt using a vacuum cleaner.
  - Apply a mild soap solution to the synthetic leather using a sponge or soft cloth.
  - Allow the solution to soak in for a few minutes. Remove the dirt and wipe off the solution with a clean, damp cloth.
Caring for leather areas

Lexus recommends cleaning the interior of the vehicle at least twice a year to maintain the quality of the vehicle’s interior.

Shampooing the carpets

There are several commercial foaming-type cleaners available. Use a sponge or brush to apply the foam. Rub in overlapping circles. Do not use water. Wipe dirty surfaces and let them dry. Excellent results are obtained by keeping the carpet as dry as possible.

Seat belts

Clean with mild soap and lukewarm water using a cloth or sponge. Also check the belts periodically for excessive wear, fraying or cuts.

CAUTION

Water in the vehicle

- Do not splash or spill liquid in the vehicle, such as on the floor, in the hybrid battery (traction battery) air vents, and in the luggage compartment. Doing so may cause the hybrid battery, electrical components, etc. to malfunction or catch fire.
- Do not get any of the SRS components or wiring in the vehicle interior wet. (→P.129)
  An electrical malfunction may cause the airbags to deploy or not function properly, resulting in death or serious injury.

Cleaning the interior (especially instrument panel)

Do not use polish wax or polish cleaner. The instrument panel may reflect off the windshield, obstructing the driver’s view and leading to an accident, resulting in death or serious injury.
**NOTICE**

- **Cleaning detergents**
  - Do not use the following types of detergent, as they may discolor the vehicle interior or cause streaks or damage to painted surfaces:
    - Non-seat portions: Organic substances such as benzene or gasoline, alkaline or acidic solutions, dye, and bleach
    - Seats: Alkaline or acidic solutions, such as thinner, benzene, and alcohol
  - Do not use polish wax or polish cleaner. The instrument panel’s or other interior part’s painted surface may be damaged.

- **Preventing damage to leather surfaces**
  - Observe the following precautions to avoid damage to and deterioration of leather surfaces:
    - Remove any dust or dirt from leather surfaces immediately.
    - Do not expose the vehicle to direct sunlight for extended periods of time. Park the vehicle in the shade, especially during summer.
    - Do not place items made of vinyl, plastic, or containing wax on the upholstery, as they may stick to the leather surface if the vehicle interior heats up significantly.

- **Water on the floor**
  - Do not wash the vehicle floor with water.
    - Vehicle systems such as the audio system may be damaged if water comes into contact with electrical components such as the audio system above or under the floor of the vehicle. Water may also cause the body to rust.

- **Cleaning the inside of the rear window**
  - Do not use glass cleaner to clean the rear window, as this may cause damage to the rear window defogger heater wires or antenna. Use a cloth dampened with lukewarm water to gently wipe the window clean. Wipe the window in strokes running parallel to the heater wires or antenna.
  - Be careful not to scratch or damage the heater wires or antenna.
To ensure safe and economical driving, day-to-day care and regular maintenance are essential. It is the owner’s responsibility to perform regular checks. Lexus recommends performing the following maintenance:

- **General maintenance**
  General maintenance should be performed on a daily basis. This can be done by yourself or by a Lexus dealer.

- **Scheduled maintenance**
  Scheduled maintenance should be performed at specified intervals according to the maintenance schedule.

  For details about maintenance items and schedules, refer to the “Warranty and Service Guide”, “Owner’s Manual Supplement” or “Scheduled Maintenance”.

- **Do-it-yourself maintenance**
  You can perform some maintenance procedures by yourself. Please be aware that do-it-yourself maintenance may affect warranty coverage.

  The use of Lexus repair manuals is recommended.

■ Repair and replacement

It is recommended that genuine Lexus parts be used for repairs to ensure performance of each system. If non-Lexus parts are used in replacement or if a repair shop other than a Lexus dealer performs repairs, confirm the warranty coverage.

■ Reset the maintenance data (U.S.A. only)

After the required maintenance is performed according to the maintenance schedule, please reset the maintenance data.

To reset the data, follow the procedures described below:

1. Switch the display to the trip meter "A" (→ P. 196) when the hybrid system is operating.
2. Turn the "POWER" switch off.
3. While pressing the trip meter reset button (→ P. 196), turn the "POWER" switch to ON mode (do not start the hybrid system because otherwise the reset mode will be canceled). Continue to press and hold the button until the trip meter displays "000000" and the multi-information display indicates that the reset is complete.

■ Allow inspection and repairs to be performed by a Lexus dealer

● Lexus technicians are well-trained specialists and are kept up to date with the latest service information. They are well informed about the operation of all systems on your vehicle.

● Keep a copy of the repair order. It proves that the maintenance that has been performed is under warranty coverage. If any problem should arise while your vehicle is under warranty, your Lexus dealer will promptly take care of it.
If your vehicle is not properly maintained
Improper maintenance could result in serious damage to the vehicle and possible serious injury or death.

Handling of the 12-volt battery
- Engine exhaust, some of its constituents, and a wide variety of automobile components contain or emit chemicals known to the State of California to cause cancer and birth defects and other reproductive harm. Work in a well ventilated area.
- Oils, fuels and fluids contained in vehicles as well as waste produced by component wear contain or emit chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Avoid exposure and wash any affected area immediately.
- 12-volt battery posts, terminals and related accessories contain lead and lead compounds which are known to cause brain damage. Wash your hands after handling. (→P. 539)
4-2. Maintenance

General maintenance

Listed below are the general maintenance items that should be performed at the intervals specified in the “Warranty and Service Guide” or “Owner’s Manual Supplement”. It is recommended that any problem you notice should be brought to the attention of your Lexus dealer or qualified service shop for advice.

#### CAUTION

If the hybrid system is operating

Turn the hybrid system off and ensure that there is adequate ventilation before performing maintenance checks.
4-2. Maintenance

Emission inspection and maintenance (I/M) programs

Some states have vehicle emission inspection programs which include OBD (On Board Diagnostics) checks. The OBD system monitors the operation of the emission control system.

■ If the malfunction indicator lamp comes on
  The OBD system determines that a problem exists somewhere in the emission control system. Your vehicle may not pass the I/M test and may need to be repaired. Contact your Lexus dealer to service the vehicle.

■ Your vehicle may not pass the I/M test in the following situations:
  ● When the 12-volt battery is disconnected or discharged
    Readiness codes that are set during ordinary driving are erased. Also, depending on your driving habits, the readiness codes may not be completely set.
  ● When the fuel tank cap is loose
    The malfunction indicator lamp comes on indicating a temporary malfunction and your vehicle may not pass the I/M test.
  ● When the malfunction indicator lamp still remains on after several driving trips
    The error code in the OBD system will not be cleared unless the vehicle is driven 40 or more times.
  ● If your vehicle does not pass the I/M test
    Contact your Lexus dealer to prepare the vehicle for re-testing.
4-3. Do-it-yourself maintenance
Do-it-yourself service precautions

If you perform maintenance by yourself, be sure to follow the correct procedure as given in these sections.

<table>

**CAUTION**

The engine compartment contains many mechanisms and fluids that may move suddenly, become hot, or become electrically energized. To avoid death or serious injury, observe the following precautions.

**When working on the engine compartment**
- Make sure that the indicator on the “POWER” switch and the “READY” indicator are both off.
- Keep hands, clothing and tools away from the moving fan and engine drive belt.
- Be careful not to touch the engine, power control unit, radiator, exhaust manifold, etc. right after driving as they may be hot. Oil and other fluids may also be hot.
- Do not leave anything that may burn easily, such as paper and rags, in the engine compartment.
- Do not smoke, cause sparks or expose an open flame to fuel. Fuel fumes are flammable.

**When working near the electric cooling fans or radiator grille**
Be sure the “POWER” switch is off. With the “POWER” switch in ON mode, the electric cooling fans may automatically start to run if the air conditioning is on and/or the coolant temperature is high. (→P. 535)

**Safety glasses**
Wear safety glasses to prevent flying or falling material, fluid spray, etc. from getting in your eyes.
4-3. Do-it-yourself maintenance

⚠️ NOTICE

- **If you remove the air cleaner filter**
  
  Driving with the air cleaner filter removed may cause excessive engine wear due to dirt in the air.
4-3. Do-it-yourself maintenance

Hood

Release the lock from the inside of the vehicle to open the hood.

Pull the hood release lever.
The hood will pop up slightly.

Pull up the auxiliary catch lever and lift the hood.

Hold the hood open by inserting the supporting rod into the slot.
### CAUTION

- **Pre-driving check**
  
  Check that the hood is fully closed and locked.  
  If the hood is not locked properly, it may open while the vehicle is in motion and cause an accident, which may result in death or serious injury.

- **After installing the support rod into the slot**
  
  Make sure the rod supports the hood securely from falling down on to your head or body.

### NOTICE

- **When closing the hood**
  
  Be sure to return the support rod to its clip before closing the hood. Closing the hood without returning the support rod properly could cause the hood to bend.
4-3. Do-it-yourself maintenance

Positioning a floor jack

When raising your vehicle with a floor jack, position the jack correctly. Improper placement may damage your vehicle or cause injury.

Front

Rear
## CAUTION

When raising your vehicle

Make sure to observe the following precautions to reduce the possibility of death or serious injury:

- Lift up the vehicle using a floor jack such as the one shown in the illustration.

- When using a floor jack, follow the instructions of the manual provided with the jack.
- Do not use the jack that was supplied with your vehicle.
- Do not put any part of your body underneath the vehicle when it is supported only by the floor jack.
- Always use floor jack and/or automotive jack stands on a solid, flat, level surface.
- Do not start the hybrid system while the vehicle is supported by the floor jack.
- Stop the vehicle on level, firm ground, firmly set the parking brake and shift the shift position to P.
- Make sure to set the floor jack properly at the jack point. Raising the vehicle with an improperly positioned floor jack will damage the vehicle and may cause the vehicle to fall off the floor jack.
- Do not raise the vehicle while someone is in the vehicle.
- When raising the vehicle, do not place any object on top of or underneath the floor jack.

4-3. Do-it-yourself maintenance

Engine compartment cover

■ Removing the engine compartment cover

■ Installing the clips

1. Push up center portion
2. Insert
3. Press

⚠️ NOTICE

■ After installing an engine compartment cover
Make sure that the cover is securely installed in its original position.
Engine oil

With the engine at operating temperature and turned off, check the oil level on the dipstick.

**Checking the engine oil**

**STEP 1** Park the vehicle on level ground. After warming up the engine and turning off the hybrid system, wait more than 5 minutes for the oil to drain back into the bottom of the engine.

Holding a rag under the end, pull the dipstick out.

**STEP 2** Wipe the dipstick clean.

**STEP 3** Flat dipstick: Reinsert the dipstick fully.

Non-flat dipstick: Reinsert the dipstick fully with its protruding areas (1 in the illustration) pointing towards engine.

**STEP 4** Holding a rag under the end, pull the dipstick out and check the oil level.

**STEP 5** Wipe the dipstick and reinsert it fully.
4.3. Do-it-yourself maintenance

Flat dipstick

1. Low
2. Full

Non-flat dipstick

1. Low
2. Measuring side
3. Full
Adding engine oil

If the oil level is below or near the low level mark, add engine oil of the same type as that already in the engine.

Make sure to check the oil type and prepare the items needed before adding oil.

<table>
<thead>
<tr>
<th>Engine oil selection</th>
<th>→ P. 679</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oil quantity (Low → Full)</td>
<td>1.6 qt. (1.5 L, 1.3 Imp.qt.)</td>
</tr>
<tr>
<td>Items</td>
<td>Clean funnel</td>
</tr>
</tbody>
</table>

**STEP 1** Remove the oil filler cap by turning it counterclockwise.

**STEP 2** Add engine oil slowly, checking the dipstick.

**STEP 3** Install the oil filler cap by turning it clockwise.
4-3. Do-it-yourself maintenance

■ Engine oil consumption

A certain amount of engine oil will be consumed while driving. In the following situations, oil consumption may increase, and engine oil may need to be refilled in between oil maintenance intervals.

● When the engine is new, for example directly after purchasing the vehicle or after replacing the engine
● If low quality oil or oil of an inappropriate viscosity is used
● When driving at high engine speeds or with a heavy load, or when driving while accelerating or decelerating frequently
● When leaving the engine idling for a long time, or when driving frequently through heavy traffic

CAUTION

■ Used engine oil

● Used engine oil contains potentially harmful contaminants which may cause skin disorders such as inflammation and skin cancer, so care should be taken to avoid prolonged and repeated contact. To remove used engine oil from your skin, wash thoroughly with soap and water.

● Dispose of used oil and filters only in a safe and acceptable manner. Do not dispose of used oil and filters in household trash, in sewers or onto the ground. Call your Lexus dealer, service station or auto parts store for information concerning recycling or disposal.

● Do not leave used engine oil within the reach of children.
<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| ■ To prevent serious engine damage  
Check the oil level on a regular basis. |
| ■ When replacing the engine oil  
- Be careful not to spill engine oil on the vehicle components.  
- Avoid overfilling, or the engine could be damaged.  
- Check the oil level on the dipstick every time you refill the vehicle.  
- Be sure the engine oil filler cap is properly tightened. |
Coolant

The coolant level is satisfactory if it is between the “FULL” and “LOW” lines on the reservoir when the hybrid system is cold.

**Engine coolant reservoir**

1. Reservoir cap
2. “FULL” line
3. “LOW” line

If the level is on or below the “LOW” line, add coolant up to the “FULL” line. (→P. 681)

**Power control unit coolant reservoir**

1. Reservoir cap
2. “FULL” line
3. “LOW” line

If the level is on or below the “LOW” line, add coolant up to the “FULL” line. (→P. 681)
Coolant selection

Only use “Toyota Super Long Life Coolant” or a similar high quality ethylene glycol based non-silicate, non-amine, non-nitrite, and non-borate coolant with long-life hybrid organic acid technology.

U.S.A.: “Toyota Super Long Life Coolant” is a mixture of 50% coolant and 50% deionized water. (Minimum temperature: -31°F [-35 °C])

Canada: “Toyota Super Long Life Coolant” is a mixture of 55% coolant and 45% deionized water. (Minimum temperature: -44 °F [-42 °C])

For more details about coolant, contact your Lexus dealer.

If the coolant level drops within a short time of replenishing

Visually check the radiator, hoses, engine/power control unit coolant reservoir caps, drain cock and water pump.
If you cannot find a leak, have your Lexus dealer test the cap and check for leaks in the cooling system.

CAUTION

When the hybrid system is hot

Do not remove the engine/power control unit coolant reservoir caps.
The cooling system may be under pressure and may spray hot coolant if the cap is removed, causing serious injuries, such as burns.
### NOTICE

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| ■ **When adding coolant**  
  
  Coolant is neither plain water nor straight antifreeze. The correct mixture of water and antifreeze must be used to provide proper lubrication, corrosion protection and cooling. Be sure to read the antifreeze or coolant label.  |   |
| ■ **If you spill coolant**  
  
  Be sure to wash it off with water to prevent it from damaging parts or paint. |   |
Radiator and condenser

Check the radiator and condenser and clear away any foreign objects. If either of the above parts is extremely dirty or you are not sure of their condition, have your vehicle inspected by your Lexus dealer.

⚠️ CAUTION

- **When the hybrid system is hot**
  Do not touch the radiator or condenser as they may be hot and cause serious injuries, such as burns.

- **When the electric cooling fans are operating**
  Do not touch the engine compartment.
  The electric cooling fans may keep rotating for about 3 minutes even after the “POWER” switch is off.
  With the “POWER” switch in ON mode, the electric cooling fans may automatically start to run if the air conditioning is on and/or the coolant temperature is high.
  Be sure the “POWER” switch is off when working near the electric cooling fans or radiator grille.
4-3. Do-it-yourself maintenance

Brake fluid

■ Checking fluid level

The brake fluid level should be between the “MAX” and “MIN” lines on the tank.

■ Adding fluid

Make sure to check the fluid type and prepare the necessary item.

<table>
<thead>
<tr>
<th>Fluid type</th>
<th>FMVSS No.116 DOT 3 or SAE J1703 brake fluid</th>
</tr>
</thead>
<tbody>
<tr>
<td>Items</td>
<td>Clean funnel</td>
</tr>
</tbody>
</table>

■ Brake fluid can absorb moisture from the air

Excess moisture in the brake fluid can cause a dangerous loss of braking efficiency. Use only newly opened brake fluid.
4-3. Do-it-yourself maintenance

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| ■ When filling the reservoir  
Take care as brake fluid can harm your hands and eyes and damage painted surfaces.  
If fluid gets on your hands or in your eyes, flush the affected area with clean water immediately.  
If you still experience discomfort, see a doctor. |

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| ■ If the fluid level is low or high  
It is normal for the brake fluid level to go down slightly as the brake pads wear out or when the fluid level in the accumulator is high.  
If the reservoir needs frequent refilling, there may be a serious problem. |
Washer fluid

If any washer does not work or the warning message appears on the multi-information display, the washer tank may be empty. Add washer fluid.

**CAUTION**
- **When adding washer fluid**
  Do not add washer fluid when the hybrid system is hot or operating as washer fluid contains alcohol and may catch fire if spilled on the engine etc.

**NOTICE**
- **Do not use any fluid other than washer fluid**
  Do not use soapy water or engine antifreeze instead of washer fluid. Doing so may cause streaking on the vehicle's painted surfaces.
- **Diluting washer fluid**
  Dilute washer fluid with water as necessary. Refer to the freezing temperatures listed on the label of the washer fluid bottle.
12-volt battery

Location

The 12-volt battery is located in the right-hand side of luggage compartment.

Removing the 12-volt battery cover

STEP 1  Open the center and right side auxiliary boxes. (→P. 470)
STEP 2  Remove the center auxiliary box. (→P. 641)
STEP 3  Remove the right side auxiliary box.
STEP 4  Remove the 12-volt battery maintenance cover.
4.3 Do-it-yourself maintenance

**Exterior**

Make sure that the 12-volt battery terminals are not corroded and that there are no loose connections, cracks, or loose clamps.

1. Terminals
2. Hold-down clamp
Installing the 12-volt battery maintenance cover

**STEP 1**
Insert the 2 tabs on the far side of the cover into the holes.

**STEP 2**
Hook on the 2 tabs on the near side of the cover.

**STEP 3**
Hook on the 2 tabs on the upper side of the cover.
Before recharging

When recharging, the 12-volt battery produces hydrogen gas which is flammable and explosive. Therefore, observe the following precautions before recharging:

- If recharging with the 12-volt battery installed on the vehicle, be sure to disconnect the ground cable.
- Make sure the power switch on the charger is off when connecting and disconnecting the charger cables to the 12-volt battery.

After recharging/reconnecting the 12-volt battery

- Unlocking the doors using the smart access system with push-button start may not be possible immediately after reconnecting the 12-volt battery. If this happens, use the wireless remote control or the mechanical key to lock/unlock the doors.
- Start the hybrid system with the “POWER” switch in ACCESSORY mode. The hybrid system may not start with the “POWER” switch turned OFF. However, the hybrid system will operate normally from the second attempt.
- The “POWER” switch mode is recorded by the vehicle. If the battery is reconnected, the vehicle will return the “POWER” switch mode to the status it was in before the battery was disconnected. Make sure to turn off the power before disconnecting the battery. Take extra care when connecting the battery if the “POWER” switch mode prior to discharge is unknown.
- Restart the hybrid system, depress the brake pedal, and confirm that it is possible to shift into each shift position.

If the system will not start even after multiple attempts at all methods above, contact your Lexus dealer.
### CAUTION

#### Chemicals in the 12-volt battery

The 12-volt battery contains poisonous and corrosive sulfuric acid and may produce hydrogen gas which is flammable and explosive. To reduce the risk of death or serious injury, take the following precautions while working on or near the 12-volt battery:

- Do not cause sparks by touching the 12-volt battery terminals with tools.
- Do not smoke or light a match near the 12-volt battery.
- Avoid contact with eyes, skin and clothes.
- Never inhale or swallow electrolyte.
- Wear protective safety glasses when working near the 12-volt battery.
- Keep children away from the 12-volt battery.

#### Where to safely charge the 12-volt battery

Always charge the 12-volt battery in an open area. Do not charge the 12-volt battery in a garage or closed room where there is insufficient ventilation.

#### How to recharge the 12-volt battery

Only perform a slow charge (4.2 A or less). The 12-volt battery may explode if charged at a quicker rate.
### CAUTION

<table>
<thead>
<tr>
<th>Emergency measures regarding electrolyte</th>
</tr>
</thead>
<tbody>
<tr>
<td>If electrolyte gets in your eyes</td>
</tr>
<tr>
<td>- Flush your eyes with clean water for at least 15 minutes and get immediate medical attention. If possible, continue to apply water with a sponge or cloth while traveling to the nearest medical facility.</td>
</tr>
<tr>
<td>If electrolyte gets on your skin</td>
</tr>
<tr>
<td>- Wash the affected area thoroughly. If you feel pain or burning, get medical attention immediately.</td>
</tr>
<tr>
<td>If electrolyte gets on your clothes</td>
</tr>
<tr>
<td>- It can soak through clothing on to your skin. Immediately take off the clothing and follow the procedure above if necessary.</td>
</tr>
<tr>
<td>If you accidentally swallow electrolyte</td>
</tr>
<tr>

</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>When replacing the 12-volt battery</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use a 12-volt battery designed for this vehicle. Failure to do so may cause gas (hydrogen) to enter the passenger compartment, causing a fire or explosion.</td>
</tr>
<tr>
<td>For replacement of the 12-volt battery, contact your Lexus dealer.</td>
</tr>
</tbody>
</table>
4-3. Do-it-yourself maintenance

**CAUTION**

- **When disconnecting the 12-volt battery**

  Do not disconnect the negative (-) terminal on the body side as shown. The disconnected negative (-) terminal may touch the positive (+) terminal, which may cause a short and result in death or serious injury.

**NOTICE**

- **When recharging the 12-volt battery**

  Never recharge the 12-volt battery while the hybrid system is operating. Also, be sure all accessories are turned off.
Replace or rotate tires in accordance with maintenance schedules and treadwear.

■ Checking tires

1. New tread
2. Treadwear indicator
3. Worn tread

The location of treadwear indicators is shown by the “TWI” or “△” marks, etc., molded on the sidewall of each tire.

Check spare tire condition and pressure if not rotated.

■ Tire rotation

Rotate the tires in the order shown.

To equalize tire wear and extend tire life, Lexus recommends that tire rotation is carried out at the same interval as tire inspection.

Do not fail to initialize the tire pressure warning system after tire rotation.
Tire pressure warning system
Your vehicle is equipped with a tire pressure warning system that uses tire pressure warning valves and transmitters to detect low tire inflation pressure before serious problems arise. (→P. 612)
The compact spare tire is not equipped with a tire pressure warning valve and transmitter.
Installing tire pressure warning valves and transmitters

When replacing tires or wheels, tire pressure warning valves and transmitters must also be installed.

When new tire pressure warning valves and transmitters are installed, new ID codes must be registered in the tire pressure warning computer and the tire pressure warning system must be initialized. Have tire pressure warning valve and transmitter ID codes registered by your Lexus dealer. (→P. 550)

Initializing the tire pressure warning system

- The tire pressure warning system must be initialized in the following circumstances:
  - Vehicles with 17 inch tires: When rotating front and rear tires which have different tire inflation pressures
  - When changing the tire size

When the tire pressure warning system is initialized, the current tire inflation pressure is set as the benchmark pressure.
How to initialize the tire pressure warning system

**STEP 1** Park the vehicle in a safe place and turn the “POWER” switch off. Initialization cannot be performed while the vehicle is moving.

**STEP 2** Adjust the tire inflation pressure to the specified cold tire inflation pressure level. (→P. 685) Make sure to adjust the tire pressure to the specified cold tire inflation pressure level. The tire pressure warning system will operate based on this pressure level.

**STEP 3** Turn the “POWER” switch to ON mode.

**STEP 4** Press and hold the tire pressure warning reset switch until the tire pressure warning light blinks slowly 3 times.

**STEP 5** Wait for a few minutes with the “POWER” switch in ON mode and then turn the “POWER” switch off.
Registering ID codes

The tire pressure warning valve and transmitter is equipped with a unique ID code. When replacing a tire pressure warning valve and transmitter, it is necessary to register the ID code. Have the ID code registered by your Lexus dealer.

- When to replace your vehicle’s tires
  Tires should be replaced if:
  - You have tire damage such as cuts, splits, cracks deep enough to expose the fabric, and bulges indicating internal damage.
  - A tire goes flat repeatedly or cannot be properly repaired due to the size or location of a cut or other damage.
  If you are not sure, consult with your Lexus dealer.

- Replacing tires and wheels
  If the ID code of the tire pressure warning valve and transmitter is not registered, the tire pressure warning system will not work properly. After driving for about 20 minutes, the tire pressure warning light blinks for 1 minute and stays on to indicate a system malfunction.

- Tire life
  Any tire over 6 years old must be checked by a qualified technician even if it has seldom or never been used or damage is not obvious.
Routine tire inflation pressure checks

The tire pressure warning system does not replace routine tire inflation pressure checks. Make sure to check tire inflation pressure as part of your routine of daily vehicle checks.

Low profile tires (vehicles with 17 inch tires)

Generally, low profile tires will wear more rapidly and tire grip performance will be reduced on snowy and/or icy roads when compared to standard tires. Be sure to use snow tires or tire chains on snowy and/or icy roads and drive carefully at a speed appropriate for road and weather conditions.

Maximum load of tire

Check that the maximum load of the replacement tire is greater than 1/2 of the Gross Axle Weight Ratings (GAWR) of either the front axle or the rear axle, whichever is greater.

For the GAWR, see the Certification Label. For the maximum load of the tire, see the load limit at maximum cold tire inflation pressure mentioned on the sidewall of the tire. (→P.693)
4-3. Do-it-yourself maintenance

Tire types

● Summer tires

Summer tires are high-speed performance tires best suited to highway driving under dry conditions. Since summer tires do not have the same traction performance as snow tires, summer tires are inadequate for driving on snow-covered or icy roads. For driving on snow-covered roads or icy roads, the use of snow tires is recommended. When installing snow tires, be sure to replace all four tires.

● All season tires

All season tires are designed to provide better traction in snow and to be adequate for driving in most winter conditions as well as for use year-round. All season tires, however, do not have adequate traction performance compared with snow tires in heavy or loose snow. Also, all season tires fall short in acceleration and handling performance compared with summer tires in highway driving.

● Snow tires

For driving on snow-covered roads or icy roads, we recommend using snow tires. If you need snow tires, select tires of the same size, construction and load capacity as the originally installed tires. Since your vehicle has radial tires as original equipment, make sure your snow tires also have radial construction. Do not install studded tires without first checking local regulations for possible restrictions. Snow tires should be installed on all wheels. (→P. 287)
Initializing the tire pressure warning system
Initialize the system with the tire inflation pressure adjusted to the specified level.

If the tread on snow tires wears down below 0.16 in. (4 mm)
The effectiveness of the tires as snow tires is lost.

If you press the tire pressure warning reset switch accidentally
If initialization is performed, adjust the tire inflation pressure to the specified level and initialize the tire pressure warning system again.

When initialization of the tire pressure warning system has failed
Initialization can be completed in a few minutes. However, in the following cases, the settings have not been recorded and the system will not operate properly. If repeated attempts to record tire inflation pressure settings are unsuccessful, have the vehicle inspected by your Lexus dealer.

- When operating the tire pressure warning reset switch, the tire pressure warning light does not blink 3 times.
- After carrying out the initialization procedure, the tire pressure warning light blinks for 1 minute then stays on after driving for 20 minutes.
4-3. Do-it-yourself maintenance

- Tire pressure warning system certification
  For vehicles sold in the U.S.A.
  MODEL/FCC IDs:
  Transmitter: PAXPMV107J
  Receiver: HYQ13BDE
  This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
  FCC WARNING:
  Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
  For vehicles sold in Canada
  Operation is subject to the following two conditions; (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
### CAUTION

**When inspecting or replacing tires**

- Observe the following precautions to prevent accidents. Failure to do so may cause damage to parts of the drive train as well as dangerous handling characteristics, which may lead to an accident resulting in death or serious injury.

  - Do not mix tires of different makes, models or tread patterns. Also, do not mix tires of remarkably different treadwear.
  - Do not use tire sizes other than those recommended by Lexus.
  - Do not mix differently constructed tires (radial, bias-belted or bias-ply tires).
  - Do not mix summer, all season and snow tires.
  - Do not use tires that have been used on another vehicle. Do not use tires if you do not know how they were used previously.

**When initializing the tire pressure warning system**

- Do not operate the tire pressure warning reset switch without first adjusting the tire inflation pressure to the specified level. Otherwise, the tire pressure warning light may not come on even if the tire inflation pressure is low, or it may come on when the tire inflation pressure is actually normal.
4-3. Do-it-yourself maintenance

**NOTICE**

- **Repairing or replacing tires, wheels, tire pressure warning valves, transmitters and tire valve caps**
  - When removing or fitting the wheels, tires or the tire pressure warning valves and transmitters, contact your Lexus dealer as the tire pressure warning valves and transmitters may be damaged if not handled correctly.
  - When replacing tire valve caps, do not use tire valve caps other than those specified. The cap may become stuck.

- **To avoid damage to the tire pressure warning valves and transmitters**
  When a tire is repaired with liquid sealants, the tire pressure warning valve and transmitter may not operate properly. If a liquid sealant is used, contact your Lexus dealer or other qualified service shop as soon as possible. Make sure to replace the tire pressure warning valve and transmitter when replacing the tire. (→P. 548)

- **Driving on rough roads**
  Take particular care when driving on roads with loose surfaces or potholes. These conditions may cause losses in tire inflation pressure, reducing the cushioning ability of the tires. In addition, driving on rough roads may cause damage to the tires themselves, as well as the vehicle's wheels and body.
4-3. Do-it-yourself maintenance

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low profile tires (vehicles with 17 inch tires)</td>
</tr>
<tr>
<td>Low profile tires may cause greater damage than usual to the tire wheel when sustaining impact from the road surface. Therefore, pay attention to the following:</td>
</tr>
<tr>
<td>● Be sure to use proper tire inflation pressure. If tires are under-inflated, they may be damaged more severely.</td>
</tr>
<tr>
<td>● Avoid potholes, uneven pavement, curbs and other road hazards. Failure to do so may lead to severe tire and wheel damage.</td>
</tr>
<tr>
<td>If tire inflation pressure of each tire becomes low while driving</td>
</tr>
<tr>
<td>Do not continue driving, or your tires and/or wheels may be ruined.</td>
</tr>
</tbody>
</table>
4-3. Do-it-yourself maintenance

Tire inflation pressure

Tire inflation pressure

The recommended cold tire inflation pressure and tire size are displayed on the tire and loading information label. (→P. 685)
4-3. Do-it-yourself maintenance

Inspection and adjustment procedure

1. Remove the tire valve cap.
2. Press the tip of the tire pressure gauge onto the tire valve.
3. Read the pressure using the gauge gradations.
4. If the tire inflation pressure is not at the recommended level, adjust the pressure.
   If you add too much air, press the center of the valve to deflate.
5. After completing the tire inflation pressure measurement and adjustment, apply soapy water to the valve and check for leakage.
6. Put the tire valve cap back on.
4-3. Do-it-yourself maintenance

■ Tire inflation pressure check interval
You should check tire inflation pressure every two weeks, or at least once a month. Do not forget to check the spare.

■ Effects of incorrect tire inflation pressure
Driving with incorrect tire inflation pressure may result in the following:
● Reduced fuel efficiency
● Reduced driving comfort and tire life
● Reduced safety
● Damage to the drive train
If a tire needs frequent inflating, have it checked by your Lexus dealer.

■ Instructions for checking tire inflation pressure
When checking tire inflation pressure, observe the following:
● Check only when the tires are cold.
  If your vehicle has been parked for at least 3 hours or has not been driven for more than 1 mile or 1.5 km, you will get an accurate cold tire inflation pressure reading.
● Always use a tire pressure gauge.
  The appearance of the tire can be misleading. In addition, tire inflation pressure that is even just a few pounds off can affect ride quality and handling.
● Do not reduce tire inflation pressure after driving. It is normal for tire inflation pressure to be higher after driving.
● Never exceed the vehicle capacity weight.
  Passengers and luggage weight should be placed so that the vehicle is balanced.
## 4-3. Do-it-yourself maintenance

### CAUTION

- **Proper inflation is critical to save tire performance**

  Keep your tires properly inflated. Otherwise, the following conditions may occur and result in an accident causing death or serious injury:

  - Excessive wear
  - Uneven wear
  - Poor handling
  - Possibility of blowouts resulting from overheated tires
  - Poor sealing of the tire bead
  - Wheel deformation and/or tire separation
  - A greater possibility of tire damage from road hazards

### NOTICE

- **When inspecting and adjusting tire inflation pressure**

  Be sure to put the tire valve caps back on.

  Without the valve caps, dirt or moisture could get into the valve and cause air leakage, which could result in an accident. If the caps are lost, replace them as soon as possible.
If a wheel is bent, cracked or heavily corroded, it should be replaced. Otherwise, the tire may separate from the wheel or cause a loss of handling control.

■ Wheel selection
   When replacing wheels, care should be taken to ensure that they are equivalent to those removed in load capacity, diameter, rim width and inset*. Replacement wheels are available at your Lexus dealer.
   *
   : Conventionally referred to as “offset”.
   Lexus does not recommend using the following:
   ● Wheels of different sizes or types
   ● Used wheels
   ● Bent wheels that have been straightened

■ Aluminum wheel precautions
   ● Use only Lexus wheel nuts and wrenches designed for use with your aluminum wheels.
   ● When rotating, repairing or changing your tires, check that the wheel nuts are still tight after driving 1000 miles (1600 km).
   ● Be careful not to damage the aluminum wheels when using tire chains.
   ● Use only Lexus genuine balance weights or equivalent and a plastic or rubber hammer when balancing your wheels.
4-3. Do-it-yourself maintenance

■ When replacing wheels

The wheels of your vehicle are equipped with tire pressure warning valves and transmitters that allow the tire pressure warning system to provide advance warning in the event of a loss in tire inflation pressure. Whenever wheels are replaced, tire pressure warning valves and transmitters must be installed. (→P. 548)

CAUTION

■ When replacing wheels

● Do not use wheels that are a different size from those recommended in the Owner’s Manual, as this may result in a loss of handling control.

● Never use an inner tube in a leaking wheel which is designed for a tubeless tire. Doing so may result in an accident, causing death or serious injury.

■ When installing the wheel nuts

● Be sure to install the wheel nuts with the tapered ends facing inward. Installing the nuts with the tapered ends facing outward can cause the wheel to break and eventually cause the wheel to come off while driving, which could lead to an accident resulting in death or serious injury.

● Never use oil or grease on the wheel bolts or wheel nuts. Oil and grease may cause the wheel nuts to be excessively tightened, leading to bolt or disc wheel damage. In addition, the oil or grease can cause the wheel nuts to loosen and the wheel may fall off, causing an accident and resulting in death or serious injury. Remove any oil or grease from the wheel bolts or wheel nuts.
4-3. Do-it-yourself maintenance

### NOTICE

- **Replacing tire pressure warning valves and transmitters**
  - Because tire repair or replacement may affect the tire pressure warning valves and transmitters, make sure to have tires serviced by your Lexus dealer or other qualified service shop. In addition, make sure to purchase your tire pressure warning valves and transmitters at your Lexus dealer.
  - Ensure that only genuine Lexus wheels are used on your vehicle. 
    Tire pressure warning valves and transmitters may not work properly with non-genuine wheels.
4-3. Do-it-yourself maintenance

Air conditioning filter

The air conditioning filter must be changed regularly to maintain air conditioning efficiency.

■ Removal method

**STEP 1** Turn the “POWER” switch off.

**STEP 2**
Open the glove box. Lift and remove the partition.

**STEP 3**
Remove the glove box cover.

**STEP 4**
Remove the filter cover.
4-3. Do-it-yourself maintenance

■ Checking interval
Inspect and replace the air conditioning filter according to the maintenance schedule. In dusty areas or areas with heavy traffic flow, early replacement may be required. (For scheduled maintenance information, please refer to the “Owner’s Manual Supplement” or “Scheduled Maintenance”.)

■ If air flow from the vents decreases dramatically
The filter may be clogged. Check the filter and replace if necessary.

⚠️ NOTICE

■ When using the air conditioning system
Make sure that a filter is always installed.
Using the air conditioning system without a filter may cause damage to the system.
4-3. Do-it-yourself maintenance

Electronic key battery

Replace the battery with a new one if it is depleted.

- You will need the following items:
  - Flathead screwdriver
  - Lithium battery CR1632

- Replacing the battery

**STEP 1**
Take out the mechanical key.

**STEP 2**
Remove the cover.
To prevent damage to the key, cover the tip of the screwdriver with a rag.

**STEP 3**
Remove the depleted battery.
Insert a new battery with the “+” terminal facing up.
4-3. Do-it-yourself maintenance

■ Use a CR1632 lithium battery
  ● Batteries can be purchased at your Lexus dealer, local electrical appliance shops or camera stores.
  ● Replace only with the same or equivalent type recommended by the manufacturer.
  ● Dispose of used batteries according to local laws.

■ When the card key battery needs to be replaced (if equipped)
  The battery for the card key is available only at Lexus dealers. Your Lexus dealer can replace the battery for you.

■ If the electronic key battery is depleted
  The following symptoms may occur:
  ● The smart access system with push-button start and wireless remote control will not function properly.
  ● The operational range will be reduced.
## CAUTION

- **Removed battery and other parts**
  These parts are small and if swallowed by a child, they can cause choking. Keep away from children. Failure to do so could result in death or serious injury.

## NOTICE

- **For normal operation after replacing the battery**
  Observe the following precautions to prevent accidents:
  - Always work with dry hands. Moisture may cause the battery to rust.
  - Do not touch or move any other component inside the remote control.
  - Do not bend either of the battery terminals.
If any of the electrical components do not operate, a fuse may have blown. If this happens, check and replace the fuses as necessary.

**STEP 1** Turn the “POWER” switch off.

**STEP 2** Open the fuse box cover.

**Engine compartment**

Push the tab in and lift the lid off.

**Left side instrument panel**

Remove the lid.

**STEP 3** After a system failure, see “Fuse layout and amperage ratings” (→P. 573) for details about which fuse to check.
4-3. Do-it-yourself maintenance

**STEP 4** Remove the fuse.

Only type A fuse can be removed using the pullout tool.

**STEP 5** Check if the fuse is blown.

**Type A**

1. Normal fuse
2. Blown fuse

Replace the blown fuse with a new fuse of an appropriate amperage rating. The amperage rating can be found on the fuse box lid.

**Type B**

1. Normal fuse
2. Blown fuse

Replace the blown fuse with a new fuse of an appropriate amperage rating. The amperage rating can be found on the fuse box lid.
4-3. Do-it-yourself maintenance

Type C

1 Normal fuse
2 Blown fuse

Replace the blown fuse with a new fuse of an appropriate amperage rating. The amperage rating can be found on the fuse box lid.

Type D

1 Normal fuse
2 Blown fuse

Replace the blown fuse with a new fuse of an appropriate amperage rating. The amperage rating can be found on the fuse box lid.

- **After a fuse is replaced**
  - If the lights do not turn on even after the fuse has been replaced, a bulb may need replacement. (→ P. 582)
  - If the replaced fuse blows again, have the vehicle inspected by your Lexus dealer.

- **If there is an overload in a circuit**
  The fuses are designed to blow, protecting the wiring harness from damage.

- **When replacing light bulbs**
  Lexus recommends that you use genuine Lexus products designed for this vehicle. Because certain bulbs are connected to circuits designed to prevent overload, non-genuine parts or parts not designed for this vehicle may be unusable.
To prevent system breakdowns and vehicle fire

Observe the following precautions. Failure to do so may cause damage to the vehicle, and possibly a fire or injury.

- Never use a fuse of a higher amperage rating than that indicated, or use any other object in place of a fuse.
- Always use a genuine Lexus fuse or equivalent. Never replace a fuse with a wire, even as a temporary fix.
- Do not modify the fuses or fuse boxes.

Fuse box near the power control unit

Never check or replace the fuses as there are high voltage parts and wiring near the fuse box. Doing so may cause electric shock, resulting in death or serious injury.

Before replacing fuses

Have the cause of electrical overload determined and repaired by your Lexus dealer as soon as possible.
4-3. Do-it-yourself maintenance

Light bulbs

You may replace the following bulbs by yourself. The difficulty level of replacement varies depending on the bulb. If necessary bulb replacement seems difficult to perform, contact your Lexus dealer.

For more information about replacing other light bulbs, contact your Lexus dealer.

- Preparing for light bulb replacement
  Check the wattage of the light bulb to be replaced. (→P. 688)

- Removing the engine compartment covers
  →P. 526

- Front bulb locations

Halogen headlights

- Headlight low beam
- Headlight high beam
- Fog light
- Front turn signal light
4-3. Do-it-yourself maintenance

LED headlights

- Headlight high beam
- Fog light
- Front turn signal light

Rear bulb locations

- Rear turn signal light
- Back-up light
- License plate lights
Replacing light bulbs

Headlight low beams (halogen headlights)

For the right side only: Remove the securing clips and unclip the engine coolant reservoir hose. Then lift up the air cleaner inlet duct.

Unplug the connector while pressing the lock release.
4-3. Do-it-yourself maintenance

Headlight high beams (halogen headlights)

STEP 1
For the right side only: Move the washer fluid filler opening.

STEP 2
Unplug the connector while pressing the lock release.

STEP 3
Turn the bulb base counterclockwise.

Turn the bulb base counterclockwise.
4-3. Do-it-yourself maintenance

■ Headlight high beams (LED headlights)

For the right side only: Remove the securing clips and unclip the engine coolant reservoir hose. Then lift up the air cleaner inlet duct. (→ P. 584)

STEP 1

Turn the cover counterclockwise and remove it.

STEP 2

Turn the bulb base counterclockwise.

STEP 3

Unplug the connector while pulling the lock release.
■ Fog lights (if equipped)

Remove 2 screws, a bolt and clip, and pull down the engine under cover.

Pull the cover down slowly, being careful not to dislodge any fixed components.

Unplug the connector while pressing the lock release.

Turn the bulb base counterclockwise.
Front turn signal lights (halogen headlights)

**STEP 1** For the right side only: Remove the securing clips and unclip the engine coolant reservoir hose. Then lift up the air cleaner inlet duct. (→P. 584)

Turn the bulb base counterclockwise.

**STEP 3**

Remove the light bulb.
Front turn signal lights (LED headlights)

Left side

**STEP 1**
Remove the power control unit cover.

**STEP 2**
Turn the bulb base counterclockwise.

**STEP 3**
Remove the light bulb.
Right side

**STEP 1** Move the washer fluid filler opening. (→ P. 585)

**STEP 2**

Turn the bulb base counterclockwise.

**STEP 3**

Remove the light bulb.
Rear turn signal lights

Open the back door and remove the covers and bolts, and remove the lamp assembly by pulling it directly backward from the rear of the vehicle.

Use a flathead screwdriver wrapped in a cloth.

Turn the bulb base counterclockwise.

Remove the light bulb.
4-3. Do-it-yourself maintenance

■ Back-up lights

Open the back door and remove the cover.

Use a flathead screwdriver wrapped in a cloth.

Turn the bulb base counterclockwise.

Remove the light bulb.
4-3. Do-it-yourself maintenance

License plate lights

STEP 1
Open the back door and remove the cover.
Use a flathead screwdriver wrapped in a cloth.

STEP 2
Turn the bulb base counterclockwise.

STEP 3
Remove the light bulb.
4-3. Do-it-yourself maintenance

Lights other than the above
If any of the lights listed below has burnt out, have it replaced by your Lexus dealer.

- Headlight low beams (LED type)
- Parking lights and daytime running lights
- Front side marker lights
- Side turn signal lights
- Stop/tail lights
- Rear side marker lights
- High mounted stoplight
- Outer foot light
After replacing the bulbs

After lifting up the air cleaner duct or removing the power control unit cover, return the duct or the cover to their original positions with the clips.

1. Push up center portion
2. Insert
3. Press

LED lights

The headlight low beams (LED type), parking lights, front side marker lights, daytime running lights, side turn signal lights, rear side marker lights, stop/tail lights and high mounted stoplight consist of a number of LEDs. If any of the LEDs burn out, take your vehicle to your Lexus dealer to have the light replaced.

Condensation build-up on the inside of the lens

Contact your Lexus dealer for more information in the following situations. Temporary condensation build-up on the inside of the headlight lens does not indicate a malfunction.

- Large drops of water have built up on the inside of the lens.
- Water has built up inside the headlight.

When replacing light bulbs

→ P. 580
### 4-3. Do-it-yourself maintenance

#### CAUTION

- **Replacing light bulbs**
  - Turn off the lights. Do not attempt to replace the bulb immediately after turning off the lights. The bulbs become very hot and may cause burns.
  - Do not touch the glass portion of the light bulb with bare hands. Hold the bulb by the plastic or metal portion. If the bulb is scratched or dropped, it may blow out or crack.
  - Fully install light bulbs and any parts used to secure them. Failure to do so may result in heat damage, fire, or water entering the headlight unit. This may damage the headlights or cause condensation to build up on the lens.

- **To prevent damage or fire**
  Make sure bulbs are fully seated and locked.

- If your vehicle overheats .................................................... 664
- If the vehicle becomes stuck ............................................. 669
- If your vehicle has to be stopped in an emergency .......... 671
5-1. Essential information

Emergency flashers

The emergency flashers are used to warn other drivers when the vehicle has to be stopped in the road due to a breakdown, etc.

Press the switch.
All the turn signal lights will flash.
To turn them off, press the switch once again.

Emergency flashers
If the emergency flashers are used for a long time while the hybrid system is not operating (while the “READY” indicator is not illuminated), the 12-volt battery may discharge.
5-1. Essential information
If your vehicle needs to be towed

If towing is necessary, we recommend having your vehicle towed by your Lexus dealer or a commercial towing service, using a lift-type truck or flat bed truck. Use a safety chain system for all towing, and abide by all state/provincial and local laws.

**Before towing**

The following may indicate a problem with your hybrid transmission. Contact your Lexus dealer before towing.

- The hybrid system is operating but the vehicle will not move.
- The vehicle makes an abnormal sound.

If there is a malfunction in the P position control system, the smart access system with push-button start or the immobilizer system, or if the 12-volt battery is discharged, the vehicle cannot be towed with the front wheels on the ground, as the front wheels may be locked. In this case, transport the vehicle with both front wheels or all four wheels lifted.
Emergency towing

If a tow truck is not available in an emergency, your vehicle may be temporarily towed using a cable or chain secured to the emergency towing eyelet(s). This should only be attempted on hard surfaced roads for short distances at under 18 mph (30 km/h).

A driver must be in the vehicle to steer and operate the brakes. The vehicle’s wheels, drive train, axles, steering and brakes must be in good condition.
Installing towing eyelets

**STEP 1**
Remove the eyelet cover using a flathead screwdriver.
To protect the bodywork, place a rag between the screwdriver and the vehicle body as shown in the illustration.

**STEP 2**
Insert the towing eyelet into the hole and tighten partially by hand.

**STEP 3**
Tighten down the towing eyelet securely using a wheel nut wrench.
5-1. Essential information

**Towing with a sling-type truck**

Do not tow with a sling-type truck to prevent body damage.

**Towing with a wheel-lift type truck**

**From the front**

Release the parking brake.

**From the rear**

Use a towing dolly under the front wheels.
Using a flat bed truck

If your Lexus is transported by a flat bed truck, it should be tied down at the locations shown in the illustration.

If you use chains or cables to tie down your vehicle, the angles shaded in black must be 45°.
Do not overly tighten the tie downs or the vehicle may be damaged.

■ Before emergency towing

STEP 1 Turn the “POWER” switch to ON mode.
Do not turn the “POWER” switch to ACCESSORY mode.

STEP 2 Shift the shift position to N.

STEP 3 Release the parking brake.

■ Emergency towing eyelet location

→ P. 640
5-1. Essential information

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Caution while towing</strong></td>
</tr>
</tbody>
</table>
| - Use extreme caution when towing the vehicle.  
  Avoid sudden starts or erratic driving maneuvers which place excessive stress on the emergency towing eyelets and the cables or chains. Always be cautious of the surroundings and other vehicles while towing. |
| - Do not turn the “POWER” switch off.  
  This may lead to an accident as the front wheels will be locked by the parking lock. |
| - If the hybrid system is off, the power assist for the brakes and steering will not function, making steering and braking more difficult. |
| **Installing towing eyelets to the vehicle** |
| Make sure that towing eyelets are installed securely.  
If not securely installed, towing eyelets may come loose during towing. This may lead to accidents that cause serious injury or even death. |
### 5-1. Essential information

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| ■ To prevent damaging the vehicle  
  When raising the vehicle, ensure adequate ground clearance for towing at the opposite end of the raised vehicle. Without adequate clearance, the vehicle could be damaged while being towed. |
| ■ To prevent causing serious damage to the hybrid transmission when towing using a wheel-lift type truck  
  Never tow this vehicle from the rear with the front wheels on the ground. |
| ■ To prevent body damage when towing with a sling-type truck  
  Do not tow with a sling-type truck, either from the front or rear. |
| ■ To prevent causing serious damage to the hybrid transmission in emergency towing  
  Never tow a vehicle from the rear with four wheels on the ground. This may cause serious damage to the hybrid transmission. |
If you notice any of the following symptoms, your vehicle probably needs adjustment or repair. Contact your Lexus dealer as soon as possible.

**Visible symptoms**
- Fluid leaks under the vehicle.
  (Water dripping from the air conditioning after use is normal.)
- Flat-looking tires or uneven tire wear
- High coolant temperature warning light flashes or comes on.

**Audible symptoms**
- Changes in exhaust sound
- Excessive tire squeal when cornering
- Strange noises related to the suspension system
- Pinging or other noises related to the hybrid system

**Operational symptoms**
- Engine missing, stumbling or running roughly
- Appreciable loss of power
- Vehicle pulls heavily to one side when braking
- Vehicle pulls heavily to one side when driving on a level road
- Loss of brake effectiveness, spongy feeling, pedal almost touches the floor
5-2. Steps to take in an emergency
If a warning light turns on or a warning buzzer sounds

Calmly perform the following actions if any of the warning lights comes on or flashes. If a light comes on or flashes, but then goes off, this does not necessarily indicate a malfunction in the system. However, if this continues to occur, have the vehicle inspected by your Lexus dealer.

Stop the vehicle immediately. Continuing to drive the vehicle may be dangerous.

The following warning indicates a possible problem in the brake system. Immediately stop the vehicle in a safe place and contact your Lexus dealer.

<table>
<thead>

</tr>
</tbody>
</table>

*1: Open door warning buzzer:
→P. 623

*2: Driver’s seat belt buzzer:
The driver’s seat belt buzzer sounds to alert the driver that his or her seat belt is not fastened. Once the “POWER” switch is turned to ON mode, the buzzer sounds for 6 seconds. If the vehicle reaches a speed of 12 mph (20 km/h), the buzzer sounds once. If the seat belt is still unfastened after 30 seconds, the buzzer will sound intermittently for 10 seconds. Then, if the seat belt is still unfastened, the buzzer will sound in a different tone for 20 more seconds.

Front passenger’s seat belt buzzer:
The front passenger’s seat belt buzzer sounds to alert the front passenger that his or her seat belt is not fastened. The buzzer sounds once if the vehicle reaches a speed of 12 mph (20 km/h). If the seat belt is still unfastened after 30 seconds, the buzzer will sound intermittently for 10 seconds. Then, if the seat belt is still unfastened, the buzzer will sound in a different tone for 20 more seconds.
5-2. Steps to take in an emergency

- SRS warning light
  This warning light system monitors the airbag sensor assembly, front airbag sensors, side and curtain shield airbag sensors, curtain shield airbag sensors, driver’s seat position sensor, driver’s seat belt buckle switch, front passenger occupant classification system (ECU and sensors), “AIR BAG ON” indicator light, “AIR BAG OFF” indicator light, front passenger’s seat belt buckle switch, seat belt pretensioner assemblies, airbags, interconnecting wiring and power sources. (→P.127)

- Front passenger detection sensor, seat belt reminder and warning buzzer
  ● If luggage is placed on the front passenger seat, the front passenger detection sensor may cause the warning light to flash and the warning buzzer to sound even if a passenger is not sitting in the seat.
  ● If a cushion is placed on the seat, the sensor may not detect a passenger, and the warning light may not operate properly.

- Electric power steering system warning light (warning buzzer)
  When the 12-volt battery charge becomes insufficient of the voltage temporarily drops, the electric power steering system warning light may come on and the warning buzzer may sound.

- If the malfunction indicator lamp comes on while driving
  First check the following:
  ● Is the fuel tank empty?
    If it is, fill the fuel tank immediately.
  ● Is the fuel tank cap loose?
    If it is, tighten it securely.
  The malfunction indicator lamp will go off after several driving trips. If the malfunction indicator lamp does not go off even after several trips, contact your Lexus dealer as soon as possible.
5-2. Steps to take in an emergency

■ When the tire pressure warning light comes on
  Check the tire inflation pressure and adjust to the appropriate level. Pushing the tire pressure warning reset switch will not turn off the tire pressure warning light.

■ The tire pressure warning light may come on due to natural causes
  The tire pressure warning light may come on due to natural causes such as natural air leaks and tire inflation pressure changes caused by temperature. In this case, adjusting the tire inflation pressure will turn off the warning light (after a few minutes).

■ When a tire is replaced with a spare tire
  The compact spare tire is not equipped with a tire pressure warning valve and transmitter. If a tire goes flat, the tire pressure warning light will not turn off even though the flat tire has been replaced with the spare tire. Replace the spare tire with the repaired tire and adjust the tire inflation pressure. The tire pressure warning light will go off after a few minutes.
If the tire pressure warning system is not functioning
The tire pressure warning system will be disabled in the following conditions:
(When the condition becomes normal, the system will work properly.)
● If tires not equipped with tire pressure warning valves and transmitters are used
● If the ID code on the tire pressure warning valves and transmitters is not registered in the tire pressure warning computer
● If the tire inflation pressure is 73 psi (500 kPa, 51 kgf/cm² or bar) or higher
The tire pressure warning system may be disabled in the following conditions:
(When the condition becomes normal, the system will work properly.)
● If electronic devices or facilities using similar radio wave frequencies are nearby
● If a radio set at a similar frequency is in use in the vehicle
● If a window tint that affects the radio wave signals is installed
● If there is a lot of snow or ice on the vehicle, particularly around the wheels or wheel housings
● If non-genuine Lexus wheels are used (Even if you use Lexus wheels, the tire pressure warning system may not work properly with some types of tires.)
● If tire chains are used
5-2. Steps to take in an emergency

■ If the tire pressure warning light frequently comes on after blinking for 1 minute
  If the tire pressure warning light frequently comes on after blinking for 1 minute
  when the “POWER” switch is turned to ON mode, have it checked by your Lexus
  dealer.

■ Customization that can be configured at Lexus dealer
  The vehicle speed linked seat belt reminder buzzer can be disabled.
  (Customizable features → P. 709)
  However, Lexus recommends that the seat belt reminder buzzer be operational to
  alert the driver and front passenger when seat belts are not fastened.
5-2. Steps to take in an emergency

CAUTION

■ If both the ABS and the brake system warning lights remain on
Stop your vehicle in a safe place immediately and contact your Lexus dealer. The vehicle will become extremely unstable during braking, and the ABS system may fail, which could cause an accident resulting in death or serious injury.

■ When the electric power steering system warning light comes on
The steering wheel may become extremely heavy. If the steering wheel becomes heavier than usual when operating, hold firmly and operate using more force than usual.

■ If the tire pressure warning light comes on
Be sure to observe the following precautions. Failure to do so could cause a loss of vehicle control and result in death or serious injury.

● Stop your vehicle in a safe place as soon as possible. Adjust the tire inflation pressure immediately.
● If the tire pressure warning light comes on even after tire inflation pressure adjustment, it is probable that you have a flat tire. Check the tires. If a tire is flat, change it with the spare tire and have the flat tire repaired by the nearest Lexus dealer.
● Avoid abrupt maneuvering and braking. If the vehicle tires deteriorate, you could lose control of the steering wheel or the brakes.

■ If a blowout or sudden air leakage should occur
The tire pressure warning system may not activate immediately.
### CAUTION

- **Maintenance of the tires**

  Each tire, including the spare (if provided), should be checked monthly when cold and inflated to the inflation pressure recommended by the vehicle manufacturer on the vehicle placard or tire inflation pressure label (tire and load information label). (If your vehicle has tires of a different size than the size indicated on the vehicle placard or tire inflation pressure label [tire and load information label], you should determine the proper tire inflation pressure for those tires.)

  As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS-tire pressure warning system) that illuminates a low tire pressure telltale (tire pressure warning light) when one or more of your tires is significantly under-inflated. Accordingly, when the low tire pressure telltale (tire pressure warning light) illuminates, you should stop and check your tires as soon as possible, and inflate them to the proper pressure. Driving on a significantly under-inflated tire causes the tire to overheat and can lead to tire failure. Under-inflation also reduces fuel efficiency and tire tread life, and may affect the vehicle’s handling and stopping ability.

  Please note that the TPMS (tire pressure warning system) is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger illumination of the TPMS low tire pressure telltale (tire pressure warning light).

  Your vehicle has also been equipped with a TPMS (tire pressure warning system) malfunction indicator to indicate when the system is not operating properly. The TPMS (tire pressure warning system) malfunction indicator is combined with the low tire pressure telltale (tire pressure warning light). When the system detects a malfunction, the telltale will flash for approximately one minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists. When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended.
CAUTION

TPMS (tire pressure warning system) malfunctions may occur for a variety of reasons, including the installation of replacement or alternate tires or wheels on the vehicle that prevent the TPMS (tire pressure warning system) from functioning properly. Always check the TPMS (tire pressure warning system) malfunction tell-tale after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels allow the TPMS (tire pressure warning system) to continue to function properly.

NOTICE

Precaution when installing a different tire

When a tire of a different specification or maker is installed, the tire pressure warning system may not operate properly.
5-2. Steps to take in an emergency
If a warning message is displayed

If a warning is shown on the multi-information display, stay calm and perform the following actions:

1. **Master warning light**
   The master warning light also comes on or flashes in order to indicate that a message is currently being displayed on the multi-information display.

2. **Multi-information display**

If any of the warning light comes on again after the following actions have been performed, contact your Lexus dealer.

**Stop the vehicle immediately.**

A buzzer sounds and a warning message is shown on the multi-information display. The following warning indicates the possibility of damage to the vehicle that may lead to an accident. Immediately stop the vehicle in a safe place and contact your Lexus dealer.

</tr>
</tbody>
</table>

During a hybrid system starting procedure in the event that the electronic key was not functioning properly (→P. 655), the “POWER” switch was touched with the electronic key.

Press the “POWER” switch within 10 seconds of the buzzer sounding.
5-2. Steps to take in an emergency

- **Warning message in radar cruise mode**
  
  In the following cases, the warning message may not be displayed even if vehicle-to-vehicle distance decreases:
  
  - When your vehicle and the vehicle ahead are traveling at the same speed or the vehicle ahead is traveling more quickly than your vehicle
  - When the vehicle ahead is traveling at a very low speed
  - Immediately after cruise control speed is set
  - At the instant the accelerator pedal is depressed
5-2. Steps to take in an emergency
If you have a flat tire

Remove the flat tire and replace it with the spare tire provided.

■ Before jacking up the vehicle
  ● Stop the vehicle on a hard, flat surface.
  ● Set the parking brake.
  ● Shift the shift position to P.
  ● Stop the hybrid system.
  ● Turn on the emergency flashers.

■ Location of the spare tire, jack and tools
5-2. Steps to take in an emergency

**Taking out the jack**

**STEP 1**
Remove the center deck board.

**STEP 2**
Remove the center auxiliary box.

**STEP 3**
Take out the jack.

1. For loosening
2. For tightening
5-2. Steps to take in an emergency

**Taking out the spare tire**

**STEP 1** Remove the center deck board and center auxiliary box. (See “Taking out the jack” for details.)

**STEP 2** Loosen the center fastener that secures the spare tire.

**Replacing a flat tire**

**STEP 1** Chock the tires.

<table>
<thead>

When trouble arises

5-2. Steps to take in an emergency

For vehicles with 15 inch wheels, remove the wheel ornament using the wrench.

To protect the wheel ornament, place a rag between the wrench and the wheel ornament.

Slightly loosen the wheel nuts (one turn).

Turn the tire jack portion “A” by hand until the notch of the jack is in contact with the jack point.

The jack point guides are located under the rocker panel. They indicate the jack point positions.

Raise the vehicle until the tire is slightly raised off the ground.
5-2. Steps to take in an emergency

Remove all the wheel nuts and the tire.

When resting the tire on the ground, place the tire so that the wheel design faces up to avoid scratching the wheel surface.

Installing the spare tire

Remove any dirt or foreign matter from the wheel contact surface.

If foreign matter is on the wheel contact surface, the wheel nuts may loosen while the vehicle is in motion, causing the tire to come off.

Install the spare tire and loosely tighten each wheel nut by hand by approximately the same amount.

Tighten the wheel nuts until the tapered portion comes into loose contact with the disc wheel seat.
5-2. Steps to take in an emergency

**STEP 3** Lower the vehicle.

**STEP 4** Firmly tighten each wheel nut two or three times in the order shown in the illustration.

- **Tightening torque:**
  - 76 ft-lbf (103 N•m, 10.5 kgf•m)

**STEP 5** Stow the flat tire, tire jack and all tools.

---

**Stowing the flat tire**

**STEP 1** Vehicles with a 16 or 17 inch wheel:
Before stowing the flat tire, remove the center wheel ornament by pushing from the reverse side.
5-2. Steps to take in an emergency

Place the flat tire on the deck board, and pass the belt through the lower-right cargo hook and then through the hole in the center of the tire.

Pass the belt through the lower-left cargo hook.

Pass the belt through the buckle and secure the tire firmly. Check that the belt is securely held by the buckle. The belt cannot be fastened securely if the buckle is facing the wrong direction.
5-2. Steps to take in an emergency

■ The compact spare tire
  ● The compact spare tire is identified by the label “TEMPORARY USE ONLY” on the tire sidewall.
  
  Use the compact spare tire temporarily, and only in an emergency.
  ● Make sure to check the tire inflation pressure of the compact spare tire.
  (→P. 685)

■ After completing the tire change
  
  The tire pressure warning system must be reset. (→P. 548)

■ When using the compact spare tire

  As the compact spare tire is not equipped with a tire pressure warning valve and transmitter, low inflation pressure of the spare tire will not be indicated by the tire pressure warning system. Also, if you replace the compact spare tire after the tire pressure warning light comes on, the light remains on.

■ If you have a flat front tire on a road covered with snow or ice

  Install the compact spare tire on one of the rear wheels of the vehicle. Perform the following steps and fit tire chains to the front tires:

  ▪ **STEP 1** Replace a rear tire with the compact spare tire.
  ▪ **STEP 2** Replace the flat front tire with the tire removed from the rear of the vehicle.
  ▪ **STEP 3** Fit tire chains to the front tires.
### 5-2. Steps to take in an emergency

</tbody>
</table>
## CAUTION

### Speed limit when using the compact spare tire

Do not drive at speeds in excess of 50 mph (80 km/h) when a compact spare tire is installed on the vehicle.

The compact spare tire is not designed for driving at high speeds. Failure to observe this precaution may lead to an accident causing death or serious injury.

### Using the tire jack

Improper use of the tire jack may cause the vehicle to suddenly fall off the jack, leading to death or serious injury.

- Do not use the tire jack for any purpose other than replacing tires or installing and removing tire chains.
- Only use the tire jack that comes with this vehicle for replacing a flat tire. Do not use it on other vehicles, and do not use other tire jacks for replacing tires on this vehicle.
- Always check that the tire jack is securely set to the jack point.
- Do not put any part of your body under the vehicle while it is supported by the jack.
- Do not start or run the hybrid system while your vehicle is supported by the jack.
- Do not raise the vehicle while someone is inside.
- When raising the vehicle, do not put an object on or under the jack.
- Do not raise the vehicle to a height greater than that required to replace the tire.
- Use a jack stand if it is necessary to get under the vehicle.

Take particular care when lowering the vehicle to ensure that no one working on or near the vehicle may be injured.
5-2. Steps to take in an emergency

**CAUTION**

**■ Replacing a flat tire**

- Do not touch the disc wheels or the area around the brakes immediately after the vehicle has been driven.
  After the vehicle has been driven the disc wheels and the area around the brakes will be extremely hot. Touching these areas with hands, feet or other body parts while changing a tire, etc. may result in burns.
- Failure to follow these precautions could cause the wheel nuts to loosen and the tire to fall off, resulting in death or serious injury.
  - Have the wheel nuts tightened with a torque wrench to 76 ft•lb (103 N•m, 10.5 kgf•m) as soon as possible after changing wheels.
  - When installing a tire, only use wheel nuts that have been specifically designed for that wheel.
  - If there are any cracks or deformations in the bolt screws, nut threads or bolt holes of the wheel, have the vehicle inspected by your Lexus dealer.
  - When installing the wheel nuts, be sure to install them with the tapered ends facing inward. (→P. 563)

**■ After using the tools and jack**

Before driving, make sure all the tools and jack are securely in place in their storage location to reduce the possibility of personal injury during a collision or sudden braking.

**■ When stowing the flat tire**

- Make sure the rear seatbacks are in their original position.
- Secure it using a tire tie-down belt. Otherwise, the flat tire may fly out in case of sudden braking or an accident, resulting in death or serious injury.
5-2. Steps to take in an emergency

**NOTICE**

- **Do not drive the vehicle with a flat tire.**
  
  Do not continue driving with a flat tire. Driving even a short distance with a flat tire can damage the tire and the wheel beyond repair.

- **Be careful when driving over bumps with the compact spare tire installed on the vehicle.**
  
  The vehicle becomes lower when driving with the compact spare tire compared to when driving with standard tires. Be careful when driving over uneven road surfaces.

- **Driving with tire chains and the compact spare tire**
  
  Do not fit tire chains to the compact spare tire. Tire chains may damage the vehicle body and adversely affect driving performance.

- **When replacing the tires**
  
  When removing or fitting the wheels, tires or the tire pressure warning valve and transmitter, contact your Lexus dealer as the tire pressure warning valve and transmitter may be damaged if not handled correctly.

- **To avoid damage to the tire pressure warning valves and transmitters**
  
  When a tire is repaired with liquid sealants, the tire pressure warning valve and transmitter may not operate properly. If a liquid sealant is used, contact your Lexus dealer or other qualified service shop as soon as possible. Make sure to replace the tire pressure warning valve and transmitter when replacing the tire. (→P. 548)
5-2. Steps to take in an emergency
If the hybrid system will not start

Reasons for the hybrid system not starting vary depending on the situation. Check the following and perform the appropriate procedure:

■ The hybrid system will not start even though the correct starting procedure is being followed. (→ P. 175)
  One of the following may be the cause of the problem:
  ● The electronic key may not be functioning properly. * (→ P. 655)
  ● There may not be sufficient fuel in the vehicle’s tank.
    Refuel the vehicle.
  ● There may be a malfunction in the immobilizer system. *
    (→ P. 119)
  ● There may be a malfunction in the P position control system.*
    (→ P. 179, 621)
  *: It may not be possible to shift the shift position other than P.

■ The interior lights and headlights are dim, or the horn does not sound or sounds at a low volume.
  One of the following may be the cause of the problem:
  ● The 12-volt battery may be discharged. (→ P. 658)
  ● The 12-volt battery terminal connections may be loose or corroded.
5-2. Steps to take in an emergency

The interior lights and headlights do not turn on, or the horn does not sound.

One of the following may be the cause of the problem:

- One or both of the 12-volt battery terminals may be disconnected.
- The 12-volt battery may be discharged. (→ P. 658)

Contact your Lexus dealer if the problem cannot be repaired, or if repair procedures are unknown.

Emergency start function

When the hybrid system does not start, the following steps can be used as an interim measure to start the hybrid system if the “POWER” switch is functioning normally:

**STEP 1** Set the parking brake.

**STEP 2** Turn the “POWER” switch to ACCESSORY mode.

**STEP 3** Press and hold the “POWER” switch for about 15 seconds while depressing the brake pedal firmly.

Even if the hybrid system can be started using the above steps, the system may be malfunctioning. Have the vehicle inspected by your Lexus dealer.
5-2. Steps to take in an emergency

If you lose your keys

New genuine keys can be made by your Lexus dealer using the other key and the key number stamped on your key number plate.
5-2. Steps to take in an emergency

If the electronic key does not operate properly

If communication between the electronic key and vehicle is interrupted (→P. 70) or the electronic key cannot be used because the battery is depleted, the smart access system with push-button start and wireless remote control cannot be used. In such cases, the doors can be opened and the hybrid system can be started by following the procedure below.

**Locking and unlocking the doors and key linked functions**

Use the mechanical key (→P. 50) in order to perform the following operations:

1. Locks all the doors
2. Closes the windows* (turn and hold)
3. Unlocks the door
   - Turning the key rearward unlocks the driver’s door. Turning the key once again within 3 seconds unlocks the other doors.
4. Opens the windows* (turn and hold)

*: These settings must be customized at your Lexus dealer.
Starting the hybrid system

STEP 1 Depress the brake pedal.

STEP 2 Touch the Lexus emblem side of the electronic key to the “POWER” switch.

If any of the doors is opened or closed while the key is being touched to the switch, an alarm will sound to indicate that the start function cannot detect the electronic key.

STEP 3 Press the “POWER” switch within 10 seconds of the buzzer sounding, keeping the brake pedal depressed.

In the event that the hybrid system still cannot be operated, contact your Lexus dealer.
5-2. Steps to take in an emergency

- **Stopping the hybrid system**
  Set the parking brake, shift the shift position to P and press the "POWER" switch as you normally do when stopping the hybrid system.

- **Replacing the key battery**
  As the above procedure is a temporary measure, it is recommended that the electronic key battery be replaced immediately when the battery is depleted. (→P. 567)

- **Changing "POWER" switch modes**
  Within 10 seconds of the buzzer sounding, release the brake pedal and press the "POWER" switch.
  The hybrid system does not start and modes will be changed each time the switch is pressed. (→P. 177)
5-2. Steps to take in an emergency
If the 12-volt battery is discharged

The following procedures may be used to start the hybrid system if the vehicle’s 12-volt battery is discharged.
You can also call your Lexus dealer or a qualified repair shop.

If you have a set of jumper (or booster) cables and a second vehicle with a 12-volt battery, you can jump start your vehicle by following the steps below.

**STEP 1**
Open the hood and fuse block cover.

**STEP 2**
Open the exclusive jump starting terminal cover.
Connect the jumper cables according to the following procedure:

1. Connect a positive jumper cable clamp to the exclusive jump starting terminal on your vehicle.
2. Connect the clamp on the other end of the positive cable to the positive (+) battery terminal on the second vehicle.
3. Connect a negative cable clamp to the negative (-) battery terminal on the second vehicle.
4. Connect the clamp at the other end of the negative cable to a solid, stationary, unpainted metallic point away from the exclusive jump starting terminal and any moving parts, as shown in the illustration.
5-2. Steps to take in an emergency

<table>
<thead>
<tr>
<th>STEP 4</th>
<th>Start the engine of the second vehicle. Increase the engine speed slightly and maintain at that level for approximately 5 minutes to recharge the battery of your vehicle.</th>
</tr>
</thead>
<tbody>
<tr>
<td>STEP 5</td>
<td>Open and close any of the doors of your vehicle with the “POWER” switch off.</td>
</tr>
<tr>
<td>STEP 6</td>
<td>Maintain the engine speed of the second vehicle and start the hybrid system of your vehicle by turning the “POWER” switch to ON mode.</td>
</tr>
<tr>
<td>STEP 7</td>
<td>Make sure the “READY” indicator light comes on. If the indicator light does not come on, contact your Lexus dealer.</td>
</tr>
<tr>
<td>STEP 8</td>
<td>Once the hybrid system has started, remove the jumper cables in the exact reverse order from which they were connected.</td>
</tr>
<tr>
<td>STEP 9</td>
<td>To install the engine cover, conduct the removal procedure in reverse. After installing, check that the fixed pins are inserted securely.</td>
</tr>
</tbody>
</table>

Once the hybrid system starts, have the vehicle inspected at your Lexus dealer as soon as possible.

---

■ Starting the hybrid system when the 12-volt battery is discharged

The hybrid system cannot be started by push-starting.

■ To prevent 12-volt battery discharge

- Turn off the headlights and the audio system while the hybrid system is off.
- Turn off any unnecessary electrical components when the vehicle is running at a low speed for an extended period, such as in heavy traffic.
5-2. Steps to take in an emergency

- **When the 12-volt battery is removed or discharged**
  - The hybrid system may not start. (⇒ P. 542)
  - If the 12-volt battery discharges while the shift position is in P, it may not be possible to shift the shift position to other positions. In this case, the vehicle cannot be towed without lifting both front wheels because the front wheels will be locked. (⇒ P. 599)
  - When the 12-volt battery is reconnected, start the hybrid system and confirm that the shift position can be changed to each position using the shift position indicator.
  - Make sure that the key is not inside the vehicle when recharging or replacing the 12-volt battery. The key may be locked in the vehicle if the alarm is activated. (⇒ P. 121)

- **Charging the 12-volt battery**
  The electricity stored in the 12-volt battery will discharge gradually even when the vehicle is not in use, due to natural discharge and the draining effects of certain electrical appliances. If the vehicle is left for a long time, the 12-volt battery may discharge, and the hybrid system may be unable to start. (The 12-volt battery recharges automatically while the hybrid system is operating.)
5-2. Steps to take in an emergency

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ Avoiding 12-volt battery fires or explosions</td>
</tr>
<tr>
<td>Observe the following precautions to prevent accidentally igniting the flammable gas that may be emitted from the 12-volt battery:</td>
</tr>
<tr>
<td>● Make sure each jumper cable is connected to the correct terminal and that it is not unintentionally in contact with any other than the intended terminal.</td>
</tr>
<tr>
<td>● Do not allow the other end of the jumper cable connected to the “+” terminal to come into contact with any other parts or metal surfaces in the area, such as brackets or unpainted metal.</td>
</tr>
<tr>
<td>● Do not allow the + and - clamps of the jumper cables to come into contact with each other.</td>
</tr>
<tr>
<td>● Do not smoke, use matches, cigarette lighters or allow open flame near the 12-volt battery.</td>
</tr>
<tr>
<td>■ 12-volt battery precautions</td>
</tr>
<tr>
<td>The 12-volt battery contains poisonous and corrosive acidic electrolyte, while related parts contain lead and lead compounds. Observe the following precautions when handling the 12-volt battery:</td>
</tr>
<tr>
<td>● When working with the 12-volt battery, always wear safety glasses and take care not to allow any battery fluids (acid) to come into contact with skin, clothing or the vehicle body.</td>
</tr>
<tr>
<td>● Do not lean over the 12-volt battery.</td>
</tr>
<tr>
<td>● In the event that battery fluid comes into contact with the skin or eyes, immediately wash the affected area with water and seek medical attention. Place a wet sponge or cloth over the affected area until medical attention can be received.</td>
</tr>
<tr>
<td>● Always wash your hands after handling the battery support, terminals, and other battery-related parts.</td>
</tr>
<tr>
<td>● Do not allow children near the 12-volt battery.</td>
</tr>
</tbody>
</table>
CAUTION

■ After recharging the 12-volt battery

Have the 12-volt battery inspected at your Lexus dealer as soon as possible. If the 12-volt battery is deteriorating, continued use may cause the 12-volt battery to emit a malodorous gas, which may be detrimental to the health of passengers.

■ When replacing the 12-volt battery

→ P. 544

NOTICE

■ When handling jumper cables

When connecting the jumper cables, ensure that they do not become entangled in the cooling fans or belt.

■ To prevent damaging the vehicle

The exclusive jump starting terminal is to be used when charging the 12-volt battery from another vehicle in an emergency. It cannot be used to jump start another vehicle.
5-2. Steps to take in an emergency
If your vehicle overheats

The following may indicate that your vehicle is overheating:

- The high coolant temperature warning light (→P. 608) comes on or flashes, or a loss of hybrid system power is experienced. (For example, the vehicle speed does not increase.)
- “HYBRID SYSTEM OVERHEAT” (→P. 627) is shown on the multi-information display.
- Steam comes out from under the hood.

**Correction procedures**

**If the high coolant temperature warning light comes on or flashes**

**STEP 1**: Stop the vehicle in a safe place and turn off the air conditioning system, and then stop the hybrid system.

**STEP 2**: If you see steam:
- Carefully lift the hood after the steam subsides.
- If you do not see steam:
  - Carefully lift the hood.

After the hybrid system has cooled down sufficiently, inspect the hoses and radiator core (radiator) for any leaks.

- **1** Radiator
- **2** Cooling fan

If a large amount of coolant leaks, immediately contact your Lexus dealer.
When trouble arises

**STEP 4**

The coolant level is satisfactory if it is between the “FULL” and “LOW” lines on the reservoir.

1 Reservoir
2 “FULL”
3 “LOW”

Add coolant if necessary.

Water can be used in an emergency if coolant is unavailable.

**STEP 5**

Start the hybrid system and turn the air conditioning system on to check that the radiator cooling fan operates and to check for coolant leaks from the radiator or hoses.

The fan operates when the air conditioning system is turned on immediately after a cold start. Confirm that the fan is operating by checking the fan sound and air flow. If it is difficult to check these, turn the air conditioning system on and off repeatedly.

(The fan may not operate in freezing temperatures.)

**STEP 6**

If the fan is not operating:

Stop the hybrid system immediately and contact your Lexus dealer.

If the fan is operating:

Have the vehicle inspected at the nearest Lexus dealer.
If “HYBRID SYSTEM OVERHEAT” is shown on the multi-information display

**STEP 1.** Stop the vehicle in a safe place.

**STEP 2.** Stop the hybrid system and carefully lift the hood.

**STEP 3.** After the hybrid system has cooled down, inspect the hoses and radiator core (radiator) for any leaks.

1. **Radiator**
2. **Cooling fan**

If a large amount of coolant leaks, immediately contact your Lexus dealer.

**STEP 4.** The coolant level is satisfactory if it is between the “FULL” and “LOW” lines on the reservoir.

1. **Reservoir**
2. **“FULL”**
3. **“LOW”**
Add coolant if necessary.

Water can be used in an emergency if coolant is unavailable.

STEP 5

Start the hybrid system and check for the multi-information display.

If the message does not disappear:

Stop the hybrid system and contact your Lexus dealer.

If the message is not displayed:

Have the vehicle inspected at the nearest Lexus dealer.
5-2. Steps to take in an emergency

**CAUTION**

- **To prevent an accident or injury when inspecting under the hood of your vehicle**
  - If steam is seen coming from under the hood, do not open the hood until the steam has subsided. The engine compartment may be very hot, causing serious injuries such as burns.
  - Check that the indicator on the “POWER” switch and the “READY” indicator are off.
  - On hybrid vehicles, the gasoline engine may automatically start, or the cooling fan may suddenly operate even if the gasoline engine stops. Do not touch or approach rotating parts such as the fan, which may lead to fingers or clothing (especially a tie, a scarf or a muffler) getting caught, resulting in serious injury.
  - Do not loosen the coolant reservoir cap while the hybrid system and radiator are hot.
  - Serious injury, such as burns, may result from hot coolant and steam released under pressure.

**NOTICE**

- **When adding engine/power control unit coolant**
  - Wait until the hybrid system has cooled down before adding engine/power control unit coolant.
  - When adding coolant, do so slowly. Adding cool coolant to a hot hybrid system too quickly can cause damage to the hybrid system.

- **To prevent damage to the cooling system**
  - Observe the following precautions:
    - Avoid contaminating the coolant with foreign matter (such as sand or dust etc.).
    - Do not use commercially available coolant additives.
5-2. Steps to take in an emergency
If the vehicle becomes stuck

Carry out the following procedures if the tires spin or the vehicle becomes stuck in mud, dirt or snow:

**STEP 1** Set the parking brake and shift the shift position to P. Stop the hybrid system.

**STEP 2** Remove the mud, snow or sand from around the stuck tire.

**STEP 3** Place wood, stones or some other material under the tires to help provide traction.

**STEP 4** Restart the hybrid system.

**STEP 5** Shift the shift position to D or R, release the parking brake and carefully apply the accelerator to free the vehicle.

---

**CAUTION**

■ When attempting to free a stuck vehicle

If you choose to push the vehicle back and forth to free it, make sure the surrounding area is clear to avoid striking other vehicles, objects or people. The vehicle may also lunge forward or lunge back suddenly as it becomes free. Use extreme caution.

■ When changing the shift position

Be careful not to change the shift position with the accelerator pedal depressed. Changing the shift position to any positions other than P or N may cause the vehicle to accelerate abruptly, causing an accident and resulting in death or serious injury.
5-2. Steps to take in an emergency

⚠️ NOTICE

- To avoid damage to the hybrid transmission and other components
  - Avoid spinning the wheels and depressing the accelerator pedal more than necessary.
  - If the vehicle remains stuck even after these procedures are performed, the vehicle may require towing to be freed.
5-2. Steps to take in an emergency
If your vehicle has to be stopped in an emergency

Only in an emergency, such as if it becomes impossible to stop the vehicle in the normal way, stop the vehicle using the following procedure:

**STEP 1** Steadily step on the brake pedal with both feet and firmly depress it.
Do not pump the brake pedal repeatedly as this will increase the effort required to slow the vehicle.

**STEP 2** Shift the shift position to N.

**If the shift position is shifted to N**

**STEP 3** After slowing down, stop the vehicle in a safe place by the road.

**STEP 4** Stop the hybrid system.

**If the shift position cannot be shifted to N**

**STEP 3** Keep depressing the brake pedal with both feet to reduce vehicle speed as much as possible.

**STEP 4** To stop the hybrid system, press and hold the "POWER" switch for 2 consecutive seconds or more, or press it briefly 3 times or more in succession.

**STEP 5** Stop the vehicle in a safe place by the road.
### CAUTION

If the hybrid system has to be turned off while driving

Power assist for the brakes and steering wheel will be lost, making the brake pedal harder to depress and the steering wheel heavier to turn. Decelerate as much as possible before turning off the hybrid system.

Vehicle identification

Vehicle identification number

The vehicle identification number (VIN) is the legal identifier for your vehicle. This is the primary identification number for your Lexus. It is used in registering the ownership of your vehicle.

This number is stamped on the top left of the instrument panel.

This number is also on the Certification Label.

This number is also stamped under the right-hand front seat.
6-1. Specifications

**Engine number**

The engine number is stamped on the engine block as shown.

</tr>
</tbody>
</table>

*: The engine oil capacity is a reference quantity to be used when exchanging. Warm up the engine and turn off the hybrid system, wait more than 5 minutes, and check the oil level on the dipstick.
■ Engine oil selection

“Toyota Genuine Motor Oil” is used in your Lexus vehicle. Use Lexus approved “Toyota Genuine Motor Oil” or equivalent to satisfy the following grade and viscosity.

Oil grade: ILSAC multigrade engine oil

Recommended viscosity: SAE 0W-20

SAE 0W-20 is the best choice for good fuel economy and good starting in cold weather.

If SAE 0W-20 is not available, SAE 5W-20 oil may be used. However, it must be replaced with SAE 0W-20 at the next oil change.

Oil viscosity (0W-20 is explained here as an example):

• The 0W in 0W-20 indicates the characteristic of the oil which allows cold startability. Oils with a lower value before the W allow for easier starting of the engine in cold weather.

• The 20 in 0W-20 indicates the viscosity characteristic of the oil when the oil is at high temperature. An oil with a higher viscosity (one with a higher value) may be better suited if the vehicle is operated at high speeds, or under extreme load conditions.
How to read oil container label:

The ILSAC (International Lubricant Standardization and Approval Committee) Certification Mark is added to some oil containers to help you select the oil you should use.
## Cooling system

<table>
<thead>
<tr>
<th>Capacity</th>

</tr>
<tr>
<td></td>
<td>2.2 qt. (2.1 L, 1.8 Imp.qt.)</td>
<td></td>
</tr>
</tbody>
</table>

**Coolant type**

Use either of the following:
- “Toyota Super Long Life Coolant”
- Similar high-quality ethylene glycol-based non-silicate, non-amine, non-nitrite, and non-borate coolant with long-life hybrid organic acid technology
  Do not use plain water alone.

C: Wedge base bulbs (clear)
D: Wedge base bulbs (amber)
E: Double end bulbs
*: If equipped
You must only use unleaded gasoline in your vehicle. Select octane rating 87 (Research Octane Number 91) or higher. Use of unleaded gasoline with an octane rating lower than 87 may result in engine knocking. Persistent knocking can lead to engine damage.

At minimum, the gasoline you use should meet the specifications of ASTM D4814 in the U.S.A. and CGSB3.5-M93 in Canada.

Fuel tank opening for unleaded gasoline
To help prevent incorrect fueling, your vehicle has a fuel tank opening that only accommodates the special nozzle on unleaded fuel pumps.

Gasoline quality
In very few cases, driveability problems may be caused by the brand of gasoline you are using. If driveability problems persist, try changing the brand of gasoline. If this does not correct the problem, consult your Lexus dealer.

If your engine knocks
- Consult your Lexus dealer.
- You may occasionally notice light knocking for a short time while accelerating or driving uphill. This is normal and there is no need for concern.
6-1. Specifications

- **Gasoline quality standards**
  - Automotive manufacturers in the U.S.A., Europe and Japan have developed a specification for fuel quality called the World-Wide Fuel Charter (WWFC), which is expected to be applied worldwide.
  - The WWFC consists of four categories that are based on required emission levels. In the U.S., category 4 has been adopted.
  - The WWFC improves air quality by lowering emissions in vehicle fleets, and improves customer satisfaction through better performance.

- **Recommendation of the use of gasoline containing detergent additives**
  - Lexus recommends the use of gasoline that contains detergent additives to avoid the build-up of engine deposits.
  - All gasoline sold in the U.S.A. contains minimum detergent additives to clean and/or keep clean intake systems, per EPA’s lowest additives concentration program.
  - Lexus strongly recommends the use of Top Tier Detergent Gasoline. For more information on Top Tier Detergent Gasoline and a list of marketers, please go to the official website www.toptiergas.com.

- **Recommendation of the use of cleaner burning gasoline**
  - Cleaner burning gasoline, including reformulated gasoline that contains oxygenates such as ethanol or MTBE (Methyl Tertiary Butyl Ether) is available in many areas.
  - Lexus recommends the use of cleaner burning gasoline and appropriately blended reformulated gasoline. These types of gasoline provide excellent vehicle performance, reduce vehicle emissions and improve air quality.
Non-recommendation of the use of blended gasoline

- Use only gasoline containing a maximum of 10% ethanol. DO NOT use any flex-fuel or gasoline that could contain more than 10% ethanol, including from any pump labeled E15, E30, E50, E85 (which are only some examples of fuel containing more than 10% ethanol).

- If you use gasohol in your vehicle, be sure that it has an octane rating no lower than 87.

- Lexus does not recommend the use of gasoline containing methanol.

Non-recommendation of the use of gasoline containing MMT

Some gasoline contains an octane enhancing additive called MMT (Methylcyclopentadienyl Manganese Tricarbonyl).

Lexus does not recommend the use of gasoline that contains MMT. If fuel containing MMT is used, your emission control system may be adversely affected. The malfunction indicator lamp on the instrument cluster may come on. If this happens, contact your Lexus dealer for service.
### NOTICE

#### Notice on fuel quality

- **Do not use improper fuels.** If improper fuels are used, the engine will be damaged.
- **Do not use leaded gasoline.** Lead can cause damage to your vehicle’s three-way catalytic converters causing the emission control system to malfunction.
- **Do not use gasohol other than the type previously stated.** Other gasohol may cause fuel system damage or vehicle performance problems.
- **Using unleaded gasoline with an octane number or rating lower than the level previously stated will cause persistent heavy knocking.** At worst, this will lead to engine damage.

#### Fuel-related poor driveability

- If poor driveability is encountered after using a different type of fuel (poor hot starting, vaporization, engine knocking, etc.), discontinue the use of that type of fuel.

#### When refueling with gasohol

- Take care not to spill gasohol. It can damage your vehicle’s paint.
6-1. Specifications

Tire information

Typical tire symbols

Full-size tire

1. Tire size
2. DOT and Tire Identification Number (TIN)
3. Location of treadwear indicators

Compact spare tire

1. Tire size
2. DOT and Tire Identification Number (TIN)
3. Location of treadwear indicators
Tire ply composition and materials
Plies are layers of rubber-coated parallel cords. Cords are the strands which form the plies in a tire.

Radial tires or bias-ply tires
A radial tire has “RADIAL” on the sidewall. A tire not marked “RADIAL” is a bias-ply tire.

TUBELESS or TUBE TYPE
A tubeless tire does not have a tube and air is directly put into the tire. A tube type tire has a tube inside the tire and the tube maintains the air pressure.

Load limit at maximum cold tire inflation pressure (→P. 551)
Maximum cold tire inflation pressure (→P. 685)
This means the pressure to which a tire may be inflated.

Uniform tire quality grading
For details, see “Uniform Tire Quality Grading” that follows.

Summer tires or all season tires (→P. 552)
An all season tire has “M+S” on the sidewall. A tire not marked “M+S” is a summer tire.

“TEMPORARY USE ONLY”
A compact spare tire is identified by the phrase “TEMPORARY USE ONLY” molded on its sidewall. This tire is designed for temporary emergency use only.

### Uniform Tire Quality Grading

This information has been prepared in accordance with regulations issued by the National Highway Traffic Safety Administration of the U.S. Department of Transportation. It provides the purchasers and/or prospective purchasers of Lexus vehicles with information on uniform tire quality grading.

Your Lexus dealer will help answer any questions you may have as you read this information.

**DOT quality grades**

All passenger vehicle tires must conform to Federal Safety Requirements in addition to these grades. Quality grades can be found where applicable on the tire sidewall between tread shoulder and maximum section width.

For example: Treadwear 200 Traction AA Temperature A

**Treadwear**

The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course.

For example, a tire graded 150 would wear one and a half (1 1/2) times as well on the government course as a tire graded 100. The relative performance of tires depends upon the actual conditions of their use. Performance may differ significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate.
■ Traction AA, A, B, C

The traction grades, from highest to lowest, are AA, A, B and C, and they represent the tire's ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete.

A tire marked C may have poor traction performance.

Warning: The traction grade assigned to this tire is based on braking (straight ahead) traction tests and does not include cornering (turning) traction.

■ Temperature A, B, C

The temperature grades are A (the highest), B, and C, representing the tire’s resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel.

Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure.

Grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109.

Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.

Warning: The temperature grades of a tire assume that it is properly inflated and not overloaded.

Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure.
### Glossary of tire terminology

<table>
<thead>
<tr>
<th>Tire related term</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cold tire inflation pressure</td>
<td>Tire pressure when the vehicle has been parked for three hours or more, or has not been driven more than 1 mile or 1.5 km under that condition</td>
</tr>
<tr>
<td>Maximum inflation pressure</td>
<td>The maximum cold inflated pressure to which a tire may be inflated, shown on the sidewall of the tire</td>
</tr>
<tr>
<td>Recommended inflation pressure</td>
<td>Cold tire inflation pressure recommended by a manufacturer</td>
</tr>
<tr>
<td>Accessory weight</td>
<td>The combined weight (in excess of those standard items which may be replaced) of automatic transmission, power steering, power brakes, power windows, power seats, radio and heater, to the extent that these items are available as factory-installed equipment (whether installed or not)</td>
</tr>
<tr>
<td>Curb weight</td>
<td>The weight of a motor vehicle with standard equipment, including the maximum capacity of fuel, oil and coolant, and if so equipped, air conditioning and additional weight optional engine</td>
</tr>
</tbody>
</table>
### Tire related terms and meanings

<table>
<thead>
<tr>
<th>Tire related term</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum loaded vehicle weight</td>
<td>The sum of: (a) Curb weight (b) Accessory weight (c) Vehicle capacity weight (d) Production options weight</td>
</tr>
<tr>
<td>Normal occupant weight</td>
<td>150 lb. (68 kg) times the number of occupants specified in the second column of Table 1* that follows</td>
</tr>
<tr>
<td>Occupant distribution</td>
<td>Distribution of occupants in a vehicle as specified in the third column of Table 1* below</td>
</tr>
<tr>
<td>Production options weight</td>
<td>The combined weight of installed regular production options weighing over 5 lb. (2.3 kg) in excess of the standard items which they replace, not previously considered in curb weight or accessory weight, including heavy duty brakes, ride levelers, roof rack, heavy duty 12-volt battery, and special trim</td>
</tr>
<tr>
<td>Rim</td>
<td>A metal support for a tire or a tire and tube assembly upon which the tire beads are seated</td>
</tr>
<tr>
<td>Rim diameter (Wheel diameter)</td>
<td>Nominal diameter of the bead seat</td>
</tr>
<tr>
<td>Rim size designation</td>
<td>Rim diameter and width</td>
</tr>
</tbody>
</table>
### 6-1. Specifications

<table>
<thead>
<tr>
<th>Tire related term</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rim type designation</td>
<td>The industry manufacturer’s designation for a rim by style or code</td>
</tr>
<tr>
<td>Rim width</td>
<td>Nominal distance between rim flanges</td>
</tr>
<tr>
<td>Vehicle capacity weight</td>
<td>The rated cargo and luggage load plus 150 lb. (68 kg) times the vehicle’s designated seating capacity</td>
</tr>
<tr>
<td>Vehicle maximum load on the tire</td>
<td>The load on an individual tire that is determined by distributing to each axle its share of the maximum loaded vehicle weight, and dividing by two</td>
</tr>
<tr>
<td>Vehicle normal load on the tire</td>
<td>The load on an individual tire that is determined by distributing to each axle its share of curb weight, accessory weight, and normal occupant weight (distributed in accordance with Table 1* below), and dividing by two</td>
</tr>
<tr>
<td>Weather side</td>
<td>The surface area of the rim not covered by the inflated tire</td>
</tr>
<tr>
<td>Bead</td>
<td>The part of the tire that is made of steel wires, wrapped or reinforced by ply cords and that is shaped to fit the rim</td>
</tr>
<tr>
<td>Bead separation</td>
<td>A breakdown of the bond between components in the bead</td>
</tr>
</tbody>
</table>
### Vehicle specifications

<table>
<thead>
<tr>
<th>Tire related term</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bias ply tire</td>
<td>A pneumatic tire in which the ply cords that extend to the beads are laid at alternate angles substantially less than 90 degrees to the centerline of the tread</td>
</tr>
<tr>
<td>Carcass</td>
<td>The tire structure, except tread and sidewall rubber which, when inflated, bears the load</td>
</tr>
<tr>
<td>Chunking</td>
<td>The breaking away of pieces of the tread or sidewall</td>
</tr>
<tr>
<td>Cord</td>
<td>The strands forming the plies in the tire</td>
</tr>
<tr>
<td>Cord separation</td>
<td>The parting of cords from adjacent rubber compounds</td>
</tr>
<tr>
<td>Cracking</td>
<td>Any parting within the tread, sidewall, or innerliner of the tire extending to cord material</td>
</tr>
<tr>
<td>CT</td>
<td>A pneumatic tire with an inverted flange tire and rim system in which the rim is designed with rim flanges pointed radially inward and the tire is designed to fit on the underside of the rim in a manner that encloses the rim flanges inside the air cavity of the tire</td>
</tr>
<tr>
<td>Extra load tire</td>
<td>A tire designed to operate at higher loads and at higher inflation pressures than the corresponding standard tire</td>
</tr>
<tr>
<td>Groove</td>
<td>The space between two adjacent tread ribs</td>
</tr>
</tbody>
</table>
### 6-1. Specifications

6-2. Customization

Customizable features

Your vehicle includes a variety of electronic features that can be personalized to suit your preferences. Programming these preferences requires specialized equipment and may be performed by your Lexus dealer.

It is also possible to customize certain vehicle features yourself using the “DISP” switch and the navigation system screen.

For instructions on customizing vehicle features using the navigation system screen, refer to the “Navigation System Owner’s Manual”.

Some function settings are changed simultaneously with other functions being customized. Contact your Lexus dealer for further details.

Customizing vehicle features

It is possible to customize certain vehicle features using the “DISP” switch.

When customizing vehicle features, ensure that the vehicle is parked in a safe place with the shift position in P and the parking brake set.

Press the “DISP” switch to display the “SETTINGS” screen while the vehicle is stopped, and then press and hold the “DISP” switch to display the customize mode screen.
6-2. Customization

Vehicles without a navigation system:
Press the “DISP” switch and select the “METER” or “VEHICLE” and press and hold the “DISP” switch.

Press the “DISP” switch and select the item, and then press and hold the “DISP” switch.

Press the “DISP” switch and select the desired setting, and then press and hold the “DISP” switch.

To go back to the previous screen or exit the customize mode, press the “DISP” switch to select the “EXIT”, and then press and hold the “DISP” switch.
Customizable Features

1. Vehicles with a navigation system: Settings that can be changed using the screen of the navigation system
2. Vehicles with a navigation system: Settings that can be changed using the “DISP” switch
3. Vehicles without a navigation system: Settings that can be changed using the “DISP” switch
4. Settings that can be changed by your Lexus dealer

*1: Refer to the “Navigation System Owner’s Manual”.
*2: This function cannot be customized for vehicles sold in Canada.
*3: Interior or exterior illumination can be set separately.
*4: Except when using the cruise control or dynamic radar cruise control.
*5: This function cannot be customized unless power window operation using the wireless remote control is enabled.
*6: If equipped
Vehicle customization

- When "SPEED SENSITIVE AUTO LOCK" and "SHIFT-LINKED AUTOMATIC LOCK" are both on, the door lock operates as follows.
  - When shifting the shift position to any position other than P, all the doors will be locked.
  - If the vehicle is started with all the doors locked, "SPEED SENSITIVE AUTO LOCK" would not operate.
  - If the vehicle is started with any door unlocked, "SPEED SENSITIVE AUTO LOCK" will operate.
- When "ACCESS SYSTEM WITH ELEC. KEY" is off, "SELECT DOORS TO UNLOCK" cannot be customized.
- When the doors remain closed after unlocking the doors and "AUTO. RELOCK TIME ADJUSTMENT" activates, the signals will be generated in accordance with the "LOCK/FEEDBACK VOLUME" and the "LOCK/UNLOCK ANSWER BACK" settings.

In the following situations, customize mode in which the settings can be changed through the "DISP" switch will automatically be turned off.

- A warning message appears after the customize mode screen is displayed.
- The "POWER" switch is turned off.
- The vehicle begins to move while the customize mode screen is displayed.
6-2. Customization

CAUTION

■ Cautions during customization
As the hybrid system needs to be running during customization, ensure that the vehicle is parked in a place with adequate ventilation. In a closed area such as a garage, exhaust gases including harmful carbon monoxide (CO) may collect and enter the vehicle. This may lead to death or a serious health hazard.

NOTICE

■ During customization
To prevent 12-volt battery discharge, ensure that the hybrid system is running while customizing features.
The following items must be initialized for normal system operation after such cases as the 12-volt battery being reconnected, or maintenance being performed on the vehicle.

For owners

Reporting safety defects for U.S. owners .................. 732
Seat belt instructions for Canadian owners
(in French) ........................................ 733
SRS airbag instructions for Canadian owners
(in French) ........................................ 735
If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying the Lexus Division of Toyota Motor Sales, U.S.A., Inc. (Toll-free: 1-800-25-LEXUS).

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or the Lexus Division of Toyota Motor Sales, U.S.A., Inc.

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at 1-888-327-4236 (TTY: 1-800-424-9153); go to http://www.safercar.gov; or write to: Administrator, NHTSA, 1200 New Jersey Ave, S.E., Washington, DC 20590. You can also obtain other information about motor vehicle safety from http://www.safercar.gov.
The following is a French explanation of seat belt instructions extracted from the seat belt section in this manual.

See the seat belt section for more detailed seat belt instructions in English.

Utilisation adéquate des ceintures de sécurité

- Tirez sur la ceinture épaullière jusqu'à ce qu'elle recouvre entièrement l'épaule; elle ne doit cependant pas toucher le cou ni glisser de l'épaule.
- Placez la ceinture abdominale le plus bas possible sur les hanches.
- Réglez la position du dossier. Tenez-vous assis bien au fond du siège, le dos droit.
- Ne virez pas la ceinture de sécurité.
Entretien et soins

- **Ceintures de sécurité**
  Avec un chiffon ou une éponge, nettoyez à l’aide d’un savon doux et de l’eau tiède. Vérifiez aussi les ceintures régulièrement pour vous assurer qu’elles ne présentent pas d’usure excessive, d’effilochage ou de coupures.

**ATTENTION**

- **Dommages et usure de la ceinture de sécurité**
  Vérifiez périodiquement le système de ceintures de sécurité. Assurez-vous qu’il n’y a pas de coupures, d’effilochures ni de pièces desserrées. N’utilisez pas une ceinture de sécurité endommagée avant qu’elle soit remplacée. Les ceintures de sécurité endommagées ne peuvent pas protéger les occupants contre les blessures graves, voire mortelles.
SRS airbag instructions for Canadian owners (in French)

The following is a French explanation of SRS airbag instructions extracted from the seat belt section in this manual.

See the SRS airbag section for more detailed seat belt instructions in English.

Coussins gonflables SRS avant

1. Coussin gonflable SRS du conducteur/Coussin gonflable SRS du passager avant
   Peuvent protéger la tête et la poitrine du conducteur et du passager avant contre les impacts avec des composants intérieurs

7. Coussins gonflables SRS de protection des genoux
   Peuvent protéger le conducteur et le passager avant
Coussins gonflables SRS latéraux et en rideau

- Coussins gonflables SRS latéraux
  Peuvent protéger le torse des occupants des sièges avant

- Coussins gonflables SRS en rideau
  Peuvent aider à protéger principalement la tête des occupants des sièges latéraux
Composants du système de coussins gonflables SRS

1. Coussin gonflable du passager avant
2. Lampes témoins “AIR BAG ON” et “AIR BAG OFF”
3. Coussins gonflables latéraux
4. Coussins gonflables en rideau
5. Système de classification de l’occupant du siège du passager avant (ECU et capteurs)
6. Capteurs des coussins gonflables en rideau
7. Lampe témoin SRS
8. Coussin gonflable du conducteur
9. Capteurs des coussins gonflables latéraux et en rideau
10. Dispositifs de tension et limiteurs de force des ceintures de sécurité
11. Contacteur de boucle de ceinture de sécurité du conducteur
12. Capteur de position de siège du conducteur
13. Coussins gonflables de protection des genoux
14. Contacteur de boucle de ceinture de sécurité du passager avant
15. Capteurs de coussin gonflable avant
16. Module de capteur de coussin gonflable
Votre véhicule est doté de COUSSINS GONFLABLES ÉVOLUÉS dont la conception s’appuie sur les normes de sécurité des véhicules à moteur américains (FMVSS208). Le module de capteur de coussin gonflable (ECU) contrôle le déploiement des coussins gonflables en fonction des informations obtenues des capteurs et d’autres éléments affichés dans le diagramme des composants du système ci-dessus. Ces informations comprennent des données relatives à la gravité de l’impact et aux passagers. Au moment du déploiement des coussins gonflables, une réaction chimique se produit dans les gonfleurs et les coussins gonflables se remplissent rapidement d’un gaz non toxique pour aider à limiter le mouvement des occupants.
ATTENTION

Précautions relatives aux coussins gonflables SRS

Observez les précautions suivantes en ce qui concerne les coussins gonflables SRS. Les négliger pourrait occasionner des blessures graves, voire mortelles.

- Le conducteur et tous les passagers du véhicule doivent porter leur ceinture de sécurité de la manière appropriée. Les coussins gonflables SRS sont des dispositifs supplémentaires qui doivent être utilisés de concert avec les ceintures de sécurité.
- Le coussin gonflable SRS du conducteur se déploie avec une force considérable et peut occasionner des blessures graves, voire mortelles, notamment lorsque le conducteur se trouve très près du coussin gonflable. La National Highway Traffic Safety Administration (NHTSA), aux États-Unis, donne les recommandations suivantes:

La zone à risque d’un coussin gonflable côté conducteur couvre 2 à 3 in. (50 à 75 mm) de la zone de déploiement du coussin gonflable. Pour assurer une marge de sécurité suffisante, restez à 10 in. (250 mm) du coussin gonflable. Cette distance est mesurée depuis le centre du volant jusqu’à votre sternum. Si vous vous tenez à moins de 10 in. (250 mm), vous pouvez changer votre position de conduite de plusieurs manières:

- Reculez votre siège à la position maximale vous permettant d’atteindre encore aisément les pédales.
- Inclinez légèrement le dossier du siège. Même si les véhicules sont conçus différemment, la plupart des conducteurs peuvent maintenir une distance de 10 in. (250 mm), même si le siège se trouve complètement vers l’avant, simplement en inclinant un peu le dossier du siège vers l’arrière. Si la visibilité avant est moindre après avoir incliné le dossier du siège, utilisez un coussin ferme et non glissant pour être assis plus haut ou relevez le siège si cette option est disponible sur votre véhicule.
- Si votre volant est réglable en hauteur, inclinez-le vers le bas. Cela vous permet d’orienter le coussin gonflable vers votre buste plutôt que vers la tête et vers le cou.

Le siège doit être réglé de la manière recommandée ci-dessus par la NHTSA, tout en gardant le contrôle des pédales et du volant, et la vue sur les commandes du bloc d’instrumentation.
ATTENTION

Précautions relatives aux coussins gonflables SRS

- Si la rallonge de ceinture de sécurité a été reliée à la boucle des ceintures de sécurité des sièges avant sans avoir été attachée à la plaque de blocage des ceintures de sécurité, les coussins gonflables SRS avant considéreront que le conducteur et le passager avant portent tout de même leur ceinture même si elles ne sont pas attachées. Les coussins gonflables SRS avant peuvent alors ne pas s'activer correctement lors d'une collision, ce qui représente un risque de blessures graves, voire mortelles. Bouclez toujours votre ceinture de sécurité lorsque vous utilisez la rallonge.

- Le coussin gonflable SRS du passager avant se déploie également avec une force considérable et peut occasionner des blessures graves, voire mortelles, notamment lorsque le passager avant se trouve très près du coussin gonflable. Le siège du passager avant doit se trouver le plus loin possible du coussin gonflable et le dossier doit être réglé de manière à ce que le passager avant soit assis bien droit.

- Le déploiement d’un coussin gonflable risque d’infliger des blessures graves, voire mortelles, aux bébés et aux enfants mal assis ou mal attachés. Un bébé ou un enfant trop petit pour utiliser une ceinture de sécurité doit être correctement retenu à l’aide d’un dispositif de retenue pour enfants. Lexus recommande vivement de placer et d’attacher correctement tous les bébés et tous les enfants sur les sièges arrière du véhicule à l’aide de dispositifs de retenue adaptés. Les sièges arrière sont plus sécuritaires pour les bébés et les enfants que le siège du passager avant.

- N’installez jamais un dispositif de retenue pour enfants de type dos à la route sur le siège du passager avant, même si la lampe témoin “AIR BAG OFF” est allumée. En cas d’accident, la force et la vitesse de déploiement du coussin gonflable du passager avant sont telles qu’elles pourraient infliger à l’enfant des blessures graves, voire mortelles, si le dispositif de retenue pour enfants du type dos à la route était installé sur le siège du passager avant.
<table>
<thead>
<tr>
<th>ATTENTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Précautions relatives aux coussins gonflables SRS</td>
</tr>
</tbody>
</table>

- Ne vous asseyez pas sur le bord du siège et ne vous appuyez pas sur le tableau de bord.

- Ne laissez pas un enfant se tenir face au coussin gonflable SRS du passager avant ni s’asseoir sur les genoux d’un passager avant.
  Ne laissez pas les occupants du siège avant tenir des objets sur leurs genoux.

- Ne vous appuyez pas sur la portière ou sur le longeron du toit, ni sur les montants avant, latéraux ou arrière.

- Ne laissez personne s’agenouiller face à la portière sur le siège du passager ni sortir la tête ou les mains à l’extérieur du véhicule.
ATTENTION

Précautions relatives aux coussins gonflables SRS

- Ne fixez et n’appuyez rien sur des zones telles que le tableau de bord, le centre du volant ou encore la partie inférieure du bloc d’instrumentation. Ces objets peuvent se transformer en projectiles lorsque les coussins gonflables SRS du conducteur, du passager avant ou de protection des genoux se déPLOYENT.

- Ne fixez rien sur les portières, le pare-brise, les glaces latérales, les montants avant ou arrière, le longeron du toit et la poignée de maintien.

- N’accrochez pas de cintres ni d’autres objets rigides sur les crochets porte-vêtements. Tous ces objets pourraient se transformer en projectiles et vous occasionner des blessures graves, voire mortelles, en cas de déploiement des coussins gonflables SRS de protection des genoux.

- Si un recouvrement de vinyle est placé sur la zone de déploiement des coussins gonflables SRS de protection des genoux, veillez à le retirer.

- N’utilisez pas d’accessoires recouvrant les parties du siège où les coussins gonflables SRS latéraux se déploient, car ceux-ci pourraient nuire au déploiement de ces coussins. De tels accessoires peuvent empêcher les coussins gonflables latéraux de se déployer correctement, rendre le système inopérant ou provoquer accidentellement le déploiement des coussins gonflables latéraux, occasionnant des blessures graves, voire mortelles.

- Ne frappez pas et n’appliquez pas une pression importante à l’emplacement des composants de coussins gonflables SRS. Vous risquez de provoquer un mauvais fonctionnement des coussins gonflables SRS.
ATTENTION

Précautions relatives aux coussins gonflables SRS

- Ne touchez à aucun composant des coussins gonflables SRS immédiatement après leur déploiement (gonflage), car ils pourraient être chauds.
- Si vous avez de la difficulté à respirer après le déploiement des coussins gonflables SRS, ouvrez une portière ou une glace pour laisser entrer l’air, ou quittez le véhicule si vous pouvez le faire en toute sécurité. Dès que possible, nettoyez tous les résidus afin d’éviter les irritations cutanées.
- Si les emplacements de stockage des coussins gonflables SRS, notamment le tampon de volant et les garnitures des montants avant et arrière, sont endommagés ou fissurés, faites-les remplacer par votre concessionnaire Lexus.

Précautions relatives aux coussins gonflables SRS

- Ne placez aucun objet, par exemple un coussin, sur le siège du passager avant. Un tel objet fausserait les données sur le poids du passager enregistrées par le capteur. Cela pourrait empêcher le déploiement du coussin gonflable SRS du passager avant en cas de collision.
ATTENTION

 Modification et mise au rebut des composants du système de coussins gonflables SRS

Ne mettez pas le véhicule au rebut et n'effectuez aucune des modifications suivantes sans d’abord consulter votre concessionnaire Lexus.
Les coussins gonflables SRS pourraient fonctionner de manière incorrecte ou se déployer (gonfler) accidentellement, ce qui serait susceptible d’occasionner des blessures graves, voire mortelles.

- Installation, retrait, démontage et réparation des coussins gonflables SRS
- Réparations, modifications, retrait ou remplacement du volant, du bloc d' instrumentation, du tableau de bord, des sièges ou du capotonnage des sièges, des montants avant, latéraux ou arrière et des longerons du toit
- Réparations ou modifications de l’aile ou du pare-chocs avant, ou du côté de l'habitacle
- Installation de lames de déneigement, de treuils, etc. sur la calandre avant (barre safari, barre kangourou, etc.)
- Modifications du système de suspension du véhicule
  Installation d’appareils électroniques tels qu’un émetteur-récepteur radio ou un lecteur de CD
- Modifications à votre véhicule pour une personne aux capacités physiques réduites
For vehicles with a navigation system, refer to the “Navigation System Owner’s Manual” for information regarding the equipment listed below.

- Navigation system
- Audio/video system
- Air conditioning
- Rear window and outside rear view mirror defoggers
- Windshield wiper de-icer
- Climate control
- Rear view monitor system
